**Approximate date of commencement of proposed sale to the public:
As soon as practicable after this registration statement becomes effective.**

If any of the securities being registered on this Form are to be offered on a delayed or continuous basis pursuant to Rule 415 under the Securities Act of 1933, please check the following box.

If this Form is filed to register additional securities for an offering pursuant to Rule 462(b) under the Securities Act, please check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

If this Form is a post-effective amendment filed pursuant to Rule 462(c) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

If this Form is a post-effective amendment filed pursuant to Rule 462(d) under the Securities Act, check the following box and list the Securities Act registration statement number of the earlier effective registration statement for the same offering.

Indicate by check mark whether the registrant is an emerging growth company as defined in Rule 405 of the Securities Act of 1933.

Emerging growth company.

If an emerging growth company that prepares its financial statements in accordance with U.S. GAAP, indicate by check mark if the registrant has elected not to use the extended transition period for complying with any new or revised financial accounting standards[†] provided pursuant to Section 7(a)(2)(B) of the Securities Act.

CALCULATION OF REGISTRATION FEE

Title of each class of securities to be registered	Amount of securities to be registered	Proposed maximum offering price per share	Proposed maximum aggregate offering price(1)	Amount of registration fee(2)
Common Shares, par value €0.06 per share	—	—	\$184,000,000.00	\$17,056.80

(1) Estimated solely for the purpose of determining the amount of registration fee in accordance with Rule 457(o) under the Securities Act of 1933, as amended. Includes the offering price of additional shares that the underwriters have the option to purchase.

(2) Calculated pursuant to Rule 457(o) based on an estimate of the proposed maximum aggregate offering price. The registrant previously paid a registration fee of \$9,270 in relation to its filing of its initial Registration Statement on Form F-1 (No.333-260432) on October 22, 2021. The remaining \$7,786.80 has been paid herewith.

The registrant hereby amends this registration statement on such date or dates as may be necessary to delay its effective date until the registrant shall file a further amendment which specifically states that this registration statement shall thereafter become effective in accordance with Section 8(a) of the Securities Act of 1933, as amended, or until the registration statement shall become effective on such date as the U.S. Securities and Exchange Commission, acting pursuant to said Section 8(a), may determine.

[†] The term "new or revised financial accounting standard" refers to any update issued by the Financial Accounting Standards Board to its Accounting Standards Codification after April 5, 2012.

The information in this prospectus is not complete and may be changed. We may not sell these securities until the registration statement filed with the Securities and Exchange Commission is effective. This prospectus is not an offer to sell these securities and we are not soliciting offers to buy these securities in any jurisdiction where the offer or sale is not permitted.

PROSPECTUS (Subject to Completion)
Issued November 8, 2021

10,000,000 Common Shares

This is Sono Group N.V.'s initial public offering of common shares, €0.06 par value per share.

We expect the public offering price to be between \$14.00 and \$16.00 per common share. This is our initial public offering and no public market currently exists for our common shares.

Following this offering, we will have two classes of shares outstanding, common shares and high voting shares. The rights of the holders of common shares and high voting shares are identical, except with respect to voting, conversion and preemptive rights. Each common share is entitled to one vote per share and is not convertible into any other shares. Each high voting share is entitled to 25 votes per share, is convertible at the request by the holder at any time into one common share and carries preemptive rights commensurate to its nominal value. After giving effect to this offering, Laurin Hahn and Jona Christians, two of our founders and management board members, will hold all of the high voting shares. They will hold, in aggregate, approximately 78.16% of the voting power of our outstanding shares following this offering (77.35% if the underwriters exercise their option to purchase additional common shares in full).

We have applied to list our common shares on The Nasdaq Global Market under the symbol "SEV"

We are both an "emerging growth company" and a "foreign private issuer" as defined under the U.S. federal securities laws and, as such, may elect to comply with certain reduced public company reporting requirements for this and future filings. See "Prospectus Summary—Implications of Being an Emerging Growth Company" and "Prospectus Summary—Implications of Being a Foreign Private Issuer."

Investing in our common shares involves risks. See "Risk Factors" beginning on page 21.

PRICE \$ PER COMMON SHARE

	Underwriting Discounts and Commissions ⁽¹⁾	Proceeds to Sono Group N.V.
Offering price to public	\$	\$
Underwriting discounts and commissions ⁽¹⁾	\$	\$
Proceeds to Sono Group N.V.	\$	\$

⁽¹⁾ See "Underwriters" for a description of the compensation payable to the underwriters.

To the extent that the underwriters sell more than 10,000,000 common shares, the underwriters have the option to purchase up to an additional 1,500,000 common shares from us at the initial public offering price, less the underwriting discount, for 30 days after the date of this prospectus.

Neither the Securities and Exchange Commission nor any state securities commission has approved or disapproved of these securities, or determined if this prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The underwriters expect to deliver the common shares to purchasers on _____, 2021.

For investors outside the United States of America ("United States" or "U.S."): Neither we nor the underwriters have done anything that would permit this offering or possession or distribution of this prospectus in any jurisdiction, other than the United States, where action for that purpose is required. Persons outside the United States who come into possession of this prospectus must inform themselves about, and observe any restrictions relating to, the offering of our common shares and the distribution of this prospectus outside the United States.

Neither we nor the underwriters have authorized anyone to provide you with any information or to make any representations other than those contained in this prospectus or in any free writing prospectuses we have prepared, and neither we nor the underwriters take responsibility for, and can provide no assurance as to the reliability of, any other information others may give you. We and the underwriters are not making an offer to sell, or seeking offers to buy, these securities in any jurisdiction where the offer or sale is not permitted. You should not assume that the information contained in this prospectus is accurate as of any date other than its date, regardless of the time of delivery of this prospectus or of any sale of the common shares.

LETTER FROM OUR FOUNDERS

Dear future Shareholders,

Climate change is one of the biggest threats facing the human species and our modern society. The main driver behind the exponential growth of CO₂ (measured in parts per million) in our atmosphere is the burning of fossil fuels. At Sono Motors, we believe that the only way to overcome this challenge is to stop burning these resources. That's why our mission is to accelerate the transition towards sustainable transport by integrating solar on every vehicle.

In order to achieve that, we built our company upon two pillars. The first, building solar electric vehicles (SEVs) and developing our digital services; and the second, selling and licensing our fully integrated solar technology to other manufacturers. We believe that this diversified business model is enabling us to build an ESG-driven, long-term oriented, fast growing company with additionally attractive financial returns.

We, Jona and Laurin, together with Navina, started this company as friends and technology enthusiasts with a big vision from a small garage in Munich, Germany. We developed the first prototype ourselves to fully understand the feasibility of our vision of an SEV for the mass market. Convinced the industry was too slow and real disruption would never come from one of the big players, we took matters into our own hands and started Sono Motors. As of November 5, 2021, more than 16,000 reservations have been made on the Sion, with an average down payment of USD 3,000.

We believe that SEVs will be the next big wave in e-mobility. Combustion engines are the past, electric vehicles are a thing of the present and solar electric vehicles are the future.

Jona and Laurin

ABOUT THIS PROSPECTUS

We have historically conducted our business through Sono Motors GmbH, which became a wholly-owned subsidiary of Sono Group N.V. after a corporate reorganization described as follows: We were incorporated pursuant to the laws of The Netherlands as Sono Motors Finance B.V. on October 23, 2020 as a wholly-owned subsidiary of Sono Motors GmbH. As part of the corporate reorganization that was completed on November 27, 2020, our then-existing shareholders contributed all of their shares in Sono Motors GmbH to Sono Motors Finance B.V. in exchange for newly issued common shares of Sono Motors Finance B.V. In addition, the sole issued and outstanding common share in Sono Motors Finance B.V. at that time, which was held by Sono Motors GmbH, was cancelled (*ingetrokken*). As a result, Sono Motors GmbH became a wholly-owned subsidiary of Sono Motors Finance B.V. and the then-existing shareholders of Sono Motors GmbH became the shareholders of Sono Motors Finance B.V. Also on November 27, 2020, Sono Motors Finance B.V. was converted into a public company with limited liability under Dutch law (*naamloze vennootschap*), and changed its legal name from Sono Motors Finance B.V. to Sono Group N.V. A portion of the newly issued common shares of Sono Group N.V. was also converted into high voting shares in the share capital of Sono Group N.V. Only the common shares of Sono Group N.V. are being offered hereby.

Immediately prior to the pricing of this offering, we will issue additional common shares to all of our existing shareholders, with the effect of a share split. Each of our existing shareholders will receive 0.71 additional common shares per common share or high voting share held by them immediately prior to the pricing of this offering, rounded down to the nearest integer. This will result in an issuance of 25,468,644 common shares to our existing shareholders. These common shares will be issued against no consideration. The nominal value of these common shares will be charged against our reserves.

Unless otherwise indicated or the context otherwise requires, all references in this prospectus to “Sono Motors,” the “Company,” “we,” “our,” “ours,” “ourselves,” “us” or similar terms refer to (i) Sono Motors GmbH, together with its subsidiary Sono Motors Finance B.V. at that time, prior to the further implementation of the aforementioned corporate reorganization, (ii) Sono Motors Finance B.V. as of the completion of the exchange of all common shares in Sono Motors GmbH for newly issued common shares in Sono Motors Finance B.V. and prior to the conversion of Sono Motors Finance B.V. into Sono Group N.V. and (iii) Sono Group N.V. after the aforementioned corporate reorganization, in which Sono Motors Finance B.V. was converted into Sono Group N.V.

Sono Group N.V. is incorporated in The Netherlands, and a majority of its outstanding securities is owned by non-U.S. residents. Under the rules of the U.S. Securities and Exchange Commission, or the SEC, Sono Group N.V. is currently eligible for treatment as a “foreign private issuer.” As a foreign private issuer, we will not be required to file periodic reports and consolidated financial statements with the SEC as frequently or as promptly as domestic registrants whose securities are registered under the Securities Exchange Act of 1934, as amended, or the Exchange Act.

The terms “dollar,” “USD” or “\$” refer to U.S. dollars, and the terms “€” or “euro” refer to the currency introduced at the start of the third stage of European economic and monetary union pursuant to the treaty establishing the European Community, as amended.

PRESENTATION OF FINANCIAL AND OTHER INFORMATION

Unless otherwise indicated, the consolidated financial statements and related notes included in this prospectus have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”), which differ in certain significant respects from U.S. generally accepted accounting principles (“U.S. GAAP”). Accordingly, our results of operations and financial condition derived from our IFRS consolidated financial statements that are included in this prospectus may differ substantially from the results of operations and financial condition derived from consolidated financial statements prepared in accordance with U.S. GAAP. We have not prepared a reconciliation of our financial information to U.S. GAAP or a summary of significant accounting differences in the accounting and valuation methods of IFRS and U.S. GAAP nor have we otherwise reviewed the impact the application of U.S. GAAP would have on our financial reporting. Financial information in

thousands or millions, and percentage figures in this prospectus, have been rounded. Rounded total and sub-total figures in tables in this prospectus may differ marginally from unrounded figures indicated elsewhere in this prospectus or in the consolidated financial statements. Moreover, rounded individual figures and percentages may not produce the exact arithmetic totals and sub-totals indicated elsewhere in this prospectus.

MARKET AND INDUSTRY DATA

We obtained the industry, market and competitive position data in this prospectus from our own internal estimates, surveys, and research as well as from publicly available information, industry and general publications and research, surveys and studies conducted by third parties, including, but not limited to, BloombergNEF, the International Energy Agency, or IEA, and the German Federal Ministry for Economic Affairs and Energy (*Bundesministerium für Wirtschaft und Energie*).

Industry publications, research, surveys, studies and forecasts generally state that the information they contain has been obtained from sources believed to be reliable, but that the accuracy and completeness of such information is not guaranteed. Forecasts and other forward-looking information obtained from these sources are subject to the same qualifications and uncertainties as the other forward-looking statements in this prospectus. These forecasts and forward-looking information are subject to uncertainty and risk due to a variety of factors, including those described under “*Risk Factors*.” These and other factors could cause results to differ materially from those expressed in our forecasts or estimates or those of independent third parties.

TRADEMARKS, SERVICE MARKS AND TRADE NAMES

We have proprietary rights to trademarks used in this prospectus that are important to our business, many of which are registered under applicable intellectual property laws. Solely for convenience, the trademarks, service marks, logos and trade names referred to in this prospectus are without the ® and ™ symbols, but such references are not intended to indicate, in any way, that we will not assert, to the fullest extent under applicable law, our rights or the rights of the applicable licensors to these trademarks, service marks and trade names.

This prospectus contains additional trademarks, service marks and trade names of others, which are the property of their respective owners. All trademarks, service marks and trade names appearing in this prospectus are, to our knowledge, the property of their respective owners. We do not intend our use or display of other companies’ trademarks, service marks, copyrights or trade names to imply a relationship with, or endorsement or sponsorship of us by, any other companies.

PROSPECTUS SUMMARY

PROSPECTUS SUMMARY

This summary highlights information contained in more detail elsewhere in this prospectus. This summary may not contain all the information that may be important to you, and we urge you to read this entire prospectus carefully, including the “Risk Factors”, “Business” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” sections and our historical consolidated financial statements, including the notes thereto, included elsewhere in this prospectus, before deciding to invest in our common shares.

Sono Motors

Our Mission: Solar on Every Vehicle

We envision a world without burning fossil fuels. Our mission is: “Solar on Every Vehicle.” Our business was founded on a shared passion for finding a solution to climate-friendly, innovative and yet affordable mobility. The goal was to develop a solar powered, family-sized car for the mass market. To realize this goal, our founders assembled an experienced team of engineers, designers, technicians, and industry experts who spent years developing solar technology suited for mobility applications. We developed and tested several prototypes to advance and refine our technology and enlisted driver feedback to create a design that would be simultaneously functional, convenient to operate, environmentally sustainable, and affordable.

From this process the Sion and our proprietary solar technology were born. The Sion is a solar electric vehicle, designed with a view to be accessible to everyday consumers and to be shared. Our technology allows us to integrate solar panels into the Sion’s bodywork to capture energy from the sun and store it in the Sion’s on-board battery. We believe the Sion unlocks the potential of solar energy in a car and advances our goal of providing a net-zero-emission vehicle solution for the mass market. We seek to license and sell our proprietary solar technology to a wide array of customers such as manufacturers of buses, trucks, camper vans, trains and even boats, in order to accelerate the transition towards sustainable transport and in order to have a second independent revenue stream.

Overview

We believe we are a pioneer and technological leader in the field of solar-powered electric mobility. We are in the process of developing and commercializing a disruptive solar technology that would allow every vehicle to benefit from solar power. We intend to use our technology to create our solar and battery powered vehicle that we call the Sion. In parallel, we are in the process of starting to license and sell our proprietary solar technology to other manufacturers for different use cases, such as buses, trucks, camper vans, trains and even boats, in order to accelerate the transition towards sustainable transportation. We intend to generate revenues from the sale of our vehicles and, in the first production cycle, from emission certificate pooling as well as from the monetization of our proprietary solar technology.

Our disruptive solar technology allows for full solar integration. In the process of developing the Sion, we soon realized that the available solar technology was not well-suited for mobility applications. Traditional solar technology relies on glass to cover the solar cells. Glass is, however, heavy, not sufficiently flexible, expensive and dangerous in crash situations. Our polymer technology solves these issues. It is lightweight, allows for flexible surface integration via our patented injection molding process, is affordable due to fast and lean production and avoids/eliminates the risk of bodily harm caused by broken glass. We have also developed other critical components for the use of solar technology in mobility applications. We have, through our maximum power point tracker central unit, or MCU, solved the issue that solar cells will be mounted on different parts of the exterior, which will lead to uneven exposure to sunlight. Our technology allows for the seamless integration of solar cells into the body of a car, such as the Sion, and the charging of its battery through the power of the sun. However, solar technology is much more versatile, and its use cases extend far beyond passenger cars, allowing for grid-independent charging and a reduction of running costs or total costs of ownership in transport related use cases, such as trucks, buses, recreational vehicles or boats. We have started to market our technology to other mobility or transport manufacturers. We have received indications of interest and first purchase orders and shipped pre-production samples to customers. Other manufacturers may also benefit from our technology. They may use our technology to retrofit existing vehicles, to extend the range of battery electric vehicles, or BEVs, for new production vehicles or to comply with emission regulations. The transport and logistics industries in particular are very focused on total cost of ownership, where our solar integration can reduce running cost significantly. We have several

patents granted or within the filing-process protecting our proprietary technology. Additionally, we have up to four years of advanced development ahead of who we believe to be our relevant competitors thanks to the patents, the testing of a large number of different polymer materials and the several relevant components for full solar integration, such as power electronics, especially the MCU.

Our technology will be one of the distinctive features of the Sion. It will have the ability to recharge itself using solar energy panels installed on the exterior that leverage our polymer-based solar technology. We expect that solar power will reduce the number of charging intervals and, depending on the vehicle's usage profile, may even eliminate the need for battery charging, positioning us to benefit from a significant competitive advantage over conventional electric vehicles. The Sion's polymer exterior significantly reduces the need for expensive metal-stamping tools and machinery costs, and the integration of solar modules into the bodywork eliminates the need for a costly paint shop, which helps us to accept reservations for the Sion locking in a comparatively low net entry price of currently €23.9 thousand. Consistent with our mission to lower CO₂ emissions, each Sion will be outfitted with technology that can connect to our car- and ride-sharing networks through our proprietary hardware and software solutions. We expect that the Sion will be convenient to operate and comparatively affordable providing it with the potential to disrupt the market.

To make the Sion affordable for the mass market without compromising security or quality, we do things differently and, we believe, much more efficiently and sustainably than traditional car manufacturers or other pure EV manufacturers. We rely on a one-variant-only vehicle, third party production and business-to-consumer direct distribution, which we believe will enable us to maintain relatively low overhead costs, significantly reduce our capital expenditures, and position us to become a price-value leader compared to competitors' offerings in the relevant car segments. We envision the Sion as a one-variant-only model. All Sions will have the same exterior color and vehicle features, and will rely on existing off-the-shelf component parts from established automotive suppliers, such as Vitesco Technologies German GmbH (a former subsidiary of Continental AG), Hella GmbH & Co. KGaA, FinDreams Industry Co., Ltd. and Casco Schoeller GmbH, resulting in economies of scale through the partial elimination of development costs, reduced purchasing and manufacturing complexity, reduced logistical challenges and inventory costs, and lower risks associated with quality control and testing, all of which should facilitate more rapid growth of our operations and positions us to offer the Sion. The production of the Sion is currently expected to be outsourced to a contract manufacturer at the former Saab Automobile AB ("SAAB") plant in Trollhättan, Sweden. Our goal is to offset 100% of the CO₂ emissions generated by the production of the Sion and our future vehicle models, with a view to achieving full CO₂ neutrality during the production cycle. Rather than relying on dealerships to sell the Sion, we intend to rely on what we consider to be an innovative and effective way to sell directly to customers through our online platform. Customers can view the Sion, book a test drive and engage and place orders directly with us. As of November 5, 2021, we had more than 16,000 reservations with advance payments resulting in total net cash inflows of €40.8 million from our customers, up from total net cash inflows of €37.9 million as of June 30, 2021. These reservations correspond to a net sales volume of approximately €340 million. However, our customers may cancel their reservations without penalty according to our general terms and conditions, if no binding purchase agreement has been concluded by an agreed deadline, which varies. Some reservations are already cancellable as of the date of this prospectus. We intend to begin delivering cars in the first half of 2023 and thereby fulfill customer reservations.

With respect to our solar technology licensing, we have shipped first pre-production samples to customers. With respect to the Sion, we are still in the pre-production phase and presented the second fully functional prototype generation in January 2021. The funding that we expect to obtain from this offering will not be sufficient to secure our needs through the start of production of the Sion. Assuming that we are able to raise the amounts we still need following this offering, we currently plan to commence commercial production of the Sion in the first half of 2023. For the six months ended June 30, 2021, we had a loss for the period of €25.7 million, compared to a loss for the period of €9.8 million in the six months ended June 30, 2020. Our loss for the period for the year ended December 31, 2020 was a loss of €56.0 million. We have incurred net losses since our inception in March 2016, resulting in an accumulated deficit of €108.8 million as of June 30, 2021. We believe that we will continue to incur losses and depend on external financing in the foreseeable future at least until we commence material deliveries of the Sion and the time when we significantly scale our operations, including the monetization of our solar technology.

Our Market Opportunity

We believe that more needs to be done to slow down global warming and that new technologies are needed to reduce CO2 emissions.

Our Market Opportunity Related to Our Solar Technology

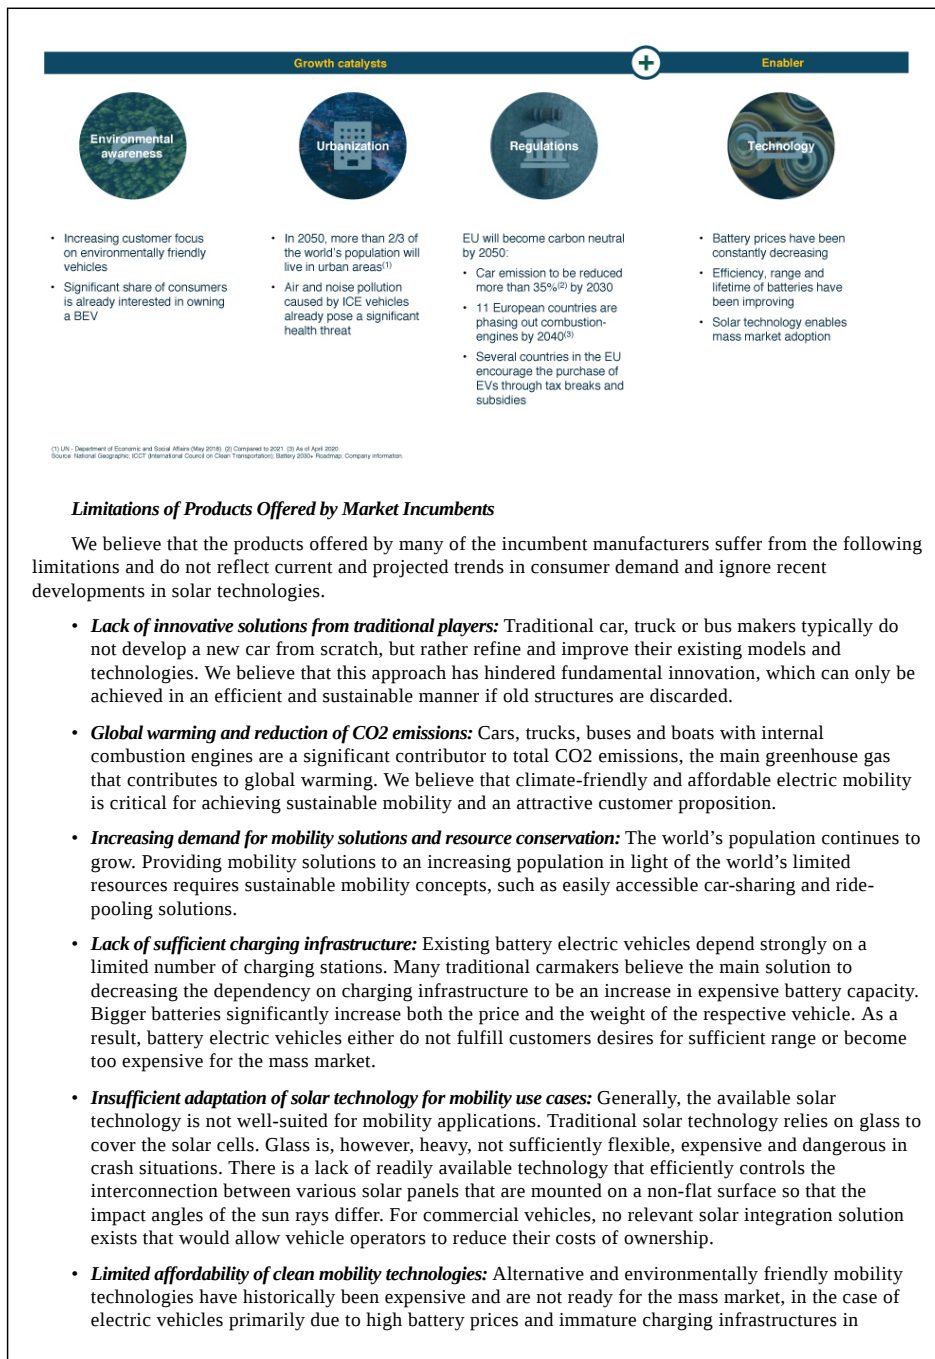

For the solar application market, we believe solar integration will be the logical next step for every pure electric vehicle. The recent decline in solar production prices as well as the increase in efficiency of solar cells finally enable solar integration to have a meaningful impact on ranges and autonomy of electric vehicles. Additionally, the steep increase in electric vehicle sales and the relatively slower increase in charging stations will create a bottleneck for the adoption of electric vehicles on a larger scale. We believe that even within the next few years, people living in apartments without private access to charging will be reluctant to buy electric vehicles due to uncertainty they will be able to find relevant charging options. This will put even more focus on electric vehicles with solar integration. We estimate that more than half of the vehicles sold in 2030 are suitable for solar retrofitting, including about a third that is suitable for solar integration. We believe that this share will rise and that more than two thirds of the vehicles sold in 2040 are suitable for solar integration.

Other users, such as building owners, already see the power of solar integration to reduce energy consumption and, accordingly, total cost of ownership. As more means of transport, including ships, trucks, vans and buses switch to electric engines, the benefit of solar integration will, we believe, become increasingly clear and important to market participants over the coming years.

Our Market Opportunity Related to the Sion

We believe that political and regulatory pressure to reduce CO2 emissions will lead to lower demand for combustion engines and will increase demand for new technologies, such as battery electric vehicles. The global total market share for battery electric cars and plug-in hybrid electric vehicles is expected to increase from 4% in 2020 to 34% to 58% in 2030, according to BloombergNEF. According to the same source, it is conceivable that the market share of battery electric vehicles and plug-in hybrid electric vehicle will increase to 70% to up to 100% by 2040. Several fundamental trends are expected to drive this increase, including increasing awareness concerning environmental matters and sustainable energy, urbanization and more stringent emissions regulations. Technological innovation, such as more efficient ways to produce batteries, longer battery lifetime and breakthroughs in solar technology are expected to enable mass market adoption.

Many governments provide consumer incentives for electric vehicle purchases. In Germany, for example, purchase-price subsidies for new electric vehicles from the German state currently amount to €6,000 per vehicle. Most recently, as of January 1, 2021, European Union, or EU, regulations now impose their most stringent ever CO2 emission limits on all new passenger cars registered in the EU. We believe we are well positioned with the Sion to benefit from these market opportunities as we intend to offer net-zero-emissions solar-powered electric mobility to the mass market at a comparatively affordable price. The following graphic summarized what we believe to be growth catalysts and enablers.

many markets. We want to be the first company to offer an affordable, practical, electric family vehicle with solar-recharge capabilities for the mass market.

Our Solution

We believe we are well positioned to address current market dislocations and to capture demand from consumers who desire a convenient and affordable car ownership experience and from manufacturers who seek access to disruptive solar technology for mobility application. Our solar technology is well-suited to provide benefits to most means of powered transport, especially new electric alternatives..

- **Innovative clean technology solutions:** We believe we are a technological leader in solar-powered electric mobility. We consider ourselves to be the first company to develop a sophisticated concept for the full integration of polymer solar modules in a vehicle exterior. These polymer solar modules eliminate the need for heavy glass in a solar panel and allow for more flexibility. In addition, we have developed various other innovative technological solutions, including solutions for bidirectional charging, car-sharing and ride-pooling. We intend to include these technologies in the Sion, but will also monetize them separately.
- **Suitable for everyday use:** We have designed the Sion as a family vehicle based on an intelligent use-of-space concept. In developing the Sion, we have centered the design around our polymer-based solar technology. Based on our current development targets, the Sion is expected to have an electric battery range based on the worldwide harmonized light vehicles test procedure (WLTP) standard of up to 305 kilometers, or 190 miles. The seamlessly integrated solar modules are expected to provide additional range for free from sunlight and significantly reduce dependency on charging infrastructures, potentially allowing customers to save money on private charging stations or reduce their dependence on public charging infrastructure. We believe the reduction of external charging cycles compared to ordinary battery electric vehicles, together with the Sion's comparatively low entry price, will make the Sion suitable for the mass market and everyday use and an especially attractive option for urban commuters and mid-low income families. All expected battery ranges for the Sion included in this prospectus are based on the WLTP. The WLTP methodology differs from the US EPA's testing methodology, which typically has lower ranges than those determined using the WLTP standard.
- **Affordable for average consumers:** We currently accept reservations for the Sion locking in a comparatively low net entry price of €23.9 thousand. We expect that this price positions us to become the price-value leader in the relevant car segment based on total costs of ownership calculations performed by the German automobile club and by us. We believe that the ownership cost advantage, together with the Sion's lower dependency on public or private charging infrastructures compared to normal battery electric vehicles, will provide the Sion with a competitive edge. Our competitors' electric vehicles that are currently available, and that are expected to be launched in the relevant car segments in the near future, are expected to be significantly more expensive to purchase and operate than the Sion.
- **Heightened independence:** Our technology will allow vehicles to generate power from the sun. This will decrease the dependence on charging infrastructure and the number of charging intervals and, depending on the vehicle's usage profile, may even eliminate the need for battery charging and may allow for the use of batteries with less capacity than in traditional battery electric vehicles.
- **Disruptive solar technology:** Our polymer technology has been developed for car and transport applications. It is lightweight, allows for flexible surface integration via our patented injection molding process, is affordable due to fast and lean production and avoids/eliminates the risk of bodily harm caused by broken glass. We have also developed other critical components for the use of solar technology in mobility applications. We have, through our power electronics, solved the issue that solar cells will be mounted on different parts of the exterior, which will lead to inhomogeneous exposure to sunlight. Our software visualizes the solar yield of the different parts of the Sion.
- **Sustainable and responsible mobility:** The operation of the Sion itself will not emit any CO₂ or other greenhouse gases and will align with our vision of sustainable and responsible electric mobility. We expect that operation of the first generation of Sions (including facelifts), which we currently estimate to be 257,000 vehicles, will save millions of tons of CO₂ compared to the operation of internal

combustion engine cars and taking into account expected car sharing. We currently expect that all production-related greenhouse gas emissions, which cannot be avoided or reduced along our supply chain and during the production process of the Sion will be fully neutralized through relevant offsetting measures.

Our Strengths

We believe the following combination of strengths, capabilities and features of our business model will distinguish us from our competitors and position us to successfully tap into the market for sun-powered mobility solutions.

Proprietary technology aimed at harnessing solar energy: Finding solutions that allow for the efficient use of solar power in mobility applications requires departing from traditional solutions and approaches. Solar cells are typically inflexible and developed for flat surfaces that have the same exposure to sunlight, such as rooftops. Through a multi-year development and testing process, our solar experts and automotive engineers developed a technology that embeds solar cells in polymer instead of glass, making the modules more flexible, lighter, less expensive, and more efficient than any other solar solution available today. As a result, our solar modules can be seamlessly integrated into all major surface areas of the Sion via our patented injection molding process to optimize sunlight capture. Solar-power will allow vehicles, such as the Sion, to operate with less dependency on battery charging infrastructures and a reduced number of loading cycles compared to ordinary battery electric vehicles. Our solar modules will also allow us to replace the traditional metal sheet exterior and eliminate the need for costly paint jobs. The layer of polymer on top of our solar cells provides protection against impact and damage, such as scratches. Patents and know-how will protect our solar technology, making it difficult for potential competitors to provide similar solutions without licensing our technology.

Benefit from position as a technology leader: Based on the experience we have gained from developing and testing our Sion prototypes, we believe that we are well positioned to offer a one-stop-shop solution. We can take care of everything to realize solar integration in vehicles, from product development to the provision of services. We intend to deliver customized solutions, such as large body panels, solar sandwich panels, 3D shaped panels and semi-translucent solar windows, that meet the requirements and needs of potential customers in relation to different types of vehicles. Our on-board charger together with our high efficiency solar modules result in a highly efficient system, delivering outstanding power per square foot ratios.

Positioned to capture untapped affordable electric vehicle market poised for growth: The market for electric vehicles is expected to show strong growth over the next ten or more years. This expected growth will be driven by a number of trends, including expected increasing convergence of production costs for electric cars and cars with internal combustion engines, consumer awareness of environmental concerns and sustainable energy and regulatory incentives aimed at promoting a shift to electric mobility. Within the market for electric vehicles, we believe that solar-powered electric mobility will be the next key trend. We are a solar-based electric mobility innovator with a clear focus on advancing solar technology. We do not have a design legacy that defines our brand, giving us the freedom to design the Sion with a focus on solar cell integration. The Sion's net entry price of currently €23.9 thousand, coupled with its expected electric battery range based on the WLTP standard of up to 305 kilometers, or up to 190 miles, and its solar-charging capability, set the Sion apart from other electric mobility options. As a result, we believe that the Sion has the potential to be the first solar electric vehicle to meet the demands of a mass market.

Pre-orders demonstrate consumer support: We have built what we believe is a vibrant and loyal community of potential customers. Potential customers can participate in online discussions with us and cast votes indicating their preference for certain features on the Sion. The traction we have gained among potential customers is evidenced by a significant number of pre-orders, which we believe provides commercial validation of our model and revenue momentum. As of November 5, 2021, we had received more than 16,000 reservations resulting in total net cash inflows of €40.8 million in advance payments. These reservations correspond to a net sales volume of approximately €340 million. However, our customers may cancel their reservations without penalty according to our general terms and conditions, if no binding purchase agreement has been concluded by an agreed deadline, which varies by customers. Some reservations are already

cancellable as of the date of this prospectus. In addition, we have recorded more than 15,000 pre-orders from business customers, for which no advance payments were made and no contractual agreements were entered into.

Lean, efficient and agile production model contains costs and promotes scalability: Our production model was intentionally structured to align with our goals. We believe in plant sharing, in utilizing off-the-shelf component parts, and in a one-variant-only approach as ways to maintain relatively low overhead costs significantly reduce our capital expenditures, and to become the price-value leader in the Sion's car segment. We intend to maintain an asset-light outsourced production model and plan to produce the Sion in the former SAAB plant in Trollhättan, Sweden, so we will not have to invest in purchasing, operating or maintaining our own manufacturing facilities. We also intend to generate cost savings by producing a single, standardized vehicle model and by sourcing off-the-shelf component parts, such as the electric motor, mirrors, tires and car seats, from established automotive suppliers rather than engineering custom parts ourselves. We believe this approach will allow us to benefit from economies of scale and comparatively low component part prices so that we can pass these savings on to our customers. We estimate that the combination of these initiatives will allow us to realize up to approximately €500 million in aggregate cost and capital expenditure avoidance. We believe our production model will reduce purchasing and manufacturing complexity, logistical challenges and inventory costs, and minimize risks associated with quality control and testing, all of which should facilitate rapid growth of our operations.

Founder-led management team that includes industry experts with a clear growth mission: We are led by our founders, which gives us an outstanding combination of stability and a strong entrepreneurial corporate culture that fosters our common vision of affordable and sustainable electric mobility. Our founders are our major shareholders who drive our focus on long-term success and increasing shareholder value. We have also recruited experienced engineers from internationally renowned companies who possess strong skills in electrical engineering, solar engineering, automotive engineering and software development. Our experienced COO, CFO, CTO, Group Lead Solar and Group Lead Digital complement our high-impact senior team due to their significant expertise in automotive manufacturing, solar technology, and high-growth industries.

Our Growth Strategy

Our growth strategy focuses on two clearly identified building blocks: Monetization of our solar technology and production and sale of solar electric vehicles.

Growth Strategy Related to Our Solar Technology

Monetizing our technological innovations: We see significant potential in our solar technology for a broad range of applications due to its physical flexibility compared to traditional glass solar panels and that enables tailor-made solutions for our clients. We believe that our technology has the potential to disrupt existing markets. We have the knowledge and products to cover the entire value chain for solar integration. We have already received purchase orders or entered into several letters of intent for partnerships, including with manufacturers of trailers, autonomous electric shuttles, trains, trucks, buses and boats that may use our technology in their own products. We may also produce and sell certain selected solar components, such as power electronics, license our patents to third parties or seek to generate service revenue from providing engineering services to third parties. They may use our technology to retrofit existing vehicles, to extend the range of battery electric vehicles, to equip new production vehicles or to comply with emission regulations.

Continuing to invest in technological innovation and intelligent mobility: We have achieved significant technological and design improvements around the integration of solar modules in vehicles while simultaneously reducing manufacturing costs. We intend to continue to invest in technological innovation to further advance our technologies and innovations, as well as the safety, reliability, range capabilities and functionality of our vehicles. We plan to invest in the improvement of existing, and the development of new, technologies. We intend to dedicate significant funding to the engineering, design and development, as well as the tooling, of our solar technology. We also intend to invest in the continuous development of the Sion and future vehicle models.

Growth Strategy related to the Sion

Advancing the development of the Sion: We plan to use the expected proceeds from this offering to fund the next development phase of the Sion. We are currently executing a detailed plan to finish the design

and development of the Sion, including finalizing the engineering of, and component sourcing for, the Sion. Further, we intend to use funding from this offering to building our final generation of pre-series prototypes.

Expanding our product portfolio: We are developing a “one base” vehicle platform with a view to scalability and usability for future models. We intend to use modular systems in the Sion, including the powertrain, chassis, thermal unit and certain electronics. These modular systems can also be used for other car types without any, or only minor, modification. Leveraging this platform and these systems, we intend to roll out multiple new vehicle models across various segments, including a cargo van and a crossover passenger vehicle. We intend to equip all of our new electric vehicles with our solar technology, and all are expected to continue to be carbon neutral.

Increasing our geographic footprint: Our initial market is focused on Germany, other EU member states and selected other European markets. We plan to expand our focus to additional nearby markets. In the long term, we currently intend to expand our operations to other, more remote markets, such as the United States and potentially even China. In order to reduce complexity, we currently plan to have at least some of the vehicles intended for a specific region manufactured by third-party manufacturers in that particular region.

Capturing additional revenue from CO2 pooling: Many developed countries have environmental regulations and incentives that seek to reduce CO2 emissions, providing us with an additional potential revenue source. For example, under EU regulation, any automotive manufacturer who fails to reduce the average emissions of its fleet sold in the EU to a specific CO2 emission per kilometer is subject to penalty payments. A manufacturer can avoid, or reduce, penalty payments, if it pools its emissions with those of manufacturers that exceed emission targets, such as manufacturers of zero or low emission vehicles. The economic benefit is shared between the pooling participations, providing us with an additional source of revenue. We intend to participate in one or more of these pooling arrangements, which we believe will comprise a meaningful percentage of our future revenue and will come at virtually no extra cost to us.

Adapting our sales approach: While we believe that our online approach to sales has the potential to replace the traditional dealership model of the car industry, we may consider supplementing or augmenting this approach by opening pop-up concept showrooms to allow our customers to view, touch and feel, and test-drive our model vehicles on-the-spot. We believe that pop-up concept showrooms may allow us to capture new potential customers who might not otherwise engage with our products. As we expand our product portfolio, we intend to utilize marketing and sales channels that provide us with the broadest possible reach and we intend to continue to be nimble and creative in how we target our customers to achieve maximum penetration in each market that we enter, while keeping our ambition of cost leadership in mind.

Continually improving our environmental performance: The core of our mission is to create sustainable products in a sustainable way. Accordingly, we plan to enhance the efficiency of the Sion’s drive train to increase the range that can be achieved with a single battery charge. In sourcing components and choosing our partners, we seek to continuously improve the CO2 footprint of the components we source and the services we receive. Our goal is to offset 100% of the CO2 emissions generated by the production of the Sion and our future vehicle models, with a view to achieving full CO2 neutrality during the production cycle.

Corporate History, Reorganization and Recent Financing Transactions

Laurin Hahn and Jona Christians started our business in a garage in Munich, Germany in 2012 to further their vision of reinventing mobility through sustainable, responsible and affordable electric mobility. Together with Navina Pernsteiner, who is no longer involved in our management but is still one of our shareholders, the company was incorporated in 2016, pursuant to the laws of the Federal Republic of Germany as Sono Motors GmbH, through which we have historically conducted our business.

Sono Motors GmbH became the wholly-owned subsidiary of Sono Group N.V. upon the conclusion of a corporate reorganization that was completed on November 27, 2020. Through this reorganization, we incorporated Sono Motors Finance B.V. on October 23, 2020, pursuant to the laws of The Netherlands, as a wholly-owned subsidiary of Sono Motors GmbH. As part of the corporate reorganization, our then-existing shareholders contributed all of their shares in Sono Motors GmbH to Sono Motors Finance B.V. in exchange for newly issued common shares of Sono Motors Finance B.V. In addition, the sole issued and outstanding common share in Sono Motors Finance B.V. at that time, which was held by Sono Motors GmbH,

was cancelled (*ingetrokken*). As a result, Sono Motors GmbH became a wholly-owned subsidiary of Sono Motors Finance B.V. and the then-existing shareholders of Sono Motors GmbH became the shareholders of Sono Motors Finance B.V. Also on November 27, 2020, Sono Motors Finance B.V. was converted into a public company with limited liability under Dutch law (*naamloze vennootschap*), and changed its legal name from Sono Motors Finance B.V. to Sono Group N.V. A portion of the newly issued common shares of Sono Group N.V. were also converted into high voting shares in Sono Group N.V. Only the common shares of Sono Group N.V. are being offered hereby. As of the date of this prospectus, Sono Motors GmbH is the only subsidiary of Sono Group N.V. Sono Motors GmbH has no subsidiaries.

On December 10, 2020, Sono Group N.V. increased its share capital by issuing 1,735,197 new common shares against payment of €38.2 million to various new shareholders as part of a private capital raise. On the same date, we also issued to certain new investors mandatory convertible senior notes, governed by German law and having an aggregate nominal value of €6.8 million. The terms and conditions of the mandatory convertible senior notes provide for a mandatory conversion of the notes into newly issued common shares in Sono Group N.V., based on a discount of 25% plus accrued interest for the newly issued shares upon certain triggering events, including an underwritten initial public offering of the common shares of the Company, as is contemplated by this offering. The mandatory convertible senior notes mature on December 10, 2023 unless converted earlier and bear interest of 7% p.a. for the first 18 months and 10% p.a. thereafter. There will be no regular interest payments. Interest will either be reflected in the discount at conversion or be paid at maturity, whatever is earlier.

In the six months ended June 30, 2021, we issued 68,136 new common shares against payment of €1.5 million to one new shareholder and one existing shareholder as part of a private capital raise.

Selected Risks Associated with Our Industry, Business, Operations and Financial Position

Our business is subject to numerous risks, as is more fully described in the section entitled “Risk Factors.” You should read these risks before you invest in our shares. We may be unable, for many reasons, including those that are beyond our control, to implement our business strategy. In particular, risks associated with our business include, but are not limited to, the following:

- our history of significant losses and expected continuing losses for the foreseeable future, which lead to continued reliance on external financing and raise substantial doubt about our ability to continue as a going concern;
- the dependence of our success and future growth upon the market’s willingness to adopt solar electric vehicles;
- developments in vehicle technology that may adversely affect the demand for solar electric vehicles;
- the competitiveness of the automotive market and the risk to fail to be among the first to serve the mass market with an electric vehicle with solar power capability;
- high volatility of demand in the automobile industry;
- our unproven ability to develop vehicles and the risk to fail to finalize development and realize the commercialization of the Sion within the intended timeframe, budget or at all;
- the initial dependence on a single car model, the Sion;
- that our customers may cancel their reservations for the Sion without penalty;
- our intention to deploy technologies and solutions in our vehicles, including our solar module technology, which may not be fully functional or available on our anticipated schedule or at all, and may remain unproven and pose additional risks;
- our dependence on the adequate protection of our intellectual property;
- that our patent applications may not lead to the granting of patents or desired protection in time or at all, which may have a material adverse effect on our ability to prevent others from commercially exploiting products similar to ours;
- obstacles we may face in tapping additional revenue opportunities;

- a delay in the commercial production of the Sion;
- our possible inability to develop manufacturing processes and capabilities within our projected costs and timelines;
- our unproven and still evolving ability to manufacture vehicles of sufficient quality and appeal to customers on schedule and at scale and to commercialize our vehicles;
- our dependence on our contract manufacturer NEVS for production of the Sion;
- our dependence on the development, production, performance and durability of batteries being engineered by a single supplier;
- our intention to outsource logistics management of our operations to third-party logistics (3PL) and potentially fourth-party logistics (4PL) services providers;
- ongoing negotiations of contractual agreements with many of our prospective suppliers and business partners and potential renegotiations of these agreements as we scale our business;
- the involvement of numerous third parties in our process, which adds significant complexity;
- our dependence on the acceptance of our brand and any negative publicity relating to any of our business partners and their products or services, which could have a significant negative impact on our business and reputation;
- the risk that the Sion or any of our future vehicles may fail to perform as expected;
- our significant use of various communication channels for our public relations activities, including our website and social media;
- damage to our reputation due to the perception that our advertisements were overly positive or that we do not live up to our promises;
- noncompliance of our advertisements with all relevant legal requirements in the past or in the future;
- product recalls that could materially adversely affect our business, prospects, operating results and financial condition;
- any unauthorized control or manipulation of our vehicles' systems;
- risks associated with our growth strategy and international operations, including unfavorable regulatory, political, tax and labor conditions, which could harm our business;
- our failure to manage our future growth effectively;
- our inability to attract and retain key employees and hire qualified management, technical and vehicle engineering personnel, which could harm our ability to compete;
- risks related to health epidemics, including the recent COVID-19 pandemic; and
- the need to raise additional funds until the start of the production of the Sion and potentially beyond, which may not be available to us on acceptable terms or at all when we need them.

Recent Events

We intend to outsource the Sion's production to National Electric Vehicle Sweden (NEVS) in Trollhättan, Sweden. NEVS is an automotive engineering and manufacturing company founded in 2012 that inherited some of SAAB's corporate assets. In 2020, NEVS was acquired by a Chinese enterprise, Evergrande New Energy Vehicle Group or Evergrande. Recent events, such as failure to pay interest on outstanding indebtedness on its due date, suggested that Evergrande faces liquidity challenges. These challenges will likely negatively affect NEVS and could lead to a sale of NEVS by Evergrande.

While our base plan, which reflects our current belief about the most likely scenario, remains that the Sion will be manufactured at NEVS, we have explored alternatives should NEVS in its current form no longer be in a position to manufacture the Sion. These alternatives include different options, including the use of available capacities of other European contract manufacturers. With two of these manufacturers, we

have already been in initial exploratory high-level discussions. Another conceivable option would be to rent the production facility in Trollhättan and employ former NEVS employees ourselves.

Changing our manufacturer may lead to an increase in the expected cost for the assembly of the Sion. Given that we expect the assembly cost to account for a single digit percentage of the total variable production costs of a Sion, any cost increase would likely only have a very small impact on our overall cost structure. Depending on the timing, a switch to an alternative manufacturer may potentially delay our targeted start of production by a few months.

Corporate Information

Our principal executive offices are located at Waldmeisterstraße 76, 80935 Munich, Federal Republic of Germany. Our telephone number is +49 (0)89 4520 5818. Our website address is www.sonomotors.com. The information contained on, or that can be accessed through, our website is not incorporated by reference into this prospectus, and you should not consider any information contained on, or that can be accessed through, our website as part of this prospectus or in deciding whether to purchase our common shares. We do business under the commercial name Sono Motors.

Enforcement of Civil Liabilities

We are organized and existing under the laws of The Netherlands, and, as such, under Dutch private international law rules the rights of our shareholders and the civil liability of our management board members, supervisory board members and executive officers are governed in certain respects by the laws of The Netherlands. The ability of our shareholders in certain countries other than The Netherlands to bring an action against us, our management board members, supervisory board members and executive officers may be limited under applicable law. In addition, substantially all of our assets are located outside the United States.

As a result, it may not be possible for shareholders to effect service of process within the United States upon us or our management board members, supervisory board members and executive officers or to enforce judgments against us or them in U.S. courts, including judgments predicated upon the civil liability provisions of the federal securities laws of the United States. In addition, it is not clear whether a Dutch court would impose civil liability on us or any of our management board members, supervisory board members and executive officers in an original action based solely upon the federal securities laws of the United States brought in a court of competent jurisdiction in The Netherlands.

As of the date of this prospectus, the United States and The Netherlands do not have a treaty providing for the reciprocal recognition and enforcement of judgments, other than arbitration awards, in civil and commercial matters. With respect to choice of court agreements in civil or commercial matters, it is noted that the Hague Convention on Choice of Court Agreements entered into force for The Netherlands, but has not entered into force for the United States. Accordingly, a judgment rendered by a court in the United States, whether or not predicated solely upon U.S. securities laws, would not automatically be recognized and enforced by the competent Dutch courts. However, if a person has obtained a judgment rendered by a court in the United States that is enforceable under the laws of the United States and files a claim with the competent Dutch court, the Dutch court will in principle give binding effect to a foreign judgment if (i) the jurisdiction of the foreign court was based on a ground of jurisdiction that is generally acceptable according to international standards, (ii) the judgment by the foreign court was rendered in legal proceedings that comply with the Dutch standards of proper administration of justice including sufficient safeguards (*behoorlijke rechtspleging*), (iii) binding effect of such foreign judgment is not contrary to Dutch public order (*openbare orde*) and (iv) the judgment by the foreign court is not incompatible with a decision rendered between the same parties by a Dutch court, or with a previous decision rendered between the same parties by a foreign court in a dispute that concerns the same subject and is based on the same cause, provided that the previous decision qualifies for recognition in The Netherlands. Even if such a foreign judgement is given binding effect, a claim based thereon may, however, still be rejected if the foreign judgment is not or no longer formally enforceable.

Based on the lack of a treaty as described above, U.S. investors may not be able to enforce against us or our management board members, supervisory board members, representatives or certain experts named

herein who are residents of The Netherlands or countries other than the United States any judgments obtained in U.S. courts in civil and commercial matters, including judgments under the U.S. federal securities laws.

The United States and Germany currently do not have a treaty providing for the reciprocal recognition and enforcement of judgments, in civil and commercial matters. Consequently, a final judgment for payment or declaratory judgments given by a court in the United States, whether or not predicated solely upon U.S. securities laws, would not automatically be recognized or enforceable in Germany. German courts may deny the recognition and enforcement of a judgment rendered by a U.S. court if they consider the U.S. court not to be competent or the decision to be in violation of German public policy principles. For example, judgments awarding punitive damages are generally not enforceable in Germany. A German court may reduce the amount of damages granted by a U.S. court and recognize damages only to the extent that they are necessary to compensate actual losses or damages. See *“Enforcement of Civil Liabilities”* for more detail.

Implications of Being an Emerging Growth Company

We qualify as an “emerging growth company” as defined in the Jumpstart Our Business Startups Act of 2012 (the “JOBS Act”). An emerging growth company may take advantage of specified reduced reporting and is exempt from other burdens that are otherwise generally applicable to public companies. These provisions include:

- the ability to include only two years of audited financial statements and only two years of related Management’s Discussion and Analysis of Financial Condition and Results of Operations disclosure;
- an exemption from the auditor attestation requirement in the assessment of our internal control over financial reporting pursuant to the Sarbanes-Oxley Act of 2002, as amended (the “Sarbanes-Oxley Act”), which would otherwise be applicable beginning with our second annual report following consummation of this offering;
- to the extent that we no longer qualify as a foreign private issuer (1) reduced disclosure obligations regarding executive compensation in our periodic reports and proxy statements and (2) exemptions from the requirements of holding a non-binding advisory vote on executive compensation, including golden parachute compensation; and
- an exemption from compliance with the requirement that the Public Company Accounting Oversight Board has adopted that would otherwise require our independent registered public accounting firm to communicate “critical accounting matters” in its report. A critical accounting matter is any matter arising from the audit of the financial statements that was communicated or required to be communicated to the audit committee and that (1) relates to accounts or disclosures that are material to the financial statements and (2) involved especially challenging, subjective or complex auditor judgment.

We may take advantage of these provisions for up to five years following the completion of this offering or such earlier time that we are no longer an emerging growth company. We would cease to be an emerging growth company if we have more than \$1.07 billion in annual revenue, have more than \$700 million in market capitalization of our shares held by non-affiliates, or issue more than \$1.0 billion of non-convertible debt over a three-year period. We may choose to take advantage of some but not all of these reduced burdens. We have taken advantage of reduced reporting requirements in this prospectus. Accordingly, the information contained herein may be different than the information you receive from other public companies in which you hold equity securities.

Implications of Being a Foreign Private Issuer

Upon consummation of this offering, we will report under the Securities Exchange Act of 1934, as amended (the “Exchange Act”), as a non-U.S. company with foreign private issuer status. Even after we no longer qualify as an emerging growth company, as long as we qualify as a foreign private issuer under the Exchange Act, we will be exempt from certain provisions of the Exchange Act that are applicable to U.S. domestic public companies, including:

- the rules under the Exchange Act requiring domestic filers to issue financial statements prepared under U.S. GAAP;
- the sections of the Exchange Act regulating the solicitation of proxies, consents or authorizations in respect of a security registered under the Exchange Act;
- the sections of the Exchange Act requiring insiders to file public reports of their stock ownership and trading activities and liability for insiders who profit from trades made in a short period of time; and
- the rules under the Exchange Act requiring the filing with the Securities and Exchange Commission (the "SEC") of quarterly reports on Form 10-Q, containing unaudited financial and other specified information, and current reports on Form 8-K, upon the occurrence of specified significant events.

We will file with the SEC, within four months after the end of each fiscal year, or such applicable time as required by the SEC, an annual report on Form 20-F containing consolidated financial statements audited by an independent registered public accounting firm.

We may take advantage of these exemptions until such time as we are no longer a foreign private issuer. We would cease to be a foreign private issuer at such time as more than 50% of our outstanding voting securities are held of record by U.S. residents and any of the following three circumstances applies: (i) the majority of our executive officers or directors are U.S. citizens or residents; (ii) more than 50% of our assets are located in the United States; or (iii) our business is administered principally in the United States. For purposes of determining whether more than 50% of our outstanding voting securities are held by U.S. residents, we intend to look to whether more than 50% of the voting power of our common shares and high voting shares on a combined basis are directly or indirectly held of record by residents of the United States.

Both foreign private issuers and emerging growth companies are also exempt from certain more extensive executive compensation disclosure rules. Thus, even if we no longer qualify as an emerging growth company but remain a foreign private issuer, we will continue to be exempt from the more extensive compensation disclosure requirements for companies that are neither an emerging growth company nor a foreign private issuer and will continue to be permitted to follow our home country practice on such matters.

THE OFFERING	
Issuer	Sono Group N.V.
Common shares offered by us	We are offering 10,000,000 common shares.
Option to purchase additional common shares	We have granted the underwriters the option to purchase up to 1,500,000 additional common shares from us, within 30 days of the date of this prospectus.
Common shares to be outstanding immediately after this offering	69,081,903 common shares (70,581,903 common shares if the underwriters exercise their option to purchase additional common shares within 30 days of the date of this prospectus from us in full).
High voting shares to be outstanding immediately after this offering	3,000,000 high voting shares.
Voting rights	Following this offering, we will have two classes of shares outstanding, common shares and high voting shares. The rights of the holders of common shares and high voting shares are identical, except with respect to voting, conversion and preemptive rights. Each common share is entitled to one vote per share and is not convertible into any other shares. Each high voting share is entitled to 25 votes per share, is convertible at the request by the holder at any time into one common share and carries preemptive rights commensurate to its nominal value. After giving effect to this offering, Laurin Hahn and Jona Christians, two of our founders and management board members, will hold all of the high voting shares. They will hold, in aggregate, approximately 78.16% of the voting power of our outstanding shares following this offering (77.35% if the underwriters exercise their option to purchase additional common shares in full).
Use of proceeds	<p>We estimate that the net proceeds to us from this offering will be approximately \$135.2 million (or \$156.1 million if the underwriters exercise their option to purchase additional common shares from us in full), assuming an initial public offering price of \$15.00 per common share, which is the midpoint of the price range set forth on the cover page of this prospectus, after deducting the underwriting discounts and commissions and estimated expenses of the offering that are payable by us.</p> <p>The principal reasons for this offering are to finance our business, to increase our public profile and awareness, create a public market for our common shares and facilitate our future access to public equity markets. We plan to use the expected proceeds from this offering for the completion of our next prototype generation, the so-called generation III, to position us to secure going concern until May 2023 and to secure or repay the down payments received until October 2021. Any remainder will be used for further investments to reach serial production. The funding that we expect to obtain from this offering will, however, not be sufficient to secure our needs through the start of production of the Sion. See “<i>Use of Proceeds.</i>”</p>
Dividend policy	We have never paid or declared any cash dividends in the past, and we do not anticipate paying any cash dividends in the foreseeable future. We intend to retain all available funds and any future earnings

	<p>to fund the completion of the development of the Sion and the start of its serial production as well as the further development and expansion of our business. Under Dutch law, we may only pay dividends and other distributions from our reserves to the extent our shareholders' equity (<i>eigen vermogen</i>) exceeds the sum of the paid-in and called-up share capital plus the reserves required to be maintained by Dutch law or by our articles of association and (if it concerns a distribution of profits) after adoption of the annual accounts by the general meeting from which it appears that such dividend distribution is allowed. Subject to such restrictions, any future determination to pay dividends or other distributions will be at the discretion of our management board with the approval of our supervisory board and will depend upon a number of factors, including our results of operations, financial condition, future prospects, contractual restrictions, restrictions imposed by applicable law and other factors our management board and supervisory board deem relevant. See "<i>Dividend Policy</i>."</p>
Lock-up agreements	<p>We intend to agree with Berenberg Capital Markets LLC, subject to certain exceptions, not to, directly or indirectly, offer, sell, assign, transfer, pledge contract to sell, or otherwise dispose of any shares of our share capital or securities convertible into or exchangeable or exercisable for any shares of our share capital without the prior written consent of Berenberg Capital Markets LLC, during the 180-day period following the date of this prospectus. Our management board members, all of our existing shareholders and holders of certain mandatory convertible senior notes previously issued by us have agreed to substantially similar lock-up provisions, subject to certain exceptions. The lock-up period under the agreements to be entered into with our existing shareholders and the holders of our mandatory convertible senior notes and with the holders of our common equity raised from December 2020 to June 2021 will, however, only cover the 90-day period following the date of this prospectus. See "<i>Underwriters</i>."</p>
Listing	<p>We have applied to list our common shares on The Nasdaq Global Market, or Nasdaq, under the symbol "SEV."</p>
	<p>Unless otherwise indicated, all information contained in this prospectus assumes or gives effect to:</p> <ul style="list-style-type: none"> • the full conversion of mandatory convertible senior notes into our common shares concurrently with the consummation of this offering; • an initial public offering price of \$15.00 per common share, which is the midpoint of the price range set forth on the cover page of this prospectus; and • no exercise by the underwriters of their option to purchase additional common shares in this offering. <p>Unless otherwise indicated, we have used an exchange rate of \$1.1519 per €1.00, which corresponds to the U.S dollar-euro exchange rate published by the European Central Bank on November 5, 2021.</p>

SUMMARY FINANCIAL AND OPERATING DATA

We present a summary of historical financial data of Sono Group N.V. below. The financial data as of and for the years ended December 31, 2019 and December 31, 2020, has been taken or derived from our consolidated financial statements and the related notes thereto, which are included elsewhere in this prospectus and which have been prepared in accordance with International Financial Reporting Standards (“IFRS”) as issued by the International Accounting Standards Board (“IASB”).

The Summary of historical financial data presented below are not necessarily indicative of the financial results for future periods. The summary of historical financial data below do not contain all the information included in our consolidated financial statements. You should read this information in conjunction with “Management’s Discussion and Analysis of Financial Condition and Results of Operations” and our consolidated financial statements and the related notes thereto, each included elsewhere in this prospectus.

Consolidated Statements of Income (Loss) and Statements of Comprehensive Income (Loss)

	For the year ended December 31,		For the six months ended June 30,	
	2020	2019(1)	2021	2020
	(in € millions)		(in € millions)	
Revenue	—	—	—	—
Cost of sales	—	—	—	—
Gross profit	—	—	—	—
Cost of research and development	(30.5)	(4.9)	(13.5)	(6.4)
Selling and distribution expenses	(9.1)	(2.1)	(1.6)	(1.1)
General and administrative expenses	(14.4)	(2.4)	(8.3)	(1.5)
Other operating income/expenses	(0.0)	0.2	0.4	0.1
Impairment losses on financial assets	(0.0)	—	(0)	(0)
Operating loss	(54.0)	(9.3)	(23.0)	(8.9)
Other interest and similar income	0.0	—	—	0
Interest and other expenses	(2.0)	(0.7)	(2.6)	(0.9)
Loss before tax	(56.0)	(10.0)	(25.6)	(9.8)
Tax on income	—	—	0	0
Deferred taxes on expense	—	—	(0)	—
Loss for the period	(56.0)	(10.0)	(25.7)	(9.8)
Other comprehensive loss	(0)	—	(0.1)	—
Total comprehensive loss for the period	(56.0)	(10.0)	(25.8)	(9.8)
Earnings / (loss) per share in €				
Basic/diluted	(1.66)/(1.66)	(0.30)/(0.30)	(0.79)/(0.79)	(0.29)/(0.29)
Weighted average number of share for calculation of earnings per share				
Basic/diluted	33,733,462	33,251,883	32,367,901	33,588,000
Pro forma earnings (loss) per share in €				
Basic/diluted(2)	(0.97)/(0.97)	(0.18)/(0.18)	(0.46)/(0.46)	(0.17)/(0.17)
Pro forma weighted average number of shares for calculation of earnings per share				
Basic/diluted(2)	57,684,220	56,860,719	55,349,120	57,435,480

- (1) Other interest and similar income, interest and other expenses, loss before tax, loss for the period, total comprehensive loss for the period, (loss) per share in EUR and basic and diluted were restated for 2019 due to a change in accounting policies in accordance with IAS 8 (Accounting policies, changes in accounting estimates and errors) with respect to a reclassification of advance payments received by customers from financial liabilities in accordance with IFRS 9 to contract liabilities in accordance with IFRS 15. Please also refer to Note 4 to the consolidated financial statements included in this prospectus.
- (2) Immediately prior to the pricing of this offering, we will issue additional common shares to all of our existing shareholders, with the effect of a share split. Each of our existing shareholders will receive 0.71 additional common shares per common share or high voting share held by them immediately prior to the pricing of this offering, rounded down to the nearest integer. This will result

in an issuance of 25,468,644 common shares to our existing shareholders. These common shares will be issued against no consideration. The nominal value of these additional common shares will be charged against our reserves. The pro forma per share data and pro forma weighted average number of shares for calculation of earnings per share is adjusted to give effect to this issuance of additional common shares and is approximate due to rounding.

Selected Consolidated Cash Flow Statement Data

	For the year ended December 31,		For the six months ended June 30,	
	2020	2019(1)	2021	2020
	(in € millions)		(in € millions)	
Net cash flows from operating activities	(1.2)	(8.8)	(17.8)	11.9
Net cash flows from investing activities	(0)	(1.1)	(0.5)	(0)
Net cash flows from financing activities	44.1	8.8	1.2	3.1
Net (decrease) increase in cash and cash equivalents	42.9	(1.1)	(17.1)	15.0
Cash and cash equivalents at the beginning of the financial year	0.4	1.5	43.3	0.4
Cash and cash equivalents at end of year	43.3	0.4	26.1	15.4

- (1) Net cash flows from operating activities, net cash flows from investing activities and net cash flows from financing activities were restated for 2019 due to a change in accounting policies in accordance with IAS 8 (Accounting policies, changes in accounting estimates and errors) with respect to a reclassification of advance payments received by customers from financial liabilities in accordance with IFRS 9 to contract liabilities in accordance with IFRS 15. Please also refer to Note 4 to the consolidated financial statements included in this prospectus.

Selected Consolidated Balance Sheets Data

	As of December 31,		As of
	2020	2019(1)	June 30, 2021
	(in € millions)		(in € millions)
Total noncurrent assets	4.1	4.8	4.1
Total current assets	49.2	0.9	34.6
Total assets	53.3	5.7	38.6
Total equity	(5.0)	(18.6)	(28.1)
Total liabilities	58.4	24.3	66.8
Total equity and liabilities	53.3	5.7	38.6

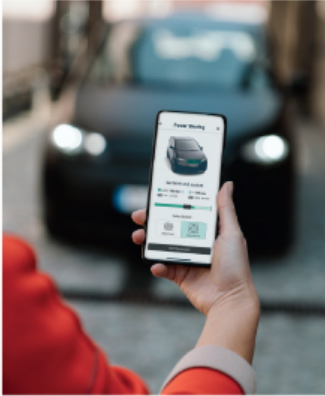

- (1) Total equity and total liabilities were restated for 2019 due to a change in accounting policies in accordance with IAS 8 (Accounting policies, changes in accounting estimates and errors) with respect to a reclassification of advance payments received by customers from financial liabilities in accordance with IFRS 9 to contract liabilities in accordance with IFRS 15. Please also refer to Note 4 to the consolidated financial statements included in this prospectus.

RISK FACTORS

RISK FACTORS

You should carefully consider the risks and uncertainties described below and the other information in this prospectus before making an investment in our common shares. Our business, financial condition or results of operations could be materially and adversely affected if any of these risks occurs, and as a result, the market price of our common shares could decline and you could lose all or part of your investment.

This prospectus also contains forward-looking statements that involve risks and uncertainties. See “Cautionary Statement Regarding Forward-Looking Statements.” Our actual results could differ materially and adversely from those anticipated in these forward-looking statements as a result of certain factors, including the risks facing our company.

Risks Related to Our Industry

Our success and future growth is dependent upon the market’s willingness to adopt solar electric vehicles.

The demand for our vehicles will highly depend upon the demand for and adoption of electric vehicles in general and solar electric vehicles in particular. The market for electric vehicles, particularly solar electric vehicles, is still rapidly evolving, characterized by rapidly changing technologies, price and other competition, evolving government regulation and industry standards, as well as changing or uncertain consumer demands and behaviors. Factors that may influence the adoption of electric vehicles in general, and solar electric vehicles in particular, include:

- perceptions about the effectiveness of solar technology deployed in electric vehicles;
- perceptions about electric vehicle quality, safety, design, performance and cost, especially if adverse events or accidents occur that are linked to the quality or safety of electric vehicles;
- perceptions about vehicle safety in general, including the use of advanced technology, such as vehicle electronics, solar power, storage and regenerative braking systems;
- the range limit over which electric vehicles may be driven on a single battery charge and the speed at which batteries can be recharged;
- technical innovations concerning battery capacity and ability to hold its charge;
- improvements in the fuel economy of internal combustion engines;
- the availability of and service for electric vehicles;
- the degree of environmental consciousness of consumers;
- access to charging stations, standardization of electric vehicle charging systems and consumers’ perceptions about convenience and cost to charge an electric vehicle;
- changes in the relative cost of electricity, oil, gasoline and hydrogen;
- government regulations and economic incentives promoting fuel efficiency and alternate forms of energy;
- the availability of tax and other governmental incentives to purchase and operate electric vehicles or future regulation requiring increased use of nonpolluting vehicles; and
- macroeconomic factors.

While other car manufacturers such as Tesla, Inc., have successfully commercialized pure battery electric vehicles, electric vehicles with a self-recharging component based on solar modules have not yet been introduced into the car market and remain commercially unproven. The Sion, the solar electric vehicle we are currently developing, may therefore not be as well accepted by the market as expected or not accepted at all and may not be able to claim the market position we hope for.

Developments in vehicle technology may adversely affect the demand for solar electric vehicles.

The automotive industry, particularly the e-mobility segment, is strongly technology driven and many established and new car manufacturers have entered or plan to enter the market for alternative fuel vehicles.

We expect competition in our industry to intensify in the future in light of regulatory initiatives and promotion, advancement of and increased demand for alternative fuel technologies and continuing consolidation in the worldwide automotive industry. Significant developments in alternative technologies, such as hydrogen fuel cell technology or advanced diesel, ethanol, or compressed natural gas or improvements in the fuel economy of the internal combustion engine, may materially and adversely affect solar electric vehicles. Other fuels or sources of energy may emerge as customers' preferred alternative to our vehicle platform. Developments in battery technology, such as solid state batteries, may make solar technology superfluous. Any such development could threaten the successful commercialization of solar electric vehicles. Any failure by us to develop new or enhanced technologies or processes, or to react to changes in existing technologies or innovations of competitors, could result in the loss of competitiveness, negatively impact revenue and lead to a loss of market share.

The automotive market is highly competitive and we may not be among the first to serve the mass market with an electric vehicle with solar power capability.

The automotive market in general, and the automotive mass market in particular, are highly competitive and we are not the only company seeking to develop and offer a solar powered car. We believe that our solar module technology provides a competitive advantage and could, together with other factors, place us among the first to provide an electric vehicle (partly) powered by solar energy at a comparably low entry-price. However, numerous competitors strive to offer e-mobility affordable to the masses and several other market players are currently experimenting with solar charging technology, including manufacturers with established brands and significantly greater financial resources than us such as Tesla, Toyota and Lightyear. Some of our competitors benefit from greater financial resources, more extensive development, manufacturing, marketing and service capabilities, own manufacturing assets, greater brand recognition and a larger number of managerial and technical personnel. If competitors' vehicles are brought to market at an affordable price or other material competitive (technological) advantage, we may experience a significant reduction in potential market share and reduction in expected revenue streams, which could impact our ability to successfully market the Sion or other models. Products from our competitors, particularly from low-cost electric car manufacturers, may successfully compete with or surpass the performance of our vehicles at more competitive prices.

We expect competition in our industry to intensify in the future, particularly in light of increased demand for alternative fuel and a regulatory push for electric vehicles (e.g., CO2 target emission regulations and tax or other monetary incentives), as well as declining battery prices. Continuing globalization may lead to additional potential competitors in emerging economies. Factors affecting competition include manufacturing efficiency, vehicle price, product quality, performance and features, design and styling, innovation and development time, reliability, safety, energy economy, charging options, customer service and financing terms. Increased competition may lead to lower vehicle unit sales and increased inventory, which may result in price pressure. We cannot guarantee that we will be able to successfully compete in our markets or that competitors will not build affordable electric vehicles with solar power technology or other competitive advantages before us. If the Sion is not among the first to market, this could significantly impact our ability to successfully launch the Sion and establish the Sono brand. Even if the Sion is among the first to market, we cannot assure that customers will choose our vehicles over those of our competitors, or over traditional battery electric vehicles or fossil fuel powered vehicles.

Demand in the automobile industry is highly volatile.

The markets in which we plan to compete have been subject to considerable volatility in demand. Demand for automobile sales depends to a large extent on general, economic, political and social conditions in a given market and the introduction of new vehicles and technologies. Difficult macroeconomic conditions, such as decreases in per capita income and level of disposable income, increased and prolonged unemployment or a decline in consumer confidence as a result of the COVID-19 pandemic, as well as spending reductions by businesses, could have a material adverse effect on demand for our vehicles. As a new automobile manufacturer, we have significantly less financial resources than more established automobile manufacturers to withstand changes in the market and disruptions in demand or to maintain operations as we seek to reach establishment of our brands and significant sales.

Demand for electric vehicles may also be affected by factors directly impacting automobile prices or the cost of purchasing and operating automobiles such as sales and financing incentives, prices of raw materials, parts and components, cost of fuel and governmental regulations, including tariffs, import regulation and other taxes. Volatility in demand may lead to lower vehicle unit sales and increased inventory, which may result in downward price pressure and adversely affect our business, prospects, financial condition and results of operation.

Risks Related to Our Business and Operations

We are an early stage company with a history of significant losses and expect continuing losses for the foreseeable future, which lead to continued reliance on significant external financing and raise substantial doubt about our ability to continue as a going concern.

We are in the process of developing a solar electric vehicle, the Sion. We are still in the pre-production phase of our vehicles and preparing for commercial production. We do not generate any revenue from our operations and will likely not do so until the commercial serial production of our vehicles, which we currently plan to commence in the first half of 2023, or, to a certain extent, the monetization of our solar technology. We have no relevant revenues. Our result for the six months ended June 30, 2021 was a loss for the period of €25.7 million, up from a loss for the period of €9.8 million in the six months ended June 30, 2020. Our loss for the period for the year ended December 31, 2020 was a loss of €56.0 million. We have incurred net losses since our inception in March 2016, resulting in an accumulated deficit of €108.8 million as of June 30, 2021. We will incur significant expenses as we conduct research, expand and refine our technology, continue our development of the Sion and seek street certification. We will also incur expenses related to preparations for the commercialization of the Sion, increasing our sales and marketing activities with the goal of building our brand, and adding infrastructure and personnel to support our growth. In addition, we currently incur various expenses from, for example, general administrative functions and our headquarters and expect that these expenses will increase following the offering, including as a result of costs relating to being a public company. We will not be able to cover our expenses with revenues at least until such time at which we begin material deliveries of the Sion and significantly increase the scale of our operations. Furthermore, we expect to incur additional substantial expenses in the foreseeable future as we intend to expand our business and product portfolio and invest in the design and development of new car models. These activities, which we consider vital to the development of our business, may result in prolonged losses. There is no guarantee that we will reach meaningful revenue levels or profitability or even that we will be able to continue as a going concern. Our ability to reach profitability in the future will not only depend on our ability to complete the development of and successfully commercialize the Sion but also on our ability to control our expenses and capital expenditures and manage our costs efficiently. If we are unable to achieve profitability, we may have to reduce the planned scale of our operations, which may impact our business growth and adversely affect our financial condition and results of operations. In addition, our continuous operation and our ability to continue as a going concern depend on our capability to obtain sufficient external equity or debt financing. If we do not succeed in doing so, we may need to curtail our operations, which could adversely affect our business, results of operations, financial position and cash flows.

We expect to continue to generate operating losses for the foreseeable future until the start of production of the Sion and possibly later. While we seek to increase monetization of our technology, we do not anticipate that we will generate commercial revenue or positive operating cash flows from vehicle sales of the Sion until the start of production or later. Management anticipates in its current plan that the Sion will generate high one-digits gross margins in the mid-term after start of production (SOP). In addition, management expects revenues from emission certificate pooling under relevant EU regulations on CO₂ target emissions (“CO₂ pooling”) and from the monetization of their solar technology and other expected revenues from after-sales and the sharing business.

Our ability to continue as a going concern is largely dependent on our ability to raise additional funds through debt or equity transactions, additional advance payments, or other means, and ultimately, to achieve serial production of the Sion. It is uncertain if sufficient financing can be obtained to continue as a going concern and further to achieve serial production of the Sion. Our forecast cash required to fund operations, excluding future financing efforts, indicates that we do not have sufficient funds to support operations through the twelve-month period from the date of issuance of the condensed consolidated interim financial statements included in this prospectus. Accordingly, there is substantial doubt about our ability to continue

as a going concern within twelve-months from the date of issuance of these financial statements. Based on the cash position as of August 31, 2021 and our business plan, excluding any targeted proceeds from an initial public offering, as of August 31, 2021, the Group would become insolvent by December 2021 or shortly thereafter if no additional financing can be raised. See Note 3.1 to the unaudited condensed consolidated interim financial statements included in this prospectus for further discussion on our ability to continue as a going concern.

There is no historical basis for reliably assessing the demand for our vehicles, our ability to develop, manufacture, and deliver the Sion or any other car model that we may roll out in the future, and our future profitability. There can be no assurance that the Sion, or any other model that we may roll out in the future, will be commercially successful or that we will be able to scale our operations. We have no reliable basis for the prediction of our future revenues and to appropriately budget for our expenses, and we may have limited insight into future trends that may emerge and affect our business. The estimated costs and timelines that we have developed to reach commercial production of our vehicles are subject to inherent risks and uncertainties involved in the transition from a start-up company focused on development activities to the commercial-scale manufacture and sale of vehicles in a mature industry. You should consider our business and prospects in light of the risks and challenges we face as a new entrant into our industry, including, but not limited to:

- our ability to successfully launch the commercial production and sales of the Sion and to continuously advance our current and develop new technologies;
- develop and manufacture safe, reliable and quality vehicles that appeal to customers, the challenges relating to the delivery and servicing of a large volume of vehicles;
- raise funding and required to develop our business and reach commercial operation;
- our ability to turn profitable and build a well-recognized and respected brand cost-effectively;
- the ability to expand our vehicle line-up and navigate the evolving regulatory environment;
- improve and maintain our operational efficiency, set up and manage our supply chain efficiently and adapt to changing market conditions, including technological developments and changes in our competitive landscape; and
- find the necessary qualified personnel, build up and scale functioning structures within our company as well as manage our growth effectively.

Our ability to develop vehicles is unproven and we may fail to finalize development and realize the commercialization of the Sion within the intended timeframe, budget or at all.

Our success will depend in large part on our ability to execute our plans to develop and produce the Sion. The successful development of the Sion is and will be subject to various risks and it will be difficult for us to develop other car models. We will need to implement technology that ensures that solar modules placed in different locations of the body work well together. Our vehicles will incorporate various other complex components, which requires substantial engineering and development efforts. There is no guarantee that our efforts will be successful and that we will be able to realize all advertised specifications of the Sion such as, for example, the advertised battery range or daily solar based range of our vehicles. We will have to finalize development of the electric powertrain and its components, which will be crucial for the range capacities of our vehicles. We have to secure the supply of necessary components on acceptable terms. We will also need to engage in substantive testing collision and safety activities, which we have not yet started. The Sion will need to pass relevant safety standards and will need to meet stringent and constantly evolving safety and road certification requirements, potentially in various jurisdictions, and there is no guarantee that our vehicles will receive the required street certification from relevant authorities. In addition, we will have to engage in significant testing activities to ensure that the Sion meets customers' expectations, including with respect to performance and durability. Given the complexities involved in developing and testing a solar electric vehicle for the mass market, there is no guarantee that we will be able to finalize the development of the Sion within the given timeframe or budget. Vehicle manufacturers often experience delays in the release of new products and any further delay in the financing, development or regulatory approval

of our vehicles could materially damage our brand, business, prospects, financial condition, results of operations, and cash flows, and could material liquidity constraints.

We may even conclude that finalization of the development is not feasible and that we have to abandon the project, due to, for example, a change in the regulatory framework, lack of feasibility, lack of supplier capacity or availability, lack of customer demand or our inability to secure sufficient capital. In such a case, we may not be able to amortize any investments made until the relevant point in time at which such a decision is made. We may have invested significant resources and time into the development of the Sion, our technology or solutions and may also have entered into contractual arrangements with suppliers or other partners in such a context under which we may be subjected to continuous payment or other obligations irrespective of our decision to abandon the relevant underlying project. Any such decision to discontinue the development or offering of the Sion or any of our technologies or solutions would lead to significant losses.

We will initially depend largely on a single car model, the Sion.

We intend to initially derive the majority of our revenues from the production and sale of a single car model, the Sion. Our success and future profitability will substantially depend on the Sion's commercial success and market acceptance. We intend to rely on a one-variant only approach and may decide not to make marketing-driven improvements or changes during the first years of production of the Sion. Car manufacturers have historically provided a variety of vehicle models in their fleets and new and improved vehicles were introduced frequently. To the extent that our product offering does not meet consumer expectations, or cannot be achieved on our projected timelines as well as cost and volume targets, our future profitability may be adversely affected. There is no guarantee that we will be able to market the Sion at the price and with the technical capabilities we currently envisage. We anticipate the purchase price of the Sion to be a significant competitive advantage, but the initial net sales price of the Sion of €21.4 thousand guaranteed to the first 16,000 reservation holder or €23.9 thousand to persons making a reservation as of the date of this prospectus will not allow us to generate a profit (not including expected revenues from emission certificate pooling under relevant EU regulations on CO2 target emissions ("CO2 pooling"), the monetization of our solar technology or other expected revenues). In November 2021, we increased the net sales price for the Sion, which may negatively impact demand for the Sion and our reputation. We may need to make further upward adjustments of the sales price of the Sion as we finalize its development due to changes in technical specifications, production or component costs or otherwise, which may result in higher than anticipated sourcing or production cost. In addition, our standard configuration with a standard price for our vehicles may not be as effective as we intend. We intend to deliver our vehicles with technology features that may be offered as costly add-ons by our competitors. Customers may prefer personalized features based on diversified tastes and needs and we may not be able to meet various customer needs. We may have overestimated the demand for the Sion and if the production volume of our vehicles is lower than originally planned this may negatively affect the costs per car produced. We may have overly focused or may continue to overly focus on (perceived) key strengths and selling points of the Sion, such as its expected affordability and environmental friendliness, while neglecting other material product aspects or components, such as our vehicles' passive or active safety, including driver assistance systems, or standard parts such as brakes or airbags, which may negatively affect our vehicles' overall performance, safety, reputation and sales volume. In addition, our intended distribution model is different from the distribution models typically used by other car manufacturers, as we plan to sell vehicles directly to our customers over the internet, rather than through traditional dealerships or company-owned retail stores. This direct sales model may result in lower sales due to customer reluctance to rely on web-based vehicle purchasing, which is particularly relevant for us as we are still in the process of developing our brand and depend on the initial success of the Sion. There can also be no assurance that we will be able to broaden our portfolio by successfully developing additional car models. The currently envisaged start of the production of the Sion in the first half of 2023 and customers may be unwilling to wait and decide to purchase other products that are or will be available earlier.

Customers may cancel their reservations for the Sion without penalty.

We have recorded reservations from potential customers for the Sion. At times, we have indicated that if we are able to sell every Sion that has been reserved, we would have revenues of a certain amount. However,

our customers may cancel a reservation without penalty according to our general terms and conditions, if no binding purchase agreement has been concluded by an agreed deadline. The relevant deadline agreed on with the customers reflected the start of serial production envisaged by us at the time the relevant reservations were made. The timing of such permitted cancellations varies, as we have amended our general terms and conditions extending the relevant cancellation deadline to reflect delays of the intended commencement of serial production of our vehicles. We have also asked some of our customers to agree to amendments of our terms and conditions that extended the date at which customers may cancel a reservation. However, not all customers who previously placed a reservation have yet accepted such amended terms and conditions. According to our terms and conditions, customers have the right to cancel their reservations without penalty at the time at which we ask them to sign a binding purchase agreement for a Sion.

To date, none of our customers has entered into a binding purchase agreement with us for our vehicles and we do not expect binding purchase agreements to be signed, at the earliest, until one year prior to the expected delivery date of a vehicle to the relevant customer. In the event of a customer's cancellation we are obligated to refund any advance payments already paid in connection with the reservation; thus, a significant number of reservation cancellations could impact our liquidity. The anticipated lead times between customer reservations and the expected first delivery of the Sion may exacerbate the risk of cancellations. We have already had to delay the start of production, which has resulted in some cancellations, and any further delay in the launch of serial production may lead to additional cancellations. In order to mitigate the effect of delays of the expected start of the production of the Sion on our customers, we had entered into a cooperation with a traditional car manufacturer and for a limited period offered our customers the option to convert parts of their advance payment into a lease arrangement for another electric vehicle at a discount until the delivery of the Sion. We have recently renewed this offer to our customers under slightly modified conditions and, in addition, alternatively offered them to lease a vehicle at discounted conditions from a start-up car rental company, which claims to focus on sustainability. However, such cooperation and offers expose us to additional costs, obligations and risks, and there is no guarantee that such initiatives will ultimately have the intended effect on customer loyalty. In addition, even if we enter into binding purchase agreements with our customers, customers may, under certain circumstances, terminate such purchase agreement within two weeks after its conclusion under a principle of EU law relating to consumer protection in relation to distance contracts (*Fernabsatzverträge*) that do not involve face-to-face contact between us and customers. This principle would generally obligate us to take back the sold vehicle and refund the customer's purchase price. Such principles applicable to distance contracts also apply to reservations. We may have also accidentally accepted reservations by customers from jurisdictions into which we will or may not be allowed to deliver our vehicles, leading to the cancellation of such reservations and the potential for reputational damage. As a result, there is no assurance that reservations will ultimately result in the purchase of a vehicle or that we actually realize our revenue expectations. Any projected revenue derived from reservations is based on a number of assumptions, including a projected purchase price for our vehicles. If the purchase price of our vehicles ends up being lower than anticipated, we may not achieve our projected level of revenue, even if all of our cars currently reserved are sold or otherwise commercialized. In addition, certain of our customers used the online payment system PayPal for their reservations and advance payments. We have not been able to immediately access these funds due to PayPal's relevant terms and conditions and may have to wait a substantial amount of time before PayPal releases these funds to us. It cannot be precluded that future advance payments made via PayPal may be subject to similar restrictions.

We intend to benefit from additional revenue opportunities, but may not be able to commercialize these platforms.

Apart from generating revenue from sales of the Sion, we also plan to generate revenue from CO2 pooling and the monetization of our solar technology.

Under the relevant EU regulations, a car manufacturer may enter into CO2 pooling arrangements with other car manufacturers to avoid, or reduce, penalty payments, if it pools its emissions with those of manufacturers of zero- or low-emission vehicles. The economic benefit is shared among the pooling participations, potentially providing a manufacturer of zero- or low-emission vehicles with an additional source of revenue. However, it remains uncertain whether such CO2 pooling will be legally feasible in the future after the start of the serial production of our vehicles. The relevant regulatory framework may change and/or other car manufacturers may be less dependent on CO2 pooling than we expected. The unavailability,

reduction or elimination of any relevant government and economic incentives could have a material adverse effect on the development of the e-mobility market, our business, prospects, financial condition and operating results. In addition, our potential to benefit from CO2 pooling may be lower than anticipated if traditional car manufacturers develop and produce their own alternative fuel vehicles to reduce their fleet-wide average emissions or if competitors would enter into CO2 pooling arrangements with traditional car manufacturers before us.

We also intend to monetize our technology based on licensing arrangements with third parties and royalty payments and we may also consider the development, general contracting and sale of certain selected solar components to third parties. However, there is no guarantee that we will be able to successfully finalize the development and commence commercialization of our technology on a large scale, particularly if our technologies are not as well received, functional or efficient as expected or should we face significant competition with respect to our technologies. The licensing of our technologies also requires patent-based or similar legal protection and there is no guarantee that we will obtain such protection in a timely manner, in the relevant jurisdictions or at all. We may fail to identify technical innovations that could be patentable and, accordingly, may fail to protect them via patents. In addition, we have already received purchase orders or entered into several letters of intent for partnerships, including with manufacturers of trailers, autonomous electric shuttles, trains, trucks, buses and boats. There is, however, no guarantee that we will be able to enter into final and binding commercial agreements with such manufacturers and ultimately monetize our technology.

We intend to deploy technologies and solutions in our vehicles, including our solar module technology, which may not be fully functional or available on our anticipated schedule or at all, and may remain unproven and pose additional risks.

The Sion will make use of certain of our technological innovations and solutions, including our solar module technology, our MCU, our on-board charger, our power sharing solution and our software and mobile application solution that is tailored to our power sharing solution and provides the backbone for our car-sharing and ride-pooling networks. We also plan to offer our own aftersales, self-service system based on an online database providing manuals and tutorials. The functionality, usability and availability of our technologies and solutions in the day-to-day use of our vehicles and at scale is unproven. Our technology has not yet been tested in industrial production. The relevant production machines that turn our technology into actual products at industrial scale have not yet been developed. There is no guarantee that our vehicles will initially perform as expected under daily driving conditions or that we will be able to detect and fix any potential weaknesses in our vehicles' technology, hardware or software prior to commencing serial production. For example, our solar modules and/or our batteries may not provide the expected additional range advantage compared to traditional battery electric vehicles or may be less reliable or more expensive to produce than expected. In addition, our solar modules may be subject to accelerated corrosion due to the impact of thermal expansion. An early prototype version of our integrated solar modules rippled and showed optical deviations when intensely exposed to the sun for an extended period of time. While we believe that we have found the reason for these issues, we cannot guarantee that they will not recur. Defects in our integrated solar modules may lead to the ignition of our vehicles and may cause bodily harm. Furthermore, defects or inappropriate use of our power sharing solutions and insufficient safety measures could lead to bodily harm, short circuits and fire damage to our vehicles or any device or facility they are connected to. Also, any of our hardware or software solutions may contain errors, bugs, vulnerabilities or design defects or may be subject to technical limitations that may compromise the functionality of our vehicles or offering. Some errors, bugs, vulnerabilities, or design defects inherently may be difficult to detect and may only be discovered after commercialization of our vehicles has begun. Additional risks may result from the use of any of our other technologies or solutions in jurisdictions where such use is not lawful and which we may not successfully control. For example, our power sharing solution may be used in jurisdictions where any of such power sharing options may not be lawful thereby exposing us or individuals to significant liability risks. Our car-sharing and ride-pooling offering may be subject to restrictive laws on passenger transportation and may also be overall less accepted by our customers than anticipated or compared to similar commercial offerings such as Zipcar or Sharenow.

Any of the technologies we intend to use in the Sion or solutions we expect to offer may not be available or fully functional at the time of the first deliveries of our vehicles or at all. There is no guarantee

that our aftersales and self-service database will be fully functional or include all required manuals, tutorials or other relevant content to address all customer concerns and issues at the beginning of the market introduction of the Sion. Our self-service approach may be less accepted by our customers than expected. Customers may prefer an all-around carefree service and we may also not be able to successfully establish and offer a service partner network to our customers for an all-around carefree service for their vehicles as currently intended, in time or at all. In addition, questions concerning the warranty for repairs carried out by customers are still unresolved. Our car-sharing and ride-pooling application is based on complex information technology and may, for example, not be fully functional when first introduced or may not offer all relevant functions. Any impairment to the function or availability of our software applications may limit offerings associated with it and may make our car- and ride-sharing networks, as well as power sharing solutions, unavailable or less practical. Furthermore, not all of our technologies, such as our car-sharing and ride-pooling software application, are or will be protected by patents, which may negatively affect our ability to, directly or indirectly, realize or monetize such technologies.

We depend on the adequate protection of our intellectual property, which can be difficult and costly.

We invest significant resources in the development of technologies and hold several patents relating to our technological innovations to be included in the Sion, such as our solar module technology and ventilation system. We consider these technologies and the related patents to be crucial for the commercial success of our vehicles. To establish and protect our rights in our technology, we rely on a combination of patents, trade secrets (including know-how), copyrights, trademarks, intellectual property licenses, employee and third-party nondisclosure agreements and other contractual rights.

The measures we take to protect our intellectual property from unauthorized use by others may not be effective for various reasons. Any patent applications we submit may not result in the issuance of patents, the scope of our issued patents may not be broad enough to protect our proprietary rights or our issued patents may be challenged and/or invalidated by our competitors. Any successful challenge to any of our intellectual property rights could deprive us of rights necessary for the successful commercialization of our vehicles or any technology relating thereto. Challenges to our patents could impair or eliminate our ability to collect future revenues and royalties on our technologies. The patent prosecution process is expensive, time consuming and complicated, and we and our future licensors may not be able to file, prosecute or maintain all necessary or desirable patents applications at a reasonable cost or in a timely manner or in all jurisdictions where protection may be commercially advantageous. It is also possible that we and our future licensors may fail to identify patentable aspects of our research and development output before it is too late to obtain patent protection. We filed and intend to continue to file trademark applications in relevant jurisdictions but may be unable to register our trademarks or otherwise protect them. For example, we have failed to obtain protection for our circle with a dot in the middle, if it is not combined with other distinctive elements. In China, our trademark application for our circle with a dot in the middle, the Sono name, and the combination of the Sono name and our circle with a dot in the middle has been objected to. Our efforts to register a trademark may be subject to oppositions and if a third-party were to register our trademarks, or similar trademarks, in a jurisdiction where we have not successfully registered such trademark, it could create a barrier to the successful commercialization of our vehicles. Failure to adequately protect our intellectual property rights could result in our competitors offering similar products, potentially resulting in the loss of some of our competitive advantage as well as a decrease in our revenue, which would adversely affect our business, prospects, financial condition and operating results.

Even if we hold valid and enforceable patents or other intellectual property rights, the legal systems of certain countries, including certain developing countries, may not favor the enforcement of these rights or otherwise offer the same degree of protection as do the laws in the EU or United States, which could make it difficult for us to stop the infringement, misappropriation, or other violation of our patents or other intellectual property rights. Further, policing the unauthorized use of our intellectual property in various jurisdictions around the world may be difficult and require significant resources.

We have applied for patent protection relating to our technological innovations to be included in the Sion in certain jurisdictions. While we generally consider applying for patents in those countries where we intend to make, have made, use, or sell patented products, we may not accurately assess all the countries where patent protection will ultimately be desirable. If we fail to timely file a patent application in any such

country, we may be precluded from doing so at a later date. Furthermore, our pending patent applications may be challenged by third parties or such applications may not eventually be issued by the applicable patent offices as patents. In addition, the patents issued as a result of our foreign patent applications may not have the same scope of coverage as our patents in the EU or United States.

Changes in the patent laws or their interpretation in the relevant jurisdictions may reduce our ability to protect our inventions and enforce our intellectual property rights. More generally, these changes could affect the value of our patents and other intellectual property. Our efforts in seeking patent protection for our technology could be negatively impacted by any such changes, which could have a material adverse effect on our existing patent rights and our ability to protect and enforce our intellectual property rights in the future. In particular, our ability to stop third parties from making, using, selling, offering to sell or importing products that infringe our intellectual property rights will depend in part on our success in obtaining and enforcing patent claims that cover our technology, inventions and improvements.

In some cases, we rely upon unpatented proprietary manufacturing expertise, continuing technological innovation, and other trade secrets to develop and maintain our competitive position. While we generally will enter into confidentiality agreements with our employees and third parties to protect our intellectual property, our confidentiality agreements could be breached and may not provide meaningful protection against improper use of our trade secrets or other proprietary information. There can be no assurance that third parties will not seek to gain access to our trade secrets or other proprietary information. In addition, adequate remedies may not be available in the event of unauthorized use or disclosure of our trade secrets or other proprietary information. Violations by others of our confidentiality agreements and the loss of employees who have specialized knowledge and expertise could harm our competitive position and cause our sales and operating results to decline as a result of increased competition.

Our patent applications may not lead to the granting of patents or desired protection in time or at all, which may have a material adverse effect on our ability to prevent others from commercially exploiting products similar to ours.

We cannot be certain that we are the first inventor of the subject matter to which a particular patent application pertains. If another party has filed a patent application pertaining to the same subject matter as we have, we may not be entitled to the protection sought by our patent application. Patent applications in many jurisdictions are typically not published until several months after filing and we cannot be certain that we were the first to make the inventions claimed in any of our issued patents or pending patent applications, or that we were the first to file for protection of the inventions set forth in our patents or patent applications. As a result, we may not be able to obtain or maintain protection for certain inventions and may face similar risks in other jurisdictions should we expand our operations, including in significant vehicle markets such as the United States and China.

Further, the scope of protection of issued patent claims is often difficult to determine. As a result, we cannot be certain that the patent applications that we file will issue, or that our issued patents will afford protection against competitors with similar technology. In addition, our competitors may seek to bypass our issued patents, which may adversely affect our business, prospects, financial condition or operating results. We cannot offer any assurances about which, if any, patents will issue, the breadth of any such patents or whether any issued patents will be found invalid or unenforceable or will be threatened by third parties.

We have no experience with using common vehicle platforms, such as our “one base” vehicle platform, in the design and manufacture of our vehicles.

The Sion is engineered on a common vehicle platform (“one base”), which means that we intend to use this platform for new vehicle types and the planned expansion of our product portfolio. We have no experience with using a common platform in the design and manufacture of vehicles. The design of the Sion and our “one base” platform is not complete. We may make changes to the design of the Sion or the platform that may make it more difficult to use the platform for future vehicles. There is no guarantee that we will be able to use the “one base” platform to bring future vehicle models to market faster or at lower cost or that there will be sufficient customer demand for additional vehicle variants of this platform.

Any delay in commercial production of the Sion could adversely affect us.

The start of the production of the Sion has been delayed and is currently envisaged for the first half of 2023, using preliminary “soft” tools, which will be replaced by permanent “hard” tools at a later point in time. Any delay in the scheduled production, manufacture or commercial release of the Sion due to, for example, our inability to successfully complete the development of the Sion, obtain sufficient financing, comply with relevant regulatory provisions and obtain street certification for the Sion or any failure by our suppliers or business partners to meet agreed upon timelines could reduce interest in our vehicles and subject the Sion to unfavorable changes in the regulatory environment over time, such as legal requirements to include certain driver assistance technologies in our vehicles, which may be costly or difficult and costly to implement.

Any delay in the production or delivery of the Sion as currently envisioned or any other future car model could threaten our future existence as a business and may adversely affect our growth prospects. Any delay in the financing, design and launch of the Sion or other car models that we may roll out in the future could lead to the cancellation of reservations or termination or non-extension of relationships with any of our business partners and may materially damage our brand, business, prospects, financial condition and operating results. In order to mitigate the effect of delays of the expected start of the production of the Sion on our customers, we had entered into a cooperation with a traditional car manufacturer and for a limited period offered our customers the option to convert parts of their advance payment into a lease arrangement for another electric vehicle at a discount until the delivery of the Sion. We have recently renewed this offer to our customers under slightly modified conditions and, in addition, alternatively offered them to lease a vehicle at discounted conditions from a start-up car rental company, which claims to focus on sustainability. However, such cooperation and offers expose us to additional costs, obligations and risks, including reputational risks, and there is no guarantee that such initiatives will ultimately have the intended effect on customer loyalty. Any future delay of the start of series production of our vehicles could force us to set up similar initiatives, which could lead to substantial cash outflows and negatively affect our financial results, reputation and business.

We may not be able to develop manufacturing processes and capabilities within our projected costs and timelines.

Our asset-light business model provides for the outsourcing of the production of our vehicles and the sourcing of off-the-shelf components from suppliers, as well as outsourced logistics and delivery management based on low inventories. We have no experience to date in manufacturing vehicles through our production partner on a high volume basis or at all or in supply chain management. We do not know whether we will be able to secure efficient, low-cost manufacturing capabilities and to implement automated manufacturing processes. We also may not be able to secure reliable sources of component supply. Any failure to meet the required quality, price, engineering, design and production standards, as well as the production volumes, may negatively impact our ability to successfully mass market the Sion or other future car models. The injection-molding based production process of our solar module technology or other relevant production technologies may not be as efficiently scalable as expected or, if scaled, may lead to a higher number of product defects than anticipated (due to, for example, increased breakage of solar cells during the injection molding process). Even if we are successful in developing our high volume manufacturing capability and processes and reliably source our component supply, we do not know whether we will be able to do so in a manner that avoids significant delays and cost overruns, including as a result of factors beyond our control such as problems with suppliers or logistics, or in time to meet our vehicle commercialization schedules or to satisfy the requirements of customers. Any failure to develop such manufacturing processes and capabilities within our projected costs and timelines could have a material adverse effect on our business, prospects, operating results and financial condition.

Our ability to manufacture vehicles of sufficient quality and appeal to customers on schedule and at scale is unproven and still evolving and we may not be able to commercialize our vehicles.

Our success will depend in large part on our ability to execute our plans to market and sell the Sion as well as other car models that we may roll out at a later point in time. There is no guarantee that we will be able to successfully commercialize the Sion or other potential future car models in time or at all.

The successful conclusion of the commercial introduction, as well as the rollout of future car models, is and will be subject to various risks, including with respect to:

- customer acceptance of our brand and the Sion and willingness to purchase our vehicles instead of more established brands;
- our ability to secure necessary funding to complete development and launch of the Sion and maintain our operating expenses until we generate sufficient revenue to meet our costs;
- the third-party production partner (NEVS) we plan to use being able to manufacture the Sion or other cars within defined design, tolerances, quality and quantity specifications;
- our other business partners, such as suppliers and logistics services providers, providing their products and services according to our needs and specifications;
- the scalability of our operations and the production of the Sion;
- long- and short-term durability of the relevant e-mobility technology, particularly our proprietary solar module technology based on polymer technology, and other related components in the day-to-day wear and tear of the vehicles;
- compliance with environmental, workplace safety and similar regulations;
- securing necessary components and raw materials for our vehicles on acceptable terms and in a timely manner;
- delays and disruptions in the delivery process of our suppliers or other business partners;
- our ability to attract, recruit, hire and train and retain skilled employees;
- quality controls;
- delays or disruptions in our supply chain;
- other delays and cost overruns; and
- unforeseen market developments in a rapidly evolving market environment.

We have yet to acquire the adequate hard tooling, i.e., metal tools that offer high repeatability and reproduction accuracy as well as high processing speed and tool stability, for the long-term serial production of our vehicles according to our timelines and may not be able to procure such tooling in time or at all, particularly if we do not secure the required funding. The currently envisaged start of the production of the Sion in the first half of 2023 will include a first series of vehicles manufactured with soft tooling, which are plastic or aluminum tools that result in greater dimensional tolerances and higher tool wear, but are much simpler and thus more cost-effective to produce. Soft tools will not allow for the production of our vehicles at the required quality and quantity in the long-run. We will not be able to secure the production of vehicles according to our timelines and demands without hard tooling. There is also no guarantee that we will be able to successfully ramp up the production of the Sion once its serial production has been started.

We depend on National Electric Vehicle Sweden (NEVS) for production of the Sion.

We intend to outsource the Sion's production to National Electric Vehicle Sweden (NEVS) in Trollhättan, Sweden. NEVS is an automotive engineering and manufacturing company founded in 2012 that inherited some of SAAB's corporate assets. However, NEVS has not taken over SAAB's complete workforce and NEVS's current or future employees may not achieve the quality or quantity levels of the former SAAB workforce. There is no guarantee that NEVS will manufacture vehicles that correspond to our specifications and quality expectations. In 2020, NEVS was acquired by a Chinese enterprise (Evergrande New Energy Vehicle Group or Evergrande), which may subject NEVS, directly or indirectly, to political and economic pressure or measures, particularly if the relationship between other countries, including the United States, and China were to deteriorate. We currently maintain a friendly and very constructive relationship with the management team of NEVS. Evergrande may, however, at any time decide to replace the current management team, which could adversely affect our business relationship with NEVS. Pursuant to the confirmation of the nomination letter between NEVS and us, if we have a new major shareholder who is a direct competitor to NEVS or Evergrande, NEVS reserves the right at its sole discretion to terminate

the letter. Recent events, such as failure to pay interest on outstanding indebtedness on its due date, suggested that Evergrande faces liquidity challenges. These challenges will likely negatively affect NEVS and could lead to a sale of NEVS by Evergrande. We may be forced to renegotiate our arrangements with NEVS or to search for a new manufacturer. We may also decide to take over the NEVS' employees that are required for the production of the Sion, which could lead to an increase in pre-production expenses. While we had initial exploratory high-level discussions with two potential alternative manufacturers, there can be no guarantee that we will be able to secure a suitable replacement for NEVS. Any change in our contract manufacturer may negatively affect our envisaged margins or may lead to a delay in the targeted start of production. In addition, outsourcing generally requires the sharing of material proprietary knowledge, trade secrets and other sensitive information and we or NEVS may not be able to implement effective measures to adequately protect our proprietary information, or other intellectual property, against misadministration, misuse, misappropriation, unauthorized access or loss.

Our asset-light business model provides for the sourcing of off-the-shelf components from suppliers based on a single-source approach.

Various standard automotive parts of the Sion will be off-the-shelf components developed by, and sourced from, third-party suppliers. With respect to our suppliers we currently rely on a "single-source" approach and have selected, or intend to select, one single supplier for a specific car component. This makes our supply chain and the production of our vehicles particularly dependent on the performance of our suppliers and increases the risks of interruption. Our operations will be negatively affected if one of our suppliers experiences capacity constraints and is not in a position to deliver the required quantities of a certain component or part. Single-sourcing also increases the bargaining power of the relevant suppliers, which may expose us to abusive conduct, may prevent us from entering into long-term supply agreements with guaranteed pricing or may require us to accept disadvantageous economic or legal conditions. We may also be forced to stop production should a supplier fail to provide required certifications for its products or should the supplier be accused of infringing or misappropriating third-party intellectual property rights. Many suppliers depend on a small number of established car manufacturers. Suppliers may be significantly impacted and may be forced to close their operations, should any of these established car manufacturers lose significant market share or file for bankruptcy. If we need to replace a supplier or if a supplier terminates its relationship with us, there is no guarantee that we will be able to find adequate substitute products or suppliers in time or at all. In addition, COVID-19-related measures or effects may also affect the availability of products, components and materials. For example, increased demand for semiconductor chips in 2020, due in part to the COVID-19 pandemic and increased demand for consumer electronics that use these chips, has resulted in a severe global shortage of such chips in 2021. Furthermore, it is possible that the supplier does not have the right to sell the relevant product to us, for example, because the supplier lacks the intellectual property rights to the design or because the supplier has an exclusivity agreement with another vehicle manufacturer, which we could force us to discontinue production or sales of the Sion, to replace the part or to change the design of the Sion, which could result in significant delays and costs or make the production of the Sion impossible altogether.

Our vehicles depend on the development, production, performance and durability of batteries being engineered by a single supplier.

The competitiveness and performance of our vehicles depend on the supply and performance of batteries. We have engaged a supplier with the development and production of our lithium-iron phosphate batteries. We are fully dependent on this supplier and any delay or disruption in the development and production of, as well as the supply of batteries from, such supplier could significantly delay or disrupt our own envisioned timelines or the production of our vehicles. Our timeline for the development and production of our vehicles as well as the timeline for the development of the batteries by the supplier are tightly aligned and we may not be able to replace such supplier or its batteries in time or at all without any significant delay or disruption of our own operations should this supplier not be able to develop and deliver batteries on time or at the required quality or quantities. Any other battery cell manufacturer may choose to refuse to supply electric vehicle manufacturers to the extent they determine that the relevant vehicles are not sufficiently safe.

The production of lithium-iron phosphate batteries is exposed to multiple risks, which may not be adequately addressed by our arrangement with our supplier. These risks include the inability or unwillingness

of battery manufacturers to build or operate battery cell manufacturing plants to supply the numbers of lithium-iron phosphate blade cells required to support the growth of the electric vehicle industry as demand for such blade cells may increase steeply, a disruption in the supply of lithium-iron phosphate blade cells due to quality issues or recalls by the battery blade cell manufacturer and an increase in the cost of raw materials used in lithium-iron phosphate cells.

Based on calculations performed by us, we currently expect that the batteries developed by our supplier and to be used in our vehicles will provide a range based on the WLTP standard of up to 305 kilometers, or up to 190 miles, until they have to be recharged. These specifications reflect our current development targets, and there is no guarantee that the batteries will actually have such a range or will represent the state of the art once being integrated in and delivered with the Sion. Even if the batteries sourced from such supplier generally perform as expected, there is no guarantee that we will be able to successfully integrate them in our vehicles and that they will show the same performance in our vehicles as generally specified by the supplier. In addition, based on our simulations, we currently expect a certain decline in the Sion's battery capacity over its lifespan, which will lead to a decrease in the range of our vehicles. Other factors such as usage, time and stress patterns may also impact the battery's ability to hold a charge, which would decrease our vehicles' range. Such battery deterioration and the related decrease in range may negatively influence potential customer decisions and may adversely affect the commercialization of the Sion and our business operations.

Increases in costs, disruption of supply or shortage of raw materials or certain products could harm our business.

Once commercial production of the Sion begins, NEVS, which is expected to produce our vehicles, or any of our suppliers may experience increases in the cost or a sustained interruption in the supply or shortage of raw materials required for the production of our vehicles or certain parts or components used in them. Our vehicles depend on various raw materials and products, including aluminum, steel, carbon fiber, non-ferrous metals (such as copper) or anti-freeze heat transfer fluid based on propane diol, corrosion inhibitors, certain polycarbonate blends and computer chips. The prices for these materials and products may fluctuate depending on market conditions. Some products, such as computer chips, may not be available at all in the short term.

Substantial increases in the prices for raw materials and/or increases in freight charges would increase our operating costs and could reduce our margins if the increased costs cannot be recouped through increased vehicle prices. There can be no assurance that we will be able to recoup increasing costs of raw materials by increasing vehicle prices.

We intend to outsource logistics management of our operations to third-party logistics (3PL) and potentially fourth-party logistics (4PL) services providers.

We plan to outsource the inbound and outbound logistics management of our operations to third-party logistics (3PL) services providers that will provide comprehensive supply chain, transport, distribution management and execution services while we may also engage a fourth-party logistics (4PL) services provider who will oversee the transportation and logistics operations of our 3PL services companies. Involving external logistics providers entails risks. These include delays, the inefficient logistics management by a 3PL or 4PL services provider or trade restrictions, embargos or COVID-19-related measures affecting supply chain management, including cross border shipments.

We have yet to enter into contractual agreements with many of our prospective suppliers and business partners and may have to renegotiate these agreements as we scale our business.

We will need to finalize our contractual arrangement with many of our prospective suppliers and business partners. Our arrangement with NEVS, the third-party manufacturer expected to produce the Sion, is of a preliminary and basic nature and various aspects of our commercial and legal relationship with NEVS, as well as details of the production of the Sion, will have to be clarified and stipulated in a finalized principal contractual framework with NEVS in advance of the production of our vehicles. Negotiations with NEVS may consume significant resources and time and there is no guarantee that such negotiations will be concluded successfully. In the negotiations, we may agree to terms and conditions that are less favorable

to us than expected. For example, the production cost per single car may be ultimately higher than currently expected due to various factors many of which are beyond our control including currency exchange rates as NEVS will invoice us in Swedish krona for the production of the Sion. We may be subject to unfavorable rules on the transfer of risk with respect to our vehicles or supplied components or disadvantageous payment terms. Any failure to finalize our arrangement with NEVS in a timely manner may lead to a delay in the production and delivery of the Sion. Terms and conditions (including production costs) of any contractual arrangement, including any preliminary contractual arrangement, may have to be again renegotiated due to a lapse of time or a change in material circumstances should we not be able to realize the anticipated timelines.

We have yet to conclude contractual agreements with many other suppliers and other prospective business partners and may not be able to reach such agreements at favorable terms, in a timely manner or at all. Prospective suppliers and business partners may end their relationship or negotiations with us for various reasons. Many of the suppliers we involve, or intend to involve, are renowned market players with significant bargaining power and whose position towards us is bolstered due to our single-source approach. We, on the other hand, are not an established business and have limited market power. We may therefore not be able to successfully assert our own interests and may enter into contracts with significantly disadvantageous terms and conditions, such as unfavorable prices, limitations on remedies in cases of breach of contract, unfair liquidated damages provisions or broad termination rights allowing our business partners to end their relationship with us at will. If we successfully launch and market the Sion, we will seek to scale our operations. We may have to renegotiate, amend or extend any of our relationships with our business partners and there is no guarantee that we will be successful in doing so. We may incur substantial additional costs and expenses should we have to amend our business model to scaled operations and we may even fail to do so.

The involvement of numerous third parties in our operations and processes adds significant complexity.

The involvement of numerous third parties in our operations and processes adds significant complexity and dependency. There is no guarantee that we will reach the required synchronization among all these parties to successfully produce our vehicles and scale our operations. The logistics processes in our business model (including in-bound logistics such as the shipping of car components from various suppliers to NEVS' factory for the assembly of various auto parts, as well as out-bound logistics such as the delivery of our vehicles to customers or hubs) may be more complex, complicated and costly than originally anticipated. The high degree of involvement of third parties is challenging for our IT-systems and interfaces. The resulting complexity may require us to introduce SAP S4/HANA, which may lead to cost increases. In addition, the introduction of SAP S4/HANA may be more time consuming and/or costly than we currently expect. Further vulnerability to our operations is added by the fact that we intend to run the production of the Sion as a one-variant-only model based on a low inventory and "just in time" strategy, which requires particularly precise coordination among NEVS, our suppliers, the 3PL and 4PL services providers and us as well as prompt delivery by all of the foregoing. We will not maintain a back stock of inventory or material and any supply chain issue, such as price increases in raw materials, shortages, natural disasters, trade disputes or political tensions can adversely affect our operations.

We depend on the acceptance of our brand and any negative publicity relating to any of our business partners and their products or services could have a significant negative impact on our business and reputation.

Our business and prospects heavily depend on our ability to develop, maintain, and strengthen our Sono brand. The automobile industry is intensely competitive and introducing a new vehicle brand to compete with existing, established brands presents significant challenges. Many of our current and potential competitors, particularly car manufacturers headquartered in the United States, EU, Japan and China, have greater name recognition, broader customer relationships and substantially greater marketing resources than we do. Establishing our vehicle brand requires substantial resources and we may not succeed in establishing, maintaining and strengthening our brand. We do not intend to maintain a dealership network, which could negatively affect our brand recognition, customer awareness or our ability to provide satisfactory levels of customer service. Our brand and reputation could be severely harmed by negative publicity with respect to us, our directors, officers, employees, shareholders, peers, business partners, customers

or our industry in general. Any misconduct by, or negative publicity relating to, any of our business partners and their products or services could have a significant negative impact on our business and reputation whether or not such publicity is directly related to their collaboration with us. Our ability to successfully build our brand could also be adversely affected by any negative perception about the quality of our business partners' products or services, if, for example, a certain car component to be used in the Sion does not meet required safety standards or lacks the required or promoted functionality. This aspect is particularly relevant with respect to prominently marketed parts such as the electric batteries for our vehicles. For example, if the batteries show higher than expected self-discharge or provide less than the promoted range, our reputation could be negatively affected and we may be faced with claims for damages. Furthermore, customers may customize their vehicles after delivery or change the charging infrastructure with aftermarket products, which may cause our vehicles not to operate properly, which, in turn, may create negative publicity and could harm our business.

If the Sion or any of our future vehicles fail to perform as expected, our ability to market our electric vehicles could be harmed.

The Sion, or any of our future vehicles, may not perform as expected or may require repair. The Sion will consist of and its performance depend on various complex components supplied by various suppliers, assembled by a third-party manufacturer. There is no guarantee that all product specifications of the Sion, which reflect our current expectations and development targets, will actually be realized at the time of the first deliveries of our vehicles or at all. The software used to operate our vehicles is complex and may contain defects and errors when first introduced. Our asset-light business model and the intended outsourced production of our vehicles by NEVS pose particular challenges to our quality management processes. Our quality management system may not be effective or sufficient and the number of defective vehicles may be substantially higher than anticipated. There can be no assurance that we will be able to detect and fix any defects in the vehicles' hardware or software prior to commencing customer sales. The risk that we do not detect defects before the launch of the Sion and that the Sion will not comport with previously defined product specifications is heightened by our limited experience in designing, developing and manufacturing cars. We may experience product recalls in the future, which could result in the incurrence of substantial costs relating to, for example, return shipping costs for defective vehicles and costs associated with the repair of the underlying product defect. Any product recall may consume a significant amount of our resources. Any product defects or any other failure of our vehicles to perform as expected could harm our reputation and result in adverse publicity, lost revenue, delivery delays, product recalls, product liability claims and significant warranty and other expenses, and could have a material adverse impact on our business, financial condition, operating results and prospects.

We make significant use of various communication channels for our public relations activities, including our website and social media, and such activities may expose us to various risks.

We are a young company and increasing brand awareness as well as a close relationship to our community are of utmost importance to us. We keep our community regularly informed and updated about our latest and most important milestones, including the development progress of the Sion, the onboarding of new suppliers and business partners, our technologies or other initiatives involving our community. The information and updates are provided through various online channels (including Facebook, Instagram, Twitter and our website and blog). We have devoted and will continue to devote significant time to such publicity work. However, there is no guarantee that our actions and promotional activities will achieve the expected results. Our continuous online activities and the focus on a close relationship with our community could make us more vulnerable than other companies to negative publicity should any of the information shared by us turn out to be unpopular or incorrect. Unfavorable publicity, including due to possibly incorrect content or statements on our website or other channels, a delay in the development and production of the Sion beyond the currently targeted date for the start of serial production or achievements of our competitors, may adversely affect our reputation, impair the relationship to our community and undermine the trust and credibility we have established.

Any perception that our advertisements were overly positive or that we do not live up to our promises may damage our reputation and adversely affect our business.

Not all the specifications and product details we have promoted in our advertisements or public statements may be actually feasible or ultimately implemented in the Sion. There is no guarantee that all

product specifications of the Sion, which we advertised and which reflect our current expectations and development targets, will actually be realized at the time of the first deliveries of our vehicles or at all. If advertised key characteristics of our vehicles, such as a specified range advantage based on our solar modules, a certain range of our batteries and a specific entry-price, turn out to be ultimately unrealistic, unfeasible or false, we may be exposed to negative publicity, reputational damage, cancellations, lower orders or even legal claims and litigation. For example, we advertised an interior design element of the Sion based on the integration of selected moss into the dashboard and center console of the vehicle to complement the air filter's activity. The filter effect of the moss is, however, uncertain. A key aspect of the Sion is the range that we advertise, including the incremental range offered by the solar panels on the vehicle, and so if the Sion does not perform as advertised this could significantly impact our brand and reputation. In addition, our public communications may have contained, or may contain in the future, incorrect information or statements or may be subject to misperception. We often advertise our vehicles with rather general characteristics and specifications that are subject to interpretation, such as "green," "environmentally friendly" or "battery reach" and any statement relating thereto may spark discussions, challenges or legal claims should any of our customers or other third party have an understanding of these characteristics and specifications that differs from ours.

We also have made and may continue to make commitments to our community aiming at its involvement, such as the announcement that we would reserve one seat in our supervisory board for a community member or that customers would be particularly rewarded for their loyalty. Our brand, reputation and credibility could be significantly harmed should we ultimately not be able to realize or implement any such commitment or statement, in part or in full or as originally contemplated, due to tax, legal, practical or any other reasons and our business may be adversely affected or subjected to litigation or legal proceedings. Any negative publicity, negative customer feedback or reputational damage, whether substantiated or not, may be significantly accelerated through social media due to its immediacy, general anonymity and accessibility as a means of communication. Any of the foregoing could adversely affect our business.

Our advertisements may not have complied in the past and may not comply in the future with all relevant legal requirements.

We cannot guarantee that all of our public statements that qualify as advertisements, or whole advertising campaigns, comply with legal requirements under competition law or other laws, rules or regulations, such as the requirement to include statements on fuel consumption and CO2 emissions in certain advertisements. Any non-compliance could lead to administrative fines and may result in us being required to discontinue a campaign. We may also be forced to publicly correct incorrect statements. Any of the foregoing could adversely affect our reputation and brand and our business.

Our distribution model is different from the distribution model typically used by other car manufacturers.

We intend to sell our vehicles directly to our customers over the internet rather than through traditional dealerships or company-owned retail stores. This model of vehicle distribution is relatively new and its long-term effectiveness is unproven. It subjects us to substantial risk as it requires, in the aggregate, significant expenditures and provides for slower expansion of our distribution and sales systems than may be possible by utilizing the traditional dealership system. For example, we will not be able to utilize long established sales channels developed through a dealership system to increase our sales volume. Moreover, we will be competing with car manufacturers with well established distribution channels. The implementation of our direct sales model will also be subject to numerous significant legal challenges, including obtaining permits and approvals from relevant authorities, and we may not be successful in addressing these challenges. In addition, there are substantial automotive franchise laws in place in many markets around the world and we might be exposed to significant franchise dealer litigation risks. Our success will depend in large part on our ability to effectively develop our own sales channels and marketing strategies and our inability to successfully implement such a distribution model could adversely affect our business, reputation, results of operations, financial condition and prospects.

We have no experience servicing our vehicles. If we are unable to address the service requirements of our customers, our business will be materially and adversely affected.

We intend to offer our own innovative aftersales service and maintenance platform that will also focus on inexpensive repairs and "do-it-yourself" maintenance based on an online database and video manuals

accessible for our customers and independent car workshops while we also plan to maintain our own network of cooperating service partners.

However, we do not have experience servicing, repairing or maintaining our vehicles. There is no guarantee that our innovative service concept will be successful and be able to meet customers' needs or preferences. Traditional car manufacturers typically maintain a broad network of car dealerships where customers can bring their vehicles for servicing and maintenance. Certain car repairs, such as, for example, fixes of the engine control unit or coil springs, the restoration of the air conditioning system or brake plumbing and reservoir replacement, are complex and involve toxic substances. Any such repairs, which are complex and/or include hazardous substances, should generally not be conducted by lay persons and are not suitable for do-it-yourself maintenance. In addition, servicing electric vehicles is different from servicing vehicles with internal combustion engines and requires specialized skills, including high voltage training and servicing techniques. The Sion will be equipped with complex hardware and software and the integrated solar module technology adds additional complexity to potential repair work. Depending on the specific kind of repair, service or maintenance work required for one of our cars, our customers may not be able to engage in such work by themselves, may find the experience offered by our platform unsatisfying or get involved in accidents while attempting to engage in such work without professional assistance and may be required to hire qualified experts at their own expense. Further, we are currently reviewing the future warranty regime of our vehicles and intend to avoid material conflicts between such warranty regime and our self-service platform. However, there is no guarantee that we will ultimately be able to fully reconcile our future warranty regime with our "do-it-yourself" maintenance approach and any repair or act conducted directly by our customers or a third-party service provider on our vehicles could negatively affect the warranty rights of our customers or any other rights they may have. Any such insufficiency of our self-service platform may negatively affect customers' view of our case, the public image of user-friendliness of our vehicles, impact the number of vehicles sold and subject us to lawsuits.

We may ultimately decide to partner with a third party to perform some or all of the service and maintenance on our vehicles, and there can be no assurance that we will be able to find an external partner or that we will be able to enter into an arrangement with any such third-party provider on terms and conditions acceptable to us. Although such servicing partners may have experience in servicing vehicles in general, they will initially have limited experience in servicing our vehicles and there can be no assurance that any such service arrangements will adequately address the service requirements of our customers. If we are unable to successfully address the service requirements of our customers, our business, reputation, results of operations, financial condition and prospects will be materially and adversely affected.

Product recalls could materially adversely affect our business, prospects, operating results and financial condition.

Our vehicles are complex products that include innovative and complex hardware and software components whose reliability and durability in the day-to-day wear and tear of our vehicles remains untested. In the future, we may, voluntarily or involuntarily, initiate a recall if any of our vehicles prove to be defective or noncompliant with applicable relevant vehicle safety standards. Relevant defects may include, for example, defective batteries, a lack of durability of our solar modules, intense heat development or thermal expansion of our modules, as well as defective brakes or airbags. Any product recall in the future may result in adverse publicity and damage our brand. Such recalls could involve significant expense and diversion of management attention and other resources and could adversely affect our business, prospects, financial condition and results of operations.

Insufficient warranty reserves to cover future warranty claims could materially adversely affect our business, prospects, financial condition and operating results.

We plan to offer a customary warranty for our vehicles. Our vehicles will be equipped with innovative and complex hardware and software, which may make them vulnerable to quality issues and/or warranty claims, particularly as we rely on an outsourced manufacturing approach where we only have limited control over processes. Once the Sion is in production, we will need to maintain warranty reserves to cover warranty-related claims. If our warranty reserves are inadequate to cover future warranty claims, we may become subject to significant and unexpected warranty expenses. There can be no assurances that then-existing warranty reserves will be sufficient to cover all claims.

Our vehicles will make use of lithium-iron phosphate battery cells and solar modules, which both pose certain health and safety risks.

The batteries to be used in the Sion will make use of lithium-iron phosphate chemistry packed in the form of blade cells. On rare occasions, the blade cells can rapidly release stored energy. Any such uncontrolled and unintended outburst of energy may ignite or cause damages to nearby materials as well as other blade cells. Once the Sion is commercially available, any incident involving rapid release of energy from blade cells that causes damage or injury could subject us to lawsuits, product recalls or redesign efforts, all of which would be time consuming and expensive. Also, negative public perceptions regarding the suitability of lithium-iron phosphate cells for automotive applications or any future incident involving lithium-iron phosphate cells, such as a vehicle or other fire, even if such incident does not involve our vehicles, could seriously harm our business and reputation.

Once manufacturing of our vehicles commences, our production partner (NEVS) may have to store a significant number of batteries at its facilities. Even if our production partner has implemented safety procedures related to the handling of the batteries, a safety issue or fire related to the batteries could disrupt operations. Such damage or injury could lead to adverse publicity and potentially a safety recall. Moreover, any failure of a competitor's electric vehicle or energy storage product may cause indirect adverse publicity for us and our products. Such adverse publicity could negatively affect our brand and harm our business, prospects, financial condition and operating results.

Solar modules may also pose various risks to their environment. Solar modules include components and complex systems that can fail, such as switches, fuses or wiring feeding the solar modules' power into our vehicles' systems. In addition, solar panels are made of chemical and potentially toxic materials, such as arsenic and cadmium, in a process that generates many toxic byproducts such as hexafluoride. These products are dangerous for the environment as well as humans. Furthermore, solar modules may catch fire due to, for example, spontaneous combustions, either from the parts within the modules or in the surrounding environment, due to the high levels of heat produced by the device. Solar modules that catch fire may produce heat, smoke and toxic byproducts, may lead to the destruction of the vehicle or may cause bodily harm. In addition, excessive heat may significantly reduce the power output of our solar modules and negatively affect our vehicles range. Excessive heat may also lead to thermal expansion and deformation of solar modules, which can negatively affect their functionality or damage the exterior of our vehicles.

We will not be able to influence, control or predict the actions of customers and third parties engaging in car-sharing or ride-pooling.

We will not be able to influence, control or predict the actions of customers and third parties using our technologies and innovations. We may be unable to provide a safe environment for drivers, customers or any third party exposed to our car-sharing and ride-pooling offering. Any inappropriate conduct, misconduct or criminal activity (including accidents, vandalism, cases of sexual abuse bodily harm or theft) in connection with our car-sharing and ride-pooling platform or our vehicles may significantly impair our customers' experience, damage our brand and reputation and may expose us to legal claims. We intend to obtain insurance coverage that addresses various risks relating to our car-sharing and ride-pooling offering but there is no guarantee that we will be able to obtain such insurance coverage in a timely manner, on favorable terms, with the required scope of protection or at all. In addition, there can be no assurance that any coverage we obtain will be sufficient to cover potential claims. We may also decide to discontinue our car-sharing and ride-pooling offering at any given point in time should the offering turn out to be unprofitable, not be accepted by customers or face significant legal challenges. For example, an intense use of our car-sharing and ride-pooling platform may subject us or individuals to laws governing the (public) transport of passengers or similar laws together with the relevant legal implications.

Any unauthorized control or manipulation of our vehicles' systems could result in loss of confidence in us and our vehicles and harm our business.

Our vehicles will contain complex information technology systems and built-in data connectivity, positioning us to install periodic remote updates to improve or update functionality. We also intend to deploy our own proprietary software and mobile application solution that will provide access to our car-sharing and ride-pooling networks as well as the bidirectional power sharing solution. We have designed,

implemented and tested security measures intended to prevent unauthorized access to our information technology networks, our vehicles and related systems. However, hackers may attempt to gain unauthorized access to modify, alter and use such networks, vehicles and systems to gain control of or to change our vehicles' functionality, user interface and performance characteristics, or to gain access to data stored in, or generated by, our networks, systems or vehicles. Future vulnerabilities could be identified and our efforts to remediate such vulnerabilities may not be successful. Any leakage or loss of data may expose us to liability risks with respect to suppliers or employees as well as customers regarding personal data.

Any unauthorized access to or control of our networks, systems and vehicles or their systems, illegal use of software or any loss of customer or other personal data could result in legal claims or proceedings. In addition, regardless of their veracity, reports of unauthorized access to our vehicles, systems or data, as well as other factors that may result in the perception that our vehicles, systems or data are capable of being "hacked," could negatively affect our brand and harm our business, prospects, financial condition and operating results.

Interruption or failure of information technology and communications systems could disrupt our business and affect our ability to effectively provide our services.

We utilize information technology systems and networks as well as cloud computing services to process, transmit and store electronic information in connection with our business activities. We manage and maintain our applications and data utilizing a combination of on-site systems as well as externally managed data centers and cloud-based data centers. We utilize third-party security and infrastructure service providers to manage our information technology systems and data centers. These applications and data encompass a wide variety of business-critical information, including research and development information, commercial information, and business and financial information as well as personal data of customers or employees. In addition, we also rely on independent third-party service providers, such as Google, which play an important role for our offering, marketing channels and overall presence. Our data of any kind stored on the cloud services and on individual devices could be lost due to improper handling, insufficient commissioning of third parties to create backup copies, or due to damage or accidental or intentional deletion by our employees. Our data could also fall into the hands of third parties, whether through espionage, hacking or due to incorrect operation of the systems.

Despite the implementation of security measures by us or our service partners, our or our service partners' systems as well as any relevant third-party service provider will be vulnerable to damage or interruption from, among others, fire, terrorist attacks, natural disasters, power loss, telecommunications failures, computer viruses, computer denial of service attacks or other attempts to harm our systems. The relevant data centers could also be subject to break-ins, sabotage and intentional acts of vandalism causing potential disruptions. Some of our or our service providers' systems will not be fully redundant, and our disaster recovery planning cannot account for all eventualities.

Any problems with or insufficiencies of our or our service providers' data centers or services could result in lengthy interruptions of our or our service providers' information technology systems and could also affect our vehicles. Cyber threats are persistent and constantly evolving. Such threats have increased in frequency, scope and potential impact in recent years. Information technology evolves rapidly and we or our service providers may not be able to address or anticipate all types of security threats, and may not be able to implement preventive measures effective against all such security threats. The techniques used by cyber criminals change frequently, may not be recognized until launched, and can originate from a wide variety of sources, including outside groups such as external service providers, organized crime affiliates, terrorist organizations, or hostile foreign governments or agencies. There can be no assurance that we or our service providers, contractors or consultants will be successful in preventing cyberattacks or successfully mitigating their effects. Similarly, there can be no assurance that any third-party service provider will be successful in protecting our confidential and other data that is stored on their systems. In addition, we may suffer reputational harm or face litigation or adverse regulatory action as a result of cyberattacks or other data security breaches and may incur significant additional expense to implement further data protection measures. Any disruption of the networks and services of independent third-party service providers could also negatively affect our operations, accessibility or offering.

Vehicle sales are influenced by interest rate levels and availability of credit for vehicle financing and a substantial increase in interest rates could materially and adversely affect demand for our vehicles.

In certain regions, including the EU, financing for new vehicle sales has been available at relatively low interest rates for several years due to, among other factors, expansive government monetary policies. A change in monetary policies and rising interest rates would also lead to an increase of market rates for new vehicle financing, which may, in turn, negatively affect demand for our vehicles. Additionally, if consumer interest rates increase substantially or if financial service providers tighten lending standards or restrict their lending to certain classes of credit, customers may not desire or be able to obtain financing to purchase or lease our vehicles. As a result, a substantial increase in customer interest rates or tightening of lending standards could have a material adverse effect on our business, prospects, financial condition, results of operations, and cash flows.

We may face risks associated with our growth strategy and international operations, including unfavorable regulatory, political, tax and labor conditions, which could harm our business.

Our initial market will be central Europe, with a particular focus on Germany. In the future, we intend to expand our geographic coverage beyond these markets, including the United States and China. Due to our intention to expand our operations internationally, we may face risks associated with our growth strategy, including possible unfavorable regulatory, political, tax and labor conditions, which could harm our business, as well as incurring significant expenditures necessary for road certification in such new markets. Our operations will be subject to the local legal, political, regulatory and social requirements and economic conditions in the relevant jurisdictions. There is no guarantee that we will obtain road certifications for our vehicles in the relevant markets or at all. We have not yet checked the feasibility of a rollout of the Sion or other potential products in all the markets we may tap in the future and may identify political, regulatory, operational or practical hurdles, which may render an expansion into such a market unfeasible.

We have no experience to date selling our vehicles. Any international sales would require us to make significant expenditures, including the potential hiring of local employees and potential establishment of local offices or facilities, in advance of generating any revenues. We are subject to a number of risks associated with international business activities that may increase our costs, impact our ability to sell our electric vehicles and require significant management attention and which we may not have adequately addressed or not addressed at all as of today. These risks include:

- conforming our vehicles to various international regulatory requirements where our vehicles are sold, including potential additional road or other certification requirements;
- difficulty in staffing and managing foreign operations;
- misconceptions and/or false assumptions about foreign local markets;
- difficulty in establishing our brand and attracting customers in new jurisdictions;
- foreign labor laws, regulations and restrictions as well as strikes or work stoppages organized by labor unions relevant for us, our suppliers or business partners;
- foreign government taxes, regulations and permit requirements, including foreign taxes that we may not be able to offset against taxes imposed upon us in Germany or The Netherlands, and foreign tax and other laws limiting our ability to repatriate funds to The Netherlands;
- fluctuations in foreign currency exchange rates and interest rates, including risks related to any interest rate swap or other hedging activities we undertake;
- foreign government trade restrictions, tariffs and price or exchange controls;
- changes in diplomatic and trade relationships; and
- political instability, natural disasters, war or events of terrorism.

If we fail to successfully address these risks, our business, prospects, operating results and financial condition could be materially harmed.

If we fail to manage our future growth effectively, we may not be able to market and sell our vehicles successfully.

Any failure to manage our future growth effectively could materially and adversely affect our business, prospects, operating results and financial condition. Our internal organization currently follows a “teal” approach that advocates employee autonomy, self-organization and organic adaption to business growth. This organizational approach may prove less efficient or impractical as our business grows and organic adaption of our internal organization to our growing operations may fail. We may have to invest significant additional resources and focus our attention on adapting our internal organization, function and processes which may cause distraction from our operations and negatively affect our business. We may not be able to hire an adequate number of new and qualified employees to support our growth strategy.

If we are unable to attract and retain key employees and hire qualified management, technical and vehicle engineering personnel, our ability to compete could be harmed.

The car industry is rapidly evolving, particularly in the area of e-mobility, and a carmaker’s profitability depends on technological innovation and resources. Our success in such an environment depends, to a large extent, on our management and the ability to retain our key personnel. We are a founder-led business. We depend on the skills and visions of our founders. We benefit from the expertise and knowledge of our research and development team and our competitiveness could be significantly impaired should we be unable to retain the head of our research and development team or any other team member. Any temporary or permanent unavailability or any unexpected loss of one or more of our founders, management members or key employees could adversely affect our business and competitiveness.

Our success also depends, in part, on our continuing ability to identify, hire, attract, train and develop highly qualified personnel. We may have to hire a significant additional number of employees in order to be able to finalize the development of the Sion and start its serial production according to our currently envisioned timelines. We may not succeed in hiring employees in sufficient numbers or at all, as our vehicles are based on a different technology platform than traditional internal combustion engines and individuals with sufficient training in electric vehicles, particularly vehicles using solar technology, are scarce, and as a result, we will need to expend significant time and money to train available employees. Competition for qualified employees is intense, and our ability to hire, attract and retain them depends, among others, on our profitability and ability to provide competitive compensation. We have a limited operating history and our brand and reputation as an employer are not as developed as that of established car manufacturers. We have not yet generated any revenues, significantly depend on external financing and may not be able to offer potential employees attractive or competitive remuneration.

We may therefore not be able to attract, integrate, develop or retain qualified personnel in sufficient quantities or at all. Any failure to do so could adversely affect our business, including the execution of our global business strategy. Unqualified or unreliable personnel may also expose us to various risks not directly related to our operations, such as violations against insider trading laws, the misappropriation of trade and business secrets or personal data from our technology infrastructure, material incorrect entries in our accounting systems, weak management of our customer or supplier relationships or logistics management.

We are exposed to various liability risks resulting from past or existing employment relationships and labor laws.

We employ an increasing number of employees and expect our workforce to grow significantly in the short-term. However, a significant number of employees decided to leave us and we also had to terminate employment relationships with numerous individuals in the past due to various reasons. We are exposed to liability and other risks related to former employees. For example, former employees may assert that the termination of their employment relationship by us was not justified under applicable law and may seek re-employment, monetary compensation or damages. In addition, despite their termination, former employees may still claim to be, fully or partially, entitled to certain benefits granted to them while they were still employed with us, such as, for example, certain incentives, bonuses or pension entitlements.

The management of a growing workforce poses various risks and challenges, particularly in the European Union and Germany, where the vast majority of our workforce is located. The labor laws in

Germany are complex and rather employee-friendly. For example, the German Working Time Act (*Arbeitszeitgesetz*) sets out a strict framework for, amongst others, the length of working shifts and resting breaks, the definition of working days and holidays, work on holidays, compensation and the obligation of employers to record working times of employees. There can be no assurance that we have complied or will comply in all material aspects with applicable labor laws, which may lead to the imposition of material fines or even criminal liability and may significantly negatively affect our reputation.

We face risks related to health epidemics, including the recent COVID-19 pandemic, which could have a material adverse effect on our business and results of operations.

We face various risks related to public health issues, including epidemics or pandemics, such as COVID-19. The impact of COVID-19, including changes in consumer and business behavior, pandemic fears and market downturns, and restrictions on business and individual activities, has created significant volatility in the global economy and led to reduced economic activity. The spread of COVID-19 has also created a disruption in the manufacturing, delivery and overall supply chain of vehicle manufacturers and suppliers, and has led to a global decrease in vehicle sales in markets around the world. Various aspects of our business cannot be conducted remotely and thus may not be carried out during work-from-home periods. The pandemic may also affect the interest of our customers in our innovative car-sharing and ride-pooling networks to which each Sion will be connected. Our car-sharing and ride-pooling solution as currently envisioned may not be compliant in all aspects with relevant or potential legislation related to COVID-19 or any other pandemic, concerning aspects such as minimum distance, the maximum number of persons allowed in a confined space or others. Any cases of infections that could be traced back to the use of one of our shared vehicles, or any other car-sharing services, whether through our fault or not, could adversely affect our reputation, customers' interest and trust in our sharing services, as well as car-sharing services in general.

The spread of COVID-19 has caused us to modify our business practices (including employee travel, work from home and cancellation or reduction of physical participation in sales activities, meetings, events and conferences), and we may take further actions as may be required by government authorities or that we determine to be in the best interests of our employees, customers, suppliers, manufacturing partners and others business partners. There is no certainty that such actions will be sufficient to mitigate the risks posed by the virus or otherwise be satisfactory to government authorities. If significant portions of our workforce are unable to work effectively, including due to illness, quarantines, social distancing, government actions or other restrictions in connection with the COVID-19 pandemic, our operations will be impacted.

Measures taken to address the spread of COVID-19 may also lead to a trend to work-from-home, which could result in lower demand for cars and could negatively impact our sales and marketing activities. In 2020, COVID-19 had a slightly negative impact on orders and advance payments received from customers. Based on the most current information available, COVID 19 may continue to have a negative effect on orders and advance payments received from customers in 2021.

The extent to which the COVID-19 pandemic impacts our business, prospects and results of operations will depend on future developments, which are highly uncertain and cannot be predicted, including, but not limited to, the duration and spread of the pandemic, its severity, the existence or emergence of potentially more infectious or harmful variants, the actions to contain the virus or mitigate its impact, the effect and penetration of vaccinations, the availability of medication and how quickly and to what extent normal economic and operating activities can resume. The COVID-19 pandemic could limit the ability of our customers, suppliers, third-party manufacturing partners and other business partners to perform, including third-party suppliers' ability to provide components and materials used in our vehicles. We may also experience an increase in the cost of raw materials used in our commercial production of vehicles. Even after the COVID-19 pandemic has subsided, we may continue to experience an adverse impact to our business as a result of its global economic impact, including any recession that has occurred or may occur in the future.

Difficult macroeconomic conditions, such as decreases in per capita income and level of disposable income, increased and prolonged unemployment, or a decline in consumer confidence as a result of the COVID-19 pandemic could have a material adverse effect on the demand for our vehicles. Under difficult economic conditions, potential customers may seek to reduce spending by forgoing our vehicles for other

traditional options, increase use of public and mass transportation options or may choose to keep their existing vehicles, and cancel reservations.

There are no comparable recent events which may provide guidance as to the effect of the spread of COVID-19 and a pandemic, and, as a result, the ultimate impact of the COVID-19 pandemic or a similar health epidemic is highly uncertain and subject to change. We do not yet know the full extent of COVID-19's impact on our business, our operations or the global economy as a whole. However, the effects could have a material impact on our results of operations, and we will continue to monitor the situation closely.

Our operations could be adversely affected as a result of disasters or unpredictable events.

Our operations could be disrupted, among others, by natural disasters such as earthquakes, fires or explosions, pandemics and epidemics, power outages, terrorist attacks, cyberattacks or other critical events. This also applies to the operations of our suppliers and other business partners. Some of our production sites may be, should we geographically expand our operations, in regions that could be affected by natural disasters such as flooding or earthquakes. Disruptions may also result from possible regulatory or legislative changes in the relevant jurisdictions of our, our suppliers' or our business partners' operations.

Risks Related to Our Financial Position

We will have to raise additional funds until the start of the production of the Sion and potentially beyond, which may not be available to us on acceptable terms or at all when we need them.

According to our current estimates, we currently expect to need funds in the total amount of at least €354 million between September 2021 and the start of the production of the Sion, which we currently envisage to begin in the first half of 2023 (based on soft tooling production to be subsequently replaced by hard tooling), for additional development activities, the initiation of serial production and obtaining of street certification and to finance overhead costs until then. These funds are required for the completion of the development and testing of the Sion, the acquisition of the relevant production and supplier tooling for the Sion (such as test-benches, manufacturing equipment for parts, machinery for body construction and final assembly) and our operational expenditures. Any delay of the start of production will lead to higher funding needs. See also “—Our ability to develop vehicles is unproven and we may fail to finalize development and realize the commercialization of the Sion within the intended timeframe, budget or at all.”

The funding that we expect to obtain from this offering will not be sufficient to secure our needs through the start of production of the Sion. Accordingly, we will need to raise additional capital in significant amounts in the near future. Our funding needs may even increase beyond our current projections should we have to significantly change the design and development of the Sion due to, for example, undiscovered design flaws, lacking certification of, or a need to reengineer, car components, the replacement of one of our suppliers, a higher need for personnel than planned, or regulatory changes regarding, for example, increased safety standards, such as a requirement for a certain driver assistance system. Shifts in the timeline due to a lack of required financing or development taking longer than originally anticipated may also increase our external financing requirements. We would also have to secure additional financing should we decide to grow and expand our product portfolio and operations.

We may find that our efforts related to the growth of our operations are more expensive than we currently anticipate or may not be available at all, and these efforts may not result in revenues, which would further increase our losses and external financing needs. If we are unable to raise required funding, we may not reach commercial operations. Our ability to generate revenue and achieve profitability in the future depends in large part on our ability, alone or with our business partners, to achieve milestones and to successfully complete the development of, obtain the necessary regulatory approvals for, and commercialize, our vehicles and/or solar technologies. We may never succeed in these activities and may never generate revenue from vehicle sales that is significant enough to achieve profitability. Even if we achieve profitability in the future, we may not be able to sustain profitability in subsequent periods.

If we cannot raise additional funds when we need them, our financial condition, results of operations, business and prospects could be materially adversely affected. We may not be able to successfully finalize, market and commercialize the Sion should we not be in a position to secure additional funds. If we do not succeed in raising sufficient additional funds, we will not be able to continue as a going concern. See “—Risks

Related to Our Business and Operations—We are an early stage company with a history of significant losses and expect continuing losses for the foreseeable future.”

We may not be able to obtain or agree on acceptable terms and conditions for all or a significant portion of the government grants, loans and other incentives for which we may apply, which may negatively affect our ability to reach funding goals.

We may apply for federal and state grants, loans and tax incentives under various government programs designed to stimulate the economy or to support the production of electric vehicles and related technologies. We anticipate that there may be new opportunities for us to apply for grants, loans and other incentives from the German federal or state government(s), the European Union or other governments or quasi-governmental organizations.

Our ability to obtain funds or incentives from these sources is subject to the availability of funds under applicable programs and approval of our applications to participate in such programs. The application process for these funds and other incentives will likely be highly competitive. We cannot assure you that we will be successful in obtaining any of these grants, loans and other incentives. If we are not successful in obtaining any of these additional incentives and unable to find alternative sources of funding to meet our planned capital needs, our business and prospects could be materially adversely affected.

The unavailability, reduction or elimination of government and economic incentives or imposition of any additional taxes or surcharges could have a material adverse effect on the development of the e-mobility market, our business, prospects, financial condition and operating results.

Many governments have established e-mobility funding programs, government subsidies, tax benefits and other economic purchase incentives in relation to the acquisition of electric vehicles. Any reduction, elimination or discriminatory application of government funding programs or subsidies and other economic incentives or imposition of any additional taxes and surcharges may negatively impact the competitiveness of the electric vehicle industry generally or the Sion in particular.

We do not expect to pay any dividends in the foreseeable future.

We currently intend to retain our future earnings, if any, for the foreseeable future, to fund the completion of development of the Sion and start of its serial production, as well as the growth of our business. We currently do not intend to pay any dividends to holders of our common shares. As a result, capital appreciation in the price of our common shares, if any, will be your only source of gain on an investment in our common shares. See “Dividend Policy.”

Regulatory, Legal and Tax Risks

We are subject to substantial regulation and unfavorable changes to, or failure by us to comply with, these regulations could substantially harm our business and operating results.

Electric vehicles as well as certain of our innovative solutions are subject to substantial regulation under international, national, regional, and local laws. We expect to incur significant costs in complying with these regulations. In addition, additional regulatory costs or hurdles may materialize in the future as we expand our operations, as we have not yet assessed all relevant legal aspects of our operations and current business model with respect to the relevant legal framework of all jurisdictions we may conduct business in. For example, our car-sharing and ride-pooling solution as currently envisioned may not be feasible in all relevant jurisdictions and may conflict with local laws on the transport of passengers. For example, customers who offer ride-pooling on a regular basis in return for payment may require a governmental license for the transport of persons in certain jurisdictions. Furthermore, our power sharing solutions to be included in our vehicles, which may allow for transfer of power from a vehicle in return for a payment, may have to comply with calibration laws in certain jurisdictions and any violations could have significant implications for any individual making use of such a solution or us.

Furthermore, regulations related to the electric vehicle industry and alternative energy are evolving and we face risks associated with changes to these regulations, including, but not limited to, increased sensitivity by regulators to the needs of established automobile manufacturers with large employment bases, high

fixed costs and business models based on the internal combustion engine, which could lead them to pass regulations that could reduce the compliance costs of such established manufacturers or mitigate the effects of government efforts to promote electric vehicles. Regulators may specifically support selected established automobile manufacturers in their transition from internal combustion engine technologies to alternative technologies, which may distort competition in the e-mobility market. In addition, the adoption of new or amendment of existing regulations or frameworks regarding the subsidization of electric vehicles or the promotion of alternative fuel concepts could negatively affect demand for our vehicles or electric vehicles in general. Furthermore, changes to the regulations governing the assembly and transportation of battery cells could increase the cost of battery cells or make such commodities more difficult to obtain.

To the extent laws change, our vehicles may not comply with applicable international, national, regional or local laws, which would have an adverse effect on our business. Compliance with changing regulations could be burdensome, time consuming and expensive. To the extent compliance with new regulations is cost prohibitive, our business, prospects, financial condition and operating results would be adversely affected.

We may face regulatory and other challenges attempting to sell our vehicles directly to customers.

Our business plan includes the direct sale of the Sion to our customers via pre-orders that can be placed on our website in order to provide a cost-efficient marketing approach and save dealer margins. Certain jurisdictions, which may become relevant for our operations in the future, require a license to sell vehicles within that jurisdiction, prohibit carmakers from directly selling vehicles to customers or require a physical dealership within that jurisdiction to deliver vehicles to customers. We have not performed complete legal analyses for all potentially relevant jurisdictions in which we may sell our vehicles.

As a result, we may not be able to sell and deliver our vehicles in each relevant jurisdiction where we, currently or in the future, plan to market our vehicles, which would adversely affect our business, prospects, financial condition and operating results. In addition, the online-based marketing and sale of our vehicles to our customers may trigger local taxing obligations for our customers or us, depending on the jurisdiction from which a car is ordered, which we may not have yet considered and may make our option less attractive to customers in key markets or impose additional financial burdens.

Furthermore, our distribution model is not common in the automotive industry today and is relatively new and unproven, therefore subjecting us to substantial risk as it requires, in the aggregate, significant expenditures and provides for slower expansion of our distribution and sales systems than may be possible by utilizing the traditional dealer franchise system. For example, we will not be able to utilize long established sales channels developed through a franchise system to increase our sales volume. Moreover, we will be competing with car manufacturers with well established distribution channels. Established car manufacturers or dealer associations may challenge or litigate any governmental license or other authorization allowing us to directly sell our vehicles or may engage in regulatory and/or legislative efforts to interpret laws or propose laws that, if enacted, would prevent us from directly selling our cars to customers. Our success will depend in large part on our ability to effectively develop our own sales channels and marketing strategies. Any workaround to realize our direct sales strategy could add significant complexity and, as a result, costs to our business.

We are subject to various environmental laws and regulations that could impose substantial costs upon us.

Our operations, are or will be subject to international, national, regional and/or local environmental laws and regulations, including, in the jurisdictions in which we intend to sell our products, laws relating to the use, handling, storage, disposal and human exposure to hazardous materials (including the German Federal Soil Protection Act (*Bundes-Bodenschutzgesetz*), the US Comprehensive Environmental Response, Compensation and Liability Act, Regulation (EC) no. 1907/2006 (REACH), or CERCLA). Environmental and health and safety laws and regulations can be complex, and we expect that we will be affected by future amendments to such laws or other new environmental and health and safety laws and regulations, which may require us to change our operations, potentially resulting in a material adverse effect on our business, prospects, financial condition and operating results.

These laws can give rise to liability for administrative oversight costs, cleanup costs, property damage, bodily injury, fines and penalties. Capital and operating expenses needed to comply with environmental laws

and regulations can be significant, and violations may result in substantial fines and penalties, third-party damages, suspension of production or a cessation of our operations.

We may be involved in legal proceedings based on the alleged violation of intellectual property rights, such as patent or trademark infringement claims, which may be time-consuming and cause us to incur substantial costs.

Technological innovation will be a crucial aspect of success on the electric vehicle market. We have been granted three patents for our technologies and intend to continue to file additional patent applications in the future. As the number of competitors in the electric vehicle market increases, and as the number of patents issued in this area grows, the possibility of patent infringement claims against us increases. While we are not aware that our technologies infringe the proprietary rights of any third party, we do not regularly conduct freedom to operate searches. We may also in-license patents and other intellectual property from third parties, including suppliers and service providers, and we may face claims that our use of this in-licensed technology infringes the intellectual property rights of others. In such cases, we will seek indemnification from our licensors. However, our rights to indemnification may be unavailable or insufficient to cover our costs and losses.

We may be required to participate in interference, derivation or opposition proceedings that concern disputes regarding priority of inventions disclosed in our patents. Determining patent infringement by a product, as well as priority of inventions and other patent-related disputes, involves complex legal and factual issues and the outcome is often uncertain. We have not conducted any significant search of patents issued to third parties, and third-party patents containing claims covering our technology or methods that predate our patents may exist. Because of the number of patents issued and patent applications filed in our technical areas or fields (including some pertaining specifically to electric vehicles), our competitors or other third-parties may assert that our technology and the methods we employ in the use of products incorporating our technology are covered by patents held by them. In addition, because patent applications can take many years to issue and because publication schedules for pending applications vary by jurisdiction, we may not be aware of certain patent applications that are currently pending, which applications may result in issued patents that our technology or other future products would infringe. Also, because the claims of published patent applications can change between publication and patent grant, there may be published patent applications that may ultimately issue with claims that we infringe.

The Sion will make use of complex hardware and software solutions and we may not have the resources to sufficiently assess potential infringements of third-party patents or other intellectual property rights. Our ability to successfully commercialize the Sion may be significantly impaired should any of its components violate third parties' intellectual property rights, particularly with respect to our key technologies, such as our solar technology. The scope of patent claims is subject to construction based on interpretation of the law, the written disclosure in a patent and the patent's prosecution history. Our interpretation of the relevance or the scope of a patent or a pending application may be incorrect. Established car manufacturers or other market players may invest significant resources and capital to protect their intellectual property and scan the market for potential violations. There is a heightened risk that inquiries or legal proceedings based on the alleged violation of intellectual property rights are initiated by established car manufacturers that develop and test technologies similar to ours and that have much more resources and funds than us. Other companies owning patents or other intellectual property rights relating to technologies relevant for us, such as battery packs, solar modules, power sharing solutions or electronic power management systems may also allege infringement of such rights. In addition, we may also be exposed to claims from individuals who were or are engaged in the design and development of our vehicles or technologies. The publicity created in connection with this offering and thereafter will draw additional attention to us and likely generally increase the risks of such claims and legal proceedings, no matter whether such claims lack the required merits or not or are of merely fraudulent nature.

In response to a determination that we have infringed upon a third party's intellectual property rights, we may be required to do one or more of the following:

- cease or delay development, production, sales or use of the Sion or any other of our vehicles that incorporate the asserted intellectual property in general or in certain jurisdictions;
- pay substantial damages, settlements or ongoing royalties;

- obtain a license from the owner of the asserted intellectual property right, which license may not be available on reasonable terms or at all;
- enter into cross-licenses with our competitors; or
- redesign one or more aspects or systems of our vehicles, which may require us to invest substantial resources in the redesign process.

In addition, we may be required to indemnify our customers and distributors against claims relating to the infringement of intellectual property rights of third parties related to our products. Third parties may assert infringement claims against our customers or distributors. These claims may require us to initiate or defend protracted and costly litigation on behalf of our customers or distributors, regardless of the merits of these claims. If any of these claims succeed, we may be forced to pay damages on behalf of our customers or distributors, or may be required to obtain licenses for the products or services they use. If we cannot obtain all necessary licenses on commercially reasonable terms, our distributors may be forced to stop distributing our products or services, and our customers may be forced to stop using our products or services.

The outcome of intellectual property litigation is subject to uncertainties that cannot be adequately quantified in advance. Because of the substantial amount of discovery required in certain jurisdictions in connection with intellectual property litigation, there is a risk that some of our confidential information could be compromised by disclosure during this type of litigation. If we are required to obtain a license from any third party in order to use the infringing technology and continue developing, manufacturing or marketing our vehicles, we may not be able to obtain such required license on commercially reasonable terms or at all, including due to competitors being unwilling to provide us a license under any terms. A successful claim of infringement of intellectual property against us could therefore materially adversely affect our business, prospects, operating results and financial condition. Any litigation or claims, whether valid or invalid, could result in substantial costs and diversion of resources and we have not yet build any reserves for litigation related to intellectual property.

If our trademarks and trade names are not adequately protected, we may not be able to build name recognition in our markets of interest, which may adversely affect our business.

Our trademark registrations and applications are valuable assets and may be challenged, infringed, circumvented or declared generic or determined to infringe a third party's trademarks. We may not be able to protect our rights to these trademark registrations or applications, which may be necessary to build name recognition among potential collaborators or customers in our markets of interest. At times, competitors may adopt trademarks or trade names similar to ours, thereby impeding our ability to build brand identity and possibly leading to market confusion. In addition, there could be potential trademark infringement claims brought by owners of other trademarks or trademarks that incorporate variations of our trademark registrations or applications. We have not conducted any availability searches for trademarks to assess whether our trademark registrations would not infringe a third party's trademarks, or whether our trademark applications would be successfully registered. We can provide no assurance that our pending trademark applications will be approved. Successful third-party challenges to the use of any of our trademarks may require us to rebrand our business or certain products or services associated therewith.

Over the long term, if we are unable to establish name recognition based on our trademarks, then we may not be able to compete effectively and our business may be adversely affected. We may fail to adequately maintain the quality of our products and services associated with our trademarks, and any loss to the distinctiveness of our trademarks may cause us to lose certain trademark protection, which could result in the loss of goodwill and brand recognition in relation to our name and products. In addition, we may license our trademarks to third parties, such as distributors. Though these license agreements may provide guidelines for how our trademarks may be used, a breach of these agreements or misuse of our trademarks by these licensees may jeopardize our rights in or diminish the goodwill associated with our trademarks. Our efforts in enforcing or protecting our trademarks may be ineffective and could result in substantial costs and diversion of resources and adversely affect our business.

We may be subject to claims that our employees have wrongfully used or disclosed alleged trade secrets of their former employers or claims asserting ownership of what we regard as our own intellectual property.

Some of our employees were previously employed at other companies that may have proprietary rights related to our business. Some of these employees may have executed proprietary rights, non-disclosure and

noncompetition agreements in connection with such previous employment. Although we try to ensure that such individuals do not use the proprietary information or know-how of others in their work for us, we may be subject to claims that we or these employees have used or disclosed intellectual property, including trade secrets or other proprietary information, of their former employers. We are not aware of any such disclosures, or threatened or pending claims related to these matters, but in the future, litigation may be necessary to defend against such claims. If we fail to defend any such claims, we may lose valuable intellectual property rights or personnel, and may be required to pay monetary damages and be enjoined from conducting our business as contemplated. Even if we are successful in defending against such claims, litigation can be expensive and time-consuming.

Intellectual property rights do not necessarily address all potential threats to our competitive advantage.

The degree of future protection afforded by our intellectual property rights is uncertain because intellectual property rights have limitations, and may not adequately protect our business or permit us to maintain our competitive advantage.

For example:

- others may be able to make products or processes that are identical or similar to any product or process we may develop and commercialize or utilize similar intellectual property or technologies that we now or may in the future own or have in-licensed;
- we or our future licensors or collaborators might not have been the first to make the inventions covered by the patents or pending patent applications that we own or have in-licensed;
- we or our future licensors or collaborators might not have been the first to file patent applications covering certain of our or their inventions;
- others may independently develop similar or alternative intellectual property or technologies or duplicate any of our intellectual property or technologies without infringing our owned or in-licensed intellectual property rights;
- it is possible that our pending patent applications or those that we may own or in-license in the future will not lead to issuance of patents;
- patents that we own or have in-licensed may be held invalid or unenforceable, including as a result of legal challenges by our or our licensors' competitors;
- our competitors might conduct research and development activities in countries where we do not have patent rights and then use the information learned from such activities to develop competitive products or processes for sale in our major commercial markets;
- we may not develop additional trade secrets or proprietary know-how that is patentable;
- the patents of others may have an adverse effect on our business; and
- we may choose not to file a patent in order to maintain certain trade secrets or proprietary know-how, and a third party may subsequently file a patent covering such trade secrets or proprietary know-how.

Should any of these events occur, they could have a material adverse effect on our business, financial condition, results of operations and reputation.

We intend to retain certain personal data about our customers and may be subject to various privacy laws.

The Sion will, and our other future car models may, be equipped with complex information technology. The Sion will be connected to car-sharing and ride-pooling networks and our customers may access their car and define the terms of shared use via our own application. We intend to use our vehicles' technology systems to log information about each vehicle's use (including the vehicle location, usage patterns of car-sharing and ride-pooling options, data on defects and repairs) in order to aid us in vehicle diagnostics, repair and maintenance. We may also use such data for marketing purposes and to induce customers to ensure proper vehicle maintenance or promote car-sharing or ride-pooling. Our customers may object to the use of this data, which may increase our vehicle maintenance costs and harm our business prospects.

Our customers' information in conducting our business may subject us to legislative and regulatory burdens and requirements in the European Economic Area ("EEA") and the United States of America that could require notification of data breaches, restrict our use of such information and hinder our ability to acquire new customers or market to existing customers. We have not yet implemented a comprehensive set of internal- or external-facing written data protection and privacy policies, procedures and rules. Non-compliance or a major breach of our network security and systems could have serious negative consequences for our business and future prospects, including possible fines, penalties and damages, reduced customer demand for our vehicles, and harm to our reputation and brand. For instance, Regulation (EU) 2016/679 of the European Parliament and of the Council of April 27, 2016 on the protection of natural persons with regard to the processing of personal data and on the free movement of such data (the General Data Protection Regulation, "GDPR") imposes strict limitations on the processing of personal data. The GDPR and other data privacy laws regulate when and how personal data may be collected, for which purposes it may be processed, for how long such data may be stored and to whom and how it may be transferred. The GDPR contains strict requirements for obtaining the consent of data subjects (i.e., the persons to whom personal data relates) to the use and processing of their personal data and also requires the implementation of appropriate technical and organizational measures, depending on the nature of the processing activities, and imposes certain documentation obligations relating to data processing activities. The GDPR also imposes various obligations in the context of processing of data, including, among others, far-reaching transparency, data minimization, storage limitations, privacy by design and privacy by default obligations, data security, integrity and confidentiality obligations. In addition, it may require data protection impact assessments where the data processing is likely to result in a high risk to the rights and freedoms of individuals. In case of a violation of the provisions of the GDPR, we could be subject to fines of up to €20,000,000 or up to 4% of our total worldwide annual turnover of the preceding financial year, whichever is higher, and other administrative penalties. We may also be liable should any individual who has suffered financial or non-financial damage arising from our infringement of the GDPR exercise their right to receive compensation against us. Furthermore, adverse publicity relating to our failure to comply with the GDPR could cause a loss of goodwill, which could have an adverse effect on our reputation, brand, business and financial condition. In addition, local authorities may construe new regulations in a way that is even more restrictive and there is no guarantee that we will be able to comply with such restrictive approaches.

There is a risk that personal data that we process could become public if there were a security breach in respect of such data and, if such security breach were to occur, we could face liability under data protection laws, including the GDPR, and lose the goodwill of our customers, which may have a material adverse effect on our reputation, brand, business and financial condition.

We are exposed to the risk of litigation or other legal proceedings that could cause us to spend substantial resources and disrupt our business.

We are exposed to the risk of product liability claims, regulatory action and litigation if any defect of our vehicles is alleged to have caused loss or injury. The automobile industry generally experiences an abundance of product liability claims. We face the risk of significant monetary exposure to product liability claims in the event our vehicles do not perform as expected or contain design, manufacturing, or warning defects, and to claims without merit, or in connection with malfunctions, resulting in personal injury or death. Product liability claims could arise, for example, from malfunctions, defects, quality issues relating to, or abuse of, any of our technologies implemented in or offered with our vehicles, or defects, quality issues or malfunctions related to any components used in our vehicles, such as batteries, airbags or brakes. Our risks in this area are particularly pronounced given the limited field experience of our vehicles and because we are a new entrant into the market. Any product liability claims or corresponding regulatory actions against us could result in increased costs and could adversely affect our reputation and our perception by our customers. We may not be able to secure product liability insurance coverage on commercially acceptable terms, at reasonable costs when needed, or at all and insurance coverage might not be sufficient to cover all potential product liability claims.

We may also face litigation and legal proceedings based on advertisements or other public statements should such statements turn out to be unrealistic, unfeasible or false or should the overall advertised performance or specifications of our vehicles deviate from such advertisements or public statements. For example, we publicly communicated that our vehicles will have a battery range of approximately

305 kilometers, or up to 190 miles and a weekly solar based range of up to 245 kilometers, or up to 152 miles. However, these specifications indicate our current expectations and development targets with respect to the battery- and solar-based range of our vehicles until the series production of our vehicles and there is no guarantee that our vehicles will ultimately achieve these specifications, which depend on the success of the development efforts of our battery supplier and/or us.

In addition, in connection with a crowdfunding campaign launched in December 2019, our three founders Laurin Hahn, Navina Persteiner and Jona Christians announced that they would contribute their profit participation rights associated with their shares in Sono Motors GmbH (while the voting rights associated with the underlying shares would remain with the founders), equaling 64.07% of all profit participation rights at that time, into a “community pool” from which certain monetary benefits in the form of so-called Sono Points would then be awarded. The founders intended such monetary benefits in the form of Sono Points to be allocated among already existing customers and new customers who placed a reservation for a vehicle, depending, with respect to new customers, on the timing of the reservation and the amount of the advance payment of the relevant new customer. The Sono Points would represent participating entitlements concerning dividends, liquidation proceeds and proceeds from the sales of shares attributable to the community pool. However, a legal assessment later revealed substantial legal obstacles in the concept as envisioned by our founders and that it was not feasible from a tax perspective. Our founders, together with their external advisors, have in the meantime developed an alternative structure for the granting of Sono Points to our customers as originally envisioned with respect to the shares in Sono Group N.V. pursuant to which our three founders will each contribute their relevant shares in Sono Group N.V. into limited partnerships controlled by a founder and governed by German law (*Kommanditgesellschaften*) and will enter into contractual sub-arrangements with the relevant Sono Point beneficiaries regarding their monetary participation entitlements. However, this alternative structure remains subject to further assessment and final approval, including by, among others, German tax authorities. There is no guarantee that this structure will be ultimately feasible or that our founders may be able to offer a feasible structure for the granting of Sono Points at all. In addition, the current alternative structure for the granting of Sono Points focuses on tax issues under German law and may not adequately cover any other relevant issues in connection with the communication during the crowdfunding campaign regarding Sono Points. In particular, our founders may not be able to address issues and financial or any other burdens with respect to Sono Points of any customers who were or are not located in Germany. In addition, not all aspects of the scheme originally envisioned by our founders for granting the Sono Points may be fully and adequately reflected in the alternatively developed structure and/or the alternatively developed structure may incorporate new structural elements or otherwise substantially deviate to the disadvantage of customers from what our founders originally contemplated and publicly communicated. For example, under the alternative structure, Sono Points will be forfeited, if a customer terminates his/her reservation and the relevant Sono Points will fall back to the founders and not lead to a proportionate increase of Sono Points (or participations in the community pool) of the remaining customers. Further, the shares underlying the Sono Points and contributed into the community pool may generally be transferred by the founders under certain conditions, which may negatively affect the actual value of participation entitlements associated with Sono Points. In addition, the alternative structure allows the allocation of additional Sono Points to new customers, which would result in the dilution of the participation entitlements of existing customers. Therefore, not all customers who were previously promised Sono Points may ultimately receive Sono Points at the terms and conditions originally communicated or at all. Disappointed customers who may not receive Sono Points at the terms and conditions originally promised or at all and/or other members of our community may initiate lawsuits against our founders or us and may trigger waves of negative publicity should we not be able to offer, in full or in part, a feasible structure for the granting of Sono Points in all relevant jurisdictions. Further, we cannot preclude that Sono Group N.V. or Sono Motors GmbH will be held liable with respect to any possible significant obligations or claims under the Sono Points scheme.

We may or will be, as the case may be, subject to anti-corruption, anti-bribery, anti-money laundering, financial and economic sanctions and similar laws and our compliance systems may not be sufficient to adequately prevent or detect legal, financial and operational risks.

Our business may or will be subject to various laws and regulations relating to, among other things, prevention of illegal employment, bribery and corruption, and money laundering, as well as compliance with antitrust, data protection (particularly the EU General Data Protection Regulation), consumer

protection, minimum wage regulations, various criminal as well as export control regulations and trade and economic sanctions and embargoes on certain countries, persons, groups and/or entities, projects and/or activities. We are reliant on the compliance of our employees and the members of our management board, our contractors, consultants, agents, vendors and (other) collaboration partners with applicable laws and compliance policies implemented by us.

However it cannot be excluded that our employees, the members of the management board, our contractors, consultants, agents, vendors and (other) collaboration partners have committed or will commit criminal, unlawful or unethical acts (including corruption) or that our compliance and risk management and its monitoring capabilities may prove insufficient to prevent or detect any breaches of the law. Any such acts or breaches of law could result in whistle-blower complaints, adverse media coverage, (criminal) investigations, significant civil, administrative, and criminal penalties and damage claims, disgorgement or other sanctions, (collateral) consequences, remedial measures and legal expenses, and cause considerable damage to our reputation, thereby negatively affecting our business, results of operations, financial condition and future business opportunities.

We may become subject to additional Dutch and German taxes, in particular, due to the statutory seat of Sono Group N.V. in the Netherlands.

There is a risk that the German tax authorities classify Sono Group N.V. as Dutch tax resident. If the German tax authorities conclude that Sono Group N.V. is not, has ceased, or ceases to be (also as a consequence of the change of facts or the law), a German tax resident, it could, *inter alia*, become subject to German exit taxation. This could have serious German tax consequences, including German exit taxes or the increase of German withholding taxes on dividends received by the Company. Such German exit taxes could lead to the taxation of the built-in gains in the assets (*e.g.*, intellectual property or goodwill) of Sono Group N.V.

If we do pay dividends, we may need to withhold tax on such dividends payable to holders of our shares in both Germany and The Netherlands.

We currently do not intend to pay any dividends to holders of our common shares. However, if we do pay dividends, we may need to withhold tax on such dividends in both Germany and The Netherlands.

As an entity incorporated under Dutch law, any dividends distributed by us are subject to Dutch dividend withholding tax based on Dutch domestic law. However, on the basis of the 2012 Convention between the Federal Republic of Germany and the Kingdom of The Netherlands for the avoidance of double taxation with respect to taxes on income, or the “double tax treaty between Germany and The Netherlands,” The Netherlands will be restricted in imposing these taxes if we are also a tax resident of Germany and our effective management is located in Germany. This withholding tax restriction does, however, not apply, and Dutch dividend withholding tax is still required to be withheld from dividends, if and when paid to Dutch resident holders of our common shares and non-Dutch resident holders of our common shares that have a permanent establishment in The Netherlands to which their shareholding is attributable. As a result, upon a payment of dividends, we will be required to identify our shareholders in order to assess whether there are Dutch residents (or non-Dutch residents with a permanent establishment in The Netherlands to which the common shares are attributable) in respect of which Dutch dividend tax has to be withheld. Such identification may not always be possible in practice. If the identity of our shareholders cannot be determined, withholding of both German and Dutch dividend tax may occur upon a payment of dividends.

Furthermore, the withholding tax restriction referred to above is based on the current reservation made by Germany under the Multilateral Convention to Implement Tax Treaty Related Measures to Prevent Base Erosion and Profit Shifting, or the MLI, with respect to the tie-breaker provision included in Article 4(3) of the double tax treaty between Germany and The Netherlands, or the MLI tie-breaker reservation. If Germany changes its MLI tie-breaker reservation, we will not be entitled to any benefits of the double tax treaty between Germany and The Netherlands, including the withholding tax restriction, as long as Germany and The Netherlands do not reach an agreement on our tax residency for purposes of the double tax treaty between Germany and The Netherlands, and, as a result, any dividends distributed by us during the period no such agreement has been reached between Germany and The Netherlands may be subject to withholding tax both in Germany and The Netherlands.

Dividends distributed on our common shares to certain related parties in low-taxed jurisdictions might in the future become subject to an additional Dutch withholding tax on dividends.

Under current law, dividends paid to holders of our common shares could become subject to Dutch dividend withholding tax at a rate of 15% under the Dutch Dividend Withholding Tax Act (*Wet op de dividendbelasting 1965*), unless a domestic or treaty exemption or reduction applies. On March 25, 2021, a legislative proposal has been published to introduce an additional withholding tax on dividends in the Netherlands as of January 1, 2024. Based on the legislative proposal, dividends distributed by us to related entities (statutorily defined term) tax resident in jurisdictions that have a corporate income tax rate below 9% (low-taxing states) or jurisdictions that are included on the European Union's blacklist of non-cooperative jurisdictions (non-cooperative jurisdictions for tax purposes) will also become subject to a conditional withholding tax at a rate equal to the highest Dutch corporate income tax rate (currently 25%) at the time of the dividend. The conditional withholding tax on dividends may also apply in situations where artificial structures are put in place with the main purpose or one of the main purposes to avoid the conditional withholding tax or in the event of a hybrid mismatch. The conditional withholding tax on dividends will be reduced, but not below zero, by any Dutch dividend withholding tax withheld in respect of the same dividend payment. As a result, if the shareholder is (A) a related entity and (B)(i) is established or has a permanent establishment a low-taxing state or non-cooperative jurisdiction for tax purposes (ii) is a hybrid entity or a reverse hybrid entity or (iii) is interposed to avoid tax otherwise due by another entity, the tax rate on dividends may rise from 15% to the highest corporate tax rate (currently 25%) as of 2024. The legislative proposal has been approved by the House of Representatives (*Tweede Kamer*) of the Dutch Parliament on September 30, 2021, and is pending for approval by the Senate (*Eerste Kamer*) of the Dutch Parliament before it can enter into force.

We may become a passive foreign investment company ("PFIC"), which could result in adverse United States federal income tax consequences to United States investors.

Based on the projected composition of our income and valuation of our assets, including goodwill, we do not expect to be a PFIC for our current taxable year or in the future, although there can be no assurance in this regard. The determination of whether or not we are a PFIC is made on an annual basis and will depend on the composition of our income and assets from time to time. Specifically, we will be classified as a PFIC for United States federal income tax purposes if either: (1) 75% or more of our gross income in a taxable year is passive income, or (2) the average percentage of our assets by value in a taxable year which produce or are held for the production of passive income (which includes cash) is at least 50%.

Although we do not expect to become a PFIC, our PFIC status is a factual determination that is made annually and thus may be subject to change. It is therefore possible that we could become a PFIC in a future taxable year. In addition, our current position that we are not a PFIC is based in part upon the value of our goodwill which is based on the market value of our shares. Accordingly, we could become a PFIC in the future if there is a substantial decline in the value of our shares.

If we are or were to become a PFIC, such characterization could result in adverse United States federal income tax consequences and burdensome reporting requirements to a holder of common shares if such holder is a United States investor.

Risks Related to Our Initial Public Offering and Our Common Shares

There has been no public market for our common shares prior to this offering, and there is no guarantee that an active and liquid market for our common shares will develop.

Prior to this initial public offering, there was no public market for our common shares, and we cannot assure you that one will develop or be sustained after this offering. If a market does not develop or is not sustained, it may be difficult for any investor to sell his or her common shares held in the Company. Public trading markets may also experience volatility and disruption. This may affect the pricing of our common shares in the secondary market, the transparency and availability of trading prices, the liquidity of our common shares and the extent of regulation applicable to us. We cannot predict the prices at which our common shares will trade. The initial public offering price for our common shares will be determined through our negotiations with the underwriters and may not bear any relationship to the market price at which our common shares will trade after this offering or to any other established criteria of the value of our business.

In the course of past financing rounds we received investments based on valuations of our business by individual investors at the relevant times. Such individual valuations were not confirmed by independent experts and reflect the personal valuation criteria of the relevant investors as well as the specific circumstances under which these investments were made. Consequently, these valuations may have exceeded the valuations at which other parties would have been willing to invest in us. Potential investors should therefore not place undue reliance on past valuations.

In addition, it is possible that, in future quarters, our operating results may be below the expectations of securities analysts and investors. As a result of these and other factors, the price of our common shares may decline.

Sales of substantial amounts of our common shares in the public market, or the perception that these sales may occur, could cause the market price of our common shares to decline.

Sales of substantial amounts of our common shares in the public market, or the perception that these sales may occur, could cause the market price of our common shares to decline. This could also impair our ability to raise additional capital through the sale of our equity securities. Under our articles of association, we will be authorized to issue up to 320,000,000 common shares. Upon an increase of our issued share capital to at least €25,000,000, our authorized share capital will automatically increase to €102,000,000, divided into 1,500,000,000 common shares and 8,000,000 high voting shares, of which 69,081,903 common shares and 3,000,000 high voting shares will be outstanding immediately following this offering. An issuance of new common shares may also lead to substantial dilution of our then existing shareholders. We intend to agree with Berenberg Capital Markets LLC, subject to certain exceptions, not to, directly or indirectly, offer, sell, assign, transfer, pledge contract to sell, or otherwise dispose of any shares of our share capital or securities convertible into or exchangeable or exercisable for any shares of our share capital without the prior written consent of Berenberg Capital Markets LLC during the 180-day period following the date of this prospectus. Our management board members, all of our existing shareholders and holders of certain mandatory convertible senior notes previously issued by us have agreed to substantially similar lock-up provisions, subject to certain exceptions. The lock-up period under the agreements to be entered into with the holders of our mandatory convertible senior notes and with the holders of our common equity raised from December 2020 to June 2021 will cover the 90-day period following the date of this prospectus. Following the expiration of the lock-up period, our existing shareholders may determine to sell their common shares, subject to certain restrictions. See “Description of Share Capital and Articles of Association” and “Common Shares Eligible for Future Sale” in this prospectus. We cannot predict the size of future issuances of our shares or the effect, if any, that future sales and issuances of shares would have on the market price of our common shares.

The market price of our common shares could fluctuate significantly, which could result in substantial losses for purchasers of our common shares in this offering.

The stock market in general and the market for smaller technology companies in particular have experienced extreme volatility that has often been unrelated to the operating performance of particular companies. As a result of this volatility, you may not be able to sell your common shares at or above the public offering price and you may lose some or all of your investment. Following this offering, the market price of our common shares will be affected by the supply and demand for our common shares, which may be influenced by numerous factors, many of which are beyond our control, including:

- fluctuation in actual or projected results of operations;
- changes in projected earnings or failure to meet securities analysts’ earnings expectations;
- the absence of analyst coverage;
- negative analyst recommendations;
- changes in trading volumes in our common shares (including by the sale of shares granted to our employees under employee participation programs);
- large-volume or targeted transactions by short-sellers;
- changes in our shareholder structure;

- changes in macroeconomic conditions;
- the activities of competitors and sellers;
- changes in the market valuations of comparable companies;
- our ability to successfully finalize development of, market and commercialize the Sion as well as future car models;
- the recruitment or departure of key management or scientific personnel or other key employees;
- significant lawsuits, including patent, shareholder or customer litigation;
- changes in investor and analyst perception with respect to our business or the car industry in general; and
- changes in the statutory framework applicable to our business.

As a result, our share price may be subject to substantial fluctuation.

In addition, general market conditions and fluctuation of share prices and trading volumes could lead to pressure on the market price of our common shares, even if there may not be a reason for this based on our business performance or earnings outlook. Furthermore, investors in the secondary market may view our business more critically than investors in this offering, which could adversely affect the market price of our common shares in the secondary market. In addition, prices for companies with a limited operating history, particularly in industries with barriers such as the car industry, may be more volatile compared to share prices for established companies or companies from other industries.

If the market price of our common shares declines as a result of the realization of any of these risks, investors could lose part or all of their investment in our common shares.

Additionally, in the past, when the market price of a stock has been volatile, holders of that stock have sometimes instituted securities class action litigation against the company that issued the shares. If any of our shareholders brought a lawsuit against us, we could incur substantial costs defending the lawsuit. Such a lawsuit could also divert the time and attention of our management from our business, which could significantly harm our profitability and reputation.

Our dual-class share structure with different voting rights will limit your ability as a holder of common shares to influence corporate matters and could discourage others from pursuing any change of control transactions that holders of common shares may view as beneficial.

We have a dual-class share structure, which we intend to maintain for the foreseeable future, as our share capital consists of common shares and high voting shares. In respect of matters requiring the votes of shareholders, holders of common shares will be entitled to one vote per share, while holders of high voting shares will be entitled to 25 votes per share. Each high voting share is convertible into one common share at any time by the holder thereof, while common shares are not convertible into high voting shares under any circumstances.

The high voting shares are held by Laurin Hahn and Jona Christians, two of our founders and management board members. Following this offering, Laurin Hahn will hold approximately 40.71% and Jona Christians will hold approximately 36.64% of our total voting rights (if the underwriters exercise their option to purchase additional common shares from us in full). This concentration of ownership may discourage, delay or prevent a change in control of our Company, which could deprive our other shareholders of an opportunity to receive a premium for their common shares as part of a sale of our Company and might ultimately affect the market price of our common shares. This concentrated control will limit your ability to influence corporate matters that holders of common shares may view as beneficial. In addition, certain index providers, such as S&P Dow Jones or FTSE Russell, view multi-class shares critically and have amended their rules so that companies with multi-class shares will no longer be added to their indexes.

We will incur increased costs as a result of operating as a public company, and our management will be required to devote substantial time to new compliance initiatives and corporate governance practices.

As a public company, and particularly once we cease qualifying as an emerging growth company or if we were to lose our status as an emerging growth company in the future, we will incur significant legal,

accounting and other expenses that we did not incur as a private company, including, but not limited to, costs and expenses for management board members' and supervisory board members' fees, increased directors and officers insurance, investor relations, and various other costs of a public company. The Sarbanes-Oxley Act, the Dodd-Frank Wall Street Reform and Consumer Protection Act, the listing requirements of Nasdaq and other applicable securities rules and regulations impose various requirements on public companies, including establishment and maintenance of effective disclosure and financial controls and corporate governance practices. Our management and other personnel will need to devote a substantial amount of time to these compliance initiatives. Moreover, these rules and regulations will increase our legal and financial compliance costs and will make some activities more time-consuming and costly. For example, we expect that these rules and regulations may make it more difficult and more expensive for us to obtain director and officer liability insurance.

We are evaluating these rules and regulations, and cannot predict or estimate the amount of additional costs we may incur or the timing of such costs. These rules and regulations are often subject to varying interpretations, in many cases due to their lack of specificity, and, as a result, their application in practice may evolve over time as new guidance is provided by regulatory and governing bodies. This could result in continuing uncertainty regarding compliance matters and higher costs necessitated by ongoing revisions to disclosure and governance practices.

We are not currently required to comply with the rules of the SEC implementing Section 404 of the Sarbanes-Oxley Act, or Section 404, and therefore are not required to make a formal assessment of the effectiveness of our internal control over financial reporting for that purpose. Upon becoming a publicly traded company, we will be required to comply with the SEC's rules implementing Sections 302, 906 and 404(a) of the Sarbanes-Oxley Act, which will require management to certify financial and other information in our annual reports and attest to the effectiveness of control over financial reporting. Though we will be required to disclose material changes in internal control over financial reporting on an annual basis, we will not be required to make our annual assessment of our internal control over financial reporting pursuant to Section 404(a) until the year of our second annual report required to be filed with the SEC.

To achieve compliance with Section 404 within the prescribed period, we will be engaged in documenting and evaluating our internal control over financial reporting, which is both costly and challenging. In this regard, we will need to continue to dedicate internal resources, potentially engage outside consultants and adopt a detailed work plan to assess and document the adequacy of internal control over financial reporting, continue steps to improve control processes as appropriate, validate through testing that controls are functioning as documented and implement a continuous reporting and improvement process for internal control over financial reporting. We currently have limited accounting personnel and we have begun the process of evaluating the adequacy of our accounting personnel staffing level and other matters related to our internal control over financial reporting. Despite our efforts, the overall control environment is still immature and may expose us to errors, losses or fraud. Hence, there is a risk that we will not be able to conclude, within the prescribed timeframe or at all, that our internal control over financial reporting is effective as required by Section 404(a).

Additionally, while we remain an emerging growth company, we will not be required to include an attestation report on internal control over financial reporting issued by our independent registered public accounting firm pursuant to Section 404(b). Furthermore, after the date we are no longer an emerging growth company, our independent registered public accounting firm will only be required to attest to the effectiveness of our internal controls over financial reporting depending on our market capitalization. An independent assessment of the effectiveness of our internal controls could detect problems that our management's assessment might not.

The consequences of being a public company could have a material adverse effect on our business, financial condition, results of operations and prospects.

We have identified material weaknesses in our internal control over financial reporting. If we are unable to remediate the material weaknesses, or if other control deficiencies are identified, we may not be able to report our financial results accurately, prevent fraud or file our periodic reports as a public company in a timely manner.

Prior to this offering, we have been operating as a private company that was not required to comply with the obligations of a public company with respect to internal controls over financial reporting.

In connection with the audits of our consolidated financial statements for the years ended December 31, 2019 and 2020, we identified multiple material weaknesses in our internal control over financial reporting. A “material weakness” is a deficiency, or a combination of deficiencies, in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of our annual or condensed consolidated interim financial statements will not be prevented or detected on a timely basis. The material weaknesses that were identified primarily related to (i) a lack of consistent and proper application of accounting processes and procedures; (ii) the design and operating effectiveness of information technology general controls for information systems that are significant to the preparation of our consolidated financial statements; (iii) a lack of review and supervision; (iv) the sufficiency of resources with an appropriate level of technical accounting and SEC reporting experience; (v) clearly defined control processes, roles and segregation of duties within our finance and accounting functions.

As a result of the material weaknesses, made journal entries without proper underlying documentation and failed to identify adjustments in various areas, including, but not limited to, capitalization of intangible assets; did not maintain accurate customer and creditor data, did not remit correct VAT declarations, made disbursements for which the Company did not retain sufficient supporting documentation, including underlying invoices; did not have sufficient knowledge of IFRS, including understanding of new accounting standards, in order for the preparation of consolidated financial statements in accordance with IFRS and consideration of the impact of changes on our internal control over financial reporting; did not have an effective risk assessment process to identify and assess the financial reporting risks caused by changes in the operating environment, business operations, personnel or IT systems and to make necessary changes to our financial reporting processes and related internal controls to manage those risks; did not design control activities that are responsive to the identified fraud risks, including the risk of bias and management override of controls; and did not have a proper process in place to sufficiently and timely identify and assess new events and transactions in order to consider necessary adjustments to our system of internal control over financial reporting. We have relied on the assistance of external service providers with expertise in these matters to assist us in the preparation of our consolidated financial statements and in our compliance with SEC reporting obligations related to this offering and expect to continue to do so while we remediate these material weaknesses. We have initiated a remediation plan to address these material weaknesses; however, our control environment still needs to be improved, and as a result, we may be exposed to errors. As part of this plan, we intend to hire additional senior-level and staff accountants to implement robust processes and provide us with additional technical expertise. In the interim, we will continue to engage third parties as required to assist with technical accounting and tax matters. Additionally, we intend to develop and implement robust accounting policies, internal control procedures and provide additional training to our accounting and finance staff. While we are working to remediate the weaknesses as quickly and efficiently as possible, we cannot at this time provide an estimate of the timeframe we expect in connection with implementing our plan to remediate this material weaknesses. These remediation measures may be time-consuming and costly, and might place significant demands on our financial and operational resources.

In addition, neither our management nor any outside advisor has performed an evaluation of our internal control over financial reporting in accordance with the provision of the Sarbanes-Oxley Act because no such evaluation has been required. Had we or an outside advisor performed an evaluation of our internal control over financial reporting in accordance with the provisions of the Sarbanes-Oxley Act, additional material weaknesses may have been identified. Once public, we will be subject to reporting obligations under U.S. securities laws and the Sarbanes-Oxley Act. Section 404 of the Sarbanes-Oxley Act will require that we include a report from management on the effectiveness of our internal control over financial reporting in our annual report on Form 20-F beginning with our annual report for the fiscal year ending December 31, 2022. If we fail to remediate the material weaknesses identified above, our management may conclude that our internal control over financial reporting is not effective. This conclusion could adversely impact the market price of our shares due to a loss of investor confidence in the reliability of our reporting processes.

Our failure to correct the existing material weaknesses or our failure to discover and address any other control deficiencies could result in inaccuracies in our consolidated financial statements and could also impair our ability to comply with applicable financial reporting requirements and make related regulatory filings on a timely basis. As a result, our business, financial condition, results of operations and prospects, as well as

the trading price and listing of our shares, may be materially and adversely affected. We cannot assure you that all of our existing material weaknesses have been identified, or that we will not in the future identify additional material weaknesses.

If we fail to establish and maintain proper and effective internal control over financial reporting, our operating results and our ability to operate our business could be harmed.

Ensuring that we have adequate internal financial and accounting controls and procedures in place so that we can produce accurate consolidated financial statements on a timely basis is a costly and time-consuming effort that needs to be re-evaluated frequently. Our internal control over financial reporting is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of consolidated financial statements in accordance with generally accepted accounting principles. In connection with this offering, we intend to begin the process of documenting, reviewing and improving our internal controls and procedures for compliance with Section 404 of the Sarbanes-Oxley Act, which will require annual management assessment of the effectiveness of our internal control over financial reporting. Our independent registered public accounting firm will not be required to formally attest to the effectiveness of our internal control over financial reporting until the later of our second annual report or the first annual report required to be filed with the SEC following the date we are no longer an emerging growth company, depending on whether we choose to rely on certain exemptions set forth in the JOBS Act.

Implementing any appropriate changes to our internal controls, including compliance with the requirements of Section 404 of the Sarbanes-Oxley Act, may distract our officers and employees, entail substantial costs to modify our existing processes and take significant time to complete. These changes may not, however, be effective in maintaining the adequacy of our internal controls, and any failure to maintain that adequacy, or consequent inability to produce accurate consolidated financial statements on a timely basis, could increase our operating costs and harm our business. In addition, investors' perceptions that our internal controls are inadequate or that we are unable to produce accurate consolidated financial statements on a timely basis may harm our stock price, make it more difficult for us to effectively market and sell our service to new and existing customers and subject us to sanctions or investigations by Nasdaq, the SEC or other regulatory authorities. In addition, our common stock may not be able to remain listed on Nasdaq or any other securities exchange.

Future offerings of debt or equity securities by us could adversely affect the market price of our common shares, and future issuances of equity securities could lead to a substantial dilution of our shareholders.

We will require additional capital in the future to finance our business operations and growth. For example, we will require additional funding to reach commercial operation, and we may seek to offer new equity in the future for such funding. The Company may seek to raise such capital through the issuance of additional equity or debt securities with conversion rights (e.g., convertible bonds and option rights). An issuance of additional equity or debt securities with conversion rights could potentially reduce the market price of our common shares and the Company currently cannot predict the amounts and terms of such future offerings.

If such offerings of equity or debt securities with conversion rights are made without granting preemptive rights to our existing shareholders, these offerings would dilute the economic and voting rights of our existing shareholders. Preemptive rights may be restricted or excluded by a resolution of the general meeting or by another corporate body designated by the general meeting. Our management board has been authorized until the fifth anniversary of the pricing of this offering to issue shares or grant rights to subscribe for shares up to our authorized share capital from time to time and to limit or exclude preemptive rights in connection therewith. This could cause existing shareholders to experience substantial dilution of their interest in us.

In addition, such dilution may arise from the acquisition or investments in companies in exchange, fully or in part, for newly issued common shares, the exercise of convertible rights under securities that the Company issued before this offering, convertible rights in connection with financing arrangements the Company entered into before this offering, stock options or conversion rights granted to our business partners or our customers as well as from the exercise of stock options or conversion rights granted to our

employees in the context of existing or future stock option programs or the issuance of common shares to employees in the context of existing or future employee participation programs.

Any future issuance of common shares could reduce the market price of our common shares and dilute the holdings of existing shareholders.

Future sales by major shareholders could materially adversely affect the market price of our common shares.

For various reasons, shareholders may sell all or some of our common shares, including in order to diversify their investments. Sales of a substantial number of our common shares in the public market following the successful completion of the offering, or the perception that such sales might occur, could depress the market price of our common shares and could impair our ability to raise capital through the sale of additional equity securities.

We have broad discretion in the use of the net proceeds from this offering and may not use them effectively.

Our management will have considerable discretion in the application of the net proceeds from this offering and could spend the proceeds in ways that do not improve our results of operations or enhance the value of our common shares. Shareholders may not be able to assess whether the proceeds are being used appropriately. The failure by our management to apply these funds effectively could result in financial losses that could adversely affect our business and cause the price of our common shares to decline. See “Use of Proceeds” in this prospectus.

An investment in our common shares by an investor whose principal currency is not the Euro may be affected by exchange rate fluctuation.

Our common shares are, and any dividends to be paid in respect of them will be, denominated in euros. An investment in our common shares by an investor whose principal currency is not the euro will expose such an investor to exchange rate risks. Any depreciation of the euro in relation to the principal currency of the respective investor will reduce the value of the investment in our common shares or any dividends in relation to such currency.

If securities or industry analysts do not publish research or publish inaccurate or unfavorable research about our business, the market price for our common shares and trading volume could decline.

The trading market for our common shares will depend in part on the research and reports that securities or industry analysts publish about us or our business. If securities or industry analyst coverage results in downgrades of our common shares or publishes inaccurate or unfavorable research about our business, our share price would likely decline. If one or more of these analysts cease coverage of us or fail to publish reports on us regularly, we could lose visibility in the financial markets and demand for our common shares could decrease, which, in turn, could cause the market price or trading volume for our common shares to decline significantly.

Investors may have difficulty enforcing civil liabilities against us or the members of our management and supervisory board.

We are organized and existing under the laws of The Netherlands, and, as such, under Dutch private international law rules the rights of our shareholders and the civil liability of our management board members, supervisory board members and executive officers are governed in certain respects by the laws of The Netherlands. The ability of our shareholders in certain countries other than The Netherlands to bring an action against us, our management board members, supervisory board members and executive officers may be limited under applicable law. In addition, substantially all of our assets are located outside the United States.

As a result, it may not be possible for shareholders to effect service of process within the United States upon us or our management board members, supervisory board members and executive officers or to enforce judgments against us or them in U.S. courts, including judgments predicated upon the civil liability provisions of the federal securities laws of the United States. In addition, it is not clear whether a Dutch

court would impose civil liability on us or any of our management board members, supervisory board members and executive officers in an original action based solely upon the federal securities laws of the United States brought in a court of competent jurisdiction in The Netherlands.

As of the date of this prospectus, the United States and The Netherlands do not have a treaty providing for the reciprocal recognition and enforcement of judgments, other than arbitration awards, in civil and commercial matters. With respect to choice of court agreements in civil or commercial matters, it is noted that the Hague Convention on Choice of Court Agreements entered into force for The Netherlands, but has not entered into force for the United States. Accordingly, a judgment rendered by a court in the United States, whether or not predicated solely upon U.S. securities laws, would not automatically be recognized and enforced by the competent Dutch courts. However, if a person has obtained a judgment rendered by a court in the United States that is enforceable under the laws of the United States and files a claim with the competent Dutch court, the Dutch court will in principle give binding effect to a foreign judgment if (i) the jurisdiction of the foreign court was based on a ground of jurisdiction that is generally acceptable according to international standards, (ii) the judgment by the foreign court was rendered in legal proceedings that comply with the Dutch standards of proper administration of justice including sufficient safeguards (*behoorlijke rechtspleging*), (iii) binding effect of such foreign judgment is not contrary to Dutch public order (*openbare orde*) and (iv) the judgment by the foreign court is not incompatible with a decision rendered between the same parties by a Dutch court, or with a previous decision rendered between the same parties by a foreign court in a dispute that concerns the same subject and is based on the same cause, provided that the previous decision qualifies for recognition in The Netherlands. Even if such a foreign judgment is given binding effect, a claim based thereon may, however, still be rejected if the foreign judgment is not or no longer formally enforceable.

Based on the lack of a treaty as described above, U.S. investors may not be able to enforce against us or our management board members, supervisory board members, representatives or certain experts named herein who are residents of The Netherlands or countries other than the United States any judgments obtained in U.S. courts in civil and commercial matters, including judgments under the U.S. federal securities laws.

The United States and Germany currently do not have a treaty providing for the reciprocal recognition and enforcement of judgments, in civil and commercial matters. Consequently, a final judgment for payment or declaratory judgments given by a court in the United States, whether or not predicated solely upon U.S. securities laws, would not automatically be recognized or enforceable in Germany. German courts may deny the recognition and enforcement of a judgment rendered by a U.S. court if they consider the U.S. court not to be competent or the decision to be in violation of German public policy principles. For example, judgments awarding punitive damages are generally not enforceable in Germany. A German court may reduce the amount of damages granted by a U.S. court and recognize damages only to the extent that they are necessary to compensate actual losses or damages.

In addition, actions brought in a German court against us, our management board members, our supervisory board members, our senior management and the experts named herein to enforce liabilities based on U.S. federal securities laws may be subject to certain restrictions. In particular, German courts generally do not award punitive damages. Litigation in Germany is also subject to rules of procedure that differ from the U.S. rules, including with respect to the taking and admissibility of evidence, the conduct of the proceedings and the allocation of costs. German procedural law does not provide for pre-trial discovery of documents, nor does Germany support pre-trial discovery of documents under the 1970 Hague Evidence Convention. Proceedings in Germany would have to be conducted in the German language and all documents submitted to the court would, in principle, have to be translated into German. For these reasons, it may be difficult for a U.S. investor to bring an original action in a German court predicated upon the civil liability provisions of the U.S. federal securities laws against us, our management board members, our supervisory board members, our senior management and the experts named in this prospectus.

Based on the foregoing, there can be no assurance that U.S. investors will be able to enforce against us or management board members, supervisory board members, executive officers or certain experts named herein who are residents of or possessing assets in The Netherlands, Germany and or other countries other than the United States any judgments obtained in U.S. courts in civil and commercial matters, including judgments under the U.S. federal securities laws.

We are a Dutch public company. The rights of our shareholders may be different from the rights of shareholders in companies governed by the laws of U.S. jurisdictions and may not protect investors in a similar fashion afforded by incorporation in a U.S. jurisdiction.

We are a public company (*naamloze vennootschap*) organized under the laws of The Netherlands. Our corporate affairs are governed by our articles of association, the rules of our management board and those of our supervisory board and by the laws governing companies incorporated in The Netherlands. However, there can be no assurance that Dutch law will not change in the future or that it will serve to protect investors in a similar fashion afforded under corporate law principles in the United States, which could adversely affect the rights of investors.

The rights of shareholders and the responsibilities of management board members and supervisory board members may be different from the rights and obligations of shareholders and directors in companies governed by the laws of U.S. jurisdictions. In the performance of their duties, our management board members and supervisory board members are required by Dutch law to consider the interests of our Company, its shareholders, its employees and other stakeholders, in all cases with due observance of the principles of reasonableness and fairness. It is possible that some of these parties will have interests that are different from, or in addition to, your interests as a shareholder.

Our articles of association stipulate that the planet, humankind and society are important stakeholders of us and the highest principle pursued by us as part of our objects is the protection of the environment, nature and humankind. Under our articles of association, this principle shall form the foundation of our actions and the decisions of our management board and the supervisory board. On the basis of that premise, among other matters, our management board and the supervisory board may let the interests of the planet, humankind and society outweigh the interests of other stakeholders, provided that the interests of the latter stakeholders are not unnecessarily or disproportionately harmed. A resolution to amend the text or purport of these provisions of our articles of association shall require a unanimous vote in a general meeting where the entire issued share capital is represented.

For more information on relevant provisions of Dutch corporation law and of our articles of association, see “*Description of Share Capital and Articles of Association*” and “*Comparison of Dutch Corporate Law and U.S. Corporate Law*.”

Our articles of association contain exclusive forum provisions for certain claims, which could limit our shareholders’ ability to obtain a favorable judicial forum for disputes with us or the members of our management or supervisory board.

Our articles of association provide that unless we consent in writing to the selection of another forum, the federal district courts of the United States of America will, to the fullest extent permitted by law, be the exclusive forum for resolving any complaint asserting a cause of action arising under the Securities Act or the Exchange Act (the “Federal Forum Provision”). Moreover, Section 22 of the Securities Act creates concurrent jurisdiction for federal and state courts over all claims brought to enforce any duty or liability created by the Securities Act or the rules and regulations thereunder. Our decision to adopt the Federal Forum Provision followed a decision by the Supreme Court of the State of Delaware holding that such provisions are facially valid under Delaware law. While there can be no assurance that federal or state courts will follow the holding of the Delaware Supreme Court or determine that the Federal Forum Provision should be enforced in a particular case, application of the Federal Forum Provision means that suits brought by our shareholders to enforce any duty or liability created by the Securities Act must be brought in federal court and cannot be brought in state court.

Section 27 of the Exchange Act creates exclusive federal jurisdiction over all claims brought to enforce any duty or liability created by the Exchange Act or the rules and regulations thereunder and our articles of association confirm that the federal district courts of the United States of America will be the exclusive forum for resolving any complaint asserting a cause of action arising under the Exchange Act. Accordingly, actions by our shareholders to enforce any duty or liability created by the Exchange Act or the rules and regulations thereunder must be brought in federal court.

We may argue that any person or entity purchasing or otherwise acquiring or holding any interest in any of our securities will have, or will be deemed to have, notice of and consented to our exclusive forum

provisions, including the Federal Forum Provision. Additionally, our shareholders cannot waive compliance with the federal securities laws and the rules and regulations thereunder. These provisions may limit our shareholders' ability to bring a claim in a judicial forum they find favorable for disputes with us or the members of our management or supervisory board, or employees and agents, which may discourage lawsuits against us and the members of our management or supervisory board or employees and agents. Alternatively, if a court were to find the choice of forum provision contained in our articles of association to be inapplicable or unenforceable in an action, we may incur additional costs associated with resolving such action in other jurisdictions, which may have an adverse effect on our business, financial condition and results of operations.

Provisions of our articles of association or Dutch corporate law might deter acquisition bids for us that might be considered favorable and prevent, delay or frustrate any attempt to replace or remove our management board members or supervisory board members.

Under Dutch law, various protective measures are possible and permissible within the boundaries set by Dutch law and Dutch case law. In this respect, certain provisions of our articles of association may make it more difficult for a third party to acquire control of us or effect a change in our management board and supervisory board. These include:

- a dual-class share structure which consists of common shares and high voting shares, with common shares carrying one vote per share and high voting shares carrying 25 votes per share;
- a provision that each of our two founders, Laurin Hahn and Jona Christians, as long as the relevant founder holds at least 5% of our voting rights, can make a binding nomination for the appointment of one supervisory board member, which can only be overruled by a two-thirds majority of votes cast representing more than 50% of our issued share capital;
- a provision that our management board members and the supervisory board members, not appointed on the basis of a binding nomination by one of our founders as described above, are appointed on the basis of a binding nomination prepared by our supervisory board which can only be overruled by a two-thirds majority of votes cast representing more than half of our issued share capital;
- a provision that our management board members and the supervisory board members may only be dismissed by the general meeting by a two-thirds majority of votes cast representing more than half of our issued share capital (unless the dismissal is proposed by the supervisory board in which case a simple majority of the votes cast would be sufficient);
- a provision allowing, among other matters, the former chairperson of our supervisory board to manage our affairs if all of our supervisory board members are removed from office and to appoint others to be charged with the supervision of our affairs, until new supervisory board members are appointed by the general meeting on the basis of the binding nominations discussed above; and
- a requirement that certain matters, including an amendment of our articles of association, may only be brought to our general meeting for a vote upon a proposal by our management board with the approval of our supervisory board.

In addition, Dutch law allows for staggered multi-year terms of our management board members and supervisory board members, as a result of which only part of our management board members and supervisory board members may be subject to appointment or re-appointment in any one year.

Furthermore, in accordance with the Dutch Corporate Governance Code (the "DCGC"), shareholders who have the right to put an item on the agenda for our general meeting or to request the convening of a general meeting shall not exercise such rights until after they have consulted our management board. If exercising such rights may result in a change in our strategy (for example, through the dismissal of one or more of our managing directors or supervisory directors), our management board must be given the opportunity to invoke a reasonable period of up to 180 days to respond to the shareholders' intentions. If invoked, our management board must use such response period for further deliberation and constructive consultation, in any event with the shareholder(s) concerned and exploring alternatives. At the end of the response time, our management board, supervised by our supervisory board, shall report on this consultation and the exploration of alternatives to our general meeting. The response period may be invoked only once for any

given general meeting and shall not apply (i) in respect of a matter for which a response period has been previously invoked or (ii) if a shareholder holds at least 75% of our issued share capital as a consequence of a successful public bid.

Moreover, our management board, with the approval of our supervisory board, can invoke a cooling-off period of up to 250 days when shareholders, using their right to have items added to the agenda for a general meeting or their right to request a general meeting, propose an agenda item for our general meeting to dismiss, suspend or appoint one or more managing directors or supervisory directors (or to amend any provision in our articles of association dealing with those matters) or when a public offer for our company is made or announced without our support, provided, in each case, that our management board believes that such proposal or offer materially conflicts with the interests of our company and its business. During a cooling-off period, our general meeting cannot dismiss, suspend or appoint managing directors and supervisory directors (or amend the provisions in our articles of association dealing with those matters) except at the proposal of our management board. During a cooling-off period, our management board must gather all relevant information necessary for a careful decision-making process and at least consult with shareholders representing 3% or more of our issued share capital at the time the cooling-off period was invoked, as well as with our Dutch works council (if we or, under certain circumstances, any of our subsidiaries would have one). Formal statements expressed by these stakeholders during such consultations must be published on our website to the extent these stakeholders have approved that publication. Ultimately one week following the last day of the cooling-off period, our management board must publish a report in respect of its policy and conduct of affairs during the cooling-off period on our website. This report must remain available for inspection by shareholders and others with meeting rights under Dutch law at our office and must be tabled for discussion at the next general meeting. Shareholders representing at least 3% of our issued share capital may request the Enterprise Chamber of the Amsterdam Court of Appeal, or the Enterprise Chamber (*Ondernemingskamer*), for early termination of the cooling-off period. The Enterprise Chamber must rule in favor of the request if the shareholders can demonstrate that:

- our management board, in light of the circumstances at hand when the cooling-off period was invoked, could not reasonably have concluded that the relevant proposal or hostile offer constituted a material conflict with the interests of our company and its business;
- our management board cannot reasonably believe that a continuation of the cooling-off period would contribute to careful policy-making; or
- other defensive measures, having the same purpose, nature and scope as the cooling-off period, have been activated during the cooling-off period and have not since been terminated or suspended within a reasonable period at the relevant shareholders' request (i.e., no 'stacking' of defensive measures).

We are not obligated to, and do not, comply with all best practice provisions of the Dutch Corporate Governance Code.

Upon the closing of this offering, we will be subject to the DCGC. The DCGC contains both principles and best practice provisions on corporate governance that regulate relations between the management board, the supervisory board and the general meeting and matters in respect of financial reporting, auditors, disclosure, compliance and enforcement standards. The DCGC is based on a "comply or explain" principle. Accordingly, companies are required to disclose in their annual reports, filed in The Netherlands, whether they comply with the provisions of the DCGC. If they do not comply with those provisions (for example, because of a conflicting Nasdaq requirement), the company is required to give the reasons for such noncompliance. The DCGC applies to Dutch companies listed on a government-recognized stock exchange, whether in The Netherlands or elsewhere, including Nasdaq. We do not comply with all best practice provisions of the DCGC. See "*Description of Share Capital and Articles of Association.*" This may affect your rights as a shareholder and you may not have the same level of protection as a shareholder in a Dutch company that fully complies with the DCGC.

We are eligible to be treated as an emerging growth company, as defined in the Securities Act, and we cannot be certain whether the reduced disclosure requirements applicable to emerging growth companies will make our common shares less attractive to investors, given that we may rely on these exemptions.

We are eligible to be treated as an "emerging growth company," as defined in Section 2(a) of the Securities Act, as modified by the JOBS Act, and we may take advantage of certain exemptions from various reporting

requirements that are applicable to other public companies that are not “emerging growth companies” including presenting only limited selected financial data in the registration statement on Form F-1 of which this prospectus is a part and not being required to comply with the auditor attestation requirements of Section 404(b) in subsequent Annual Reports filed on Form 20-F. As a result, our shareholders may not have access to certain information that they may deem important. We could be an emerging growth company for up to five years, although circumstances could cause us to lose that status earlier, including if our total annual gross revenue exceeds \$1.07 billion, if we issue more than \$1.00 billion in non-convertible debt securities during any three-year period, or if we are a large accelerated filer and the market value of our common shares held by non-affiliates exceeds \$700 million as of the end of any second quarter before that time.

As a foreign private issuer, we will not be subject to U.S. proxy rules and will be subject to Exchange Act reporting obligations that, to some extent, are more lenient and less frequent than those of a U.S. domestic public company.

Upon completion of this offering, we will report under the Exchange Act as a non-U.S. company with foreign private issuer status. Because we qualify as a foreign private issuer under the Exchange Act and although we are subject to Dutch laws and regulations with regard to such matters, we are exempt from certain provisions of the Exchange Act that are applicable to U.S. domestic public companies, including (1) the sections of the Exchange Act regulating the solicitation of proxies, consents or authorizations in respect of a security registered under the Exchange Act, (2) the sections of the Exchange Act requiring insiders to file public reports of their share ownership and trading activities and liability for insiders who profit from trades made in a short period of time and (3) the rules under the Exchange Act requiring the filing with the SEC of quarterly reports on Form 10-Q containing unaudited financial and other specified information. In addition, foreign private issuers are required to file their annual report on Form 20-F within four months after the end of each fiscal year, while U.S. domestic issuers that are accelerated filers are required to file their annual report on Form 10-K within 75 days after the end of each fiscal year and U.S. domestic issuers that are large accelerated filers are required to file their annual report on Form 10-K within 60 days after the end of each fiscal year. Foreign private issuers are also exempt from Regulation FD, which is intended to prevent issuers from making selective disclosures of material information. As a result of all of the above, holders of our common shares may not have the same protections afforded to shareholders of a company that is not a foreign private issuer.

We may lose our foreign private issuer status in the future, which could result in significant additional costs and expenses.

As discussed above, we are a foreign private issuer, and therefore, we are not required to comply with all of the periodic disclosure and current reporting requirements of the Exchange Act. The determination of foreign private issuer status is made annually on the last business day of an issuer’s most recently completed second fiscal quarter, and, accordingly, the next determination will be made with respect to us on June 30, 2022.

In the future, we would lose our foreign private issuer status if, among others, (1) more than 50% of our outstanding voting securities, which we intend to determine based on the voting power of our common shares and high voting shares on a combined basis are directly or indirectly held of record by U.S. residents and (2) a majority of our directors or executive officers are U.S. citizens or residents, more than 50% of our assets are located in the United States or our business is administered principally in the United States. If we lose our foreign private issuer status, we will be required to file with the SEC periodic reports and registration statements on U.S. domestic issuer forms including consolidated financial statements prepared under US GAAP, and which are more detailed and extensive than the forms available to a foreign private issuer. We will also have to mandatorily comply with U.S. federal proxy requirements, and our officers, directors and principal shareholders will become subject to the short-swing profit disclosure and recovery provisions of Section 16 of the Exchange Act. In addition, we will lose our ability to rely upon exemptions from certain corporate governance requirements under the listing rules of Nasdaq. As a U.S. listed public company that is not a foreign private issuer, we would incur significant additional legal, accounting and other expenses that we would not incur as a foreign private issuer. These expenses would relate to, among other things, the obligation to present our financial information in accordance with U.S. GAAP in the future. Additionally, a loss of our foreign private issuer status would divert our management’s attention from

other business concerns, which could have a material adverse effect on our business, financial condition, results of operations and prospects.

As a foreign private issuer and as permitted by the listing requirements of Nasdaq, we follow certain home country governance practices rather than the corporate governance requirements of Nasdaq.

We are a foreign private issuer. As a result, in accordance with the listing requirements of Nasdaq we will rely on home country governance requirements and certain exemptions thereunder rather than relying on the corporate governance requirements of Nasdaq. In accordance with Dutch law and generally accepted business practices, our articles of association currently do not provide quorum requirements generally applicable to general meetings. To this extent, our practice varies from the requirement of Nasdaq Listing Rule 5620(c), which requires an issuer to provide in its bylaws for a generally applicable quorum, and that such quorum may not be less than one-third of the outstanding voting shares. Although we must provide shareholders with an agenda and other relevant documents for the general meeting, Dutch law does not have a regulatory regime for the solicitation of proxies and the solicitation of proxies is not a generally accepted business practice in the Netherlands, thus our practice will vary from the requirement of Nasdaq Listing Rule 5620(b). As permitted by the listing requirements of Nasdaq, we have also opted out of the requirements of Nasdaq Listing Rule 5605(d), which requires, among other things, an issuer to have a compensation committee that consists entirely of independent directors, Nasdaq Listing Rule 5605(e), which requires independent director oversight of director nominations, and Nasdaq Listing Rule 5605(b)(1), which requires an issuer to have a majority of independent directors on its board. We will also rely on the phase-in rules of the SEC and Nasdaq with respect to the independence of our audit committee. These rules require that a majority of our supervisory board members must be independent and all members of our audit committee must meet the independence standard for audit committee members within one year of the effectiveness of the registration statement of which this prospectus forms a part. In addition, we have opted out of shareholder approval requirements, as included in the Nasdaq Listing Rules, for the issuance of securities in connection with certain events such as the acquisition of shares or assets of another company, the establishment of or amendments to equity-based compensation plans for employees, a change of control of our Company and certain private placements. To this extent, our practice varies from the requirements of Nasdaq Rule 5635, which generally requires an issuer to obtain shareholder approval for the issuance of securities in connection with such events. For an overview of our corporate governance principles, see “*Description of Share Capital and Articles of Association.*” Accordingly, you may not have the same protections afforded to shareholders of companies that are subject to these stock exchange requirements.

CAUTIONARY STATEMENT REGARDING FORWARD LOOKING STATEMENTS

CAUTIONARY STATEMENT REGARDING FORWARD-LOOKING STATEMENTS

The prospectus contains forward-looking statements that relate to our current expectations and views of future events. These statements relate to events that involve known and unknown risks, uncertainties and other factors, including those listed under “*Risk Factors*,” which may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by the forward-looking statements.

In some cases, these forward-looking statements can be identified by words or phrases such as “believe,” “may,” “will,” “expect,” “estimate,” “could,” “should,” “anticipate,” “aim,” “estimate,” “intend,” “plan,” “believe,” “potential,” “continue,” “is/are likely to” or other similar or comparable expressions. These forward-looking statements include all matters that are not historical facts. Forward-looking statements contained in this prospectus include, but are not limited to, statements about:

- our future business and financial performance, including our revenue, operating expenses and our ability to achieve profitability and maintain our future business and operating results;
- our strategies, plan, objectives and goals, including, for example, the planned completion of the development of the Sion and the beginning of its serial production as well as intended expansion of our product portfolio or geographic reach;
- the number of reservations for the Sion and revenue potential;
- the expected start of serial production of the Sion and the key steps to start production including indicative milestones and funding requirements;
- our planned monetization of our technological innovations;
- our plan to generate revenue from emission certificate pooling under relevant EU regulations on CO2 credits (CO2 pooling);
- our use of the net proceeds from the sale of shares by us in this offering; and
- our expectations regarding the development of our industry, market size and the competitive environment in which we operate.

These forward-looking statements are subject to known and unknown risks, uncertainties and assumptions, many of which are beyond our control. In addition, these forward-looking statements reflect our current views with respect to future events and are not a guarantee of future performance. We caution you that forward-looking statements are not guarantees of future performance and that our actual results of operations, financial condition and liquidity, and the development of the industries in which we operate may differ materially from those made in or suggested by the forward-looking statements contained in this prospectus. In addition, even if our results of operations, financial condition and liquidity, and the development of the industries in which we operate are consistent with the forward-looking statements contained in this prospectus, those results or developments may not be indicative of results or developments in subsequent periods. Actual outcomes may differ materially from the information contained in the forward-looking statements as a result of a number of factors, including, without limitation, the risk factors set forth in “*Risk Factors*,” which include the following:

- our history of significant losses and expect continuing losses for the foreseeable future, which lead to continued reliance on external financing and raise substantial doubt about our ability to continue as a going concern;
- the dependence of our success and future growth upon the market’s willingness to adopt solar electric vehicles;
- developments in vehicle technology that may adversely affect the demand for solar electric vehicles;
- the competitiveness of the automotive market and the risk to fail to be among the first to serve the mass market with an electric vehicle with solar power capability;
- high volatility of demand in the automobile industry;

- our unproven ability to develop vehicles and the risk to fail to finalize development and realize the commercialization of the Sion within the intended timeframe, budget or at all;
- the initial dependence on a single car model, the Sion;
- that our customers may cancel their reservations for the Sion without penalty;
- our intention to deploy technologies and solutions in our vehicles, including our solar module technology, which may not be fully functional or available on our anticipated schedule or at all, and may remain unproven and pose additional risks;
- our dependence on the adequate protection of our intellectual property;
- that our patent applications may not lead to the granting of patents or desired protection in time or at all, which may have a material adverse effect on our ability to prevent others from commercially exploiting products similar to ours;
- obstacles we may face in tapping additional revenue opportunities;
- a delay in the commercial production of the Sion;
- our possible inability to develop manufacturing processes and capabilities within our projected costs and timelines;
- our unproven and still-evolving ability to manufacture vehicles of sufficient quality and appeal to customers on schedule and at scale and to commercialize our vehicles;
- our dependence on National Electric Vehicle Sweden (NEVS) for production of the Sion;
- our dependence on the development, production, performance and durability of batteries being engineered by a single supplier;
- our intention to outsource logistics management of our operations to third-party logistics (3PL) and potentially fourth-party logistics (4PL) services providers;
- ongoing negotiations of contractual agreements with many of our prospective suppliers and business partners and potential renegotiations of these agreements as we scale our business;
- the involvement of numerous third parties in our process, which adds significant complexity;
- our dependence on the acceptance of our brand and any negative publicity relating to any of our business partners and their products or services, which could have a significant negative impact on our business and reputation;
- the risk that the Sion or any of our future vehicles may fail to perform as expected;
- our significant use of various communication channels for our public relations activities, including our website and social media;
- damage to our reputation due to the perception that our advertisements were overly positive or that we do not live up to our promises;
- noncompliance of our advertisements with all relevant legal requirements in the past or in the future;
- product recalls that could materially adversely affect our business, prospects, operating results and financial condition;
- any unauthorized control or manipulation of our vehicles' systems;
- risks associated with our growth strategy and international operations, including unfavorable regulatory, political, tax and labor conditions, which could harm our business;
- our failure to manage our future growth effectively;
- our inability to attract and retain key employees and hire qualified management, technical and vehicle engineering personnel, which could harm our ability to compete;
- risks related to health epidemics, including the recent COVID-19 pandemic; and

- the need to raise additional funds until the start of the production of the Sion and potentially beyond, which may not be available to us on acceptable terms or at all when we need them.

The forward-looking statements made in this prospectus relate only to events or information as of the date on which the statements are made in this prospectus. Except as required by law, we undertake no obligation to update or revise publicly any forward-looking statements, whether as a result of new information, future events or otherwise, after the date on which the statements are made or to reflect the occurrence of unanticipated events. You should read this prospectus, including the uncertainties and factors discussed under “*Risk Factors*” completely and the documents that we have filed as exhibits to the registration statement, of which this prospectus is a part, completely and with the understanding that our actual future results or performance may be materially different from what we expect. All forward-looking statements made in this prospectus are qualified by these cautionary statements.

Comparison of results between current and prior periods are not intended to express any future trends, or indications of future performance, unless expressed as such, and should only be viewed as historical data.

USE OF PROCEEDS

USE OF PROCEEDS

We estimate that the net proceeds to us from this offering will be approximately \$135.2 million (or \$156.1 million if the underwriters exercise their option to purchase additional common shares from us in full), assuming an initial public offering price of \$15.00 per common share, which is the midpoint of the price range set forth on the cover page of this prospectus, after deducting the estimated underwriting discounts and commissions and estimated expenses of the offering that are payable by us.

Each \$1.00 increase (decrease) in the assumed initial public offering price per common share would increase (decrease) our net proceeds, after deducting the estimated underwriting discounts and estimated commissions and expenses, by \$9.3 million, assuming that the number of common shares offered by us, as set forth on the cover of this prospectus, remains the same. Each increase (decrease) of 1,000,000 common shares in the number of common shares offered by us would increase (decrease) our net proceeds, after deducting the estimated underwriting discounts and commissions and estimated expenses, by approximately \$14.0 million, assuming no change in the assumed initial public offering price per share. Expenses of this offering will be paid by us.

The principal reasons for this offering are to finance our business, to increase our public profile and awareness, create a public market for our common shares and facilitate our future access to public equity markets. We plan to use the expected proceeds from this offering for the completion of our next prototype generation, the so-called generation III, to position us to secure going concern until May 2023 and to secure or repay the down payments received until November 2021. Any remainder will be used for further investments to reach serial production.

Our expected use of net proceeds from this offering represents our current intentions based upon our present plans and business condition. As of the date of this prospectus, we cannot predict with certainty all of the particular uses for the net proceeds to be received upon the completion of this offering or the amounts that we will actually spend on the uses set forth above. The amounts and timing of our actual use of net proceeds will vary depending on numerous factors, including the factors described in "Risk Factors." As a result, our management will have broad discretion in the application of the net proceeds of this offering, and investors will be relying on our judgment regarding the application of the net proceeds.

We believe that the anticipated net proceeds from this offering, together with our existing cash, cash equivalents, borrowings available to us and short-term investments, will, however, not enable us to fund our operating expenses and capital expenditure requirements to start serial production of the Sion for sales in European markets. Accordingly, our ability to continue as a going concern will be largely dependent on our ability to raise additional funds through debt or equity transactions, additional advance payments, or other means.

DIVIDEND POLICY

DIVIDEND POLICY

We have never paid or declared any cash dividends in the past, and we do not anticipate paying any cash dividends in the foreseeable future. We intend to retain all available funds and any future earnings to fund the completion of the development of the Sion and the start of its serial production as well as the further development and expansion of our business. We may only pay dividends and other distributions from our reserves to the extent our shareholders' equity (*eigen vermogen*) exceeds the sum of the paid-in and called-up share capital plus the reserves required to be maintained by Dutch law or by our articles of association and (if it concerns a distribution of profits) after adoption of the annual accounts by the general meeting from which it appears that such dividend distribution is allowed. Subject to such restrictions, any future determination to pay dividends or other distributions will be at the discretion of our management board with the approval of our supervisory board and will depend upon a number of factors, including our results of operations, financial condition, future prospects, contractual restrictions, restrictions imposed by applicable law and other factors our management board and supervisory board deem relevant.

Under our articles of association, our management board may decide that all or part of the profits are added to our reserves. After reservation of any profit, the remaining profit will be at the disposal of the general meeting at the proposal of our management board for distribution, subject to restrictions of Dutch law and approval by our supervisory board of such proposal by our management board. Our management board is permitted, subject to certain requirements, to declare interim dividends without the approval of the general meeting, but only with the approval of the supervisory board. Dividends and other distributions shall be made payable not later than the date determined by the management board. Claims to dividends and other distributions not made within five years from the date that such dividends or distributions became payable will lapse and any such amounts will be considered to have been forfeited to us (*verjaring*).

CAPITALIZATION

CAPITALIZATION

The table below sets forth our cash and cash equivalents and capitalization as of June 30, 2021:

- on an actual basis;
- on a pro forma basis to give effect to (i) the issuance of 25,468,644 additional common shares against no consideration to our existing shareholders immediately prior to pricing of this offering and (ii) the full conversion of the mandatory convertible senior notes into our common shares; and
- on a pro forma as adjusted basis to give further effect to the issuance and sale of 10,000,000 common shares in this offering at an assumed initial public offering price of \$15.00 per common share, which is the midpoint of the price range set forth on the cover page of this prospectus, after deducting underwriting discounts and commissions and estimated offering expenses payable by us, as set forth under “Use of Proceeds”, excluding the underwriters’ option to purchase additional common shares and using an assumed exchange rate of \$1.1519 per €1.00.

You should read this table in conjunction with our consolidated financial statements and notes thereto included elsewhere in this prospectus as well as “About This Prospectus,” “Use of Proceeds” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations.”

	As of June 30, 2021		
	Actual	Pro forma	Pro forma as adjusted ⁽¹⁾
	(in € millions)		
Cash and cash equivalents	26.1	26.1	143.5
Long-term debt (including current portion)	14.4	5.9	5.9
Equity:			
Subscribed capital	6.5	8.1	8.7
Capital and other reserves	74.2	81.1	197.9
Accumulated deficit	(108.8)	(108.8)	(108.8)
Total equity	(28.1)	(19.6)	97.8
Total capitalization	(13.7)	(13.7)	103.7

- (1) A \$1.00 increase or decrease in the assumed initial public offering price of \$15.00 per share, which is the midpoint of the price range set forth on the cover page of this prospectus, would increase or decrease the as adjusted amount of each of cash and cash equivalents, total equity and total capitalization by approximately \$9.3 million, assuming the number of shares offered by us, as set forth on the cover page of this prospectus, remains the same and after deducting the estimated underwriting discounts and commissions. An increase or decrease of 1,000,000 shares offered by us, as set forth on the cover page of this prospectus, would increase or decrease the as adjusted amount of each of cash and cash equivalents, total equity and total capitalization by approximately \$14.0 million, assuming no change in the assumed initial public offering price of \$15.00 per share, which is the midpoint of the price range set forth on the cover page of this prospectus, and after deducting the estimated underwriting discounts and commissions.

DILUTION

DILUTION

If you invest in our common shares in this offering, your ownership interest will be diluted to the extent of the difference between the initial public offering price per share and the as adjusted net tangible book value per common share immediately after the completion of this offering.

As of June 30, 2021, we had a pro forma net tangible book value of negative €19.8 million, corresponding to a pro forma net tangible book value of negative €0.32 per common share. Historical net tangible book value per common share represents the amount of our total assets less our total liabilities, excluding intangible assets, divided by the total number of our common shares outstanding at June 30, 2021. Pro forma net tangible book value represents the amount of our total assets less our total liabilities, excluding intangible assets, divided by the total number of common shares issued and outstanding, after giving effect to (i) the issuance of 25,468,644 additional common shares against no consideration to our existing shareholders immediately prior to pricing of this offering and (ii) the full conversion of the mandatory convertible senior notes into our common shares.

After giving further effect to the issuance and sale of 10,000,000 common shares offered by us in the offering at an assumed offering price of \$15.00 per common share, which is the midpoint of the price range set forth on the cover page of this prospectus and an exchange rate of \$1.1519 per €1.00, after deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us, our pro forma as adjusted net tangible book value as of June 30, 2021 would have been €97.6 million (or \$112.4 million), representing €1.35 (or \$1.56) per common share outstanding. This represents an immediate increase in pro forma as adjusted net tangible book value of €1.67 (or \$1.93) per common share outstanding to existing shareholders and an immediate dilution in net tangible book value of €11.67 (or \$13.44) per common share outstanding to new investors purchasing common shares in this offering. Dilution for this purpose represents the difference between the price per common share paid by these purchasers and the pro forma as adjusted net tangible book value per common share immediately after the completion of this offering.

The following table illustrates this dilution to new investors purchasing common shares in the offering, assuming either no exercise or full exercise of the underwriters' option to purchase additional common shares:

	No exercise		Full exercise	
	in €	(in \$)	in €	(in \$)
Assumed initial public offering price per common share	13.02	15.00	13.02	15.00
Historical net tangible book value as of June 30, 2021 per common share	(0.79)	(0.91)	(0.79)	(0.91)
Pro forma net tangible book value as of June 30, 2021 per common share after giving effect to the issuance of 25,468,644 additional common shares to our existing shareholders and the full conversion of the mandatory convertible senior notes	(0.32)	(0.37)	(0.32)	(0.37)
Increase in pro forma net tangible book value attributable to new investors purchasing common shares in this offering	1.67	1.93	1.89	2.18
Pro forma as adjusted net tangible book value as of June 30, 2021 per common share after giving effect to the issuance of 25,468,644 additional common shares to our existing shareholders and the full conversion of the mandatory convertible senior notes and the offering	1.35	1.56	1.57	1.81
Dilution to new investors per common share	11.67	13.44	11.45	13.19
Percentage of dilution to new investors per common share	89.60%	89.60%	87.92%	87.92%

A \$1.00 increase (decrease) in the assumed initial public offering price of \$15.00 per common share would increase (decrease) our pro forma as adjusted net tangible book value after this offering by \$0.13 per common share, and the dilution in pro forma as adjusted net tangible book value to new investors by \$0.13 per common share, assuming that the number of common shares offered by us, as set forth on the cover page of this prospectus, remains the same and after deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us. Each increase (decrease) of 1,000,000 in the

number of common shares offered by us would increase (decrease) our pro forma as adjusted net tangible book value after this offering by \$0.17 per common share, and decrease (increase) the dilution to investors participating in this offering by approximately \$0.17 per common share, assuming that the assumed initial public offering price remains the same and after deducting the estimated underwriting discounts and commissions and estimated offering expenses payable by us.

If the underwriters were to fully exercise their option to purchase additional common shares from us, the pro forma as adjusted net tangible book value per common share after the offering would be €1.57 per common share (\$1.81 per common share), and the dilution per common share to new investors would be €11.45 per common share (\$13.19 per common share), in each case at an assumed initial public offering price of €13.02 per common share (\$15.00 per common share), which is the midpoint of the price range set forth on the cover of this prospectus.

The following table summarizes, on a pro forma as adjusted basis, as of June 30, 2021, the number of common shares owned by our existing shareholders and to be owned by new investors purchasing common shares in this offering, the total consideration paid to us and the average price per common share paid by new investors purchasing common shares in this offering. The calculation below is based on an assumed initial public offering price of \$15.00 per common share, which is the midpoint of the price range set forth on the cover page of this prospectus, before deducting underwriting discounts and commissions and estimated offering expenses payable by us and excluding the underwriters' option to purchase additional common shares from us:

	Shares		Total consideration		Average price per Share (in \$)
	Number	Percent	Amount (in \$ million)	Percent	
Existing shareholders	62,081,903	86.13%	57.6	27.75%	0.93
New investors	10,000,000	13.75%	150.0	72.25%	15.00
Total	72,081,903	100.00%	207.6	100.00%	2.88

If the underwriters exercise the option to purchase additional common shares from us, the percentage of our shares held by existing shareholders will decrease to approximately 84.37% of the total number of our shares outstanding after this offering and the percentage of our shares held by new investors will increase to approximately 15.63% of the total number of our shares outstanding after this offering.

The total number of shares reflected in the discussion and tables above is based on the number of shares outstanding as of the June 30, 2021 on a pro forma as adjusted basis.

To the extent we grant options or other equity awards to our employees or members of our management board or our supervisory board, and those options or other equity awards are exercised in the future or other issuances of our common shares are made, there will be further dilution to new investors.

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

You should read the following discussion and analysis of our financial condition and results of operations in conjunction with our historical consolidated financial statements, prepared in accordance with IFRS as issued by IASB and the related notes thereto included elsewhere in this prospectus. This discussion contains forward-looking statements and involves numerous risks and uncertainties, including, but not limited to, those described in the "Risk Factors" section of this prospectus. Actual results could differ materially from those contained in any forward-looking statements.

Overview

We believe we are a pioneer and technological leader in the field of solar-powered electric mobility. We are in the process of developing and commercializing a disruptive solar technology that would allow every vehicle to benefit from solar power. We intend to use our technology to create our solar and battery powered vehicle that we call the Sion. In parallel, we are in the process of starting to license and sell our proprietary solar technology to other manufacturers for different use cases, such as buses, trucks, camper vans, trains and even boats, in order to accelerate the transition towards sustainable transportation. We intend to generate revenues from the sale of our vehicles and, in the first production cycle, from emission certificate pooling as well as from the monetization of our proprietary solar technology.

Our disruptive solar technology allows for full solar integration. In the process of developing the Sion, we soon realized that the available solar technology was not well-suited for mobility applications. Traditional solar technology relies on glass to cover the solar cells. Glass is, however, heavy, not sufficiently flexible, expensive and dangerous in crash situations. Our polymer technology solves these issues. It is lightweight, allows for flexible surface integration via our patented injection molding process, is affordable due to fast and lean production and avoids/eliminates the risk of bodily harm caused by broken glass. We have also developed other critical components for the use of solar technology in mobility applications. We have, through our maximum power point tracker central unit, or MCU, solved the issue that solar cells will be mounted on different parts of the exterior, which will lead to uneven exposure to sunlight. Our technology allows for the seamless integration of solar cells into the body of a car, such as the Sion, and the charging of its battery through the power of the sun. However, solar technology is much more versatile, and its use cases extend far beyond passenger cars, allowing for grid-independent charging and a reduction of running costs or total costs of ownership in transport related use cases, such as trucks, buses, recreational vehicles or boats. We have started to market our technology to other mobility or transport manufacturers. We have received indications of interest and first purchase orders and shipped pre-production samples to customers. Other manufacturers may also benefit from our technology. They may use our technology to retrofit existing vehicles, to extend the range of battery electric vehicles, or BEVs, for new production vehicles or to comply with emission regulations. The transport and logistics industries in particular are very focused on total cost of ownership, where our solar integration can reduce running cost significantly. We have several patents granted or within the filing-process protecting our proprietary technology. Additionally, we have up to four years of advanced development ahead of who we believe to be our relevant competitors thanks to the patents, the testing of a large number of different polymer materials and the several relevant components for full solar integration, such as power electronics, especially the MCU.

Our technology will be one of the distinctive features of the Sion. It will have the ability to recharge itself using solar energy panels installed on the exterior that leverage our polymer-based solar technology. We expect that solar power will reduce the number of charging intervals and, depending on the vehicle's usage profile, may even eliminate the need for battery charging, positioning us to benefit from a significant competitive advantage over conventional electric vehicles. The Sion's polymer exterior significantly reduces the need for expensive metal-stamping tools and machinery costs, and the integration of solar modules into the bodywork eliminates the need for a costly paint shop, which helps us to accept reservations for the Sion locking in a comparatively low net entry price of currently €23.9 thousand. Consistent with our mission to lower CO₂ emissions, each Sion will be outfitted with technology that can connect to our car- and ride-sharing networks through our proprietary hardware and software solutions. We expect that the Sion will be convenient to operate and comparatively affordable providing it with the potential to disrupt the market.

To make the Sion affordable for the mass market without compromising security or quality, we do things differently and, we believe, much more efficiently and sustainably than traditional car manufacturers or other pure EV manufacturers. We rely on a one-variant-only vehicle, third party production and business-to-consumer direct distribution, which we believe will enable us to maintain relatively low overhead costs, significantly reduce our capital expenditures, and position us to become a price-value leader compared to competitors' offerings in the relevant car segments. All Sions will have the same exterior color and vehicle features, and will rely on existing off-the-shelf component parts from established automotive suppliers, such as Vitesco Technologies German GmbH (a former subsidiary of Continental AG), Hella GmbH & Co. KGaA, FinDreams Industry Co., Ltd. and Casco Schoeller GmbH, resulting in economies of scale through the partial elimination of development costs, reduced purchasing and manufacturing complexity, reduced logistical challenges and inventory costs, and lower risks associated with quality control and testing, all of which should facilitate more rapid growth of our operations and positions us to offer the Sion. The production of the Sion is currently expected to be outsourced to a contract manufacturer at the former Saab Automobile AB ("SAAB") plant in Trollhättan, Sweden. Our goal is to offset 100% of the CO₂ emissions generated by the production of the Sion and our future vehicle models, with a view to achieving full CO₂ neutrality during the production cycle. Rather than relying on dealerships to sell the Sion, we intend to rely on what we consider to be an innovative and effective way to sell directly to customers through our online platform. Customers can view the Sion, book a test drive and engage and place orders directly with us. As of November 5, 2021, we had more than 16,000 reservations with advance payments resulting in total net cash inflows of €40.8 million from our customers up from total net cash inflows of €37.9 million as of June 30, 2021. These reservations correspond to a net sales volume of approximately €340 million. However, our customers may cancel their reservations without penalty according to our general terms and conditions, if no binding purchase agreement has been concluded by an agreed deadline, which varies. Some reservations are already cancellable as of the date of this prospectus. We intend to begin delivering cars in the first half of 2023 and thereby fulfill customer reservations. See also "*Risk Factors—Risks Related to Our Business and Operations—Any delay in commercial production of the Sion could adversely affect us.*"

With respect to our solar technology licensing, we have shipped first pre-production samples to customers. With respect to the Sion, we are still in the pre-production phase and presented the second fully functional prototype generation in January 2021. The funding that we expect to obtain from this offering will not be sufficient to secure our needs through the start of production of the Sion. Assuming that we are able to raise the amounts we still need following this offering, we currently plan to commence commercial production of the Sion in the first half of 2023. For the six months ended June 30, 2021, we had a loss for the period of €25.7 million, compared to a loss for the period of €9.8 million in the six months ended June 30, 2020. Our loss for the period for the year ended December 31, 2020 was a loss of €56.0 million. We have incurred net losses since our inception in March 2016, resulting in an accumulated deficit of €108.8 million as of June 30, 2021 up from €83.1 million of December 31, 2020. We believe that we will continue to incur losses and depend on external financing in the foreseeable future at least until we commence material deliveries of the Sion and the time when we significantly scale our operations, including the monetization of our solar technology.

Our Business Model

We expect to generate revenue mainly from sales of the Sion, monetization of our solar technology and initially also from emission certificate pooling. We also expect to generate revenue to a lesser degree, from our car- and ride-sharing application.

- **Sales of the Sion and Future Vehicle Models:** We plan to position the Sion as an affordable, solar-electric vehicle for the mass market. As of November 5, 2021, we received more than 16,000 reservations with advance payments resulting in total net cash inflows of €40.8 million. These reservations correspond to an assumed aggregate sales volume of approximately €340 million based on our initial net price of €21.4 thousand per vehicle for the first 16,000 reservations and assuming that all reservations result in sales. In the longer term, we plan to introduce additional solar electric vehicle models.
- **Monetization of our Solar Technology:** The potential scope of application of our solar technology goes significantly beyond the Sion. We believe that our solar technology has the potential to be used in existing markets, for example for trucks and trailers, trains, ships and buildings. We have already

received purchase orders or entered into several letters of intent for partnerships, including with manufacturers of trailers, autonomous electric shuttles, trains, trucks, buses and boats that may use our technology in their own products. We may also produce and sell certain selected solar components, license our patents to third parties or seek to generate service revenue from providing engineering services to third parties. We believe that our patents position us to shift our solar technology revenue model from sales to licensing in the long term. We have shipped pre-production samples to customers and expect to generate very limited revenue in the fourth quarter of 2021.

- **Emission Certificate Pooling:** Many developed countries have environmental regulations and incentives that seek to reduce CO2 emissions. For example, under EU regulation, any automotive manufacturer who fails to reduce the average emissions of its fleet sold in the EU to a specific CO2 emission per kilometer is subject to penalty payments. A manufacturer can avoid, or reduce, penalty payments, if it pools its emissions with those of manufacturers that exceed emission targets, such as manufacturers of zero or low emission vehicles. The economic benefit is shared between the pooling participants, providing us with an additional source of revenue. We believe that our ability to participate in these pooling arrangements will comprise a meaningful percentage of our future revenue stream during the first production cycle that we can generate at a relatively low cost.
- **Car-sharing and Ride-pooling Application:** We have developed a car-sharing and ride-pooling application, which will be installed ex works in every Sion that is purchased by our customers. The application can also be added to any third-party vehicle at minimal cost to the owner. The application includes algorithmic technology that can match ride-seekers with drivers, and that can match drivers seeking temporary use of a car with owners seeking to rent out their vehicles. Matches are formed through a network of riders and car owners who have to be registered to use our services. We will receive commissions on each transaction booked through our application and expect to generate incremental revenue from this platform, which will operate at marginal cost. We anticipate that Sion owners will make up our initial market and that over time the network will grow to include owners of other vehicles as well.

On the expense side, we currently intend to focus on benefiting from economies of scale, controlling expenses and reducing significant capital expenditure to position us to become the price/value leader in our market. This approach is illustrated by our current strategy:

- **One-Variant-Only:** The Sion is a one-variant-only model, resulting in economies of scale, less complexity, lower logistics and inventory costs and lower quality and testing risk.
- **No Sono Motors-Owned Factory:** We do not currently intend to own a factory, as the Sion will be produced by a contract manufacturer at the former SAAB plant in Trollhättan, Sweden.
- **Asset-Light Manufacturing:** The Sion's polymer body eliminates the need for expensive steel stamping tools and the integration of solar modules into the bodywork eliminates the need for a costly paint shop.
- **Use of Off-the-shelf Components:** Certain standard automotive parts will be sourced as off-the-shelf components from established automotive suppliers, allowing us to save development costs and position ourselves to benefit from economies of scale.
- **Online Direct Sales:** We believe that online direct sales will allow us to reduce distribution costs by approximately 15%, as we do not have to pay dealer margins.

Factors Affecting Our Financial Condition and Results of Operation

We believe that our performance and future success depend on several factors that present significant opportunities for us but also pose risks and challenges, including those set forth in the section entitled "Risk Factors."

Start of Serial Production of the Sion

We currently do not generate any revenue from our operations and do not expect to generate revenue until we start production and delivery of the Sion. We believe that being one of the first manufacturers of solar electric vehicles will enable us to immediately capture a share of the market. While it is not yet

commercially available, we have received significant reservations and advance payments from customers for the Sion. Our customers may cancel a reservation without penalty according to our general terms and conditions, if no binding purchase agreement has been concluded by an agreed deadline. The relevant deadline agreed on with the customers reflected the start of serial production envisaged by us at the time the relevant reservations were made. The timing of such permitted cancellations varies, as we have amended our general terms and conditions extending the relevant cancellation deadline to reflect delays of the intended commencement of serial production of our vehicles. We have also asked some of our customers to agree to amendments of our terms and conditions that extended the date at which customers may cancel a reservation. However, not all customers who previously placed a reservation have yet accepted such amended terms and conditions. As of November 5, 2021, 10% of our advance payments were cancelable. An additional 18% will become cancelable on January 1, 2022, an additional 59% on January 1, 2023 and an additional 13% on July 1, 2023.

While we finalize development and prepare the launch of production of the Sion, we offered selected customers who made an advance payment for the Sion to convert this advance payment into a lease contract for a Renault Zoe in 2020. This offer allowed consumers to already drive an electric car and positioned us to avoid cancellations and generate income from commissions we receive for every lease agreement entered into. We have recently renewed this offer under slightly modified conditions and, in addition, offered Sion reservation holders to lease a vehicle at discounted conditions from a start-up car rental company, which claims to focus on sustainability. Through August 31, 2021, we issued vouchers for €0.4 million, of which €0.3 million have been cashed in. We may continue to provide similar offers in the future to bridge the period until we make deliveries to our customers.

Monetization of Our Solar Technology

As of October 2021, we have four patents pending and three patents have been granted. Our patent applications mainly relate to our solar technology. We also plan to license our technologies to third parties. We have already received purchase orders or entered into several letters of intent for partnerships, including with manufacturers of trailers, autonomous electric shuttles, trains, trucks, buses and boats that may use our technology in their own products. We may also consider the development, general contracting and sale of certain selected solar components to third parties. Revenue from these activities would allow us to start generating revenue potentially before we start selling the Sion and could position us to be less dependent on sales of the Sion.

Ability to Control Cost of Sales

We currently do not incur any cost of sales. When we start selling the Sion, our profitability will depend on our ability to organize the manufacturing of the Sion in an efficient manner. As part of the manufacturing process, we will purchase a wide variety of components, raw materials, and other supplies. Due to our solar technology, we are able to significantly reduce the battery costs and expenses for painting the body of the Sion. We expect that our cost of sales will be affected primarily by our production volume. Our cost of sales will also be affected, to a lesser extent, by fluctuations in certain raw material prices. As our business grows in scale, we expect to have higher bargaining power and hence more favorable terms from suppliers, including pricing and payment terms.

Execution of Effective Marketing

Our ability to execute effective marketing will affect the growth of our reservations. Demand for the Sion will directly affect our sales volume, which will in turn contribute to our revenue growth and our ability to achieve profitability. Vehicle reservations may depend, in part, on whether prospective customers find our vehicles more affordable and convenient than other environmentally friendly vehicles, which in turn depends on prospective customers' perception of our brand and the advantages of our solar technology. We guide our marketing expenditure by analyzing the effectiveness of marketing channels based on our needs at various stages of sales and brand awareness. Effective marketing can help amplify our efforts in efficiently increasing vehicle reservations.

Development Expenses

We will continue to incur significant expenses related to the development of the Sion as well as refinement of our technology. We expect that our research and development expenses will constitute the

most substantial part of our expenses in future periods. We will only incur development expenses to the extent we believe that we are able to secure necessary financing. Based on our business plan, we will depend on significant additional financing for additional development activities, start of serial production and obtaining street certification. We intend to raise the needed financing in part through this offering.

Capital Expenditure

We operate on an asset-light basis, which means that our capital expenditure is very limited. The Sion will be produced by a contract manufacturer, the Sion's polymer body eliminates the need for expensive steel stamping tools and certain standard automotive parts will be sourced as off-the-shelf components. Accordingly, we expect our investments outside of research and development and ongoing general and administrative expenses to be of a limited nature. Between 2021 and the planned start of production of the Sion in the first half of 2023, we expect significant capital expenditure to be borne by us for hard and soft tooling. Over the same period, we also expect to incur expenses for engineering work that NEVS will invoice to Sono Motors.

Unused Tax Loss

We have substantial carried-forward tax losses resulting from our negative taxable income in 2020, 2019 and prior fiscal years. Given that our estimated taxable income in the foreseeable future may not be sufficient to recover these carried-forward losses we have not recognized deferred tax assets on the balance sheet as of December 31, 2019, December 31, 2020 or June 30, 2021. Our unused tax losses as of December 31, 2020, for which no tax asset has been recognized were €51.3 million (corporate income tax) and €51.1 million (trade tax). Assuming a total tax rate of 32.98%, our unused corporate income and trade tax losses correspond to a potential undiscounted tax benefit of €16.9 million. Only up to 60% of our annual taxable income, to the extent such taxable income exceeds €1 million, may be offset against tax loss carry forwards. The remaining 40% of the taxable income are subject to corporate income and trade tax under the so-called minimum taxation rules. Annual taxable income for corporate income tax and trade tax purposes of up to €1 million could fully be offset against tax loss carry-forwards.

Conversion Stock Option Program (CSOP)

In the first half of 2018, we set up two similar employee participation programs for our staff members and selected managers of the company based on virtual shares. In December 2020, we offered all participants of the aforementioned employee participation programs as well as six additional members of our staff to exchange their virtual shares for actual stock options under a newly set up employee participation program (conversion stock option program or CSOP), which is equity settled. As of December 31, 2020, 88 employees, including all those participating in the original employee participation program but one, have joined the CSOP. We recorded expenses in the amount of €32.2 million for the implementation of the CSOP in 2020.

COVID-19

COVID-19 is still the globally dominant topic. In the first half of 2021, successful vaccination campaigns led to the lowering of state and private measures. In line with the economic recovery associated with these reliefs, the automotive industry in Germany expects a slight increase in the number of vehicles sold in 2021 as compared to the prior year, but expectations are still below the pre-COVID-19 level. With regard to us, in the first half of 2021, COVID-19 had a slightly negative impact on advance payments received from customers. The impact of COVID-19 on the current situation continues to improve compared to 2020 but is still negatively impacted compared to the pre-COVID-19 state.

The continuing COVID-19 measures may stabilize the existing trend to work from home, which could result in lower demand for cars and could negatively impact our sales and marketing activities. The pandemic may also affect the interest of our customers in their car-sharing and ride-pooling networks. Based on the most recent information, COVID-19 might continue to have a negative effect on advance payments received from customers in 2021. Other than that, we cannot yet foresee the full extent of COVID-19's impact on our business and operations and such impact will depend on future developments of the outbreak, including new information concerning the global severity of and actions taken to contain the ongoing pandemic, which are highly uncertain and unpredictable. These aspects could have a material impact on our result from

operations, liquidity and capital management, including financing. We will continue to monitor the situation and the effect of this development on its liquidity and capital management. At the same time, we have taken actions to maintain operations and protect employees from infection.

Components of Our Results of Operations

Revenues

In the years ended December 31, 2019, 2020 and the six months ended June 30, 2021, we did not generate any revenues as we only started monetizing our solar technology in the second half of 2021 and as the start of the Sion's production is currently only planned to start in the first half of 2023.

Cost of Sales

In the years ended December 31, 2019, 2020 and the six months ended June 30, 2021, we did not incur any cost of sales as we only started monetizing our solar technology in the second half of 2021 and as the start of the Sion's production is currently only planned to start in the first half of 2023.

Operating Expenses

Our operating expenses consist of research and development expenses and selling, general and administrative expenses as well as other operating income.

Cost of Research and Development

There were no research expenses included in the profit and loss of the Company in the years ended December 31, 2019 and 2020 or the six months ended June 30, 2021, as we do not perform research. Our development expenses consist of (i) personnel expenses for our development staff, including salaries and bonuses and the relevant share of expenses relating to our the CSOP, (ii) development cost for prototypes, our car-sharing and ride-pooling application and solar integration, (iii) professional services and (iv) other expenses. Development costs are expensed as incurred.

Selling and Distribution Expenses

Our selling and distribution expenses consist of (i) employee compensation for employees responsible for marketing activities, such as roadshows, test rides and social media, including salaries and bonuses and the relevant share of expenses relating to our the employee participation program (CSOP), (ii) marketing and promotional expenses, (iii) expenses for professional services and (iv) other expenses.

General and Administrative Expenses

Our general and administrative expenses consist of (i) personnel expenses for employees responsible for areas such as finance, human resources, business development, administration, including salaries and bonuses and the relevant share of expenses relating to our the employee participation program (CSOP), (ii) expenses for professional services, such as accounting, tax, legal and other external services, (iii) expenses without sufficient supporting documentation, including underlying invoices, and (iv) other expenses.

Other Operating Income/Expenses

Our other operating income primarily consists of agency fees, donations, statutory reimbursements for personnel expenses and government grants.

Our other operating expenses solely included expenses that related to project terminations with a supplier.

Other Interest and Similar Income

Other interest and similar income relates to interest income from VAT taxes.

Interest and Other Expenses

Interest and other expenses largely consists of interest expenses related to the compounding effect for advance payments received from customers and financial liabilities.

Results of Operations

The following table shows information taken from our consolidated statement of income (loss) and statements of comprehensive income (loss) for the years ended December 31, 2019 and December 31, 2020 and for the six months ended June 30, 2020 and June 30, 2021:

	For the year ended December 31,		For the six month ended June 30,	
	2020	2019 ⁽¹⁾	2021	2020
	(in € millions)		(in € millions)	
Revenue	—	—	—	—
Cost of sales	—	—	—	—
Gross profit	—	—	—	—
Cost of research and development	(30.5)	(4.9)	(13.5)	(6.4)
Selling and distribution expenses	(9.1)	(2.1)	(1.6)	(1.1)
General and administrative expenses	(14.4)	(2.4)	(8.3)	(1.5)
Other operating income/expenses	(0.0)	0.2	0.4	0.1
Impairment losses on financial assets	(0.0)	—	(0)	(0)
Operating loss	(54.0)	(9.3)	(23.0)	(8.9)
Other interest and similar income	0.0	—	—	0
Interest and other expenses	(2.0)	(0.7)	(2.6)	(0.9)
Loss before tax	(56.0)	(10.0)	(25.6)	(9.8)
Tax on income	—	—	0	0
Deferred taxes on expense	—	—	(0)	—
Loss for the period	(56.0)	(10.0)	(25.7)	(9.8)
Other comprehensive loss	(0)	—	(0.1)	—
Total comprehensive loss for the period	(56.0)	(10.0)	(25.8)	(9.8)

- (1) Other interest and similar income, interest and other expenses, loss before tax, loss for the period and total comprehensive loss for the period were restated for 2019 due to a change in accounting policies in accordance with IAS 8 (Accounting policies, changes in accounting estimates and errors) with respect to a reclassification of advance payments received by customers from financial liabilities in accordance with IFRS 9 to contract liabilities in accordance with IFRS 15. Please also refer to Note 4 to the consolidated financial statements included in this prospectus.

Revenue

Comparison of the Six Month Period ended June 30, 2020 and 2021

For the six months ended June 30, 2020 and June 30, 2021, we did not generate any revenue from our operations.

Comparison of the Year ended December 31, 2019 and 2020

In 2019 and 2020, we did not generate any revenue from our operations.

Cost of Sales

Comparison of the Six Month Period ended June 30, 2020 and 2021

We recorded no cost of sales in the six months ended June 30, 2020 and June 30, 2021.

Comparison of the Year ended December 31, 2019 and 2020

We recorded no cost of sales in 2019 and 2020.

Gross profit

Comparison of the Six Month Period ended June 30, 2020 and 2021

We generated no gross profit in the six months ended June 30, 2020 and June 30, 2021.

Comparison of the Year ended December 31, 2019 and 2020

In 2019 and 2020, we did not generate gross profit.

Cost of Research and Development*Comparison of the Six Month Period ended June 30, 2020 and 2021*

Cost of research and development increased from €6.4 million in the six months ended June 30, 2020 to €13.5 million in the six months ended June 30, 2021, primarily due to an increase in development cost of prototypes, which increased from €4.0 million in the six months ended June 30, 2020 to €8.8 million in the six months ended June 30, 2021 resulting from the development of our new prototypes. Personal expenses increased from €1.7 million in the six months ended June 30, 2020 to €3.1 million in the six months ended June 30, 2021, mainly due to expenses related to the CSOP. In the six months periods ended June 30, 2020 and June 30, 2021, there were no research expenses, as we do not perform research. As the recognition criteria for the capitalization of development cost have not been met, all development expenses were recognized in profit or loss as incurred in the six months periods ended June 30, 2020 and June 30, 2021.

Comparison of the Year ended December 31, 2019 and 2020

Cost of research and development increased from €4.9 million in 2019 to €30.5 million in 2020, primarily due to an increase in personnel expenses for our development staff resulting from the implementation of our CSOP in 2020, which accounted for expenses of €17.7 million. In addition, development costs for prototypes increased from €1.6 million in 2019 to €7.3 million in 2020 resulting from the development of our new prototypes. In 2019 and 2020, there were no research expenses, as we do not perform research. As the recognition criteria for the capitalization of development cost have not been met, all development expenses were recognized in profit or loss as incurred in 2019 and 2020.

Selling and Distribution Expenses*Comparison of the Six Month Period ended June 30, 2020 and 2021*

Selling and distribution expenses increased from €1.1 million in the six months ended June 30, 2020 to €1.6 million in the six months ended June 30, 2021, primarily due to an increase in personnel expenses for our employees responsible for marketing activities as well as an increase in external services expenses related to marketing activities.

Comparison of the Year ended December 31, 2019 and 2020

Selling and distribution expenses increased from €2.1 million in 2019 to €9.1 million in 2020, primarily due to an increase in personnel expenses for our employees responsible for marketing activities resulting from the implementation of our CSOP, which accounted for expenses of €6.9 million in 2020. Additionally, selling and distribution expenses mainly consisted of personnel expenses for employees responsible for marketing activities such as roadshows, test rides and social media.

General and Administrative Expenses*Comparison of the Six Month Period ended June 30, 2020 and 2021*

General and administrative expenses increased from €1.5 million in the six months ended June 30, 2020 to €8.3 million in the six months ended June 30, 2021, primarily due to an increase in personnel expenses for employees responsible for areas such as finance, human resources, business development and administration mainly resulting from the implementation of our CSOP. In addition, expenses for professional services increased from €0.5 million in the six months ended June 30, 2020 to €3.2 million for the six months ended June 30, 2021 resulting from accounting, tax and legal services as well as other external services related to the preparation of our financial statements.

Comparison of the Year ended December 31, 2019 and 2020

General and administrative expenses increased from €2.4 million in 2019 to €14.4 million in 2020, primarily due to an increase in personnel expenses for employees responsible for areas such as finance,

human resources, business development and administration resulting from the implementation of our CSOP, which accounted for expenses of €7.5 million in 2020. In addition, expenses for professional services increased from €0.7 million in 2019 to €4.8 million in 2020 resulting from accounting, tax and legal services as well as other external services related to the initial preparation and audit of financial statements.

Other Operating Income/Expenses

Comparison of the Six Month Period ended June 30, 2020 and 2021

Other operating income/expenses changed from income of €0.1 million in the six months ended June 30, 2020 to income of €0.4 million in the six months ended June 30, 2021.

Comparison of the Year ended December 31, 2019 and 2020

Other operating income increased from €0.2 million in 2019 to €0.3 million in 2020. In 2020, other operating income mainly included agency fees from a conversion offer, which allowed selected customers who made advance payments to enter into a lease agreement with Renault for a Renault ZOE and to use their advance payments to partly offset their lease payments, donations, statutory reimbursements for personnel expenses and government grants. This conversion offer ended in 2020.

Other operating expenses amounted to €0.3 million in 2020 and solely included expenses relating to a project termination with a supplier.

Operating Loss, Loss for the Period

Comparison of the Six Month Period ended June 30, 2020 and 2021

Operating loss increased from €8.9 million in the six months ended June 30, 2020 to €23.0 million in the six months ended June 30, 2021, primarily due to an increase in cost of research and development and general and administrative expenses. Subtracting other interest and similar income and subtracting interest and other expenses and tax on income, loss for the period increased from a loss of €9.8 million in the six months ended June 30, 2020 to a loss of €25.7 million in the six months ended June 30, 2021.

Comparison of the Year ended December 31, 2019 and 2020

Operating loss increased from a loss of €9.3 million in 2019 to a loss of €54.0 million in 2020 primarily due to an increase in personnel expenses resulting from the implementation of our CSOP, the development of our new prototypes and professional services primarily relating to the preparation and audit of our consolidated financial statements and other professional services relating to the issue of our pre-IPO mandatory convertible bonds and this offering. Subtracting other interest and similar income and subtracting interest and other expenses and tax on income, loss for the period increased from a loss of €10.0 million in 2019 to a loss of €56.0 million in 2020.

Liquidity and Capital Resources

As of June 30, 2021, we had cash and cash equivalents of €26.1 million compared to €43.3 million as of December 31, 2020. Our cash and cash equivalents consist primarily of cash in bank accounts.

We are in the process of developing a solar electric vehicle, the Sion. We currently do not generate any revenue from our operations. We incur, however, significant expenses related to the development of the Sion, refinement of our technology, marketing activities and general and administrative functions. In order to cover these expenses and prepare for production of the Sion, we rely on external financing and expect to continue to rely on external financing. We have mainly raised capital in the form of equity or debt capital. We have also raised capital through advance payments on reservations for the Sion. We may, however, not be able to access all of these advance payments, as some of the customers used PayPal for their advance payments. Since March 2020, we have no access to these amounts reserved by PayPal in line with PayPal's relevant terms and conditions and it is unclear when these amounts will be released to us. As we expect a payment of these funds by PayPal to us within the next twelve months, these funds at PayPal have been classified as current financial assets. Customers may also cancel their reservations for the Sion, in which case we will have to refund the advance payment. We have also raised funds through the placement of pre-IPO mandatory

convertible bonds. Finally, we have received limited grants from government agencies and similar bodies like the EU for participation in specific research and development projects. As of June 30, 2021, our cash and cash equivalents amounted to €26.1 million. During the six months ended June 30, 2021, net financing was received from advance payments from customers of €0.9 million and proceeds from the issue of shares to private investors of €1.5 million. Our ability to raise external financing has been, and will continue to be, highly dependent on further progress in the development of the Sion and successful communication to potential external investors.

Our ability to continue as a going concern is largely dependent on our ability to raise additional funds through debt or equity transactions, additional advance payments, or other means, and ultimately, to achieve serial production of the Sion. It is uncertain if sufficient financing can be obtained to continue as a going concern and further to achieve serial production of the Sion. Our forecast cash required to fund operations, excluding future financing efforts, indicates that we do not have sufficient funds to support operations through the twelve-month period from the date of issuance of the condensed consolidated interim financial statements included in this prospectus. Accordingly, there is substantial doubt about our ability to continue as a going concern within twelve-months from the date of issuance of these financial statements. Based on the cash position as of August 31, 2021 and our business plan, excluding any targeted proceeds from an initial public offering, as of August 31, 2021, the Group would become insolvent by December 2021 or shortly thereafter if no additional financing can be raised.

We plan to address this going concern uncertainty by raising the required financing through this offering, where we seek to raise sufficient funds to finalize the development of the next generation prototype, the so-called generation III, which is the basis for the serial production and thus an important milestone in our business plan. As further financing is currently uncertain, the IPO proceeds will also be used to maintain liquidity until May 2023 to meet legal financial obligations, to pay ongoing overhead cost and to maintain going concern of the Company until May 2023. Additional financing will be necessary to undertake additional development activities for the car and solar technology to begin serial production and pay overhead costs.

See also Note 3.1 to the condensed consolidated interim financial statements as of and for the six months ended June 30, 2021 included in this prospectus.

Consolidated Cash Flow Statements

The following table shows selected information taken from our consolidated cash flow statements for the years ended December 31, 2019 and 2020 and for the six months ended June 30, 2020 and June 30, 2021:

	For the year ended December 31,		For the six months ended June 30	
	2020	2019 ⁽¹⁾	2021	2020
	(in € millions)		(in € millions)	
Net cash flows from operating activities	(1.2)	(8.8)	(17.8)	11.9
Net cash flows from investing activities	(0)	(1.1)	(0.5)	(0)
Net cash flows from financing activities	44.1	8.8	1.2	3.1
Net (decrease) increase in cash and cash equivalents	42.9	(1.1)	(17.1)	15.0
Cash and cash equivalents at the beginning of the financial year	0.4	1.5	43.3	0.4
Cash and cash equivalents at end of year	43.3	0.4	26.1	15.4

- (1) Net cash flows from operating activities, net cash flows from investing activities and net cash flows from financing activities were restated for 2019 due to a change in accounting policies in accordance with IAS 8 (Accounting policies, changes in accounting estimates and errors) with respect to a reclassification of advance payments received by customers from financial liabilities in accordance with IFRS 9 to contract liabilities in accordance with IFRS 15. Please also refer to Note 4 to the consolidated financial statements included in this prospectus.

Net cash flows from operating activities

Comparison of the Six Month Period ended June 30, 2020 and 2021

Net cash flows from operating activities decreased from a cash inflow of €11.9 million in the six months ended June 30, 2020 to a cash outflow of €17.8 million in the six months ended June 30, 2021. This

change was mainly due to high cash inflows from advance payments received from customers in the six months ended June 30, 2020, which did not recur in the six months ended June 30, 2021 and an increase in the cash effective loss for the period.

Comparison of the Year ended December 31, 2019 and 2020

Net cash flows from operating activities increased from a cash outflow of €8.8 million in 2019 to a cash outflow of €1.2 million in 2020. An increase in the cash effective operating loss of €10.0 million in 2019 to €56.0 million in 2020 adjusted for non-cash items (primarily relating to expenses for our CSOP) as well as a cash outflow relating to an increase in other assets was offset by a cash inflow of €26.4 million relating to an increase of reservations with advance payments from our customers.

Net cash flows from investing activities

Comparison of the Six Month Period ended June 30, 2020 and 2021

Net cash flows from investing activities decreased from a cash outflow of €0.0 million in the six months ended June 30, 2020 to a cash outflow of €0.5 million in the six months ended June 30, 2021, primarily due to a decrease of cash outflows relating to purchase of property, plant and equipment.

Comparison of the Year ended December 31, 2019 and 2020

Net cash flows from investing activities increased from a cash outflow of €1.1 million in 2019 to a cash outflow of €0 million in 2020, primarily due to a decrease of cash outflows relating to purchase of property, plant and equipment, which decreased from €1.1 million in 2019 to €0.0 million in 2020.

Net cash flows from financing activities

Comparison of the Six Month Period ended June 30, 2020 and 2021

Net cash flows from financing activities decreased from a cash inflow of €3.1 million in the six months ended June 30, 2020, which mainly included proceeds from borrowings, to a cash inflow of €1.2 million in the six months ended June 30, 2021, which mainly included proceeds from issues of shares.

Comparison of the Year ended December 31, 2019 and 2020

Net cash flows from financing activities increased from a cash inflow of €8.8 million in 2019 to a cash inflow of €44.1 million in 2020, primarily due to an increase of proceeds from the issue of shares to private investors and from borrowings in connection with our last funding round before this offering.

Financial Liabilities

The table below summarizes the maturity profile of our financial liabilities based on contractual undiscounted payments as of June 30, 2021:

	Carrying amount	Less than 1 year	1 - 5 years	More than 5 years
		(in € millions)		
Trade and other payables	6.9	6.9	—	—
Loans and participation rights	5.8	2.1	9.0	—
Convertible notes	8.5	—	—	—
Lease liabilities	3.3	0.3	1.3	0.6
Total	24.5	9.3	10.3	0.6

Changes in Accounting Policies and Disclosures

In 2019, we accounted for advance payments from customers as financial liabilities in accordance with IFRS 9. In 2020, due to the frequency of these transactions, we re-evaluated and determined that these advance payments should have been accounted for as contract liabilities in accordance with IFRS 15 due to our commitment to deliver a vehicle to customers (if they choose so) in exchange for their advance payment.

In accordance with IAS 8 (*Accounting policies, changes in accounting estimates and errors*) this change in accounting policy has been applied retrospectively.

Certain new accounting standards and interpretations have been published that are not mandatory for the consolidated financial statements as of December 31, 2020 and have not been early-adopted by us. These standards are not expected to have a material impact on the Company's consolidated financial statements in the current or future reporting periods and on foreseeable future transactions.

Significant Accounting Judgments, Estimates and Assumptions

The preparation of our consolidated financial statements in accordance with IFRS as issued by the IASB requires us to make judgments, estimates and assumptions that affect the reported amounts in the consolidated financial statements. We continually evaluate our judgments and estimates in relation to assets, liabilities, contingent liabilities and expenses. We base our judgments and estimates on historical experience and on other various factors, we believe to be reasonable under the circumstances, the result of which forms the basis of the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions and conditions and may materially affect the financial results or the financial position reported in future periods.

In the process of applying the accounting policies, we have made the following judgments, which have the most significant effect on the amounts recognized in our consolidated financial statements.

Going Concern

We assessed our ability to continue as a going concern and evaluated whether there are conditions and events, considered in the aggregate, that raise substantial doubt about our ability to continue as a going concern using all information available about the future, focusing on the 12 months following the issuance date of the condensed consolidated interim financial statements.

As of June 30, 2021, we had an accumulated deficit according to IFRS of €108.8 million (December 31, 2020: €83.1 million), of which €28.1 million was not covered by equity (December 31, 2020: €5.0 million). Historically, we have financed our operations primarily through capital raises and with loans from shareholders and private investors as well as through advance payments received from customers. Since our inception, we have incurred recurring losses and negative cash flows from operations.

In the six months ended June 30, 2021, we had net losses for the period of €25.7 million (€9.8 million in the six months ended June 30, 2020). We expect to continue to generate operating losses for the foreseeable future until the start of production of the Sion and possibly later. While we seek to increase monetization of our technology, we do not anticipate that we will generate commercial revenue or positive operating cash flows from vehicle sales of the Sion until the start of production or later. Management anticipates in its current plan that the Sion will generate high one-digits gross margins in the mid-term after start of production (SOP). In addition, management expects revenues from emission certificate pooling under relevant EU regulations on CO2 target emissions ("CO2 pooling") and from the monetization of their solar technology and other expected revenues from after-sales and the sharing business.

Our ability to continue as a going concern is largely dependent on our ability to raise additional funds through debt or equity transactions, additional advance payments, or other means, and ultimately, to achieve serial production of the Sion. It is uncertain if sufficient financing can be obtained to continue as a going concern and further to achieve serial production of the Sion. Our forecasted cash required to fund operations, excluding future financing efforts, indicates that we do not have sufficient funds to support operations through the twelve month period from the issuance date of these financial statements. Accordingly, there is substantial doubt about the Group's ability to continue as a going concern within twelve-months from the issuance date of our condensed consolidated interim financial statements as of and for the six months ended June 30, 2021. Based on our cash position as of August 31, 2021 and our business plan as of August 31, 2021 and excluding any proceeds from this offering, we will become insolvent by December 2021 or shortly thereafter if no additional financing can be raised.

Securing the financing of development activities and operations represents an ongoing challenge for us. Structural changes in the German and international automotive industry in the recent past as well as changes

in the capital markets have made it difficult to attract large, strategic investors. Additionally, the ongoing corona virus-pandemic may negatively affect our business, liquidity and financial position going forward, as further described Note 3.2 to the unaudited condensed consolidated interim financial statements included in this prospectus and in the section “Risk Factors.”

We intend to address this going concern uncertainty by raising the required financing through this offering. We expect to use the expected proceeds mainly to finalize the development of our next generation prototype, the so-called generation III, which is the basis for the serial production and thus an important milestone in our business plan. As further financing is currently uncertain, the expected proceeds from this offering will also be used to maintain liquidity until May 2023 (including a reserve of €39 million to maintain the ability to repay customer advance payments) to meet legal financial obligations, to pay ongoing overhead cost and to maintain going concern of the Company until May 2023. Additional financing will be necessary to undertake additional development activities for the Sion and solar technology to begin serial production and pay overhead costs.

The timely raising of funding through this IPO of at least €149 million as well as obtaining further required financing, based on management’s current estimates, of at least €205 million (by way of a second offering or other means of financing) is crucial for our ability to achieve start of serial production within the first half of 2023. For the period after start of production, we expect that the operating business can stay solvent primarily based on the anticipated sales and (if necessary) further financing means such as a working capital credit line. There is no certainty that we will be successful in obtaining sufficient funding on terms acceptable to us or even obtain additional funding at all. If we are unable to obtain additional funding in due time, for example if the IPO is unsuccessful or an insufficient amount is raised in the IPO transaction, or an unsuccessful follow-on offering or inability to raise other means of funding or if funding needs increase beyond the current projections, we will be forced to delay, reduce, or eliminate some or all of our development activities and production efforts and, subsequently, will be subject to cancellations and demands for repayment of advance payments received from customers and other financing received, which will lead to a liquidity shortage or may even lead to the insolvency of the Sono Group.

Our unaudited condensed consolidated interim financial statements included in this prospectus have been prepared on a going concern basis, which contemplates the realization of assets and satisfaction of liabilities and commitments in the ordinary course of business. Our condensed consolidated interim financial statements as of and for the six months ended June 30, 2021 do not include any adjustments relating to the recoverability and classification of recorded asset amounts or the amounts and classification of liabilities that may result from the outcome of this uncertainty.

Remuneration based on shares (share-based payments)

For equity-settled share-based payment transactions we initially measure on the grant date the fair value of the services received by reference to the fair value of the equity-settled instruments granted. The fair value measurement of the stock options for the equity-settled share-based transactions requires assumptions about the relevant input data for the use of the Black-Scholes model for the pricing of the transactions. The expected life of the stock options is based on current expectations and is not necessarily indicative of exercise patterns that may occur. The expected volatility was based on an evaluation of historical volatilities of comparable listed peer group companies. The expected volatility reflects the assumption that the historical volatility over a period similar to the life of the stock options is indicative of future trends, which may not necessarily be the actual outcome. For further details about the input factors see note 10.3 Remuneration based on shares (share-based payment) in our consolidated financial statements included elsewhere in this prospectus.

Impact of COVID-19

We cannot yet foresee the full extent of COVID-19’s impact on our business and operations and such impact will depend on future developments of the outbreak, including new information concerning the global severity of and actions taken to contain the outbreak, which are highly uncertain and unpredictable. The effects could have a material impact on our results of operations, liquidity and capital management. We will continue to monitor the situation and the effect of this development on our liquidity and capital management. At the same time, we have taken actions to maintain operations and protect employees from

infection. In 2020, COVID-19 had a slightly negative impact on order and advance payments received from customers. Based on the most current information available, we expect COVID-19 to continue to negatively impact orders and advance payments received from customers in 2021.

Sono Points

We use advance payments made by customers in connection with reservations to finance our operations. Reservations entitle customers to conclude a contract for the purchase of the Sion. A customer can withdraw from the reservation if he or she decides not to conclude the purchase contract or we have not offered a purchase contract by the respective date defined by the underlying terms and conditions. In December 2019, we launched a crowdfunding campaign with the aim of raising a predefined target amount. In connection with the campaign, so-called Sono Points were introduced and communicated on December 15, 2019. Our three founders, Laurin Hahn, Navina Persteiner and Jona Christians, announced that they would be giving a majority of their profit participation rights (the voting rights remain with the founders), equaling 64.07% of all profit participation rights at the relevant point in time (as of December 31, 2019) to a “community pool”, from which the so-called Sono Points would be awarded. The number of Sono Points, through which the participants in the crowdfunding and pre-orders should participate in the community pool depends mainly on the time and amount of the individual deposit. The maximum number of possible Sono Points in total is not limited. In case a Sono Point holder should revoke or withdraw from the reservation or should revoke or withdraw from the purchase contract concluded on the basis of the reservation, the Sono Points will expire.

According to the current assessment of our management board (based on legal assessments), our management board concludes that Sono Points do not impact us as the obligation relates only to the founders. For more information on Sono Points, please see “*Risk Factors—Regulatory, Legal and Tax Risks—We may be subject to litigation or other legal proceedings that could cause us to spend substantial resources and disrupt our business.*” and Note 5.11.4 to the consolidated financial statements as of and for the year ended December 31, 2020 included in this prospectus.

Recoverability of Deferred Tax Assets in Relation to Loss Carryforwards

We have substantial carry-forward tax losses resulting from our negative taxable income in 2020, 2019 and prior fiscal years. These tax losses represent start-up losses as a result of establishing our business. Based on our current business plan and budget, estimated future taxable income after the start of production will not be sufficient to recover these carried-forward losses. Accordingly, we did not recognize deferred tax assets as of December 31, 2019 or December 31, 2020. The tax losses can generally be carried forward indefinitely and have no expiry date. However, only up to 60% of the taxable income, to the extent such taxable income exceeds an amount of €1 million, may be offset against carry-forward tax losses. The remaining 40% of the taxable income are subject to corporate income and trade tax under the so-called minimum taxation rules. Taxable income for corporate income tax and trade tax purposes of up to an amount of €1 million could fully be offset against tax loss carry-forwards. We currently expect to generate positive taxable income from 2024 onwards. Due to our corporate reorganization, however, we will be able to use these tax losses only up to the amount that hidden reserves existed at the time of the corporate reorganization.

Quantitative and Qualitative Disclosures About Market Risk

We are exposed to a variety of risks in the ordinary course of our business, including, but not limited to, credit risk, liquidity risk and interest rate risk. We regularly assess each of these risks to minimize any adverse effects on our business as a result of those factors. For discussion and sensitivity analyses of our exposure to these risks, see Note 9.1 to the consolidated financial statements included in this prospectus.

Internal Control Over Financial Reporting

Historically, we have been a private company and did not maintain the internal accounting and financial reporting resources necessary to comply with the obligations of a public reporting company, including maintaining effective internal control over financial reporting. In connection with the audits of our consolidated financial statements for the years ended December 31, 2019 and 2020, we identified multiple material weaknesses in our internal control over financial reporting. A “material weakness” is a deficiency,

or a combination of deficiencies, in internal control over financial reporting such that there is a reasonable possibility that a material misstatement of our annual or condensed consolidated interim financial statements will not be prevented or detected on a timely basis. The material weaknesses that were identified primarily related to (i) a lack of consistent and proper application of accounting processes and procedures; (ii) the design and operating effectiveness of information technology general controls for information systems that are significant to the preparation of our consolidated financial statements; (iii) a lack of review and supervision; (iv) the sufficiency of resources with an appropriate level of technical accounting and SEC reporting experience; (v) clearly defined control processes, roles and segregation of duties within our finance and accounting functions. These deficiencies constitute material weaknesses in our internal controls over financial reporting in both design and operation.

As a result of the material weaknesses, we

- made journal entries without proper underlying documentation and failed to identify adjustments in various areas, including, but not limited to, capitalization of intangible assets;
- did not maintain accurate customer and creditor data, did not remit correct VAT declarations, made disbursements for which the Company did not retain sufficient supporting documentation, including underlying invoices;
- did not have sufficient knowledge of IFRS, including understanding of new accounting standards, in order for the preparation of consolidated financial statements in accordance with IFRS and consideration of the impact of changes on our internal control over financial reporting;
- did not have an effective risk assessment process to identify and assess the financial reporting risks caused by changes in the operating environment, business operations, personnel or IT systems and to make necessary changes to our financial reporting processes and related internal controls to manage those risks;
- did not design control activities that are responsive to the identified fraud risks, including the risk of bias and management override of controls; and
- did not have a proper process in place to sufficiently and timely identify and assess new events and transactions in order to consider necessary adjustments to our system of internal control over financial reporting.

We have initiated a remediation plan to address these material weaknesses. As part of this plan, we intend to hire additional senior level and staff accountants to implement robust processes and provide us with additional technical expertise. In the interim, we will continue to engage third parties as required to assist with technical accounting and tax matters. Additionally, we intend to develop and implement robust accounting policies, internal control procedures and provide additional training to our accounting and finance staff. We will improve the document management process. While we are working to remediate the weaknesses as quickly and efficiently as possible, we cannot at this time, provide an estimate of the timeframe we expect in connection with implementing our plan to remediate this material weaknesses. See also *“Risk Factors—Risks Related to our Initial Public Offering and Our Common Shares—We have identified material weaknesses in our internal control over financial reporting. If we are unable to remediate the material weaknesses, or if other control deficiencies are identified, we may not be able to report our financial results accurately, prevent fraud or file our periodic reports as a public company in a timely manner.”*

BUSINESS

BUSINESS

Our Mission: Solar on Every Vehicle

We envision a world without burning fossil fuels. Our mission is: “Solar on Every Vehicle.” Our business was founded on a shared passion for finding a solution to climate-friendly, innovative and yet affordable mobility. The goal was to develop a solar-powered, family-sized car for the mass market. To realize this goal, our founders assembled an experienced team of engineers, designers, technicians, and industry experts who spent years developing solar technology suited for mobility applications. We developed and tested several prototypes to advance and refine our technology and enlisted driver feedback to create a design that would be simultaneously functional, convenient to operate, environmentally sustainable, and affordable.

From this process the Sion and our proprietary solar technology were born. The Sion is a solar electric vehicle, designed with a view to be accessible to everyday consumers and to be shared. Our technology allows us to integrate solar panels into the Sion’s bodywork to capture energy from the sun and store it in the Sion’s on-board battery. We believe the Sion unlocks the potential of solar energy in a car and advances our goal of providing a net-zero-emission vehicle solution for the mass market. We seek to license and sell our proprietary solar technology to a wide array of customers such as manufacturers of buses, trucks, camper vans, trains and even boats, in order to accelerate the transition towards sustainable transport and in order to have a second independent revenue stream.

Overview

We believe we are a pioneer and technological leader in the field of solar-powered electric mobility. We are in the process of developing and commercializing a disruptive solar technology that would allow every vehicle to benefit from solar power. We intend to use our technology to create our solar and battery powered vehicle that we call the Sion. In parallel, we are in the process of starting to license and sell our proprietary solar technology to other manufacturers for different use cases, such as buses, trucks, camper vans, trains and even boats, in order to accelerate the transition towards sustainable transportation. We intend to generate revenues from the sale of our vehicles and, in the first production cycle, from emission certificate pooling as well as from the monetization of our proprietary solar technology.

Our disruptive solar technology allows for full solar integration. In the process of developing the Sion, we soon realized that the available solar technology was not well-suited for mobility applications. Traditional solar technology relies on glass to cover the solar cells. Glass is, however, heavy, not sufficiently flexible, expensive and dangerous in crash situations. Our polymer technology solves these issues. It is lightweight, allows for flexible surface integration via our patented injection molding process, is affordable due to fast and lean production and avoids/eliminates the risk of bodily harm caused by broken glass. We have also developed other critical components for the use of solar technology in mobility applications. We have, through our maximum power point tracker central unit, or MCU, solved the issue that solar cells will be mounted on different parts of the exterior, which will lead to uneven exposure to sunlight. Our technology allows for the seamless integration of solar cells into the body of a car, such as the Sion, and the charging of its battery through the power of the sun. However, solar technology is much more versatile, and its use cases extend far beyond passenger cars, allowing for grid-independent charging and a reduction of running costs or total costs of ownership in transport related use cases, such as trucks, buses, recreational vehicles or boats. We have started to market our technology to other mobility or transport manufacturers. We have received indications of interest and first purchase orders and shipped pre-production samples to customers. Other manufacturers may also benefit from our technology. They may use our technology to retrofit existing vehicles, to extend the range of battery electric vehicles, or BEVs, for new production vehicles or to comply with emission regulations. The transport and logistics industries in particular are very focused on total cost of ownership, where our solar integration can reduce running cost significantly. We have several patents granted or within the filing-process protecting our proprietary technology. Additionally, we have up to four years of advanced development ahead of who we believe to be our relevant competitors thanks to the patents, the testing of a large number of different polymer materials and the several relevant components for full solar integration, such as power electronics, especially the MCU.

Our technology will be one of the distinctive features of the Sion. It will have the ability to recharge itself using solar energy panels installed on the exterior that leverage our polymer-based solar technology.

We expect that solar power will reduce the number of charging intervals and, depending on the vehicle's usage profile, may even eliminate the need for battery charging, positioning us to benefit from a significant competitive advantage over conventional electric vehicles. The Sion's polymer exterior significantly reduces the need for expensive metal-stamping tools and machinery costs, and the integration of solar modules into the bodywork eliminates the need for a costly paint shop, which helps us to accept reservations for the Sion locking in a comparatively low net entry price of currently €23.9 thousand. Consistent with our mission to lower CO2 emissions, each Sion will be outfitted with technology that can connect to our car- and ride-sharing networks through our proprietary hardware and software solutions. We expect that the Sion will be convenient to operate and comparatively affordable providing it with the potential to disrupt the market.

To make the Sion affordable for the mass market without compromising security or quality, we do things differently and, we believe, much more efficiently and sustainably than traditional car manufacturers or other pure EV manufacturers. We rely on a one-variant-only vehicle, third party production and business-to-consumer direct distribution, which we believe will enable us to maintain relatively low overhead costs, significantly reduce our capital expenditures, and position us to become a price-value leader compared to competitors' offerings in the relevant car segments. All Sions will have the same exterior color and vehicle features, and will rely on existing off-the-shelf component parts from established automotive suppliers, such as Vitesco Technologies German GmbH (a former subsidiary of Continental AG), Hella GmbH & Co. KGaA, FinDreams Industry Co., Ltd. and Casco Schoeller GmbH, resulting in economies of scale through the partial elimination of development costs, reduced purchasing and manufacturing complexity, reduced logistical challenges and inventory costs, and lower risks associated with quality control and testing, all of which should facilitate more rapid growth of our operations and position us to offer the Sion. The production of the Sion is currently expected to be outsourced to a contract manufacturer at the former Saab Automobile AB ("SAAB") plant in Trollhättan, Sweden. Our goal is to offset 100% of the CO2 emissions generated by the production of the Sion and our future vehicle models, with a view to achieving full CO2 neutrality during the production cycle. Rather than relying on dealerships to sell the Sion, we intend to rely on what we consider to be an innovative and effective way to sell directly to customers through our online platform. Customers can view the Sion, book a test drive and engage and place orders directly with us. As of November 5, 2021, we had more than 16,000 reservations with advance payments resulting in total net cash inflows of €40.8 million from our customers up from total net cash inflows of €37.9 million as of June 30, 2021. These reservations correspond to a net sales volume of approximately €340 million. However, our customers may cancel their reservations without penalty according to our general terms and conditions, if no binding purchase agreement has been concluded by an agreed deadline, which varies. Some reservations are already cancellable as of the date of this prospectus. We intend to begin delivering cars in the first half of 2023 and thereby fulfill customer reservations. See also "*Risk Factors—Risks Related to Our Business and Operations—Any delay in commercial production of the Sion could adversely affect us.*"

With respect to our solar technology licensing, we have shipped pre-production samples to customers and expect to generate very limited revenue in the fourth quarter of 2021. With respect to the Sion, we are still in the pre-production phase and presented the second fully functional prototype generation in January 2021. The funding that we expect to obtain from this offering will not be sufficient to secure our needs through the start of production of the Sion. Assuming that we are able to raise the amounts we still need following this offering, we currently plan to commence commercial production of the Sion in the first half of 2023. For the six months ended June 30, 2021, we had a loss for the period of €25.7 million, compared to a loss for the period of €9.8 million in the six months ended June 30, 2020. Our loss for the period for the year ended December 31, 2020 was a loss of €56.0 million. We have incurred net losses since our inception in March 2016, resulting in an accumulated deficit of €108.8 million as of June 30, 2021. We believe that we will continue to incur losses and depend on external financing in the foreseeable future at least until we commence material deliveries of the Sion and the time when we significantly scale our operations, including the monetization of our solar technology.

Our Market Opportunity

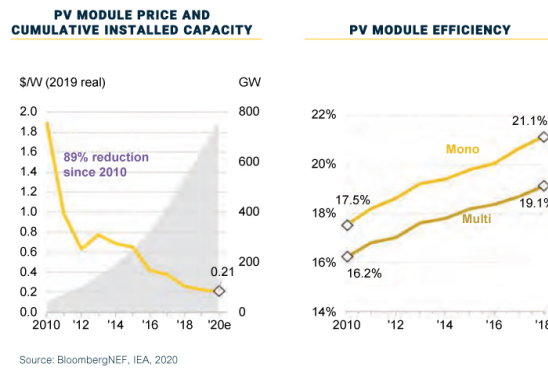

We believe that more needs to be done to slow down global warming and that new technologies are needed to reduce CO2 emissions.

Our Market Opportunity Related to Our Solar Technology

For the solar application market, we believe solar integration will be the logical next step for every pure electric vehicle. The recent decline in solar production prices as well as the increase in efficiency of solar cells finally enable solar integration to have a meaningful impact on ranges and autonomy of electric vehicles. Additionally, the steep increase in electric vehicle sales and the relatively slower increase in charging stations will create a bottleneck for the adoption of electric vehicles on a larger scale. We believe that even within the next few years, people living in apartments without private access to charging will be reluctant to buy electric vehicles due to uncertainty they will be able to find relevant charging options. This will put even more focus on electric vehicles with solar integration. We estimate that more than half of the vehicles sold in 2030 are suitable for solar retrofitting, including about a third that is suitable for solar integration. We believe that this share will rise and that more than two third of the vehicles sold in 2040 are suitable for solar integration.

Other users, such as building owners, already see the power of solar integration to reduce energy consumption and, accordingly, total cost of ownership. As more means of transport, including ships, trucks, vans and buses switch to electric engines, the benefit of solar integration will, we believe, become increasingly clear and important to market participants over the coming years.

The following graphics highlights developments in the price for, and efficiency of, solar modules, which, according to the IEA, may make solar energy one of the cheapest energies and position solar technology to disrupt legacy power sources.

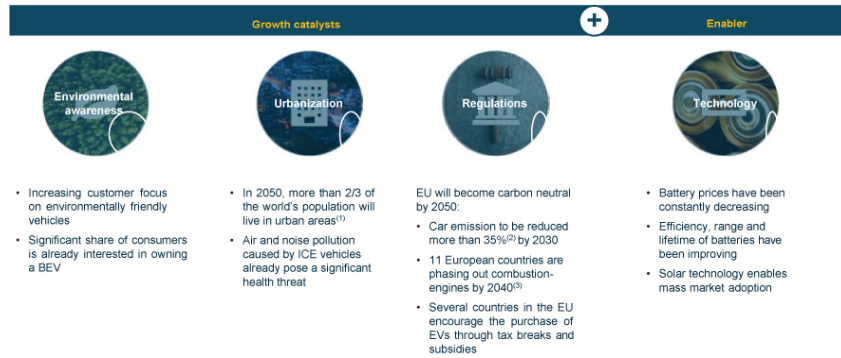

Our Market Opportunity Related to the Sion

We believe that political and regulatory pressure to reduce CO₂ emissions will lead to lower demand for combustion engines and will increase demand for new technologies, such as battery electric vehicles. The global total market share for battery electric cars and plug-in hybrid electric cars is expected to increase from 4% in 2020 to 34% to 58% in 2030, according to BloombergNEF. According to the same source, it is conceivable that the market share of battery electric vehicles and plug-in hybrid electric cars will increase to 70% to up to 100% by 2040. Several fundamental trends are expected to drive this increase, including increasing awareness concerning environmental matters and sustainable energy, urbanization and more stringent emissions regulations. Technological innovation, such as more efficient ways to produce batteries, longer battery lifetime and breakthroughs in solar technology are expected to enable mass market adoption.

Many governments provide consumer incentives for electric vehicle purchases as part of economic stimulus programs. In Germany, for example, purchase-price subsidies for new electric vehicles from the German State currently amount to €6,000 per vehicle. Most recently, as of January 1, 2021, European Union, or EU, regulations now impose their most stringent ever CO₂ emission limits on all new passenger cars registered in the EU. We believe we are well positioned with the Sion to benefit from these market opportunities

as we intend to offer net-zero-emissions solar-powered electric mobility to the mass market at a comparatively affordable price. The following graphic summarized what we believe to be growth catalysts and enablers.

(1) UN - Department of Economic and Social Affairs (May 2018). (2) Compared to 2021. (3) As of April 2020.

Limitations of Products Offered by Market Incumbents

We believe that the products offered by many of the incumbent manufacturers suffer from the following limitations and do not reflect current and projected trends in consumer demand and ignore recent developments in solar technologies.

- **Lack of innovative solutions from traditional players:** Traditional car, truck or bus makers typically do not develop a new car from scratch, but rather refine and improve their existing models and technologies. We believe that this approach has hindered fundamental innovation, which can only be achieved in an efficient and sustainable manner if old structures are discarded.
- **Global warming and reduction of CO2 emissions:** Cars, trucks, buses and boats with internal combustion engines are a significant contributor to total CO2 emissions, the main greenhouse gas that contributes to global warming. We believe that climate-friendly and affordable electric mobility is critical for achieving sustainable mobility and an attractive customer proposition.
- **Increasing demand for mobility solutions and resource conservation:** The world's population continues to grow. Providing mobility solutions to an increasing population in light of the world's limited resources requires sustainable mobility concepts, such as easily accessible car-sharing and ride-pooling solutions.
- **Lack of sufficient charging infrastructure:** Existing battery electric vehicles depend strongly on a limited number of charging stations. Many traditional carmakers believe the main solution to decreasing the dependency on charging infrastructure to be an increase in expensive battery capacity. Bigger batteries significantly increase both the price and the weight of the respective vehicle. As a result, battery electric vehicles either do not fulfill customers desires for sufficient range or become too expensive for the mass market.
- **Insufficient adaptation of solar technology for mobility use cases:** Generally, the available solar technology is not well-suited for mobility applications. Traditional solar technology relies on glass to cover the solar cells. Glass is, however, heavy, not sufficiently flexible, expensive and dangerous in crash situations. There is a lack of readily available technology that efficiently controls the interconnection between various solar panels that are mounted on a non-flat surface so that the impact angles of the sun rays differ. For commercial vehicles, no relevant solar integration solution exists that would allow vehicle operators to reduce their costs of ownership.
- **Limited affordability of clean mobility technologies:** Alternative and environmentally friendly mobility technologies have historically been expensive and are not ready for the mass market, in the

case of electric vehicles primarily due to high battery prices and immature charging infrastructures in many markets. We want to be the first company to offer an affordable, practical, electric family vehicle with solar-recharge capabilities for the mass market.

Our Solution

We believe we are well positioned to address current market dislocations and to capture demand from consumers who desire a convenient and affordable car ownership experience and from manufacturers who seek access to disruptive solar technology for mobility application. Our solar technology is well-suited to provide benefits to most means of powered transport, especially new electric alternatives.

- **Innovative clean technology solutions:** We believe we are a technological leader in solar-powered electric mobility. We consider ourselves to be the first company to develop a sophisticated concept for the full integration of polymer solar modules in a vehicle exterior. These polymer solar modules eliminate the need for heavy glass in a solar panel and allow for more flexibility. In addition, we have developed various other innovative technological solutions, including solutions for bidirectional charging, car-sharing and ride-pooling. We intend to include these technologies in the Sion, but will also monetize them separately.
- **Suitable for everyday use:** We have designed the Sion as a family vehicle based on an intelligent use-of-space concept. In developing the Sion, we have centered the design around our polymer-based solar technology. Based on our current development targets, the Sion is expected to have an electric battery range based on the worldwide harmonized light vehicles test procedure (WLTP) standard of up to 305 kilometers, or 190 miles. The seamlessly integrated solar modules are expected to provide additional range for free from sunlight and significantly reduce dependency on charging infrastructures, potentially allowing customers to save money on private charging stations or reduce their dependence on public charging infrastructure. We believe the reduction of external charging cycles compared to ordinary battery electric vehicles, together with the Sion's comparatively low entry price, will make the Sion suitable for the mass market and everyday use and an especially attractive option for urban commuters and mid-low income families. All expected battery ranges for the Sion included in this prospectus are based on the WLTP. The WLTP methodology differs from the US EPA's testing methodology, which typically has lower ranges than those determined using the WLTP standard.
- **Affordable for average consumers:** We are currently accepting reservations for the Sion locking in a comparatively low net entry price of €23.9 thousand. We expect that this price positions us to become the price-value leader in the relevant car segment based on total costs of ownership calculations performed by the German automobile club and by us. We believe that the ownership cost advantage, together with the Sion's lower dependency on public or private charging infrastructures compared to normal battery electric vehicles, will provide the Sion with a competitive edge. Our competitors' electric vehicles that are currently available, and that are expected to be launched in the relevant car segments in the near future, are expected to be significantly more expensive to purchase and operate than the Sion.
- **Heightened independence:** Our technology will allow vehicles to generate power from the sun. This will decrease the dependence on charging infrastructure and the number of charging intervals and, depending on the vehicle's usage profile, may even eliminate the need for battery charging and may allow for the use of batteries with less capacity than in traditional battery electric vehicles.
- **Disruptive solar technology:** Our polymer technology has been developed for car and transport applications. It is lightweight, allows for flexible surface integration via our patented injection molding process, is affordable due to fast and lean production and avoids/eliminates the risk of bodily harm caused by broken glass. We have also developed other critical components for the use of solar technology in mobility applications. We have, through our power electronics, solved the issue that solar cells will be mounted on different parts of the exterior, which will lead to inhomogeneous exposure to sunlight. Our software visualizes the solar yield of the different parts of the Sion.
- **Sustainable and responsible mobility:** The operation of the Sion itself will not emit any CO₂ or other greenhouse gases and will align with our vision of sustainable and responsible electric mobility. We

expect that operation of the first generation of Sions (including facelifts), which we currently estimate to be 257,000 vehicles, will save millions of tons of CO₂ compared to the operation of internal combustion engine cars and taking into account expected car sharing. We currently expect that all production-related greenhouse gas emissions, which cannot be avoided or reduced along our supply chain and during the production process of the Sion will be fully neutralized through relevant offsetting measures.

Our Strengths

We believe the following combination of strengths, capabilities and features of our business model will distinguish us from our competitors and position us to successfully tap into the market for sun-powered mobility solutions.

Proprietary technology aimed at harnessing solar energy: Finding solutions that allow for the efficient use of solar power in mobility applications requires departing from traditional solutions and approaches. Solar cells are typically inflexible and developed for flat surfaces that have the same exposure to sunlight, such as rooftops. Through a multi-year development and testing process, our solar experts and automotive engineers developed a technology that embeds solar cells in polymer instead of glass, making the modules more flexible, lighter, less expensive, and more efficient than any other solar solution available today. As a result, our solar modules can be seamlessly integrated into all major surface areas of the Sion via our patented injection molding process to optimize sunlight capture. Solar-power will allow vehicles, such as the Sion, to operate with less dependency on battery charging infrastructures and a reduced number of loading cycles compared to ordinary battery electric vehicles. Our solar modules will also allow us to replace the traditional metal sheet exterior and eliminate the need for costly paint jobs. The layer of polymer on top of our solar cells provides protection against impact and damage, such as scratches. Patents and know-how will protect our solar technology, making it difficult for potential competitors to provide similar solutions without licensing our technology.

Benefit from position as a technology leader: Based on the experience we have gained from developing and testing our Sion prototypes, we believe that we are well positioned to offer a one-stop-shop solution. We can take care of everything to realize solar integration in vehicles, from product development to the provision of services. We intend to deliver customized solutions, such as large body panels, solar sandwich panels, 3D shaped panels and semi-translucent solar windows, that meet the requirements and needs of potential customers in relation to different types of vehicles. Our on-board charger together with our high efficiency solar modules result in a highly efficient system, delivering outstanding power per square foot ratios.

Positioned to capture untapped affordable electric vehicle market poised for growth: The global automotive market is huge and vehicles with internal combustion engines account for the last majorities of sales. The market is expected to remain huge, with expected sales of \$8.9 trillion in 2030 and \$9 trillion in 2040, according to data by Statista. The market for electric vehicles is expected to show strong growth over the next ten or more years. This expected growth will be driven by a number of trends, including expected increasing convergence of production costs for electric cars and cars with internal combustion engines, consumer awareness of environmental concerns and sustainable energy and regulatory incentives aimed at promoting a shift to electric mobility. Within the market for electric vehicles, we believe that solar-powered electric mobility will be the next key trend. We are a solar-based electric mobility innovator with a clear focus on advancing solar technology. We do not have a design legacy that defines our brand, giving us the freedom to design the Sion with a focus on solar cell integration. The Sion's net entry price of currently €23.9 thousand, coupled with its expected electric battery range based on the WLTP standard of up to 305 kilometers, or up to 190 miles, and its solar-charging capability, set the Sion apart from other electric mobility options. As a result, we believe that the Sion has the potential to be the first solar electric vehicle to meet the demands of a mass market.

Pre-orders demonstrate consumer support: We have built what we believe is a vibrant and loyal community of potential customers. Potential customers can participate in online discussions with us and cast votes indicating their preference for certain features on the Sion. The traction we have gained among potential customers is evidenced by a significant number of pre-orders, which we believe provides commercial validation of our model and revenue momentum. As of November 5, 2021, we had received more than

16,000 reservations resulting in total net cash inflows of €40.8 million in advance payments. These reservations correspond to a net sales volume of approximately €340 million. However, our customers may cancel their reservations without penalty according to our general terms and conditions, if no binding purchase agreement has been concluded by an agreed deadline, which varies by customers. Some reservations are already cancellable as of the date of this prospectus. In addition, we have recorded more than 15,000 pre-orders from business customers, for which no advance payments were made and no contractual agreements were entered into.

Note: (1) Represents reservations, for which an advance payment was made. Reservations are shown as of November 5, 2021. Some reservations are cancellable and there is no guarantee that all reservations will actually be converted into orders or sales or that the Company will be able to generate net revenues from all reservations.
 (2) Pre-orders reflect "intention to buy over lifecycle". No downpayments were made and no contractual agreements were signed for B2B orders. We expect lower conversion rates for B2B orders than for reservations with down payments.
 Source: Company information

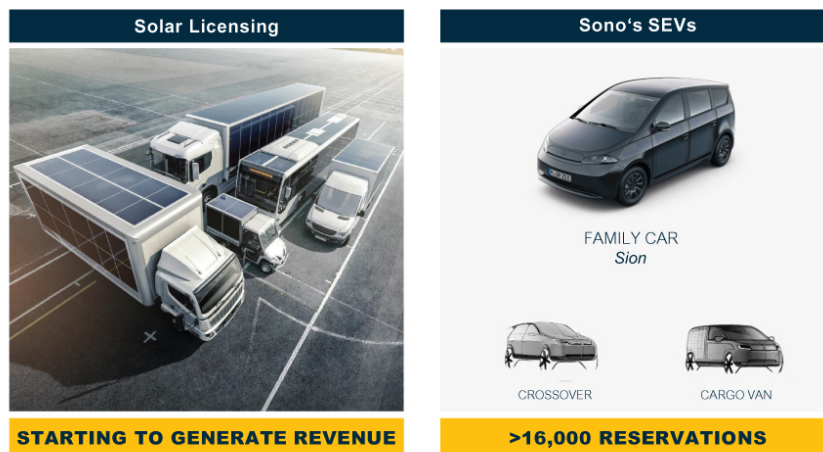

Lean, efficient and agile production model contains costs and promotes scalability: Our production model was intentionally structured to align with our goals. We believe in plant sharing, in utilizing off-the-shelf component parts, and in a one-variant-only approach as ways to maintain relatively low overhead costs, significantly reduce our capital expenditures, and to become the price-value leader in the Sion's car segment. We intend to maintain an asset-light outsourced production model and plan to produce the Sion in the former SAAB plant in Trollhättan, Sweden, so we will not have to invest in purchasing, operating or maintaining our own manufacturing facilities. We also intend to generate cost savings by producing a single, standardized vehicle model and by sourcing off-the-shelf component parts, such as the electric motor, mirrors, tires and car seats, from established automotive suppliers rather than engineering custom parts ourselves. We believe this approach will allow us to benefit from economies of scale and comparatively low component part prices so that we can pass these savings on to our customers. We estimate that the combination of these initiatives will allow us to realize up to approximately €500 million in aggregate cost and capital expenditure avoidance. We believe our production model will reduce purchasing and manufacturing complexity, logistical challenges and inventory costs, and minimize risks associated with quality control and testing, all of which should facilitate rapid growth of our operations.

Founder-led management team that includes industry experts with a clear growth mission: We are led by our founders, which gives us an outstanding combination of stability and a strong entrepreneurial corporate culture that fosters our common vision of affordable and sustainable electric mobility. Our founders are our major shareholders who drive our focus on long-term success and increasing shareholder value. We have also recruited experienced engineers from internationally renowned companies who possess strong skills in electrical engineering, solar engineering, automotive engineering and software development. Our experienced

COO, CFO, CTO, Group Lead Solar and Group Lead Digital complement our high-impact senior team due to their significant expertise in automotive manufacturing, solar technology and high-growth industries.

Our Growth Strategy

Our growth strategy focuses on two clearly identified building blocks: Monetization of our solar technology and production and sale of solar electric vehicles.

Source: Company information.

Growth Strategy Related to Our Solar Technology

Monetizing our technological innovations: We see significant potential in our solar technology for a broad range of applications due to its physical flexibility compared to traditional glass solar panels and that enables tailor-made solutions for our clients. We believe that our technology has the potential to disrupt existing markets. We have the knowledge and products to cover the entire value chain for solar integration. We have already received purchase orders or entered into several letters of intent for partnerships, including with manufacturers of trailers, autonomous electric shuttles, trains, trucks, buses and boats that may use our technology in their own products. We may also produce and sell certain selected solar components, such as power electronics, license our patents to third parties or seek to generate service revenue from providing engineering services to third parties. They may use our technology to retrofit existing vehicles, to extend the range of battery electric vehicles, to equip new production vehicles or to comply with emission regulations.

Continuing to invest in technological innovation and intelligent mobility: We have achieved significant technological and design improvements around the integration of solar modules in vehicles while simultaneously reducing manufacturing costs. We intend to continue to invest in technological innovation to further advance our technologies and innovations, as well as the safety, reliability, range capabilities and functionality of our vehicles. We plan to invest in the improvement of existing, and the development of new, technologies. We intend to dedicate significant funding to the engineering, design and development, as well as the tooling, of our solar technology. We also intend to invest in the continuous development of the Sion and future vehicle models.

Growth Strategy related to the Sion

Advancing the development of the Sion: We plan to use the expected proceeds from this offering to fund the next development phase of the Sion. We are currently executing a detailed plan to finish the design and development of the Sion, including finalizing the engineering of, and component sourcing for, the Sion. Further, we intend to use funding from this offering to building our final generation of pre-series prototypes.

Expanding our product portfolio: We are developing a “one base” vehicle platform with a view to scalability and usability for future models. We intend to use modular systems in the Sion, including the powertrain, chassis, thermal unit and certain electronics. These modular systems can also be used for other car types without any, or only minor, modification. Leveraging this platform and these systems, we intend to roll out multiple new vehicle models across various segments, including a cargo van and a crossover passenger vehicle. We intend to equip all of our new electric vehicles with our solar technology, and all are expected to continue to be carbon neutral.

Increasing our geographic footprint: Our initial market is focused on Germany, other EU member states and selected other European markets. We plan to expand our focus to additional nearby markets. In the long term, we currently intend to expand our operations to other, more remote markets, such as the United States and potentially even China. In order to reduce complexity, we currently plan to have at least some of the vehicles intended for a specific region manufactured by third-party manufacturers in that particular region.

Capturing additional revenue from CO2 pooling: Many developed countries have environmental regulations and incentives that seek to reduce CO2 emissions, providing us with an additional potential revenue source. For example, under EU regulation, any automotive manufacturer who fails to reduce the average emissions of its fleet sold in the EU to a specific CO2 emission per kilometer is subject to penalty payments. A manufacturer can avoid, or reduce, penalty payments, if it pools its emissions with those of manufacturers that exceed emission targets, such as manufacturers of zero or low emission vehicles. The economic benefit is shared between the pooling participations, providing us with an additional source of revenue. We intend to participate in one or more of these pooling arrangements, which we believe will comprise a meaningful percentage of our future revenue and will come at virtually no extra cost to us.

Adapting our sales approach: While we believe that our online approach to sales has the potential to replace the traditional dealership model of the car industry, we may consider supplementing or augmenting this approach by opening pop-up concept showrooms to allow our customers to view, touch and feel, and test-drive our model vehicles on-the-spot. We believe that pop-up concept showrooms may allow us to capture new potential customers who might not otherwise engage with our products. As we expand our product portfolio, we intend to utilize marketing and sales channels that provide us with the broadest possible reach and we intend to continue to be nimble and creative in how we target our customers to achieve maximum penetration in each market that we enter, while keeping our ambition of cost leadership in mind.

Continually improving our environmental performance: The core of our mission is to create sustainable products in a sustainable way. Accordingly, we plan to enhance the efficiency of the Sion’s drive train to increase the range that can be achieved with a single battery charge. In sourcing components and choosing our partners, we seek to continuously improve the CO2 footprint of the components we source and the services we receive. Our goal is to offset 100% of the CO2 emissions generated by the production of the Sion and our future vehicle models, with a view to achieving full CO2 neutrality during the production cycle.

Operations

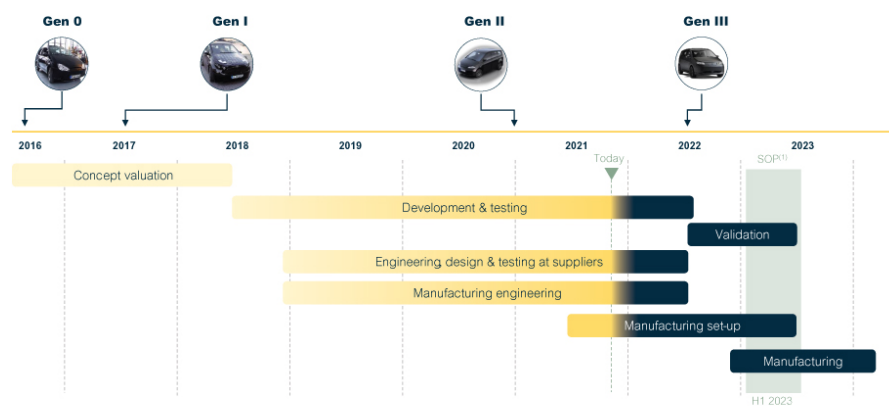

Our Car

The following graphic summarizes the main features of the Sion’s solar technology:

We are currently in the process of finalizing the development of the Sion, our first solar electric vehicle. The following graphic shows the key steps to start of production. In January 2021, we presented our final

prototype, which we use to confirm our concept and to test components. We will also need to perform collision and safety testing before we are able to start production.

Source: Company information. (1) SOP: Start of Production

The Sion will be produced in the former SAAB plant in Trollhättan, Sweden, by the contract manufacturer NEVS, with the aim of ultimately using 100% renewable energy. The Sion is a five-seater that offers enough space for a family. Its 650-liter, or 23-cubic-foot, trunk allows for the transportation of bulky baggage. The Sion's liquid cooled lithium-iron phosphate battery has a capacity of 54 kWh, giving the Sion an expected range based on the WLTP standard of up to 305 kilometers, or 190 miles, according to calculations based on the WLTP standard on a single charge. Its seamlessly integrated solar cells allow the Sion to charge its battery during the day through the power of the sun. In Germany, for example, we expect that the Sion's solar panels can add up to 245 kilometers, or up to 152 miles, of additional driving range per week to a car's battery, providing the Sion with full self-sufficiency on short distances or for occasional medium-distance travel. If the solar power does not provide the energy needed, the Sion can be recharged using the power grid. It typically takes 35 minutes to charge up to 80% at a fast-charging station (up to 75 kW direct current charging). Additionally, the Sion can be charged at any public or private alternate current charging station in Europe (up to 11 kW alternate current charging) or at regular power sockets at home. Due to a bidirectional on-board charger, the Sion will be able to share its power to charge Sions, other electric vehicles or other electrical devices. The battery is expected to have a useful life of 3,000 charging cycles.

In the interior, the infotainment system will include connectivity and mobility services and can be controlled centrally via a 10-inch touch display. Its 120 kW motor will allow the Sion to reach a maximum speed of 140 km/h (87 mph). We have offered the Sion to the first 16,000 reservation holders at a net sales price of €21.4 thousand. Given that we have received more than 16,000 reservations as of the date of this prospectus, persons entering into reservations for the Sion as of the date of this prospectus, will be offered the Sion at a net sales price of €23.9 thousand. We believe that the current net sales price makes the Sion accessible to the mass market. In order to support our sales activities, we currently intend to provide a warranty for the Sion that will likely cover two years or 100,000 kilometers as well as a warranty for the battery of two years, 100,000 kilometers or 2,000 charge cycles. This warranty would be in addition to any statutory warranty provisions that apply.

We currently intend to launch serial production of the Sion in the first half of 2023, using preliminary "soft" tools, which will be replaced by permanent "hard" tools at a later point in time. While we finalize development and prepare the launch of production of the Sion, we offered consumers who made an advance payment for the Sion to convert this advance payment into a lease contract for a Renault Zoe in 2020. The lease contract was entered into directly between the relevant consumer and a leasing provider. We are not a party to the lease contract. Our involvement consists of a transfer of the down payment to the leasing provider. We have recently renewed this offer under slightly modified conditions and, in addition, offered

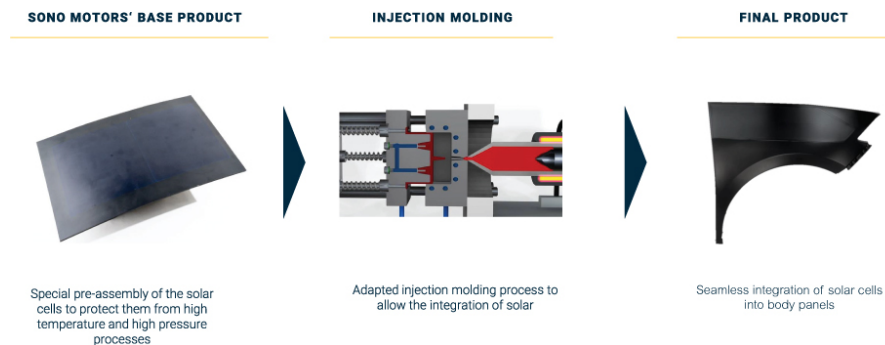

them to lease a vehicle at discounted conditions from a start-up car rental company, which claims to focus on sustainability. We may provide similar offers in the future to bridge the period until we make deliveries to our customers. These offers allowed consumers to already drive an electric car and positioned us to avoid cancellations and generate income from commissions.

Our Technology

We consider our technological achievements to be at the core of our business activities and key to our future success. We have developed several innovative technologies for use in the mobility area. We intend to integrate our technologies in the Sion and future car models and have been approached by a number of companies, such as manufacturers of trucks, commercial vehicle equipment and public transport operators to provide them with access to our technology. We believe these technologies will offer our customers a unique experience and increased practicability of our vehicles far beyond the mere driving experience.

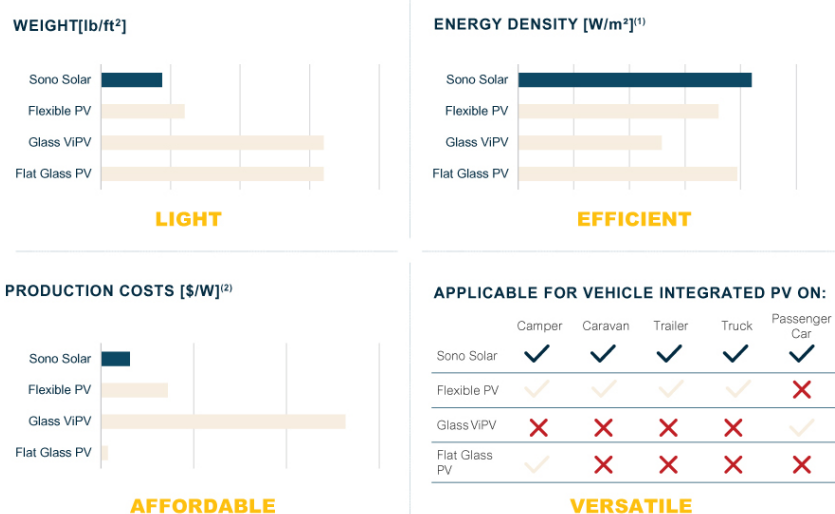

Polymer Solar Modules – Vehicle Integrated Solutions

Our solar technology is polymer based. It allows for flexible surface integration. Our modules, which will be produced by contract manufacturers in Europe based on our intellectual property rights, are lighter than regular glass solar panels. We use monocrystalline silicon cells for the solar modules that allow for seamless integration into the entire body of vehicles. Our polymer solar modules can be used to replace the traditional metal sheet exterior and need for costly paint jobs, as the exterior of a car, such as the Sion, will be covered with polymer solar body modules. Our solar modules make complex geometries and forms feasible, significantly broadening the scope of the technology's possible applications compared to traditional glass solar panels. Our solar modules will be manufactured based on our patented injection molding processes. This approach makes our solar elements more robust than traditional solar cells, which are laminated into glass. We believe that our approach also allows for time-efficient production cycles, increasing the manufacturing speed of our vehicles. In addition, the layer of polymer provides the solar cells underneath with protection against impact and damage such as scratches. Our solar technology also includes a maximum power tracker, a control unit that seeks to predict the energy yield from solar cells mounted in different angles to the sunlight. We have also developed an proprietary hardware for critical components, such as an on-board charger that feeds the energy created by the solar cells into the on-board batteries of the relevant vehicle. Our proprietary software provides for live energy data and optimization of energy yields and provides the backbone for seamless system integration of our solar technology. The following graphic visualizes the application of our patented injection molding technology in the solar assembly process.

Solar technology offers a broad variety of use cases and we have already received purchase orders or entered into several letters of intent for partnerships, including with manufacturers of trailers, autonomous electric shuttles, trains, trucks, buses and boats, all of whom may enter into agreements with us to use solar technology in their own products. We believe that there are many relevant use cases for solar technology. For example, solar energy can be used to provide a large share of the energy needed by a semi-truck trailer with a cooling unit, positioning the fleet operator to increase operating hours and to reduce energy cost and CO₂ emissions.

We believe our solar technology is among the lightest, most efficient and most affordable solar technology currently available for consumer usage. According to our own data, it is the lightest in terms of kilograms per square meter; it is the most efficient in terms of watts generated per square meter; and it is the most affordable in terms of production cost in euro per watt.

Source: Company information / estimates. Note: EUR / USD FX of 1.198. Values are given as midpoints of price, weight and energy density ranges, as applicable. (1) Shows average value for Sono Solar. (2) Shows average costs.

Our solar technology is the key element of our solar-first approach and the design and development of the Sion around our solar module technology. Our solar technology will significantly increase practicability. Our solar modules will charge the Sion’s battery whenever the Sion is exposed to light. In a single week, we expect that an additional driving range of up to 245 kilometers, or up to 152 miles, can be generated purely by solar energy in Germany (depending on geographic location, regional season and weather conditions). The power generated while the Sion is parked and exposed to light will reduce the number of charging intervals or may even eliminate the need for external charging completely.

Following the start of production of the Sion, we believe that we will be positioned to enter into co-development projects with established car manufacturers, with a view to having our solar technology used in series production cars of established car manufacturers by 2024 or 2025.

Traditional Solar Modules — Vehicle Added Modules

In addition to our vehicle integrated modules, we also offer vehicle added modules. This approach aims at using solar technology for vehicles after they have been fully built. These solutions are relevant for customers which want existing vehicles equipped either in a prototype solar module or low to medium volume production.

This approach uses different types of semi-flexible solar modules, which are either glued or clamped onto the vehicle. The relevant solution is developed based on the needs of the specific customer, taking into account the expected lifetime of the vehicle, weights and costs specifications, installation times and synergies between solutions for different vehicle types. Currently we aim to be able to equip single prototypes, during 2022 it is planned to improve the solutions to equip first small pilot fleets. For diesel buses as well as for motorhomes and caravans an early-stage solution is available and we currently seek to have an optimized solution ready for implementation and street approval until June 30, 2022. Continuous technical and cost

improvements are planned for the remainder of 2022. For reefers and non-reefer cargo box vehicles, we plan to have a first concept developed and ready to be applied in a customer prototype by June 30, 2022. Solutions for more curved surfaces, such as vans, would need to be developed upon customer request. We also aim to be able to equip large vehicles with semi-translucent solar windows to make efficient use of their large window areas.

Maximum Power Point Tracker

The integration of solar modules into energy systems for transport-related use cases requires power electronics that fit the vehicle powertrain or auxiliary systems. Our maximum power point tracker central unit, or MCU, is the central piece of our power electronics. Our MCU is a multichannel, dynamic system that is both conversion and tracking efficient. Our power electronics optimize the power output by intelligent algorithms and the energy earnings for solar modules mounted on, or integrated into, moving objects by a multichannel approach that considers quickly changing sun radiation conditions and differently oriented solar modules. We aim to optimize our power electronics to provide for a power range of above 1 kWp with a target up to 2.5 kWp, whereas other power electronics typically provide for a power range of less than 1 kWp. Our MCU contains a controller area network that enables the battery systems to perform complex tasks efficiently and allows active communication between the battery systems and other devices throughout the vehicle.

We currently develop three systems that are in different stages of maturity:

- *High Voltage System:* The high voltage system is used in our Sion prototypes. While the Sion uses about 400V, the high voltage system has been developed to work with voltages between 400V and 800V. The system can be used for electric vehicles other than the Sion with minor or medium changes. Use cases include buses, vans, trucks, reefer trailers as well as electric boats.
- *Low Voltage System:* Based on the Sion system, current development projects relate to adding low voltage capabilities, flexibility on the input voltage to allow for a combination with a broader range of solar modules and higher power output. The low voltage system will be relevant for diesel buses, smaller reefer vans and the camper industry.
- *Reefer System:* For reefer systems, our maximum power point tracker unit need to be coupled with battery packs, inverters and charging systems.

Power Sharing, Car and Ride Sharing

The Sion will also be equipped with a bidirectional power sharing solution. On the one hand, our vehicles can be externally charged with electricity based on plug-in technology; on the other hand, each Sion can also share its stored electricity, based on a bidirectional charging plug. The app-controlled solution enables vehicle-to-vehicle (V2V), vehicle-to-home (V2H) and vehicle-to-grid (V2G) power sharing. We have also developed a proprietary software and mobile application serving as a tool to access or provide the community with access to car and ride sharing. Our software will work as a marketplace-like communication platform bringing together “supply” and “demand.”

After-sales Service

Our innovative after-sales service system will be available once the serial production of the Sion has been started. For repairs and maintenance of our vehicles, the system will center around an online database where spare parts can be ordered and manuals as well as video tutorials for “do-it-yourself” fixes of our vehicles can be sourced. We intend that spare parts will also be available for direct 3D print or at a CNC milling service. We will also make available on our online database workshop handbooks that allow customers to involve workshops in the service or repair of their vehicles. We also plan to cooperate with an established European service provider for repairs involving high-voltage or body parts.

Research & Development

We believe that it is and will be crucial for our success to keep up with advances and changes in electric vehicle technology. Our research and development activities currently focus on the finalization of the

development of the Sion and will in the future include a facelift as well as a new version of the Sion and additional car models.

Our research and development (R&D) strategy focuses on developing our key technologies and innovations in-house where we benefit from the expertise of our highly qualified R&D team. This allows us to ensure that the key technologies and innovations used in our vehicles reflect our core values and vision of sustainable and affordable electric mobility. However, we also involve players in the automotive industry in our R&D activities and have established, or are in the process of establishing, several partnerships with suppliers and engineering service providers that develop and will supply certain components for our vehicles. This approach allows us to leverage the expertise and know-how of established market players in our R&D processes. In addition, we cooperate, or intend to cooperate, with renowned research institutions to combine our expertise in selected areas. For example, we established a joint project with the Fraunhofer Institute for Solar Energy Systems (ISE) for a collaborative study that covers the testing of our patented solar technology up to its readiness for serial production and its certification.

Manufacturing Concept

Our manufacturing concept is based on the outsourced production of a “one-variant-only” vehicle while using certain standard automotive components from third-party suppliers, which positions us to significantly benefit from economies of scale. Our manufacturing approach enables significantly lower capital expenditures as well as various cost savings along the value chain. The offer of only one variant of the Sion enables us to focus our engineering capacities and significantly reduces manufacturing complexity, logistical challenges, inventory costs and quality and testing risks. The production of the Sion will be based on low inventories and an exact synchronization of steps along our supply chain. Due to the Sion’s uniform black polymer exterior, significantly less steel stamping tools and no paint shops will be needed for production and finish. We believe that we will be able to save capital expenditures and currently expect that we will need to spend at least €354 million between September 2021 and the first half of 2023 for additional development activities, start of serial production in the first half of 2023 and overhead costs in this period. See “*Management’s Discussion and Analysis of Financial Condition and Results of Operation—Going Concern.*”

Contract Manufacturer NEVS

The Sion will be manufactured by National Electric Vehicle Sweden (NEVS) in the former SAAB plant in Trollhättan, Sweden. The plant is a shared facility and operated in two shifts. NEVS will produce and assemble the Sion based on our specifications and using our internally developed key components as well as off-the-shelf-components from established suppliers. We may utilize a prototype shop floor in the plant.

NEVS is an automotive engineering and manufacturing company founded in 2012 that inherited some of SAAB’s corporate assets. The carmaker also holds a production license in China and operates additional production sites in Tianjin and Shanghai in addition to its production site in Trollhättan. In 2020, NEVS was acquired by a Chinese enterprise, Evergrande. Recent events, such as failure to pay interest on outstanding indebtedness on its due date, suggested that Evergrande faces liquidity challenges. These challenges will likely negatively affect NEVS, and could lead to a sale of NEVS by Evergrande. We may be forced to renegotiate our arrangements with NEVS or to search for a new manufacturer. We may also decide to take over the NEVS’ employees that are required for the production of the Sion, which could lead to an increase in pre-production expenses. See “*Risk Factors—Risks Related to Our Business and Operations—We depend on National Electric Vehicle Sweden (NEVS) for production of the Sion.*”

We concluded a preliminary arrangement with NEVS in 2019, which we have since renewed, that sets out the cornerstones of our relationship and the production of the Sion. The arrangement ensures that we will maintain ultimate control over the production process and will remain the owner of any relevant intellectual property rights that are relevant for the manufacture of the Sion. The first production cycle is expected to include a total of approximately 257,000 vehicles and a target annual volume of 14,000 cars in 2023 and 43,000 cars thereafter with the option of ramping up production and increasing the total volume. The total annual capacity of NEVS’ plant is 200,000 vehicles, and the remaining parts of the plant are currently reserved for NEVS itself. NEVS’ production processes are geared towards sustainability and environmental friendliness: NEVS has indicated that it will aim at using 100% renewable energy for the production of the Sion and implement other sustainability concepts that we may propose in the future.

Off-the-shelf Components

We intend to source certain standard automotive parts, such as the electric motor, mirrors, tires and car seats, of the Sion as off-the-shelf-components from established suppliers for the automotive and other industries. The majority of our suppliers will be European suppliers for the automotive industry. The use of off-the-shelf components will mean comparatively low development costs as development and engineering work relating to major standard car components is done at the supplier level. We have vetted our suppliers to confirm that they comply with our vision as well as our standards concerning quality and reliability.

Logistics and Delivery Concept

Our logistics and delivery concept integrates various unconventional elements that deviate from industry standards. Sustainability and leaving a smallest possible CO2 footprint with our operations is important to us and will also influence our selection of relevant third parties and business partners (such as suppliers, third-party logistics (3PL) and fourth-party logistics (4PL) services providers) that we plan to involve in our logistics and delivery processes. In general, we expect our logistics and delivery processes to be comparatively lean due to our “one-variant-only” strategy regarding the Sion, allowing us to focus on only one production line. We intend to outsource the shipping and logistics management of our operations to 3PL services providers and currently do not intend to invest in our own logistics-related infrastructure, assets or equipment (such as trucks, trains, railcars, warehouses or sales offices). However, we will intensively explore investments in reusable packaging where considered beneficial. The 3PL services companies will provide comprehensive supply chain, transport, distribution management and execution services while we may also engage a 4PL services provider that will oversee the transportation and logistics operations of our 3PL services companies. We will also use and integrate digital means of communication and handover methods as well as the option of home delivery of vehicles to our customers. We believe that our intended logistics network and supplier ecosystem will be, in combination with outsourced manufacturing processes, a competitive advantage.

With respect to deliveries, we plan to offer four delivery and handover options for our customers: factory pick-ups, handover events or, alternatively, informal “fast-lane” pick-ups at a location of our finished vehicle logistics (“FVL”) service provider as well as home deliveries. We intend to have delivery hubs in several cities across our markets and those delivery hubs are intended to be fixed locations where our customers can pick up their Sion. These locations will be provided by our finished vehicle logistics (“FVL”) service partner and the pick-up process as well as the specification of such locations will be jointly determined by our FVL service partner and us. The fast-lane pick-up focuses on a time-efficient and informal option where customers have to deal only with minimal paperwork and no unnecessary documents, explanations or ceremonial proceedings. The home delivery option will be available for an extra charge. All aspects of the execution of finished vehicle logistics will be managed by our FVL services provider. Our distribution network has still to be finalized taking into account the available capacity of transport routes as well as sustainable options with a reduced CO2 footprint.

Marketing

We focus on providing multiple online and offline touchpoints with our customers and the community in general throughout the entire sales experience and rely on various marketing channels with a special focus on social media and online marketing. Our marketing efforts are geared towards increasing brand awareness in order to increase sales of the Sion.

We seek to increase brand awareness through a broad array of marketing channels such as targeted online marketing (including search engine optimization and search engine advertising), press publications, industry events, video advertising in public transportation and cinemas and guerilla marketing actions as well as physical test drives that can be easily arranged through our car-sharing offering. Our website content, blog, targeted newsletters, social media posts as well as local events are intended to spark further interest of potential customers in our offering.

Customers are able to place reservations for our vehicles on our website and can participate in online discussions with our community or cast votes on certain features of the Sion. Customers can set up test-drives based on our car-sharing offering. Purchase orders for our vehicles can then also be placed on our website.

Our approach to customer retention focuses on our community and feedback of satisfied customers on social media, targeted newsletters, video and other website content centered around features of the Sion, customer experiences and updates, community events or our blog. In 2020, we arranged for a special cooperation with Renault, pursuant to which we offered consumers who made an advance payment for the Sion to convert this advance payment into a lease contract for a Renault Zoe. We have recently renewed this offer under slightly modified conditions and, in addition, offered them to lease a vehicle at discounted conditions from a start-up car rental company, which claims to focus on sustainability. We may provide similar offers in the future to bridge the period until we make deliveries to our customers.

We rely on a number of KPIs to gauge the success of our marketing efforts and make the building and retaining of our community visible:

- Number of reservations of Sions: We assess the number of pre-production reservations for the Sion, which gives us visibility on market demand for our vehicles and shows customer support of our offering.
- Net promoter score: We use a net promoter score, which is intended to indicate customer loyalty and satisfaction measurement derived from surveys among our customers on their satisfaction and likelihood to recommend our product or services to others on a certain scale.
- Number of social media followers: The number of people following our brand on social media is a strong indicator of brand awareness and our popularity among our community. It indicates our reach that is achieved without any major engagement.
- Newsletter subscribers and opening rate: The number of newsletter subscribers and the opening rate, i.e., the percentage of recipients of our email advertising that open our emails, are important indicators of the success of our email advertising strategy. The opening rate indicates, among others, the punchiness of subject lines, the composition of the audience and the appropriateness of emails sent.
- Website visits: We track the number of visitors to our website as this indicates interest in our brand independently of our own media activities.
- Advertising and marketing spent per reservation: This KPI quantifies the benefit of a community, the role of word-of-mouth recommendations and the effectiveness of a strong brand to acquire new reservations and, in the future, purchasers for the Sion.

Sales

We primarily rely on online sales of our vehicles through our website with only a very limited number of physical locations. This approach allows us to reach many customers in a larger number of countries and eliminates potential dealer margins and distribution costs. We also intend to provide further digital channels to enable an exchange with our customers prior to the delivery of our vehicles with a view to taking the customer with us on the journey of building his or her vehicle.

However, we also plan to offer conventional direct sales channels and maintain physical contact with our customers. We want to offer a variety of events for this purpose, such as test-drive tours and product presentations, as well as mobile locations in cities or at our delivery hubs, where potential customers can test our vehicles and get all relevant information about our products and the Company. These events will also enable us to collect relevant data about customers in order to better understand their needs.

The following graphic compares the conventional sales process to our customer journey.

Customer Service

We intend to focus on our database, which will be available once serial production of the Sion has commenced and will enable customers themselves to conduct inexpensive repairs and maintenance of our vehicles based on digital open-source car manuals as well as video tutorials for “do-it-yourself” maintenance of our vehicles. Our customers will generally be able to choose from among three options:

- **Individual self-repair:** Customers may self-repair their vehicle at low cost with the assistance of our online database through open-source manuals, instructions and video tutorials while spare parts can be ordered online on our website or even simply be printed in 3D.
- **Non-licensed car-workshops:** Depending on the skill level of the customer and the specific maintenance work to be done, our customers can also involve non-licensed car workshops who then engage in low-cost repair also based on our open-source material from our database.
- **Service partner network:** We also intend to cooperate with a renowned European service provider for an all-around carefree service offering and, in particular, repairs involving high-voltage or body parts.

We believe that our concept creates additional value for our customers as, contrary to the approach often taken by established vehicle brands, we currently do not intend to create incentives to have required service and maintenance work performed at typically more costly licensed car workshops. At the same time, this concept allows us to externalize the costs typically associated with the installation, operation and maintenance of a service network.

Information Technology

We use a number of standard software programs for our business operations. In addition, we deploy our own proprietary software and applications. To help secure data that we handle and protect against outages, we have implemented a number of protective measures, including duplicate systems, firewalls, antivirus software, patches, data encryption, log monitors, routine backups, system audits, data partitioning, routine password modifications and disaster recovery procedures.

Competition

Solar Technology

While there is a large number of providers of solar technology solutions for all kinds of stationary applications, the competitive landscape for vehicle solar solutions is less competitive. Based on a survey conducted by our business intelligence team, we have identified a few competitors, including a2-solar

Advanced and Automotive Solar Systems GmbH, eNow, Inc., KRSolar B.V. doing business as wattlab, Im Efficiency B.V., Green Energy Solutions and TRAILAR.

We believe that the following factors differentiate ourselves from these competitors:

- many of these competitors rely on self-installation while we offer installation services;
- we rely on cell technology that provides high energy density at a reasonable cost;
- we have a proprietary maximum power point tracker solution; and
- we offer both vehicle added solar modules and vehicle integrated solar modules.

Car

The automotive market in general, and the automotive mass market in particular, are highly competitive, and while we are arguably the only manufacturer focused exclusively on solar power vehicles, we are not the only company seeking to develop and offer a solar powered car. We expect competition in our industry to intensify in the future, particularly in light of increased demand for alternative fuel and a regulatory push for electric vehicles (e.g., CO2 target emission regulations and tax or other monetary incentives), as well as declining battery prices. Continuing globalization may lead to additional potential competitors in emerging economies. We believe the primary competitive factors in our markets include:

- manufacturing efficiency,
- vehicle price,
- product quality, performance and features,
- design and styling,
- innovation and development time,
- reliability,
- safety,
- energy economy,
- charging options,
- customer service and
- financing terms

We have strategically positioned ourselves to fill a niche in the market for electric vehicles. However, we expect that the niche for solar electric vehicles may become more competitive in the future. Numerous competitors strive to offer e-mobility affordable to the masses and several other market players are currently experimenting with solar charging technology, including manufacturers with established brands and significantly greater financial resources than us such as Tesla, Toyota and Lightyear. In order to succeed, we seek to be the price / value leader in our segment and offer customers the lowest total cost of ownership in our segment. The following graphic compares the Sion to selected offers from competitors:

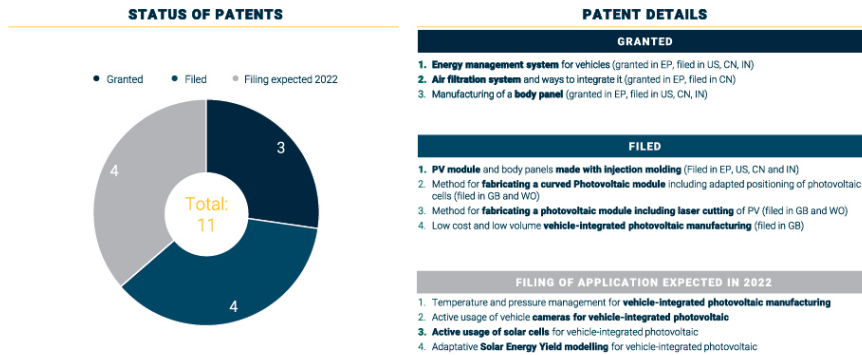

(1) EUR / USD FX of 1.198, excluding VAT. Prices shown are recommended retail prices (in EUR converted into USD) and do not include any indirect incentives. Pricing and included options can differ by region. Sion range based on expected WLTP with additional solar based mileage on average per week based on calculations and measurements in 18 EU cities with highest population density and certain assumptions concerning energy efficiency of the Sion. Distance may vary based on location and weather conditions. Source: www.ev-database.org, 25.09.2021. Segment source: Kraftfahrtbundesamt (Kfz)

Intellectual Property

Our intellectual property, including patents, trademarks and copyright, is important to our business. We hold three patents in several jurisdictions relating to our power sharing solution, the ventilation system and the procedure to manufacture a car body part, have filed several patent applications, including relating to our solar technology, and expect to file several additional patent applications in 2021. We have registered trademarks in the EU or other relevant jurisdictions for “Sono Motors” and “Sion.” Our intellectual property portfolio includes domain names for websites that we use in our business.

We control access to, use and distribution of our intellectual property through confidentiality procedures, non-disclosure agreements with third parties and our employment and contractor agreements. Under the German Employee Invention Act (*Arbeitnehmererfindungsgesetz*) we generally have a claim on work-related inventions by our employees. We rely on contractual provisions with our business partners to protect our intellectual property and proprietary technology, brand and creative assets. We seek to maintain and protect our intellectual property portfolio, including by pursuing any infringements by third parties.

Source: Company information.
 Note: EP: European Patent, WO: Granted by the World Intellectual Property Organization. Duration between filing the application and granting can take years, and there is no guarantee that filed applications will issue in any jurisdiction. International (WO) patent applications can be nationalized in various jurisdictions for 30 months after the priority date (typically the date of the first patent application for the invention).

Insurance Coverage

We have taken out a number of group insurance policies that are customary in our industry, such as property and loss of earnings insurance, business liability insurance, including insurance for product liability, transport insurance and environmental liability insurance. We believe that our insurance policies contain market-standard exclusions and deductibles. We regularly review the adequacy of our insurance coverage and consider the scope of our insurance coverage to be customary in our industry.

Employees

As of December 31, 2020, we employed a total of 97 full-time equivalent employees, which increased to 176 by June 30, 2021 and has increased to more than 230 as of the date of this prospectus.

Facilities

Our headquarters are located at Waldmeisterstraße 76, 80935 Munich, Germany. We have leased this property for a fixed term until March 31, 2022 and have the option, after the expiration of the fixed term, to extend such lease for an additional term of one year up to five times. After the optional extension of the term of the lease, the lease will be consecutively and automatically extended for one more year, unless the lease is terminated by either party with six-months prior written notice.

In addition, we have rented a workshop at Waldmeisterstraße 93, 80935 Munich, Germany. We have rented this property for a fixed term until April 30, 2026. We then have the option this fixed term by five years.

As of the date of this prospectus, we do not own any real estate property and do not lease any real estate property, except for our headquarters.

Legal Proceedings

From time to time, we may be involved in various claims and legal proceedings relating to claims arising out of our operations. We are currently not a party to any material legal proceedings (including any such proceedings that are pending or threatened, of which we are aware).

REGULATORY ENVIRONMENT

REGULATORY ENVIRONMENT

Overview

Our industry and business operations are subject to various laws, rules and regulations at international, national, state and municipal levels, which may affect, directly or indirectly, our operations or our industry. Such laws, rules and regulations include laws on vehicle approval and homologation, laws on vehicle road safety, environmental laws, laws on vehicle emissions and renewable energies, consumer protection laws, product warranty and product liability laws, intellectual property and copyright laws, labor and employment protection laws, export control regulations, trade and economic sanctions and embargoes on certain countries, persons, groups and/or entities, projects and/or activities, competition and antitrust laws, tax laws, and criminal laws (e.g. anti-money laundering and anti-corruption laws). Within the EU the legal environment is also characterized by a set of political initiatives and legal frameworks under the so-called European green deal, which seeks to serve the overarching goal of eliminating greenhouse gas emissions and reaching climate neutrality by 2050. These initiatives and legal frameworks have had and will continue to have a significant influence on our industry and business operations as well as the overall adoption rate of electric mobility within the EU.

An overview of the laws, rules and regulations that are most relevant for our business operations or industry, broken down by general category of regulation, is provided below. Any reference in this section to any legislation or regulation is deemed to refer to such legislation or regulation as amended, supplemented or otherwise modified, and all further rules and regulations promulgated thereunder, unless the context requires otherwise

Vehicle Approval/Road Safety

Our vehicles and related components will require compliance with product-related regulatory frameworks and approval by the relevant government authorities before we may sell our vehicles to customers or before our vehicles may be used on public roads. We will have to comply with substantial licensing, certification, approval, permit and other homologation requirements in all relevant markets in which we may operate, as well as numerous and continually increasing technical product requirements, particularly with regard to the safety of vehicle occupants and other road users.

The EU has passed extensive legislation and regulations on vehicle approval and safety, including a regulation governing the testing necessary for a vehicle to be placed on the market. EU regulation also sets out EU-wide rules on technical requirements and procedures to ensure that new types of motor vehicles and their trailers conform to EU-approved requirements on safety and environmental protection. It also provides for market surveillance to ensure the conformity of vehicles already available on the market, and allows EU member states and the European Commission to carry out random tests on vehicles to detect failures. EU regulation passed in 2019, which will take effect from July 6, 2022, introduces requirements for the implementation of state-of-art safety technologies (such as intelligent speed assistance, advanced driver distraction warning systems and other safety systems, including with respect to pedestrians and cyclists) as standard vehicle equipment and seeks to enhance the competitiveness of EU car manufacturers on the global market by providing the first EU legal framework for automated and fully automated vehicles.

At the national level, Germany has implemented portions of the above into its Road Transport Law (*Straßenverkehrsgesetz*), Road Traffic Licensing Regulations (*Straßenverkehrszulassungsordnung*) and EG-Vehicle Approval Regulation (*EG-Fahrzeuggenehmigungsverordnung*). In order to be accredited as a manufacturer with the German Federal Motor Vehicle and Transport Authority (*Kraftfahrtbundesamt*) we are required to implement a quality management system to provide proof of conformity of production.

General Product Safety Liability

Our vehicles will also have to comply with product-specific or general, non-specific product safety and product liability legislation and associated regulations.

The EU has passed a directive on general product safety that applies in the absence of specific provisions among the EU regulations governing the safety of the products concerned, or if legislation on the sector is insufficient. Under this directive, manufacturers and distributors may only market products that comply with

a general requirement of consumer safety. A product is safe if it does not present any risk or only the minimum risks compatible with the product's use considered to be acceptable and consistent with a high level of protection for the safety and health of persons. In addition to compliance with the safety requirement, manufacturers and distributors must provide consumers with the necessary information in order to assess a product's inherent risks and take the necessary measures to avoid such threats (for example, withdraw products from the market, inform consumers and recall products). Strict liability applies for defective products throughout the EU in addition to any consumer protections at the national level.

In Germany, the EU requirements have been implemented via the Product Safety Act (*Produktsicherheitsgesetz*) and the Product Liability Act (*Produkthaftungsgesetz*), which are accompanied by the more general provisions under the tort law codified in the German Civil Code § 823 (*Bürgerliches Gesetzbuch*).

Vehicle Emissions and Regulatory Incentives

The protection of air quality and reduction of greenhouse gas emissions is a priority in the EU and car manufacturers relying on internal combustion engines must comply with increasingly stringent standards on vehicle emissions. The current environment of the EU and regulatory initiatives strongly support the development, production and sale of alternative fuel vehicles and their overall market adoption. In line with the international climate agreement signed at the 2015 United Nations Framework Convention on Climate Change in Paris by nearly 200 nations (commonly referred to as the "Paris Agreement"), which became effective in November 2016 and consists of two elements (a commitment by each participating country to set a voluntary emissions reduction target (referred to as "nationally determined contributions" or "NDCs"), with a review of the NDCs that could lead to updates and enhancements every five years beginning in 2023, and a transparency commitment requiring participating countries to disclose their progress), as well as based on emission legislation, the EU is taking a progressive stance in reducing carbon oxide emissions, thereby deliberately driving increasing demand for electric vehicles.

In that context and against the background of the EU's green deal, the EU implemented the Euro 6 regulatory framework ("Euro 6"), which became mandatory in stages, depending on the vehicle, beginning from September 2014 onwards. Under Euro 6, new passenger vehicles only receive vehicle type approval in the EU if such vehicles comply with defined maximum emission volumes regarding carbon monoxide, hydrocarbons, nitrogen oxides, ammonia and particulates. Implementation of Euro 6 in the EU member states did not require additional legislation at the national level. National authorities monitor compliance and have the ability to recall non-compliant vehicles. The European Commission has started the development of the next level of emission standards known as "Euro 7."

Furthermore, the EU has implemented mandatory CO₂ emissions targets. At present, all car manufacturers must meet a fleet-wide average emission target of 95g CO₂/km for their new vehicle fleets that are registered in the EU. Car manufacturers are given additional incentives to produce zero- or low-emission cars emitting less than 50g CO₂/km through a fleet-wide credits system. The regulation also provides for fleet-wide average CO₂/km emissions targets for the years 2025 and 2030, which are defined as a percentage reduction from the current applicable values: Cars are subject to a fleet-wide reduction of 15% in 2025 and 37.5% in 2030, while vans are subject to a fleet-wide reduction of 15% in 2025 and 31% in 2030. The regulation also allows for pooling arrangements among several manufacturers of passenger cars or vans based on which these manufacturers will be treated as a single "pool" and their compliance with emission limits assessed on an aggregated basis at the pool level. Car manufacturers are subject to penalty payments if the fleet-wide average emission of CO₂/km of the relevant car manufacturer exceeds the defined target values in a given year. The monetary penalty is calculated based on a predetermined euro amount (currently € 95) for each gram of CO₂/km exceeding the relevant target value multiplied by the number of vehicles produced by the relevant car manufacturer.

The adoption of electric mobility is further promoted on the national level within the EU. The vast majority of member states of the EU provide purchase grants, tax benefits or other incentive schemes to buyers of electric vehicles. For example, German governments on a state and federal level have implemented various incentive schemes to drive the adoption of electric mobility. Individual buyers of purely electric vehicles receive tax benefits in the form of ownership tax exemptions up to December 31, 2030 based on an amendment of the Motor Vehicle Tax Act (*Kraftfahrzeugsteuergesetz*). The work- or company-related use

of electric vehicles receives preferential tax treatment as well. The German Federal Office for Economic Affairs and Export Control (BAFA) has set up an “environmental bonus program” (so-called innovation bonus) under which buyers of new fully electric vehicles may receive a one-time grant in the amount of up to nine thousand euros (of which the relevant car manufacturer has to bear a share of three thousand euros in order to lead to a customer claim under the bonus program of up to six thousand euros in form of a government bonus) during a limited period of time and depending on the net list price of the relevant vehicle. Buyers of fully electric vehicles registered for the first time after June 3, 2020, and until December 31, 2021, will receive an extra innovation bonus in the same amount. The federal German Electro Mobility Act (*Elektromobilitätsgesetz*) and various incentives granted on the state or municipal level provide for various privileges electric vehicles, including, for example, the allocation of special parking spaces at charging stations in public areas, the reduction or waiver of parking fees, permitted bus lane use as well as exemptions from certain access restrictions.

Renewable Energy Requirements

The laws and regulations within the EU and various other jurisdictions impose energy source requirements for the transportation sector, which also aim at the reduction of the emission of greenhouse gases and the promotion of the adoption of alternative fuel or electric vehicles. A directive adopted in 2018, which has to be implemented by the EU member states until June 30, 2021, establishes a common system on the promotion of energy from renewable sources (such as wind, solar (both solar thermal and solar solar) and geothermal energy, tide, wave and other ocean energy, hydropower or biomass) in electricity, heating and cooling, and transport and provides a framework for the promotion of the use of renewable energy sources in the EU until 2030. The directive defines a binding overall target of at least 32% of energy from renewable sources for the EU’s gross final energy consumption by 2030 (calculated as the sum of the member states’ gross final consumption of electricity and energy in various sectors) and promotes the use of renewable energy in transport, particularly prioritizing electricity, with a target of at least 14% renewables in the final energy consumption mix by 2030. The directive envisages electric mobility to constitute a substantial part of the renewable energy mix in the transport sector by the year 2030 and is a cornerstone for the adoption and integration of electric mobility within the EU, as it also supports incentive schemes for the swift development of electric mobility with respect to the sector’s growth potential and role for the EU employment market. In addition, the directive seeks to boost the use of renewable electricity in the transport sector by applying augmented multipliers in the context of the calculation of the relevant energy mix under the directive.

Industrial Environmental Control

All member states of the EU control the manufacture, use and disposal of pollutants by means of regulations on air pollutants, chemicals, heavy metals, persistent organic pollutants, soil contamination and biocides. The operations of manufacturers, particularly our production, logistics and transport processes as well as end products, must comply with these regulations.

The most relevant legal frameworks are the Regulation for Registration, Evaluation, Authorization and Restriction of Chemicals (“REACH”) and the Regulation on Classification, Labeling and Packaging of Substances and Mixtures (“CLP”). REACH requires manufacturers and importers of chemicals to identify and manage risks linked to the substances they manufacture and market, to submit a registration dossier for substances produced or imported in quantities of one ton or more per year per company, and to provide downstream users with risk information to ensure proper application of such substances. In addition, for “substances of very high concern,” REACH may require government authorization for further use or impose restrictions in the future, any of which may delay or increase the costs of operations. CLP complements REACH by requiring suppliers of substances and mixtures, including manufacturers, downstream users and distributors, to apply harmonized criteria to their classification and labeling.

Substance restrictions under REACH in some cases prohibit the marketing in the EU of articles containing certain substances. This is particularly relevant in relation to spare parts for products, which were designed before a relevant restriction was adopted and which are no longer in mass production (“legacy parts”). Similar problems may arise if a substance is placed under an authorization requirement under

REACH and may, therefore, not be used for the production of legacy parts without a corresponding authorization. REACH does not include general exemptions with regard to legacy parts (so-called “repair as produced” clauses).

Emissions from Production

Emissions from production, such as air pollutants, noise, odors, vibrations and greenhouse gases (such as CO₂), are governed by specific laws and regulations, and, if the operation of a facility is subject to a permit, by specific conditions set forth therein. Some laws and regulations require the submission of emission reports on a regular basis. Non-compliance with maximum emission levels may result in administrative fines.

International, as well as European and national regulations, may have repercussions on the operation of the relevant production facilities. For example, stricter regulation of CO₂ emissions could cause manufacturers to incur significant capital expenditures to upgrade production plants by installing or improving technical equipment to comply with maximum emission levels that may become applicable in the future, which may also affect their ability to sell their products at predetermined price levels.

Emission trading systems for emissions from industrial production exist on the European and national level. These systems are based on “cap and trade” principles designed to reduce carbon dioxide emissions by limiting the number of emission allowances (cap) required for certain facilities and allowing the purchase for shortfall or the sale of surplus emission allowances (trade).

Reuse, Recycling and Recovery

Manufacturers may also be obligated to assist customers with the disposal, recovery and recycling of certain underlying components of their products once they have reached their end-of-life/disposal stage.

An EU directive on batteries (the “Batteries Directive”) governs the recovery of batteries within the EU. The Batteries Directive requires manufacturers and distributors of batteries to bear a significant amount of the costs associated with proper collection and disposal of end-of-life batteries. As batteries are a substantial component of our vehicles, we may have to (potentially) incur additional costs and administrative burdens to comply with laws governing the recovery of batteries and other similar laws.

Furthermore, an EU directive on end-of-life vehicles (“ELV Directive”) and an EU directive on waste electric and electronic equipment (the “WEEE Directive”) each govern the recovery of motor vehicles and electric and electronic equipment within the EU, providing for ambitious recovery, reuse and recycling rates. The directives require that manufacturers cover all, or a significant part of, the costs associated with recovery, reuse and recycling measures. The aforementioned directives, including the Batteries Directive, as well as an EU directive on the restrictions of the use of certain hazardous substances in electrical and electronic equipment, limit manufacturing options because they also contain prohibitions on the use of certain identified substances and materials.

Cross-border Import and Export of Products

Sales of our products may be subject to export control and sanction regulations, as well as trade policy measures, such as tariffs. We may be required to comply with export control regulations, trade and economic sanctions restrictions and embargoes imposed by multiple authorities, such as the United Nations, the EU and the United States. In addition, the EU, United States and other applicable sanctions and embargo laws and regulations vary in their application (and may be inconsistent): they do not all apply to the same covered countries, persons, groups and/or entities, projects and/or activities, and such sanctions and embargo laws and regulations may be amended or strengthened from time to time.

Within our primary target market, the EU’s internal market, the principle of free movement of goods applies. When importing goods from, and exporting goods to, non-EU countries, we will have to comply with national and European foreign trade and customs regulations.

Data Protection and Privacy

We plan to include various digital offerings in our vehicles to be accessible via our own app and plan to continue to further develop connectivity solutions for our customers. We will also obtain data from our

customers as they reserve cars or as we sell cars online. Regulations governing data protection can therefore have a significant impact on our business.

The EU General Data Protection Regulation (“GDPR”) applies to the processing of personal data in the context of activities of establishments in the European Economic Area (“EEA”), regardless of whether the processing takes place in the EEA or not. The GDPR and other data privacy laws regulate when and how personal data may be collected, for which purposes it may be processed, for how long such data may be stored and to whom and how it may be transferred. The GDPR contains strict requirements for obtaining the consent of data subjects (i.e., the persons to whom personal data relates) to the use and processing of their personal data. The GDPR also requires the implementation of appropriate technical and organizational measures, depending on the nature of the processing activities. It also imposes various obligations in the context of processing of data, including, among others, far-reaching transparency, data minimization, storage limitations, privacy by design and privacy by default obligations, data security, integrity and confidentiality obligations. In addition, it may require so-called data protection impact assessments, at least in cases where the data processing is likely to result in a high risk to the rights and freedoms of individuals. In Germany, operators of online platforms have to comply with the specific requirements of the German Tele Media Act (*Telemediengesetz* (“Tele Media Act”)), which takes into consideration particular aspects of online communication. For example, the Tele Media Act provides for additional information obligations which are stricter than the general requirements of the Data Protection Act (e.g., a requirement to include an imprint on websites and apps).

An EU directive on the processing of personal data and the protection of personal data in the electronic communications sector adopted in 2002 sets out rules to ensure security in the processing of personal data, the notification of personal data breaches and confidentiality of communications through public electronic communication services such as the internet and mobile telephony. Providers of such electronic communication services must, among others, ensure that personal data are accessed by authorized persons only, are protected from being destroyed, lost or accidentally altered and from other unlawful or unauthorized forms of processing and ensure the implementation of a security policy on the processing of personal data. The e-Privacy Directive also contains several provisions aimed at ensuring the confidentiality of electronic communications and sets forth strict (consent) requirements for the use of cookies and for unsolicited communication as part of direct marketing efforts. The e-Privacy Directive has been implemented in the Netherlands by the Dutch Telecommunications Act (*Telecommunicatiewet*) and in Germany by the German Telecommunications Act (*Telekommunikationsgesetz*). On January 10, 2017, the European Commission released a proposal for a regulation of the European Parliament and of the Council concerning the respect for private life and the protection of personal data in electronic communications (the e-Privacy Regulation), which would repeal the e-Privacy Directive. The proposal is still subject to legislative procedure and debate.

Antitrust Law

Competition and antitrust laws and regulations are designed to preserve free and open competition in the marketplace to enhance competitiveness and economic efficiency. Provisions on merger control, the prohibition of anticompetitive agreements, collusive behavior, the prohibition of abuse of a dominant position and the receipt of advantages in violation of state aid rules within the market are of particular relevance for manufacturers. National and supranational competition and antitrust authorities may initiate investigations and proceedings for alleged infringements of competition or antitrust laws, which may result in significant fines or other forms of liability or impose certain limitations or conditions regarding acquisitions and certain business practices.

Within the EU, compliance with applicable European and national competition laws is monitored by the European Commission and in some cases the national competition authorities. The EU’s antitrust rules are set out in Articles 101 and 102 of the Treaty on the Functioning of the European Union (“TFEU”). Article 101(1) of the TFEU prohibits anticompetitive agreements to the extent they are not otherwise exempted by Article 101(3) of the TFEU. Article 102 TFEU prohibits the abuse of a dominant position. Article 107 (1) TFEU prohibits the granting of state aid.

Class Actions

In the EU and certain of its member states, there is or has been an increasing prevalence of legislation governing class actions and their use to enforce regulations. As a result of these developments, consumers have increasingly powerful legal mechanisms at their disposal to collectively sue manufacturers of consumer products.

In the EU, under the banner of “A New Deal for Consumers,” the European Commission is facilitating a trend towards the increasing availability and use of collective redress mechanisms in areas in which EU law grants rights, including in particular consumer protection rules and regulations. The Commission made a non-binding recommendation for EU member states to adopt collective redress procedures in June 2013, subsequently consulted on progress in 2017 and published a report on the subject in January 2018. A proposal for a new directive regarding “better enforcement and modernization of EU consumer protection rules” has been put forward by the European Commission. EU member states have also been developing their own rules in this regard. In Germany a law introducing a declaratory model action (*Musterfeststellungsklage*) came into force on November 1, 2018. With this new declaratory model action, certain persons are entitled to seek a legal declaration concerning factual or legal matters regarding consumer claims. Consumers can then opt in to be bound by a judgment (and under certain circumstances also a settlement) issued in the declaratory model proceedings.

In The Netherlands, in the event a third party is liable to a Dutch company, only the company itself can bring a civil action against that party. The individual shareholders do not have the right to bring an action on behalf of the company. Only in the event that the cause for the liability of a third party to the company also constitutes a tortious act directly against a shareholder does that shareholder have an individual right of action against such third party in its own name. Dutch law provides for the possibility to initiate such actions collectively, in which a foundation or an association can act as a class representative and has standing to commence proceedings and claim damages if certain criteria are met. The court will first determine if those criteria are met. If so, the case will go forward as a class action on the merits after a period allowing class members to opt out from the case has lapsed. All members of the class who are residents of The Netherlands and who did not opt out will be bound to the outcome of the case. Residents of other countries must actively opt in in order to be able to benefit from the class action. The defendant is not required to file defenses on the merits prior to the merits phase having commenced. It is possible for the parties to reach a settlement during the merits phase. Such a settlement can be approved by the court, which approval will then bind the members of the class, subject to a second opt-out. This new regime applies to claims brought after January 1, 2020 and which relate to certain events that occurred prior to that date. For other matters, the old Dutch class actions regime will apply. Under the old regime, no monetary damages can be sought. Also, a judgment rendered under the old regime will not bind individual class members. Even though Dutch law does not provide for derivative suits, directors and officers can still be subject to liability under U.S. securities laws.

MANAGEMENT

MANAGEMENT

Board Structure

We have a two-tier board structure consisting of a management board (*bestuur*) and a separate supervisory board (*raad van commissarissen*). There are no family relationships among any of our management board members and supervisory board members.

Management Board

Our management board currently consists of two members. Torsten Kiedel, Thomas Hausch and Markus Volmer will be appointed as additional members of our management board immediately prior to the pricing of this offering. Following the closing of this offering, each management board member of Sono Group N.V. will hold office for the term set by our general meeting (as set forth in the table below), except in the case of his or her earlier death, resignation or removal. Our management board members do not have a retirement age requirement under our articles of association.

Our management board members are responsible for the management and representation of our Company in accordance with applicable laws, our articles of association and the management board's internal rules.

The following table lists our management board members, all of whom we consider executive officers, as well as their ages, term served, the year of expiration of their term as management board members of Sono Group N.V. and position immediately prior to pricing of this offering:

Name	Age	Term Served	Year in which Term Expires	Position
Laurin Hahn	27	2020 - Present	2025	Co-Chief Executive Officer and Co-Founder
Jona Christians	28	2020 - Present	2025	Co-Chief Executive Officer and Co-Founder
Torsten Kiedel(1)	43	2021 - Present	2025	Chief Financial Officer
Thomas Hausch(2)	56	2021 - Present	2025	Chief Operating Officer
Markus Volmer(3)	47	2021 - Present	2025	Chief Technology Officer

- (1) Torsten Kiedel joined Sono Motors on February 1, 2020 and will become a member of our management board immediately prior to the pricing of this offering.
- (2) Thomas Hausch joined Sono Motors on June 13, 2018 and will become a member of our management board immediately prior to the pricing of this offering.
- (3) Markus Volmer joined Sono Motors on February 1, 2021 and will become a member of our management board immediately prior to the pricing of this offering.

The following is a brief summary of the business experience of the members of our management board. Unless otherwise indicated, the current business address for each management board member is the same as our business address: Waldmeisterstraße 76, 80935 Munich, Germany.

Laurin Hahn is a co-founder and Chief Executive Officer of our Company. Laurin founded his first business in the event industry at the age of 17 together with his brothers. Driven by the vision of fostering a system change and fully dedicating his time to the development of an efficient and affordable electric vehicle suitable for everyday use by sourcing the energy from the sun, he embarked on an ambitious journey after graduating from high school in 2012 together with his childhood friend Jona Christians. Within three years, Laurin and Jona built their first electric car with integrated solar panels, which they named the Sion, in a private garage. Based on this project and the vision of a sustainable mobility concept independent of fossil fuels, Laurin and Jona, together with Navina Pernsteiner, incorporated Sono Motors GmbH in early 2016 to further promote their vision and enlarge their team. Laurin as the visionary heart of Sono Motors, together with Jona, has built Sono Motors into a pioneer for solar electric mobility and a technological leader. Laurin is also a member of the "Entrepreneurs for Future" network. Laurin was recognized by the German magazine Capital for his entrepreneurship and innovative spirit in a "40 under 40" ranking in 2019. In 2020 Laurin was nominated for the entrepreneur of the year Germany 2020 award by Ernst & Young and also nominated as the founder of the most innovative start-up.

Jona Christians is the co-founder and chief executive officer of Sono Motors. His main areas of expertise are the company's product and innovation strategy. In 2016, he co-founded the company together with his two friends and partners, Laurin Hahn and Navina Pernsteiner. Together with Laurin, he laid the foundation for the company's first vehicle, the Sion, and has been running Sono Motors since then. Jona was inspired by sustainable technology startups such as the Dutch company Fairphone and the nonprofit organization TED. After graduating from high school in 2012, he started to develop and realize his vision of a sustainable mobility concept independent of fossil fuels. As the joint project grew and consolidated, he decided against continuing his studies in computer science and experimental physics and devoted himself fully to the development of the Sion and the management of Sono Motors. At the age of 27, Jona was nominated for the Entrepreneur of the Year, Germany 2020, by Ernst & Young. With Sono Motors, he is among the finalists of the German Sustainability Award Design. In 2020, Sono Motors and its founders were awarded as number one of the Most Innovative Start-Ups in Mobility by Forbes. Next to his role at Sono, Jona currently serves as a member of the entrepreneurial community Leaders for Climate Action.

Torsten Kiedel has been working in the mobility industry for most of his professional life. He started his career at the BMW Group in 2004, where he spent seven years in various finance positions. During his tenure, Torsten also worked three years at the BMW Bank of North America in Salt Lake City, UT. Afterwards, Torsten became Chief Financial Officer of former myTaxi, now "Free Now." His main responsibility was to build a team and introduce processes and systems that would enable myTaxi's strong growth. After the successful acquisition of myTaxi by Daimler Financial Services, Torsten transferred to another Daimler portfolio company, FlixBus, doing business as FlixBus, where he served as Vice President Finance, Legal and Procurement for three years, enabling FlixBus's international expansion. From March 2018 to January 2020, Torsten served as CFO of Occhio GmbH, a Munich, Germany, based provider of lighting solutions. Torsten joined Sono Motors at the beginning of 2020 as Chief Financial Officer.

Thomas Hausch has more than 25 years of experience in the automotive industry and a vast experience in the areas of development, manufacturing, sales and marketing. After working on the assembly line, he began his career as an international management associate and project lead at Daimler-Benz AG (now Daimler AG), where he remained until 2011. He was the head of technology strategy for advanced development Mercedes-Benz passenger cars and held various other management positions; later, he served as executive director international sales and marketing, as vice president international sales and, finally, as vice president of the Chrysler Group and chief executive officer of the EMEA region among others. In 2011, he joined CODA Automotive, Inc. as senior vice president responsible for sales, marketing, aftersales and final assembly. In 2013, he joined Nissan Motor Company as managing director of Nissan Center Europe and vice president before joining Sono Motors as chief operating officer in 2018. Thomas holds a degree in industrial engineering and mechanical engineering (*Diplom-Wirtschaftsingenieur*) from the University of Karlsruhe and an MBA in change management, marketing and strategic planning from the University of Southern California — Marshall School of Business.

Markus Volmer has more than 18 years of experience as a senior development engineer in the automotive industry. He began his career as an international management associate at Daimler AG (formerly DaimlerChrysler AG) in 2003. Between 2004 and 2014, Markus held various positions in development and testing at Daimler AG, before joining Foton Motor Group as chief engineer vehicle testing in 2014. In 2016, he was appointed senior chief engineer research & development and testing at Borgward Group AG, a position he remained in before joining Sono Motors as chief technology officer in 2021. Markus holds a degree in industrial engineering with a focus on mechanical engineering (*Diplom-Wirtschaftsingenieur*) from the Technical University Braunschweig and an MBA from the University of Rhode Island — College of Business.

Supervisory Board

Our supervisory board is expected to be composed of five members, provided that our supervisory board may adjust the number of supervisory board members from time to time. However, our supervisory board must, when determining the number of supervisory board members, observe our nomination arrangement pursuant to which each of Laurin Hahn and Jona Christians, acting individually, shall always be allowed to make a binding nomination for one supervisory board member as long as he holds at least 5% of voting rights. Following the closing of this offering, each supervisory board member will hold office for

the term set by our general meeting (as set forth in the table below), except in the case of his or her earlier death, resignation or removal. Our supervisory board members do not have a retirement age requirement under our articles of association.

The following table sets forth the names of our envisaged supervisory board members, their ages and the year of expiration of their term as supervisory board members of Sono Group N.V. immediately prior to the pricing of this offering:

<u>Name</u>	<u>Age</u>	<u>Year in which Term Expires</u>
Wilko Stark	48	2025
Martina Buchhauser	55	2025
Sebastian Böttger	47	2025
Bob Jeffe	71	2025
Johannes Trischler	34	2025

The following is a brief summary of the prior business experience and principal business activities performed outside of the position on the supervisory board of Sono Motors. Unless otherwise indicated, the current business addresses for each of our supervisory board members is Waldmeisterstraße 76, 80935 Munich, Germany.

The following is a brief summary of the prior business experience of the members of our supervisory board:

Wilko Stark will become a member of our supervisory board immediately prior to pricing of this offering. Wilko was a member of the Divisional Board of Management of Mercedes-Benz Cars, Purchasing and Supplier Quality from October 2018 until April 2019. In this position, he was responsible for purchasing of production material as well as the purchased parts quality of the Mercedes Benz Cars and Vans suppliers worldwide. He has been the head of Daimler Corporate Strategy and Strategy and Product Planning of Mercedes-Benz Cars since 2013 and has been additionally responsible for the CASE Division within Mercedes-Benz Cars since May 2017. At this point, he was responsible for the implementation of activities related to Connectivity, Autonomous Driving, Shared & Services and E-Mobility at Mercedes-Benz Cars. Today, Wilko is a supervisory and advisory board member to several companies including ZKW Group, Kromberg & Schubert, Altech Advanced Materials and Flender. He started his professional career at the Boston Consulting Group in 1998. In 2007, he moved to Volkswagen AG, where he was Head of Product Strategy VW Group and VW Passenger Cars, as well as Head of Products of Seat S.A. In 2012, Wilko joined Daimler AG and was responsible for Products & Modules Daimler Trucks. Wilko studied mechanical engineering (*Diplom-Ingenieur*) at the University of Stuttgart.

Martina Buchhauser will become a member of our supervisory board immediately prior to pricing of this offering. Martina has more than 35 years of extensive experience in the automotive industry as well as a proven track record in global sourcing, supplier management and close collaboration with engineering and manufacturing organizations. Since August 2021, she has served as senior advisor to H&Z Management Consulting AG. Until January 2021, she was at Volvo Car Corporation where she served as senior vice president of global procurement and member of the management board. Prior to that, she was senior vice president of purchasing and supplier network, interior and electric/electronics at BMW Group from 2012 to 2017. Until 2021, she served as director of the advisory board of GV Automobile Technology (Ningbo) Co. Ltd., the joint venture of Geely and Volvo. In 2007, she joined MAN Truck and Bus (today part of Volkswagen), MAN SE as vice president corporate purchasing until 2012. Martina began her career in 1985 at General Motors Corporation, USA, and Adam Opel AG, Germany, where she later served as global executive director worldwide purchasing until 2006. Martina holds a master of science in management (M.Sc.) from Stanford University and a bachelor of science in business management (B.Sc.) from Lawrence Technological University.

Sebastian Böttger will become a member of our supervisory board immediately prior to pricing of this offering. Sebastian is an entrepreneur, who founded his first company during his first semester at university. Sebastian is chief executive officer of NeLeSo GmbH, a software and consulting company that develops innovative solutions in the area of electric mobility with a focus on digital services, which he founded in 2010. From 2004 to 2018, he was founder and chief executive officer of Melin GmbH, a company providing an

email marketing server for high volume emailing, which merged with Neleso GmbH in 2018. From 1995 to 2004, he was founder and chief executive officer of Imperia GmbH, a content management system for complex websites for media/publishers and public authorities. Imperia GmbH was sold to a stock exchange listed company in 2004 (now Pirobase Imperia GmbH). Sebastian studied electrical engineering and holds a degree from RWTH Aachen (*Dipl.Ing. Elektrotechnik*).

Robert A. Jeffe will become a member of our supervisory board immediately prior to pricing of this offering. Robert has more than 34 years of extensive investment banking and corporate finance experience and has served in leadership roles and held board positions at several large financial institutions and energy companies. Since 2011, Robert serves as director at Associated Bank Corp. In 2017, Robert joined BlackWatch Advisors LLC, a financial and strategic consulting and advisory services firm focused in the technology and entertainment industries, where he currently works as a senior operating partner. From 2017 to 2021, he served as chairman of OAG Analytics, Inc. From 2012 to 2017, he served as co-chairman and co-founder of Hawkwood Energy, a private oil and gas company, focused on onshore exploration and production in the U.S. From 2004 to 2011, he was chairman of the corporate advisory group of Deutsche Bank. From 2001 to 2004, he served as senior vice president of corporate business development for General Electric Company, and as a member of GE Capital's board of directors from 2002 to 2004. Prior to that, he was with Morgan Stanley, Credit Suisse and Smith Barney (now Citigroup) serving at all three firms as managing director, head of the global energy and natural resources group, and a member of the investment banking management committee and global leadership group. At Morgan Stanley, Robert also was co-head of global corporate finance. Robert holds a master of business administration from Stanford University and an undergraduate degree in economics from Dartmouth College.

Johannes Trischler will become a member of our supervisory board immediately prior to pricing of this offering. Besides various political engagements, Johannes began his legal career in 2017 as head of the legal department at the large district town Freising (Große Kreisstadt Freising), where he was a member of the mayor's staff and advised on legal and policy issues until 2018. In 2018, he joined Sono Motors GmbH as senior legal counsel and head of the legal department; he holds the title of General Counsel since March 2021. Johannes was born in Munich, Germany, in 1987. He holds a law degree from the Ludwig-Maximilians-University, Munich. He graduated with his first state examination in law in 2013 and completed his legal clerkship at the Higher Regional Court of Munich in 2016. He graduated with his second state examination in 2016.

Committees

Audit Committee

The audit committee, which is expected to consist of Robert Jeffe, Sebastian Böttger, Martina Buchhauser and Wilko Stark, will assist the supervisory board in overseeing our accounting and financial reporting processes and the audits of our consolidated financial statements. Robert Jeffe will serve as chairperson of the committee. In addition, the audit committee will be responsible for the appointment, compensation, retention and oversight of the work of our independent registered public accounting firm. Our supervisory board has determined that Robert Jeffe satisfies the "independence" requirements set forth in Rule 10A-3 under the Exchange Act and qualifies as an "audit committee financial expert," as such term is defined in the rules of the SEC.

Compensation Committee

The compensation committee is expected to consist of Sebastian Böttger, Robert Jeffe and Wilko Stark. The compensation committee will assist the supervisory board in determining compensation for our executive officers and our management board members and supervisory board members. Sebastian Böttger will serve as chairperson of the committee. The composition of our compensation committee is consistent with the best practice provisions of the DCGC.

The compensation committee will be governed by a charter that will be posted on our website prior to the listing of our common shares.

Nomination and Corporate Governance Committee

The nomination and corporate governance committee is expected to consist of Martina Buchhauser, Wilko Stark and Johannes Trischler. The nomination and corporate governance committee will assist our supervisory board in identifying individuals qualified to become our management board members or supervisory board members consistent with criteria established by us, including in our code of business conduct and ethics. Martina Buchhauser will serve as chairperson of the committee.

The nominating and corporate committee will be governed by a charter that will be posted on our website prior to the listing of our common shares.

Remuneration and Other Benefits to Supervisory and Management Board Members for the Year Ended December 31, 2020

As a foreign private issuer, in accordance with the Nasdaq listing requirements, we will comply with home country compensation requirements and certain exemptions thereunder rather than complying with Nasdaq compensation requirements. Dutch law does not provide for limitations with respect to the aggregate annual compensation paid to our management board members or supervisory board members, provided that such compensation is consistent with our compensation policy. Our compensation policy has been adopted by our general meeting. Changes to our compensation policy shall require a vote of our general meeting by simple majority of votes cast. The supervisory board determines the remuneration of individual management board members with due observance of the compensation policy. A proposal with respect to remuneration schemes in the form of shares or rights to shares in which management board members may participate is subject to approval by our general meeting by simple majority of votes cast. Such a proposal must set out at least the maximum number of shares or rights to subscribe for shares to be granted to the management board members and the criteria for granting or amendment. The compensation for our supervisory board members is set by the general meeting.

Our compensation policy authorizes our supervisory board to determine the amount, level and structure of the compensation packages of our management board members at the recommendation of our compensation committee. These compensation packages may consist of a mix of fixed and variable compensation components, including base salary, short-term incentives, long-term incentives, fringe benefits, severance pay and pension arrangements, as determined by our supervisory board.

Supervisory Board

Compensation of Supervisory Board Members

Our supervisory board was first established in 2021. Therefore, for the business year 2020 and earlier, no compensation or other benefits were granted to supervisory board members.

Share Ownership of Supervisory Board Members

For the year ended December 31, 2020, our supervisory board members did not and currently do not own any shares in the Company.

Option Ownership of Supervisory Board Members

For the year ended December 31, 2020, our supervisory board members did not and currently do not own any options or other equity awards for shares of the Company.

Management Board

Compensation of Management Board Members

For the year ended December 31, 2020, the aggregate compensation accrued or paid to our management board members for services in all capacities was €88,781.78. The following table sets forth the aggregate compensation and benefits provided to our management board members in the year ended December 31, 2020.

<u>Name</u>	<u>Salary (€)</u>	<u>Bonus (€)</u>	<u>All Other Compensation (€)(1)</u>	<u>Total Compensation (€)</u>
Laurin Hahn	37,927.87	5,000.00	1,500.00	44,427.87
Jona Christians	37,853.91	5,000.00	1,500.00	44,353.91

(1) All other compensation includes other monetary benefits and contributions to social security insurance, if any.

Share Ownership of Management Board Members

The following table sets forth the share ownership of our management board members as of December 31, 2020.

<u>Name</u>	<u>Number of Shares</u>	<u>Percentage of Shares Outstanding</u>	<u>Voting Rights</u>
Laurin Hahn(1)	12,500,000	34.81%	46.75%
Jona Christians(2)	11,250,000	31.42%	42.07%

(1) Of which 1,578,947 shares are high voting shares, which correspond to 36.62% of the voting rights.

(2) Of which 1,421,053 shares are high voting shares, which correspond to 32.95% of the voting rights.

The following table sets forth the share ownership of our management board members that will become a member of our management board immediately prior to pricing of this offering.

<u>Name</u>	<u>Number of Shares</u>	<u>Percentage of Shares Outstanding</u>	<u>Voting Rights</u>
Torsten Kiedel(1)	—	—%	—%
Thomas Hausch(2)	—	—%	—%
Markus Volmer(3)	—	—%	—%

(1) Torsten Kiedel joined Sono Motors on February 1, 2020 and will become a member of our management board immediately prior to the pricing of this offering.

(2) Thomas Hausch joined Sono Motors on June 13, 2018 and will become a member of our management board immediately prior to the pricing of this offering.

(3) Markus Volmer joined Sono Motors on February 1, 2021 and will become a member of our management board immediately prior to the pricing of this offering.

Option Ownership of Management Board Members

The following table sets forth the option ownership of our management board members as of December 31, 2020.

<u>Name</u>	<u>Number of Options</u>	<u>Exercise Price (in €)</u>
Laurin Hahn	—	—
Jona Christians	—	—

The following table sets for the option ownership of our management board members that will become a member of our management board immediately prior to pricing of this offering.

<u>Name</u>	<u>Number of Options</u>	<u>Exercise Price (in €)</u>	<u>Underlying Common Shares(1)</u>
Torsten Kiedel(2)	132,350	0.06	226,318
Thomas Hausch(3)	134,350	0.06	229,738
Markus Volmer(4)	—	—	—

(1) Immediately prior to the pricing of this offering, we will issue additional common shares to all of our existing shareholders, replicating the effect of a share split. Each of our existing shareholders will receive 0.71 additional common shares per common share or high voting share held by them immediately prior to the pricing of this offering, rounded down to the nearest integer. Our

- stock options will reflect the effect of this issuance of share, as the underlying securities for one stock option will change from one common share to 1.71 common shares, with issuable shares being rounded down to the nearest full integer. The numbers shown in this column reflect an underlying of 1.71 common shares per stock option.
- (2) Torsten Kiedel joined Sono Motors on February 1, 2020 and will become a member of our management board immediately prior to the pricing of this offering.
 - (3) Thomas Hausch joined Sono Motors on June 13, 2018 and will become a member of our management board immediately prior to the pricing of this offering.
 - (4) Markus Volmer joined Sono Motors on February 1, 2021 and will become a member of our management board immediately prior to the pricing of this offering.

Service Agreements

We intend to enter into service contracts with our management board members (“Management Contracts”). The Management Contracts generally will provide for a term of four years and a base salary and an annual variable payment expressed as a percentage of annual base salary. The supervisory board will also be entitled to grant management board members additional compensation at its discretion.

The Management Contracts will also provide for additional allowances. The management board members will also be eligible to participate in a stock option plan, virtual stock plan or equivalent plan that is established in a manner substantially similar to other of the senior executives.

The Management Contracts will provide for the following restrictive covenants: (i) a non-compete during employment and for 18 months and (ii) a perpetual confidentiality covenant. Under the Management Contracts, we will be obligated to pay the management board members compensation for the duration of their post-employment non-compete in monthly installments that are equal to half of the total compensation they received prior to their termination.

We may in the near future enter into service agreements with supervisory board members, the terms of which may provide for, among other things, cash or equity-based compensation and benefits.

Employee Participation

Former Virtual Share Programs

We granted virtual shares to all employees under an employee participation program (the “VESP 2017”), which entitled the beneficiaries to monetary benefits in the form of profit participations or a right to participate in Sono Motors GmbH’s exit proceeds in the case of certain predetermined exit events subject to certain conditions. The value of the virtual shares of the employees were derived from a point system based on the relevant employee’s length of employment.

In addition, we granted virtual shares to certain key employees under another employee participation program (the “VESP 2018”), which also entitled such key employees to essentially equivalent monetary benefits, while the value of such key employees’ virtual shares were derived from a percentage defined in the relevant key employee’s employment contract.

In December 2020, the VESP 2017 and VESP 2018 and any virtual shares, awards or other benefits related thereto were terminated with immediate effect based on the conclusion of individual cancellation agreements with all beneficiaries but one.

Conversion Stock Option Program (CSOP)

In December 2020, against the background of our intention to terminate all relevant benefits under the VESP 2017 and the VESP 2018, we adopted our conversion stock option program (CSOP) in order to grant a total of 1,805,100 of stock options each with an exercise price of €0.06 to the former beneficiaries under the VESP 2017 (except for one such beneficiary) and the VESP 2018 as well as one additional beneficiary based on individual grant agreements.

Under the CSOP, the Company granted 1,401,240 fully vested stock options, each with an exercise price of €0.06 and which are not subject to any performance criteria, with effect as of the closing date of this offering to all but one former beneficiaries (who had not accepted our offer to transfer to the CSOP) under the VESP 2017 as well as the one aforementioned additional beneficiary (the “VESP 2017 Tranche”).

The VESP 2017 Tranche stock options may first be exercised one year after the closing of this offering and only in certain windows afterwards and expire four years after the closing of this offering. In addition, we intend to offer 27,100 fully vested stock options to certain former employees based on essentially equivalent terms as the other stock options that were already granted under the VESP 2017 Tranche.

In addition, the Company granted 403,860 stock options (of which 274,075 stock options are fully vested and 129,785 stock options are not fully vested), each with an exercise price of €0.06 and which are not subject to any performance criteria, with effect as of the closing date of this offering to the former beneficiaries under the VESP 2018 (the “VESP 2018 Tranche”). The VESP 2018 Tranche stock options are generally subject to a three-year vesting period with 1/36 of the stock options granted to the relevant beneficiary incrementally vesting for each month of employment of such beneficiary depending on the relevant vesting start date as set out in the relevant individual grant agreement. The then-vested VESP 2018 Tranche stock options may first be exercised one year after the closing of this offering and expire four years after the closing of this offering.

Immediately prior to the pricing of this offering, we will issue additional common shares to all of our existing shareholders, replicating the effect of a share split. Each of our existing shareholders will receive 0.71 additional common shares per common share or high voting share held by them immediately prior to the pricing of this offering, rounded down to the nearest integer. Our stock options will reflect the effect of this issuance of share, as the underlying securities for one stock option will change from one common share to 1.71 common shares, with issuable shares being rounded down to the nearest full integer.

Employee Participation Plan

In conjunction with the consummation of this offering, we intend to establish a new long-term incentive plan (“Employee Participation Plan”) with the purpose of advancing the interests of our shareholders and other stakeholders by enhancing our ability to attract, retain and motivate individuals who are expected to make important contributions to us. The Employee Participation Plan will govern issuances of equity and equity-based incentive awards from and after the consummation of this offering. The maximum number of common shares underlying awards granted pursuant to the Employee Participation Plan (other than replacement awards under the Employee Participation Plan) shall not exceed 10% of the Company’s issued share capital from time to time.

The Employee Participation Plan will, as applicable, be administered by (i) the management board, to the extent the administration or operation of the Employee Participation Plan relates to the grant of awards to a participant who is not a management board member or supervisory board member, as well as any other matter relating to such awards, (ii) the Company’s supervisory board, to the extent the administration or operation of the Employee Participation Plan relates to the grant of awards to participants who are members of the compensation committee established by the Supervisory Board, as well as any other matter relating to such awards, or (iii) the compensation committee established by the Supervisory Board for all other matters relating to the administration or operation of the Employee Participation Plan (each of them, where appropriate, the “Committee”).

Awards under the Employee Participation Plan may be granted to our employees, the members of our management board and supervisory board, consultants or other advisors.

Awards under the Employee Participation Plan may be granted in the form of stock options, stock appreciation rights, restricted stock, restricted stock units, other share-based awards or a combination of the foregoing. The Committee may condition the right of an individual to exercise his or her awards upon the achievement or satisfaction of performance criteria.

The vesting conditions for awards under the Employee Participation Plan will be determined by the Committee and will be set forth in the applicable award documentation.

In the event of a good leaver’s (as defined in the Employee Participation Plan) termination of employment or service, all vested awards must be exercised or settled in accordance with their terms within a period specified by the Committee and all unvested awards shall be cancelled automatically unless decided

otherwise by the Committee. In the event of a bad leaver's (as defined in the Employee Participation Plan) termination of employment or service, all vested and unvested awards will be cancelled automatically without compensation.

In the event of a change in control of the Company (as defined in the Employee Participation Plan), outstanding awards that will be substituted or exchanged for equivalent replacement awards, will be cancelled. If outstanding rewards are not substituted or exchanged for equivalent replacement awards, the awards shall immediately vest and settle in full, unless otherwise decided by the Committee.

Code of Business Conduct and Ethics

We have adopted a written code of business conduct and ethics, or code of conduct, which outlines the principles of legal and ethical business conduct under which we do business. The code of conduct applies to all of our management board members, supervisory board members and employees. Upon the closing of this offering, the full text of the code of conduct will be available on our website at www.sonomotors.com. The information and other content appearing on our website are not part of this prospectus.

In addition, we are in the process of implementing a compliance management policy which describes the compliance management system implemented at Sono Motors GmbH, which is designed to ensure compliance with all legal requirements, while at the same time implementing high ethical standards that are mandatory for both management and each employee. The overall responsibility for the compliance management system lies with the compliance circle, which includes members of our management board, which reports regularly to the audit committee. In the performance of its compliance responsibilities, the management board has delegated the corresponding tasks to various functions at Sono Motors GmbH.

PRINCIPAL SHAREHOLDERS

PRINCIPAL SHAREHOLDERS

As of the date of this prospectus, we have a subscribed capital in the amount of €8,000,398.62 which is divided into 58,339,977 common shares, each with a nominal value of €0.06 and 3,000,000 high voting shares, each with a nominal value of €1.50. Our authorized share capital is €25,200,000, divided into 320,000,000 common shares, each with a nominal value of € 0.06, and 4,000,000 high voting shares, each with a nominal value of € 1.50. The following table sets forth information, as of October 31, 2021, regarding the beneficial ownership of our common shares and our high voting shares: (i) prior to the consummation of this offering as well as the full conversion of the mandatory convertible senior notes into our common shares and (ii) as adjusted to reflect the sale of our common shares in this offering as well as the full conversion of the mandatory convertible senior notes into our common shares, for:

- each person, or group of affiliated persons, known by us to own beneficially 5% or more of our outstanding common shares or high voting shares;
- each management board member and supervisory board member; and
- all management board members and supervisory board members as a group.

Beneficial ownership is determined in accordance with the rules of the SEC, and the information is not necessarily indicative of beneficial ownership for any other purpose. Under such rules, beneficial ownership includes any shares over which the individual has sole or shared voting power or investment power as well as any shares that the individual has the right to acquire within 60 days of November 8, 2021, through the exercise of any option, warrant or other right. Except as otherwise indicated, and subject to applicable community property laws, the persons named in the table have sole voting and investment power with respect to all shares held by that person.

The percentage of shares beneficially owned before this offering is computed on the basis of 58,339,977 outstanding common shares and 3,000,000 high voting shares, which takes into account the shares outstanding as of October 31, 2021 and the issuance of 25,468,644 additional common shares against no consideration to our existing shareholders immediately prior to pricing of this offering. The percentage of shares beneficially owned on an adjusted basis after this offering is based on 72,081,903 shares to be outstanding after this offering after giving effect to completion of this offering assuming no exercise of the underwriters' option to purchase additional common shares from us, and 73,581,903 shares to be outstanding after this offering after giving effect to completion of this offering and assuming full exercise of the underwriters' option to purchase additional common shares from us. There are no shares that a person has the right to acquire within 60 days of completion of the offering. Unless otherwise indicated below, the address for each beneficial owner listed is c/o Sono Group N.V., Waldmeisterstraße 76, 80935 Munich, Germany.

	Shares beneficially owned before this offering and conversion of the mandatory convertible senior notes				Common shares beneficially owned after this offering and conversion of the mandatory convertible senior notes				High voting shares beneficially owned after this offering and conversion of the mandatory convertible senior notes				% of total voting power

- (1) Indicates number of outstanding high voting shares. All outstanding high voting shares are held by Laurin Hahn and Jona Christians.
- (2) Percentage reflects the relation of the relevant number of high voting shares to the total number of high voting shares outstanding.
- (3) Includes 3,779,100 common shares held by eVentures TNS GmbH and 150,480 common shares held by Felunic KG. Marita Hansen controls the voting and investment decisions of eVentures TNS GmbH and Felunic KG. The address of Marita Hansen, eVentures TNS GmbH and Felunic Vermögensverwaltungs KG is Panoramastrasse 9, 82266 Inning am Ammersee, Germany.
- (4) Includes 3,443,940 common shares held by Matthias Willenbacher and 1,031,130 common shares held by Wi Venture Sono GmbH & Co. KG. Matthias Willenbacher controls the voting and investment decisions of Wi Venture Management GmbH, the general partner of Wi Venture Sono GmbH & Co. KG. The address of Matthias Willenbacher, Wi Venture Management GmbH and Wi Venture Sono GmbH & Co. KG is Schneebergerhof 14, 67813 Gerbach.
- (5) Laurin Hahn and Jona Christians, together with Navina Pernsteiner, gave profit participation rights originally associated with their shares in Sono Motors GmbH and now, after our corporate reorganization, equivalent to 18,399,456, 16,556,510 and 1,839,946 common shares in Sono Group N.V., respectively, to a "community pool" as further described under "Management's Discussion and Analysis of Financial Condition and Results of Operations—Significant Accounting Judgments, Estimates and Assumptions—Sono Points."
- (6) Torsten Kiedel joined Sono Motors on February 1, 2020 and will become a member of our management board immediately prior to the pricing of this offering.
- (7) Thomas Hausch joined Sono Motors on June 13, 2018 and will become a member of our management board immediately prior to the pricing of this offering.
- (8) Markus Volmer joined Sono Motors on February 1, 2021 and will become a member of our management board immediately prior to the pricing of this offering.

As of September 30, 2021, no common shares were held by U.S. record holders.

Following the completion of this offering, each holder of our common shares is entitled to one vote per common share and each holder of our high voting shares is entitled to 25 votes per high voting share. We are not aware of any arrangement that may, at a subsequent date, result in a change of control of our Company.

RELATED PARTY TRANSACTIONS

RELATED PARTY TRANSACTIONS

The following is a description of related party transactions in excess of \$120,000 we have entered into since January 1, 2018, with any members of our management or supervisory board, executive officers, nominees or holders of more than 5% of any class of our voting securities.

Relationships with Members of the Management Board and the Supervisory Board

Our management board members are expected to enter into service agreements with us as discussed in more detail within the “Service Agreements” section above.

Relationships with Other Related Parties

Some of the key management personnel do participate in the employee participation program. For details on this program, please refer to notes 5.10 Share-based payment and 10.3 Remuneration based on shares (share-based payment) to our consolidated financial statements included in this prospectus.

In February 2019, Sono Motors GmbH as borrower and Sono Motors Investment UG, an affiliate of Laurin Hahn and Jona Christians, as lender entered into a loan agreement for an aggregate loan amount of €185 thousand and a term until December 31, 2020. The loan bears interest at a fixed interest rate of 4% per annum. The loan amount and any outstanding interest thereon have been repaid in January 2021.

In August 2019, Sono Motors GmbH as borrower and each of eVenture TNS GmbH, ELFH Holding GmbH & Co. KG, two of our shareholders, and wiwi consult GmbH & Co. KG as lender entered into a loan agreement for an aggregate loan amount of €2.5 million, a fixed interest rate of 12% per annum and a term until August 31, 2021. In connection with this loan agreement, Sono Motors GmbH provided certain of its intellectual property rights as collateral to the lenders based on a separate pledge agreement. In December 2020, in connection with a financing round conducted at that time, Sono Motors GmbH and the lenders entered into a settlement agreement pursuant to which, among others, the outstanding loan amounts were redeemed and repaid and the pledged intellectual property rights fully released to Sono Motors GmbH.

In January 2020, Sono Motors GmbH as borrower and Wi Venture GmbH und Co. KG, an affiliate of our shareholder Matthias Willenbacher, as lender entered into a loan agreement for an aggregate loan amount of €10.0 million and a term until December 31, 2023. The loan amount can be drawn subject to the satisfaction of certain conditions. Any loan amount outstanding under the agreement bears interest at a fixed rate of 12% per annum and can generally be repaid at any time, in full or in part, before the expiration of the agreement’s term. The loan agreement grants Wi Venture GmbH und Co. KG the right to convert any outstanding loan amount or interest payment under the agreement into shares in Sono Motors GmbH based on a 25% discount on the relevant pre-money valuation, if Sono Motors GmbH implements a capital increase before the repayment of any and all outstanding payment claims of Wi Venture GmbH und Co. KG under the loan agreement. We have not yet drawn any amount under the loan agreement.

Our shareholder Matthias Willenbacher has placed 30 reservations for our vehicles with net advance payments amounting to a total of €0.1 million.

DESCRIPTION OF SHARE CAPITAL AND ARTICLES OF ASSOCIATION

DESCRIPTION OF SHARE CAPITAL AND ARTICLES OF ASSOCIATION

General

We were incorporated pursuant to the laws of The Netherlands as Sono Motors Finance B.V. on October 23, 2020 as a wholly-owned subsidiary of Sono Motors GmbH. As part of the corporate reorganization that was completed on November 27, 2020, our then-existing shareholders contributed all of their shares in Sono Motors GmbH to Sono Motors Finance B.V. in exchange for newly issued common shares of Sono Motors Finance B.V. In addition, the sole issued and outstanding common share in Sono Motors Finance B.V. at that time, which was held by Sono Motors GmbH, was cancelled (*ingetrokken*). As a result, Sono Motors GmbH became a wholly-owned subsidiary of Sono Motors Finance B.V. and the then-existing shareholders of Sono Motors GmbH became the shareholders of Sono Motors Finance B.V. Also on November 27, 2020, Sono Motors Finance B.V. was converted into a public company with limited liability under Dutch law (*naamloze vennootschap*), and changed its legal name from Sono Motors Finance B.V. to Sono Group N.V. A portion of the newly issued common shares of Sono Group N.V. was also converted into high voting shares in the share capital of Sono Group N.V. As of completion of the corporate reorganization, the shareholders of Sono Group N.V. held an aggregate of 31,068,000 common shares of Sono Group N.V.

Our affairs are governed by the provisions of our articles of association and internal rules, regulations and policies, as amended and restated from time to time, and by the provisions of applicable Dutch law.

We are registered with the Trade Register of the Chamber of Commerce (*Kamer van Koophandel*) under number 80683568. Our corporate seat is in Amsterdam, the Netherlands, and our registered office is in Munich, Germany.

The following is a summary of material information concerning our share capital and our articles of association as they will read upon the closing of this offering. The summaries of our articles of association as set forth herein are qualified in their entirety by reference to the full text of our articles of association. This summary does not constitute legal advice regarding those matters and should not be regarded as such.

Share Capital

As of the date of this prospectus and assuming the issuance of 25,468,644 additional common shares against no consideration to our existing shareholders immediately prior to pricing of this offering, we have a subscribed capital in the amount of €8,000,398.62 which is divided into 58,339,977 common shares, each with a nominal value of €0.06 and 3,000,000 high voting shares, each with a nominal value of €1.50.

Under Dutch law, our authorized share capital is the maximum capital that we may issue without amending our articles of association. An amendment of our articles of association would require a resolution of the general meeting upon proposal by the management board with the approval of the supervisory board. As of the execution of our deed of conversion and amendment as part of the corporate reorganization, our authorized share capital amounts to € 25,200,000, divided into 320,000,000 common shares, each with a nominal value of €0.06, and 4,000,000 high voting shares, each with a nominal value of €1.50. Upon an increase of our issued share capital to at least € 25,000,000, our authorized share capital will automatically increase to € 102,000,000, divided into 1,500,000,000 common shares, each with a nominal value of €0.06, and 8,000,000 high voting shares, each with a nominal value of €1.50.

Our high voting shares carry the same economic rights entitlements as our common shares. The high voting shares carry different voting rights than the common shares, proportionate to the respective nominal value: for each high voting share, 25 votes can be exercised in the general meeting, whereas for each common share one vote can be exercised in the general meeting. As a matter of Dutch law, preemptive rights for the holders of our common shares and our high voting shares are linked to the nominal value of their shares, which implies that each high voting share carries a preemptive right representing 25 times the preemptive right attached to each common share. Pursuant to our articles of association, each holder of high voting shares can convert any number of high voting shares held by a shareholder into common shares as described below. A holder of common shares cannot convert its common shares into high voting shares under our articles of association.

Upon receipt of a request for conversion of high voting shares into common shares, the management board shall resolve to convert the relevant number of high voting shares into common shares in a 1:25 ratio. A management board member who holds high voting shares that are the subject of the conversion request may generally participate in the decision making process of the management board and is only precluded therefrom, if the personal interests of such management board member in such decision conflict, directly or indirectly, with the interests of the Company and its business. The supervisory board shall resolve on the conversion request, if all management board members are precluded from the decision making process concerning a conversion request due to such conflicts of interest. Promptly following a conversion, the holder of high voting shares that made the conversion request shall be obligated to transfer 24 out of every 25 common shares so received to us for no consideration, which will be canceled afterwards with the effect of a 1:1 conversion ratio. The conversion mechanism is structured in this manner in order to avoid a two-month waiting period which would be required under Dutch law if high voting shares were converted into common shares of an actual 1:1 ratio. Neither the management board nor the Company is required to effect a conversion of high voting shares (a) if the conversion request does not comply with the specifications and requirements set out in our articles of association or if the management board reasonably believes that the information included in such request is incorrect or incomplete or (b) to the extent that we would not be permitted under mandatory Dutch law to acquire the relevant number of common shares in connection with such conversion.

We have applied to list our common shares on Nasdaq under the symbol “SEV.”

Initial settlement of our common shares issued in this offering will take place on the closing date of this offering through The Depository Trust Company, or DTC, in accordance with its customary settlement procedures for equity securities. Each person owning common shares held through DTC must rely on the procedures thereof and on institutions that have accounts therewith to exercise any rights of a holder of the common shares.

Upon the closing of this offering, our articles of association will provide that, for as long as any of our common shares are admitted to trading on Nasdaq, the New York Stock Exchange or on any other regulated stock exchange operating in the United States, the laws of the State of New York shall apply to the property law aspects of the common shares reflected in the register administered by our transfer agent and New York State law will determine, for example, how our common shares are transferred or encumbered. However, certain other aspects relating to our common shares remain subject to Dutch law and Dutch law will continue to determine, for example, how new shares are issued.

Common Shares

The following summarizes the main rights of holders of our common shares:

- each holder of common shares is entitled to one vote per share on all matters to be voted on by shareholders generally, including the appointment of management board members and supervisory board members;
- there are no cumulative voting rights (but our high voting shares do carry 25 votes each, compared to one vote each per common share);
- the holders of our common shares are entitled to dividends and other distributions as may be declared from time to time by us out of funds legally available for that purpose, if any;
- upon our liquidation, dissolution or winding-up, the holders of common shares will be entitled to share ratably in the distribution of all of our assets remaining available for distribution after satisfaction of all our liabilities; and
- the holders of common shares have preemptive rights in case of share issuances or the grant or rights to subscribe for shares, except if such rights are limited or excluded by the corporate body authorized to do so and except in such cases as provided by Dutch law and our articles of association.

Shareholders' Register

Pursuant to Dutch law and our articles of association, we must keep our shareholders' register accurate and current. The management board keeps our shareholders' register and records names and

addresses of all holders of registered shares, showing the date on which the shares were acquired, the date of the acknowledgement by or notification of us as well as the amount paid on each share. The register also includes the names and addresses of those with a right of usufruct (*vruchtgebruik*) on registered shares belonging to another or a pledge (*pandrecht*) in respect of such shares. The common shares offered in this offering will be held through DTC, therefore DTC or its nominee will be recorded in the shareholders' register as the holder of those common shares. All shares are in registered form (*op naam*), provided that our management board may resolve that one or more common shares are in bearer form (*aan toonder*) if certain requirements are met. We may issue share certificates (*aandeelbewijzen*) for registered shares in such form as may be approved by our management board.

Corporate Objectives

Pursuant to our articles of association, our main corporate objectives are:

- the design, development, manufacturing and production of electric vehicles, including with solar integration technology;
- the design, development, manufacturing, production and licensing of solar panels for mobility applications and consumer products;
- the design, development, licensing and operation of software-based mobility services;
- to develop electronic applications;
- to incorporate, to participate in, to finance, to hold any other interest in and to conduct the management or supervision of other entities, companies, partnerships and businesses;
- to acquire, to manage, to invest, to exploit, to encumber and to dispose of assets and liabilities;
- to furnish guarantees, to provide security, to warrant performance in any other way and to assume liability, whether jointly and severally or otherwise, in respect of obligations of group companies or other parties; and
- to do anything which, in the widest sense, is connected with or may be conducive to the objects described above.

Environment

As described in article 4 of our articles of association, the planet, humankind and society are important stakeholders of us and the highest principle pursued by us as part of our objects is the protection of the environment, nature and humankind. This principle shall form the foundation of the actions of our Company and the decisions of our management board and supervisory board. On the basis of that premise:

- our management board shall monitor for and, to the extent possible and practicable, is expected to favor environmentally friendly alternatives for existing operations of the Company and its subsidiaries, in particular if those alternatives are more efficient in terms of resource consumption;
- additional costs or other increased expenditures shall not constitute a decisive factor when deciding whether or not to pursue an environmentally superior alternative for existing operations of the Company and its subsidiaries;
- products designed, developed, manufactured or produced by the Company and its subsidiaries should be durable, recyclable and sustainable; and
- our management board and supervisory board may let the interests of the planet, humankind and society outweigh the interests of other stakeholders, provided that the interests of the latter stakeholders are not unnecessarily or disproportionately harmed.

A management board member or supervisory board member who repeatedly and consistently violates these principles shall be considered to have breached his or her statutory duty to act in the best interests of the company and its business.

A resolution to amend the text or purport of these provisions of our articles of association shall require a unanimous vote in a general meeting where the entire issued share capital is represented.

Limitations on the Rights to Own Securities

Our common shares may be issued to individuals, corporations, trusts, estates of deceased individuals, partnerships and unincorporated associations of persons. Our articles of association contain no limitation on the rights to own our shares and no limitation on the rights of nonresidents of The Netherlands or foreign shareholders to hold or exercise voting rights.

Limitation on Liability and Indemnification Matters

Under Dutch law, management board members and supervisory board members may be held liable for damages in the event of improper or negligent performance of their duties. They may be held jointly and severally liable for damages to the company and to third parties for infringement of the articles of association or of certain provisions of Dutch law. In certain circumstances, they may also incur additional specific civil and criminal liabilities. Subject to certain exceptions, our articles of association provide for indemnification of our current and former management board members and supervisory board members (and other current and former officers and employees as designated by our management board, subject to approval by our supervisory board). No indemnification shall be given to an indemnified person:

- (a) if a competent court or arbitral tribunal has established, without having (or no longer having) the possibility for appeal, that the acts or omissions of such indemnified person that led to the financial losses, damages, expenses, suit, claim, action or legal proceedings as described above are of an unlawful nature (including acts or omissions which are considered to constitute malice, gross negligence, intentional recklessness and/or serious culpability attributable to such indemnified person);
- (b) to the extent that his or her financial losses, damages and expenses are covered under insurance and the relevant insurer has settled, or has provided reimbursement for, these financial losses, damages and expenses (or has irrevocably undertaken to do so);
- (c) in relation to proceedings brought by such indemnified person against the company, except for proceedings brought to enforce indemnification to which he is entitled pursuant to our articles of association, pursuant to an agreement between such indemnified person and the company which has been approved by the management board or pursuant to insurance taken out by the company for the benefit of such indemnified person; and
- (d) for any financial losses, damages or expenses incurred in connection with a settlement of any proceedings effected without the company's prior consent.

Under our articles of association, our management board may stipulate additional terms, conditions and restrictions in relation to the indemnification described above.

Shareholders' Meeting

General meetings may be held in Amsterdam, Arnhem, Assen, The Hague, Haarlem, 's-Hertogenbosch, Groningen, Leeuwarden, Lelystad, Maastricht, Middelburg, Rotterdam, Schiphol (Haarlemmermeer), Utrecht or Zwolle, all in The Netherlands. The annual general meeting must be held within six months of the end of each financial year. Additional extraordinary general meetings may also be held whenever considered appropriate by our management board or the supervisory board and shall be held within three months after our management board has considered it to be likely that our equity has decreased to an amount equal to or lower than half of its paid-in and called-up share capital, in order to discuss the measures to be taken if so required.

Pursuant to Dutch law, one or more shareholders or others with meeting rights under Dutch law that jointly represent at least one-tenth of the issued share capital may request us to convene a general meeting, setting out in detail the matters to be discussed. If we have not taken the steps necessary to ensure that such meeting can be held within six weeks after the request, the requesting party/parties may, on their application, be authorized by the competent Dutch court in preliminary relief proceedings to convene a general meeting. The court shall disallow the application if it does not appear that the applicants have previously requested our management board and our supervisory board to convene a general meeting and neither our management

board nor our supervisory board has taken the necessary steps so that the general meeting could be held within six weeks after the request.

General meetings must be convened by an announcement published in a Dutch daily newspaper with national distribution. The notice must state the agenda, the time and place of the meeting, the record date (if any), the procedure for participating in the general meeting by proxy, as well as other information as required by Dutch law. The notice must be given at least 15 days prior to the day of the meeting. The agenda for the annual general meeting shall include, among other things, the adoption of the annual accounts, appropriation of our profits and proposals relating to the composition of the management board and supervisory board, including the filling of any vacancies in such bodies. In addition, the agenda shall include such items as have been included therein by the management board or the supervisory board. The agenda shall also include such items requested by one or more shareholders, or others with meeting rights under Dutch law, representing at least 3% of the issued share capital. Requests must be made in writing or by electronic means and received by us at least 60 days before the day of the meeting. No resolutions shall be adopted on items other than those that have been included in the agenda.

In accordance with the DCGC and our articles of association, shareholders having the right to put an item on the agenda under the rules described above shall exercise such right only after consulting the management board in that respect. If one or more shareholders intend to request that an item be put on the agenda that may result in a change in the company's strategy (for example, the removal of management board members or supervisory board members), the management board must be given the opportunity to invoke a reasonable period to respond to such intention. Such period shall not exceed 180 days (or such other period as may be stipulated for such purpose by Dutch law and/or the DCGC from time to time). If invoked, the management board must use such response period for further deliberation and constructive consultation, in any event with the shareholders(s) concerned, and shall explore the alternatives. At the end of the response time, the management board shall report on this consultation and the exploration of alternatives to the general meeting. This shall be supervised by our supervisory board. The response period may be invoked only once for any given general meeting and shall not apply: (a) in respect of a matter for which a response period has been previously invoked; or (b) if a shareholder holds at least 75% of the Company's issued share capital as a consequence of a successful public bid. The response period may also be invoked in response to shareholders or others with meeting rights under Dutch law requesting that a general meeting be convened, as described above.

Moreover, our management board, with the approval of our supervisory board, can invoke a cooling-off period of up to 250 days when shareholders, using their right to have items added to the agenda for a general meeting or their right to request a general meeting, propose an agenda item for our general meeting to dismiss, suspend or appoint one or more managing directors or supervisory directors (or to amend any provision in our articles of association dealing with those matters) or when a public offer for our company is made or announced without our support, provided, in each case, that our management board believes that such proposal or offer materially conflicts with the interests of our company and its business. During a cooling-off period, our general meeting cannot dismiss, suspend or appoint managing directors and supervisory directors (or amend the provisions in our articles of association dealing with those matters) except at the proposal of our management board. During a cooling-off period, our management board must gather all relevant information necessary for a careful decision-making process and at least consult with shareholders representing 3% or more of our issued share capital at the time the cooling-off period was invoked, as well as with our Dutch works council (if we or, under certain circumstances, any of our subsidiaries would have one). Formal statements expressed by these stakeholders during such consultations must be published on our website to the extent these stakeholders have approved that publication. Ultimately one week following the last day of the cooling-off period, our management board must publish a report in respect of its policy and conduct of affairs during the cooling-off period on our website. This report must remain available for inspection by shareholders and others with meeting rights under Dutch law at our office and must be tabled for discussion at the next general meeting. Shareholders representing at least 3% of our issued share capital may request the Enterprise Chamber for early termination of the cooling-off period. The Enterprise Chamber must rule in favor of the request if the shareholders can demonstrate that:

- our management board, in light of the circumstances at hand when the cooling-off period was invoked, could not reasonably have concluded that the relevant proposal or hostile offer constituted a material conflict with the interests of our company and its business;

- our management board cannot reasonably believe that a continuation of the cooling-off period would contribute to careful policy-making; or
- other defensive measures, having the same purpose, nature and scope as the cooling-off period, have been activated during the cooling-off period and have not since been terminated or suspended within a reasonable period at the relevant shareholders' request (i.e., no 'stacking' of defensive measures).

The general meeting is presided over by the chairperson of the supervisory board. If no chairperson has been elected or if he or she is not present at the meeting, the general meeting shall be presided over by another supervisory board member present at the meeting. If no supervisory board member is present, the meeting shall be presided over by one of our CEOs. If no CEO has been elected or if they are not present at the meeting, the general meeting shall be presided over by another management board member present at the meeting. If no management board member is present at the meeting, the general meeting shall be presided over by any other person appointed by the general meeting. In each case, the person who should chair the general meeting pursuant to the rules described above may appoint another person to chair the general meeting instead. Management board members and supervisory board members may always attend a general meeting. In these meetings, they have an advisory vote. The chairperson of the meeting may decide at his or her discretion to admit other persons to the meeting.

All shareholders and others with meeting rights under Dutch law are authorized to attend the general meeting, to address the meeting and, insofar as they have such right, to vote *pro rata* to his or her shareholding. Shareholders may exercise these rights, if they are the holders of shares on the record date, if any, as required by Dutch law, which is currently the 28th day before the day of the general meeting. Under our articles of association, shareholders and others with meeting rights under Dutch law must notify us in writing or by electronic means of their identity and intention to attend the general meeting. This notice must be received by us ultimately on the seventh day prior to the general meeting, unless indicated otherwise when such meeting is convened.

Each common share confers the right on the holder to cast one vote at the general meeting and each high voting share confers the right on the holder to cast 25 votes at the general meeting. Shareholders may vote by proxy. No votes may be cast at a general meeting on shares held by us or our subsidiaries or on shares for which we or our subsidiaries hold depository receipts. Nonetheless, the holders of a right of usufruct (*vruchtgebruik*) and the holders of a right of pledge (*pandrecht*) in respect of shares held by us or our subsidiaries in our share capital are not excluded from the right to vote on such shares, if the right of usufruct (*vruchtgebruik*) or the right of pledge (*pandrecht*) was granted prior to the time such shares were acquired by us or any of our subsidiaries. Neither we nor any of our subsidiaries may cast votes in respect of a share on which we or such subsidiary holds a right of usufruct (*vruchtgebruik*) or a right of pledge (*pandrecht*). Shares which are not entitled to voting rights pursuant to the preceding sentences will not be taken into account for the purpose of determining the number of shareholders that vote and that are present or represented, or the amount of the share capital that is provided or that is represented at a general meeting.

Decisions of the general meeting are taken by a simple majority of votes cast, except where Dutch law or our articles of association provide for a qualified majority or unanimity. Upon completion of this offering, our articles of association will provide that, subject to any provision of mandatory Dutch law and any higher quorum requirement stipulated by our articles of association, if we become subject to a binding quorum requirement with respect to resolutions of our general meeting under applicable securities laws or listing rules, then such resolutions shall be subject to such quorum.

Management Board and Supervisory Board Members

Appointment of Management Board and Supervisory Board Member

Under our articles of association, each of Laurin Hahn and Jona Christians, two of our founders, as long as they hold, individually, at least 5% of our voting rights, can make a binding nomination for the appointment of one supervisory board member. These supervisory board members can only be appointed by the general meeting upon such binding nominations. In addition, under our articles of association, our management board members and our other supervisory board members are appointed by the general

meeting upon binding nomination by our supervisory board. However, the general meeting may at all times overrule the binding nomination by a resolution adopted by at least a two-thirds majority of the votes cast, provided such majority represents more than half of the issued share capital. If the general meeting overrules the binding nomination, the supervisory board, Laurin Hahn or Jona Christians, as applicable, shall make a new nomination.

Prior to the closing of this offering, our supervisory board shall adopt a diversity policy for the composition of our management board and our supervisory board, as well as a profile for the composition of the supervisory board. The supervisory board shall make any nomination for the appointment of a management board member or supervisory board member with due regard to the rules and principles set forth in such diversity policy and profile, as applicable.

At a general meeting, a resolution to appoint a management board member or supervisory board member can only be passed in respect of candidates whose names are stated for that purpose in the agenda of that general meeting or in the explanatory notes thereto.

Under Dutch law, when nominating a person for appointment or reappointment as a supervisory board member, the nomination must be supported by reasons (if it concerns a reappointment, past performance must be taken into consideration) and the following information about such person must be provided: (i) age and profession; (ii) the aggregate nominal value of the shares held in the company's capital; (iii) present and past positions, to the extent relevant for the performance of the tasks of a supervisory board member; and (iv) the name of each entity where such person already holds a position as supervisory board member or non-executive director (in case of multiple entities within the same group, the name of the group shall suffice).

Duties and Liabilities of Management Board and Supervisory Board Members

Under Dutch law, the management board is charged with the management of the company, subject to the restrictions contained in our articles of association, and the supervisory board is charged with the supervision of the policy of the management board and the general course of affairs of the company and of the business connected with it. The management board members may divide their tasks among themselves in or pursuant to the internal rules applicable to the management board. Each management board member and supervisory board member has a statutory duty to act in the corporate interest of the company and its business. Under Dutch law, the corporate interest extends to the interests of all corporate stakeholders, such as shareholders, creditors, employees, customers and suppliers. The duty to act in the corporate interest of the company also applies in the event of a proposed sale or break-up of the company, provided that the circumstances generally dictate how such duty is to be applied and how the respective interests of various groups of stakeholders should be weighed. Our articles of association stipulate that the planet, humankind and society are important stakeholders of us and the highest principle pursued by us as part of our objects is the protection of the environment, nature and humankind. Under our articles of association, this principle shall form the foundation of our actions and the decisions of our management board and the supervisory board. On the basis of that premise, among other matters, our management board and the supervisory board may let the interests of the planet, humankind and society outweigh the interests of other stakeholders, provided that the interests of the latter stakeholders are not unnecessarily or disproportionately harmed. Any resolution of the management board regarding a material change in our identity or character requires approval of the general meeting.

Our management board is entitled to represent the Company. The power to represent the Company also vests in any two management board members acting jointly.

Dividends and Other Distributions

Dividends

We may only make distributions, whether a distribution of profits or of freely distributable reserves, to our shareholders to the extent our shareholders' equity (*eigen vermogen*) exceeds the sum of the paid-in and called-up share capital plus any reserves required by Dutch law or by our articles of association. Under our articles of association, the management board may decide that all or part of the profits are carried to

reserves. After reservation by the management board of any profit, any remaining profit will be at the disposal of the general meeting for distribution, subject to restrictions of Dutch law and approval by our supervisory board.

We only make a distribution of dividends to our shareholders after the adoption of our annual accounts demonstrating that such distribution is legally permitted. The management board is permitted, subject to certain requirements, to declare interim dividends without the approval of the general meeting, but only with the approval of the supervisory board.

Dividends and other distributions shall be made payable not later than the date determined by the management board. Claims to dividends and other distributions not made within five years from the date that such dividends or distributions became payable will lapse and any such amounts will be considered to have been forfeited to us (*verjaring*).

Our current dividend policy is to retain all available funds and any future earnings to fund the completion of the development of the Sion and the start of its serial production as well as the further development and expansion of our business. If we were to revise this policy relating to a payment of future dividends, such revised policy would, subject to the restrictions described above, depend on many factors, such as our results of operations, financial condition, cash requirements, prospects and other factors deemed relevant by our management board and supervisory board. For more information, see “*Dividend Policy*” in this prospectus.

Exchange Controls

Under Dutch law, there are no exchange controls applicable to the transfer to persons outside of The Netherlands of dividends or other distributions with respect to, or of the proceeds from the sale of, shares of a Dutch company, albeit those transfers being subject to applicable restrictions under trade and economic sanctions and measures, including those concerning export control, pursuant to EU regulations, the Sanctions Act 1977 (*Sanctiewet 1977*) or other legislation, applicable anti-boycott regulations, applicable anti-money-laundering regulations and similar rules and provided that, under circumstances, such dividends or other distributions must be reported to the Dutch Central Bank for statistical purposes. There are no special restrictions in the articles of association or Dutch law that limit the right of shareholders who are not citizens or residents of The Netherlands to hold or vote shares.

Squeeze-Out Procedures

A shareholder who holds at least 95% of our issued share capital for its own account, alone or together with group companies, may initiate proceedings against the other shareholders jointly for the transfer of their shares to such shareholder. The proceedings are held before the Enterprise Chamber, and can be instituted by means of a writ of summons served upon each of the other shareholders in accordance with the provisions of the Dutch Code of Civil Procedure (*Wetboek van Burgerlijke Rechtsvordering*). The Enterprise Chamber may grant the claim for squeeze-out in relation to the other shareholders and will determine the price to be paid for the shares, if necessary, after appointment of one or three experts who will offer an opinion to the Enterprise Chamber on the value to be paid for the shares of the other shareholders. Once the order to transfer becomes final before the Enterprise Chamber, the person acquiring the shares shall give written notice of the date and place of payment and the price to the holders of the shares to be acquired whose addresses are known to it. Unless the addresses of all of them are known to the acquiring person, such a person is required to publish the same in a daily newspaper with a national circulation.

Dissolution and Liquidation

Under our articles of association, we may be dissolved by a resolution of the general meeting, subject to a proposal of the management board approved by our supervisory board. In the event of a dissolution, the liquidation shall be effected by the management board, under supervision of our supervisory board, unless the general meeting decides otherwise. During liquidation, the provisions of our articles of association will remain in force as far as possible. To the extent that any assets remain after payment of all debts, those remaining assets shall be distributed to our shareholders in proportion to their number of shares.

Dutch Corporate Governance Code

As a listed Dutch public company (*naamloze vennootschap*), we will be subject to the DCGC. The DCGC contains both principles and best practice provisions on corporate governance that regulate relations between the management board, the supervisory board and the general meeting and matters in respect of financial reporting, auditors, disclosure, compliance and enforcement standards. The DCGC is based on a “comply or explain” principle. Accordingly, companies are required to disclose in their statutory annual reports, filed in The Netherlands, whether they comply with the provisions of the DCGC. If they do not comply with these provisions (for example, because of a conflicting Nasdaq requirement), the company is required to give the reasons for such non-compliance. See “*Risk Factors—Risk Related to our Initial Public Offering and Our Common Shares—We are not obligated to, and do not, comply with all best practice provisions of the Dutch Corporate Governance Code.*”

We do not comply with all principles and best practice provisions of the DCGC. As of the date of this prospectus, our main deviations from the DCGC are summarized below, but cannot exclude the possibility of deviating from additional provisions of the DCGC after the date hereof, including in order to follow market practice or governance practices in the United States.

Under our articles of association, management board members and supervisory board members are to be appointed on the basis of a binding nomination prepared by the supervisory board or certain of our shareholders. This means that the nominee will be appointed, unless the general meeting removes the binding nature of the nomination (in which case a new nomination will be prepared for a subsequent general meeting). Our articles of association provide that the general meeting can only pass such resolution by a two-thirds majority representing more than half of the issued share capital. However, the DCGC recommends that the general meeting can pass such a resolution by simple majority, representing no more than one-third of the issued share capital.

Under our articles of association, management board members and supervisory board members can only be dismissed by the general meeting by simple majority, provided that the supervisory board proposes the dismissal. In other cases, the general meeting can only pass such resolution by a two-thirds majority representing more than half of the issued share capital. The DCGC recommends that the general meeting can pass a resolution to dismiss a management board member or a supervisory board member by simple majority, representing no more than one-third of the issued share capital.

The DCGC recommends against providing equity awards as part of the compensation of a supervisory board member. However, we may deviate from this recommendation and grant equity awards to our supervisory board members, consistent with U.S. market practice.

Our long-term incentive plan allows us to set the terms and conditions of equity awards granted thereunder. Under that plan, we may grant shares that are not subject to a lock-up period of at least five years after the date of grant, and we may grant options without restricting the exercisability of those options during the first three years after the date of grant. In those cases, this would cause additional deviations from the DCGC.

Dutch Financial Reporting Supervision Act

On the basis of the Dutch Financial Reporting Supervision Act (*Wet toezicht financiële verslaggeving*), or the FRSA, the Dutch Authority for the Financial Markets (*Stichting Autoriteit Financiële Markten*), or AFM, supervises the application of financial reporting standards by Dutch companies whose securities are listed on a Dutch or foreign stock exchange.

Pursuant to the FRSA, the AFM has an independent right to (i) request an explanation from us regarding our application of the applicable financial reporting standards if, based on publicly known facts or circumstances, it has reason to doubt that the Company’s financial reporting meets such standards and (ii) recommend to us the making available of further explanations. If we do not comply with such a request or recommendation, the AFM may request that the Enterprise Chamber order us to (i) make available further explanations as recommended by the AFM, (ii) provide an explanation of the way we have applied the applicable financial reporting standards to our financial reports or (iii) prepare or restate our financial reports in accordance with the Enterprise Chamber’s orders.

Listing

We have applied to list the common shares on Nasdaq under the symbol “SEV.”

Transfer Agent and Registrar

Upon the closing of this offering, the transfer agent and registrar for the common shares will be American Stock and Transfer Company.

COMPARISON OF DUTCH CORPORATE LAW AND U.S. CORPORATE LAW

COMPARISON OF DUTCH CORPORATE LAW AND U.S. CORPORATE LAW

The following comparison between Dutch corporate law, which applies to us, and Delaware corporation law, the law under which many publicly listed corporations in the United States are incorporated, discusses additional matters not otherwise described in this prospectus. Although we believe this summary is materially accurate, the summary is subject to Dutch law, including Book 2 of the Dutch Civil Code and the DCGC and Delaware corporation law, including the Delaware General Corporation Law.

Corporate Governance

Duties of Managing and Supervisory Board Members

The Netherlands. We have a two-tier board structure consisting of our management board (*bestuur*) and a separate supervisory board (*raad van commissarissen*).

Under Dutch law, the management board is charged with the management of the company, subject to the restrictions contained in our articles of association, and the supervisory board is charged with the supervision of the policy of the management board and the general course of affairs of the company and of the business connected with it. The management board members may divide their tasks among themselves in or pursuant to the internal rules applicable to the management board. Each management board member and supervisory board member has a statutory duty to act in the corporate interest of the company and its business. Under Dutch law, the corporate interest extends to the interests of all corporate stakeholders, such as shareholders, creditors, employees, customers and suppliers. The duty to act in the corporate interest of the company also applies in the event of a proposed sale or break-up of the company, provided that the circumstances generally dictate how such duty is to be applied and how the respective interests of various groups of stakeholders should be weighed. Our articles of association stipulate that the planet, humankind and society are important stakeholders of us and the highest principle pursued by us as part of our objects is the protection of the environment, nature and humankind. Under our articles of association, this principle shall form the foundation of our actions and the decisions of our management board and the supervisory board. On the basis of that premise, among other matters, our management board and the supervisory board may let the interests of the planet, humankind and society outweigh the interests of other stakeholders, provided that the interests of the latter stakeholders are not unnecessarily or disproportionately harmed. Any resolution of the management board regarding a material change in our identity or character requires approval of the general meeting.

The approval of our supervisory board is required for certain resolutions of our management board, including concerning the following matters: the making of certain proposals to the general meeting; the issue of shares or the granting of rights to subscribe for shares; the limitation or exclusion of preemption rights; the acquisition of shares by us in our own capital; the drawing up or amendment of our management board rules; the performance of legal acts relating to non-cash contributions on shares; material changes to the identity or the character of the company or its business; the charging of amounts to be paid up on shares against the company's reserves; the making of an interim distribution; and such other resolutions as the supervisory board shall have specified in a resolution to that effect and notified to the management board. The absence of the approval of the supervisory board shall result in the relevant resolution being null and void but shall not affect the powers of representation of the management board or of the management board members.

Our management board is entitled to represent the Company. The power to represent the Company also vests in any two management board members acting jointly.

Delaware. The board of directors bears the ultimate responsibility for managing the business and affairs of a corporation. In discharging this function, directors of a Delaware corporation owe fiduciary duties of care and loyalty to the corporation and to its stockholders. Delaware courts have decided that the directors of a Delaware corporation are required to exercise informed business judgment in the performance of their duties. Informed business judgment means that the directors have informed themselves of all material information reasonably available to them. Delaware courts have also imposed a heightened standard of conduct upon directors of a Delaware corporation who take any action designed to defeat a threatened change in control of the corporation. In addition, under Delaware law, when the board of directors of a

Delaware corporation approves the sale or break-up of a corporation, the board of directors may, in certain circumstances, have a duty to obtain the highest value reasonably available to the stockholders.

Director Terms

The Netherlands. The DCGC provides the following best practice recommendations on the terms for tenure of management board members and supervisory board members:

- Management board members should be appointed for a maximum period of four years, without limiting the number of consecutive terms management board members may serve.
- Supervisory board members should be appointed for two consecutive periods of no more than four years. Thereafter, supervisory board members may be reappointed for a maximum of two consecutive periods of no more than two years, provided that the reasons for any reappointment after an eight-year term of office should be disclosed in the company's annual report.

The general meeting shall at all times be entitled to suspend or dismiss a management board member or supervisory board member. Under our articles of association, the general meeting may only adopt a resolution to suspend or dismiss such director by at least a two-thirds majority of the votes cast, provided that such majority represents more than half of the issued share capital, unless the resolution is passed at the proposal of the supervisory board, in which case a simple majority of the votes cast is sufficient. In addition, the supervisory board may at any time suspend a management board member. A suspension by the supervisory board can at any time be lifted by the general meeting. If a management board member is suspended and the general meeting does not resolve to dismiss him or her within three months from the date of such suspension, the suspension shall lapse.

Delaware. The Delaware General Corporation Law generally provides for a one-year term for directors, but permits directorships to be divided into up to three classes with up to three-year terms, with the years for each class expiring in different years, if permitted by the certificate of incorporation, an initial bylaw or a bylaw adopted by the stockholders. A director elected to serve a term on a "classified" board may not be removed by stockholders without cause. There is no limit in the number of terms a director may serve.

Director Vacancies

The Netherlands. Our management board can temporarily fill vacancies in its midst caused by temporary absence or incapacity of management board members without requiring a shareholder vote. If all of our management board members are absent or incapacitated, our management shall be attributed to the supervisory board. The person charged with our management in this manner may designate one or more persons to be charged with our management instead of, or together with, such person(s). Our supervisory board can also temporarily fill vacancies in its midst caused by temporary absence or incapacity of supervisory board members without a shareholder vote. If all of our supervisory board members are absent or incapacitated, the supervision of our Company shall be attributed to the person who most recently ceased to hold office as the chairperson of our supervisory board, provided that such person is willing and able to accept such position, who may designate one or more other persons to be charged with the supervision of the Company, instead of, or together with, such former chairperson. The person charged with the supervision of the Company pursuant to this provision shall cease to hold that position when the general meeting has appointed one or more persons as supervisory board members.

Under Dutch law, management board members and supervisory board members are appointed and reappointed by the general meeting. Under our articles of association, each of Laurin Hahn and Jona Christians, two of our founders, as long as he holds at least 5% of our voting rights, can make a binding nomination for the appointment of one supervisory board member. These supervisory board members can only be appointed by the general meeting upon such binding nominations. In addition, under our articles of association, our management board members and our other supervisory board members are appointed by the general meeting upon binding nomination by our supervisory board. However, the general meeting may at all times overrule the binding nomination by a resolution adopted by at least a two-thirds majority of the votes cast, provided such majority represents more than half of the issued share capital. If the general

meeting overrules the binding nomination, the supervisory board, Laurin Hahn or Jona Christians, as applicable, shall make a new nomination.

Prior to the closing of this offering, our supervisory board shall adopt a diversity policy for the composition of our management board and our supervisory board, as well as a profile for the composition of the supervisory board. The supervisory board shall make any nomination for the appointment of a management board member or supervisory board member with due regard to the rules and principles set forth in such diversity policy and profile, as applicable.

Under Dutch law, when nominating a person for appointment or reappointment as a supervisory board member, the nomination must be supported by reasons (if it concerns a reappointment, past performance must be taken into consideration) and the following information about such person must be provided: (i) age and profession; (ii) the aggregate nominal value of the shares held in the company's capital; (iii) present and past positions, to the extent relevant for the performance of the tasks of a supervisory board member; and (iv) the name of each entity where such person already holds a position as supervisory board member or non-executive director (in case of multiple entities within the same group, the name of the group shall suffice).

Delaware. The Delaware General Corporation Law provides that vacancies and newly created directorships may be filled by a majority of the directors then in office (even though less than a quorum) unless (i) otherwise provided in the certificate of incorporation or bylaws of the corporation or (ii) the certificate of incorporation directs that a particular class of stock is to elect such director, in which case any other directors elected by such class, or a sole remaining director elected by such class, will fill such vacancy.

Conflict-of-Interest Transactions

The Netherlands. Under Dutch law and our articles of association, our management board members and supervisory board members shall not take part in any discussion or decision-making that involves a subject or transaction in relation to which he or she has a direct or indirect personal conflict of interest with us. Such a conflict of interest would generally arise if the management board member or supervisory board member concerned is unable to serve our interests and the business connected with it with the required level of integrity and objectivity due to the existence of the conflicting personal interest. Our articles of association provide that if as a result of conflicts of interests no resolution of the management board can be adopted, the resolution shall be passed by the supervisory board and that, if as a result of conflicts of interests no resolution of the supervisory board can be adopted, the resolution may nonetheless be adopted by the supervisory board as if none of the supervisory board members had a conflict of interest. In that case, each supervisory board member is entitled to participate in the discussion and decision-making process and to cast a vote.

The DCGC provides the following best practice recommendations in relation to conflicts of interests in respect of management board members or supervisory board members:

- A management board member should report any potential conflict of interest in a transaction that is of material significance to the company and/or to such person to the chairperson of the supervisory board and to the other members of the management board without delay. The management board member should provide all relevant information in that regard, including the information relevant to the situation concerning his or her spouse, registered partner or other life companion, foster child and relatives by blood or marriage up to the second degree.
- A supervisory board member should report any conflict of interest or potential conflict of interest in a transaction that is of material significance to the company and/or to such person to the chairperson of the supervisory board without delay and should provide all relevant information in that regard, including the relevant information pertaining to his or her spouse, registered partner or other life companion, foster child and relatives by blood or marriage up to the second degree. If the chairperson of the supervisory board has a conflict of interest or potential conflict of interest, he or she should report this to the vice-chairperson of the supervisory board without delay.
- The supervisory board should decide, outside the presence of the management board member or supervisory board member concerned, whether there is a conflict of interest.

- All transactions in which there are conflicts of interest with management board members or supervisory board members should be agreed on terms that are customary in the market.
- Decisions to enter into transactions in which there are conflicts of interest with management board members or supervisory board members that are of material significance to the company and/or to the relevant management board members or supervisory board members should require the approval of the supervisory board. Such transactions should be published in the annual report, together with a description of the conflict of interest and a declaration that the relevant best practice provisions of the DCGC have been complied with.

Delaware. The Delaware General Corporation Law generally permits transactions involving a Delaware corporation and an interested director of that corporation if:

- the material facts as to the director's relationship or interest are disclosed and a majority of disinterested directors consent;
- the material facts are disclosed as to the director's relationship or interest and a majority of shares entitled to vote thereon consent; or
- the transaction is fair to the corporation at the time it is authorized by the board of directors, a committee of the board of directors or the stockholders.

Proxy Voting by Directors

The Netherlands. An absent management board member may issue a proxy for a specific management board meeting but only to another management board member in writing or by electronic means. An absent supervisory board member may issue a proxy for a specific supervisory board meeting but only to another supervisory board member in writing or by electronic means.

Delaware. A director of a Delaware corporation may not issue a proxy representing the director's voting rights as a director.

Shareholder Rights

Voting Rights

The Netherlands. In accordance with Dutch law and our articles of association, each issued common share confers the right to cast one vote at the general meeting and each issued high voting share confers the right to cast 25 votes at the general meeting. No votes may be cast on shares that are held by us or our direct or indirect subsidiaries or on shares for which we or our subsidiaries hold depository receipts. Nonetheless, the holders of a right of usufruct (*vruchtgebruik*) and the holders of a right of pledge (*pandrecht*) in respect of shares held by us or our subsidiaries in our share capital are not excluded from the right to vote on such shares, if the right of usufruct (*vruchtgebruik*) or the right of pledge (*pandrecht*) was granted prior to the time such shares were acquired by us or any of our subsidiaries. Neither we nor any of our subsidiaries may cast votes in respect of a share on which we or such subsidiary holds a right of usufruct (*vruchtgebruik*) or a right of pledge (*pandrecht*).

In accordance with our articles of association, for each general meeting, the management board may determine that a record date will be applied in order to establish which shareholders are entitled to attend and vote at the general meeting. Such record date shall be the 28th day prior to the day of the general meeting. The record date and the manner in which shareholders can register and exercise their rights will be set out in the notice of the meeting which must be published in a Dutch daily newspaper with national distribution at least 15 days prior to the meeting (and such notice may therefore be published after the record date for such meeting). Under our articles of association, shareholders and others with meeting rights under Dutch law must notify us in writing or by electronic means of their identity and intention to attend the general meeting. This notice must be received by us ultimately on the seventh day prior to the general meeting, unless indicated otherwise when such meeting is convened.

Delaware. Under the Delaware General Corporation Law, each stockholder is entitled to one vote per share of stock, unless the certificate of incorporation provides otherwise. In addition, the certificate of

incorporation may provide for cumulative voting at all elections of directors of the corporation, or at elections held under specified circumstances. Either the certificate of incorporation or the bylaws may specify the number of shares and/or the amount of other securities that must be represented at a meeting in order to constitute a quorum, but in no event will a quorum consist of less than one-third of the shares entitled to vote at a meeting.

Stockholders as of the record date for the meeting are entitled to vote at the meeting, and the board of directors may fix a record date that is no more than 60 nor less than 10 days before the date of the meeting, and if no record date is set then the record date is the close of business on the day next preceding the day on which notice is given, or if notice is waived then the record date is the close of business on the day next preceding the day on which the meeting is held. The determination of the stockholders of record entitled to notice or to vote at a meeting of stockholders shall apply to any adjournment of the meeting, but the board of directors may fix a new record date for the adjourned meeting.

Shareholder Proposals

The Netherlands. Pursuant to our articles of association, extraordinary general meetings will be held whenever required under Dutch law or whenever our management board or supervisory board deems such to be appropriate or necessary. Pursuant to Dutch law, one or more shareholders or others with meeting rights under Dutch law representing at least one-tenth of the issued share capital may request us to convene a general meeting, setting out in detail the matters to be discussed. If we have not taken the steps necessary to ensure that such a meeting can be held within six weeks after the request, the requesting party or parties may, on their application, be authorized by the competent Dutch court in preliminary relief proceedings to convene a general meeting.

Also, the agenda for a general meeting shall include such items requested by one or more shareholders, and others entitled to attend general meetings, representing at least 3% of the issued share capital, except where the articles of association state a lower percentage. Our articles of association do not state such lower percentage. Requests must be made in writing or by electronic means and received by us at least 60 days before the day of the meeting.

In accordance with the DCGC, shareholders who have the right to put an item on the agenda for our general meeting or to request the convening of a general meeting shall not exercise such rights until after they have consulted our management board. If exercising such rights may result in a change in our strategy (for example, through the dismissal of one or more of our managing directors or supervisory directors), our management board must be given the opportunity to invoke a reasonable period of up to 180 days to respond to the shareholders' intentions. If invoked, our management board must use such response period for further deliberation and constructive consultation, in any event with the shareholder(s) concerned and exploring alternatives. At the end of the response time, our management board, supervised by our supervisory board, shall report on this consultation and the exploration of alternatives to our general meeting. The response period may be invoked only once for any given general meeting and shall not apply (i) in respect of a matter for which a response period has been previously invoked or (ii) if a shareholder holds at least 75% of our issued share capital as a consequence of a successful public bid.

Moreover, our management board, with the approval of our supervisory board, can invoke a cooling-off period of up to 250 days when shareholders, using their right to have items added to the agenda for a general meeting or their right to request a general meeting, propose an agenda item for our general meeting to dismiss, suspend or appoint one or more managing directors or supervisory directors (or to amend any provision in our articles of association dealing with those matters) or when a public offer for our company is made or announced without our support, provided, in each case, that our management board believes that such proposal or offer materially conflicts with the interests of our company and its business. During a cooling-off period, our general meeting cannot dismiss, suspend or appoint managing directors and supervisory directors (or amend the provisions in our articles of association dealing with those matters) except at the proposal of our management board. During a cooling-off period, our management board must gather all relevant information necessary for a careful decision-making process and at least consult with shareholders representing 3% or more of our issued share capital at the time the cooling-off period was invoked, as well as with our Dutch works council (if we or, under certain circumstances, any of our subsidiaries would have one). Formal statements expressed by these stakeholders during such consultations must be

published on our website to the extent these stakeholders have approved that publication. Ultimately one week following the last day of the cooling-off period, our management board must publish a report in respect of its policy and conduct of affairs during the cooling-off period on our website. This report must remain available for inspection by shareholders and others with meeting rights under Dutch law at our office and must be tabled for discussion at the next general meeting. Shareholders representing at least 3% of our issued share capital may request the Enterprise Chamber for early termination of the cooling-off period. The Enterprise Chamber must rule in favor of the request if the shareholders can demonstrate that:

- our management board, in light of the circumstances at hand when the cooling-off period was invoked, could not reasonably have concluded that the relevant proposal or hostile offer constituted a material conflict with the interests of our company and its business;
- our management board cannot reasonably believe that a continuation of the cooling-off period would contribute to careful policy-making; or
- other defensive measures, having the same purpose, nature and scope as the cooling-off period, have been activated during the cooling-off period and have not since been terminated or suspended within a reasonable period at the relevant shareholders' request (i.e., no 'stacking' of defensive measures).

Delaware. Delaware law does not specifically grant stockholders the right to bring business before an annual or special meeting. However, if a Delaware corporation is subject to the SEC's proxy rules, a stockholder who owns at least \$2,000 in market value, or 1% of the corporation's securities entitled to vote, may propose a matter for a vote at an annual or special meeting in accordance with those rules.

Action by Written Consent

The Netherlands. Under Dutch law, shareholders' resolutions may be adopted in writing without holding a meeting of shareholders, provided that (i) the articles of association allow such action by written consent, (ii) the company has not issued bearer shares or, with its cooperation, depository receipts for shares in its capital, and (iii) the resolution is adopted unanimously by all shareholders that are entitled to vote. Although our articles of association allow for shareholders' resolutions to be adopted in writing, the requirement of unanimity renders the adoption of shareholder resolutions without holding a meeting not feasible for us as a publicly traded company.

Delaware. Although permitted by Delaware law, publicly listed companies do not typically permit stockholders of a corporation to take action by written consent.

Appraisal Rights

The Netherlands. Subject to certain exceptions, Dutch law does not recognize the concept of appraisal or dissenters' rights. However, Dutch law does provide for squeeze-out procedures as described under "*Description of Share Capital and Articles of Association—Dividends and Other Distributions—Squeeze-Out Procedures.*" Also, Dutch law provides for cash exit rights in certain situations for dissenting shareholders of a company organized under Dutch law entering into certain types of mergers. In those situations, a dissenting shareholder may file a claim with the Dutch company for compensation. Such compensation shall then be determined by one or more independent experts. The shares of such a shareholder that are subject to such claim will cease to exist as of the moment of entry into effect of the merger.

Delaware. The Delaware General Corporation Law provides for stockholder appraisal rights, or the right to demand payment in cash of the judicially determined fair value of the stockholder's shares, in connection with certain mergers and consolidations.

Shareholder Suits

The Netherlands. In the event a third party is liable to a Dutch company, only the company itself can bring a civil action against that party. The individual shareholders do not have the right to bring an action on behalf of the company. Only in the event that the cause for the liability of a third party to the company also constitutes a tortious act directly against a shareholder does that shareholder have an individual right of action against such third party in its own name. Dutch law provides for the possibility to initiate such actions

collectively, in which a foundation or an association can act as a class representative and has standing to commence proceedings and claim damages if certain criteria are met. The court will first determine if those criteria are met. If so, the case will go forward as a class action on the merits after a period allowing class members to opt out from the case has lapsed. All members of the class who are residents of The Netherlands and who did not opt out will be bound to the outcome of the case. Residents of other countries must actively opt in in order to be able to benefit from the class action. The defendant is not required to file defenses on the merits prior to the merits phase having commenced. It is possible for the parties to reach a settlement during the merits phase. Such a settlement can be approved by the court, which approval will then bind the members of the class, subject to a second opt-out. This new regime applies to claims brought after January 1, 2020 and which relate to certain events that occurred prior to that date. For other matters, the old Dutch class actions regime will apply. Under the old regime, no monetary damages can be sought. Also, a judgment rendered under the old regime will not bind individual class members. Even though Dutch law does not provide for derivative suits, directors and officers can still be subject to liability under U.S. securities laws.

Under our articles of association as they will read upon the completion of this offering, except as otherwise approved by our management board, the sole and exclusive forum for any complaint asserting a cause of action arising under the Securities Act, as amended, to the fullest extent permitted by applicable law, shall be the U.S. federal district courts.

Delaware. Under the Delaware General Corporation Law, a stockholder may bring a derivative action on behalf of the corporation to enforce the rights of the corporation. An individual also may commence a class action suit on behalf of himself and other similarly situated stockholders where the requirements for maintaining a class action under Delaware law have been met. A person may institute and maintain such a suit only if that person was a stockholder at the time of the transaction which is the subject of the suit. In addition, under Delaware case law, the plaintiff normally must be a stockholder at the time of the transaction that is the subject of the suit and throughout the duration of the derivative suit.

Delaware law also requires that the derivative plaintiff make a demand on the directors of the corporation to assert the corporate claim before the suit may be prosecuted by the derivative plaintiff in court, unless such a demand would be futile.

Repurchase of Shares

The Netherlands. Under Dutch law, when issuing shares, a public company such as ours may not subscribe for newly issued shares in its own capital. Such a company may, however, subject to certain restrictions of Dutch law and its articles of association, acquire shares in its own capital. A listed public company such as ours may acquire fully paid shares in its own capital at any time for no valuable consideration. Furthermore, subject to certain provisions of Dutch law and its articles of association, such company may repurchase fully paid shares in its own capital if (i) the company's shareholders' equity less the payment required to make the acquisition does not fall below the sum of paid-in and called-up share capital plus any reserves required by Dutch law or its articles of association and (ii) the aggregate nominal value of shares of the company which the company acquires, holds or on which the company holds a pledge (*pandrecht*) or which are held by a subsidiary of the company, would not exceed 50% of its then-current issued share capital. Such company may only acquire its own shares if its general meeting has granted the management board the authority to effect such acquisitions.

An acquisition of shares for a consideration must be authorized by our general meeting. Such authorization may be granted for a maximum period of 18 months and must specify the number of shares that may be acquired, the manner in which shares may be acquired and the price limits within which common shares may be acquired. The actual acquisition may only be effected pursuant to a resolution of our management board, with the approval of our supervisory board. Our management board has been authorized until the date that is 18 months following the pricing of this offering to cause the repurchase of shares (or depository receipts for shares) by us of up to 10% of our issued share capital, for a price per share not exceeding 110% of the average market price of our common shares on Nasdaq (such average market price being the average of the closing prices on each of the five consecutive trading days preceding the date the acquisition is agreed upon by us), provided that, until our common shares are listed on a stock exchange, the

maximum purchase price shall be 110% of the original issue price of the shares concerned. These shares may be used to deliver shares underlying awards granted pursuant to our equity-based compensation plans.

No authorization of the general meeting is required if fully paid common shares are acquired by us with the intention of transferring such common shares to our employees under an applicable employee share purchase plan.

Delaware. Under the Delaware General Corporation Law, a corporation may purchase or redeem its own shares unless the capital of the corporation is impaired or the purchase or redemption would cause an impairment of the capital of the corporation. A Delaware corporation may, however, purchase or redeem out of capital any of its preferred shares or, if no preferred shares are outstanding, any of its own shares if such shares will be retired upon acquisition and the capital of the corporation will be reduced in accordance with specified limitations.

Anti-Takeover Provisions

The Netherlands. Under Dutch law, various protective measures are possible and permissible within the boundaries set by Dutch law and Dutch case law. In this respect, certain provisions of our articles of association may make it more difficult for a third party to acquire control of us or effect a change in our management board and supervisory board. These provisions include:

- a dual-class share structure which consists of common shares and high voting shares, with common shares carrying one vote per share and high voting shares carrying 25 votes per share;
- a provision that each of Laurin Hahn and Jona Christians, two of our founders, as long as he holds at least 5% of our voting rights, can make a binding nomination for the appointment of one supervisory board member, which can only be overruled by a two-thirds majority of votes cast representing more than 50% of our issued share capital;
- a provision that our management board members and the supervisory board members not appointed on the basis of a binding nomination by Laurin Hahn or Jona Christians as described above are appointed on the basis of a binding nomination prepared by our supervisory board which can only be overruled by a two-thirds majority of votes cast representing more than half of our issued share capital;
- a provision that our management board members and supervisory board members may only be dismissed by the general meeting by a two-thirds majority of votes cast representing more than half of our issued share capital (unless the dismissal is proposed by the supervisory board in which case a simple majority of the votes cast would be sufficient);
- a provision allowing, among other matters, the former chairperson of our supervisory board to manage our affairs if all of our supervisory board members are removed from office and to appoint others to be charged with the supervision of our affairs, until new supervisory board members are appointed by the general meeting on the basis of the binding nominations discussed above; and
- a requirement that certain matters, including an amendment of our articles of association, may only be brought to our general meeting for a vote upon a proposal by our management board with the approval of our supervisory board.

In addition, Dutch law allows for staggered multi-year terms of our management board members and supervisory board members, as a result of which only part of our management board members and supervisory board members may be subject to appointment or re-appointment in any one year.

Furthermore, our management board may, under certain circumstances invoke a reasonable period of up to 180 days to respond to certain shareholder proposals or a statutory cooling-off period of up to 250 days to respond to certain shareholder proposals or a hostile bid. See above under “*Shareholder Proposals.*”

Delaware. In addition to other aspects of Delaware law governing fiduciary duties of directors during a potential takeover, the Delaware General Corporation Law also contains a business combination statute that protects Delaware companies from hostile takeovers and from actions following the takeover by prohibiting some transactions once an acquirer has gained a significant holding in the corporation.

Section 203 of the Delaware General Corporation Law prohibits “business combinations,” including mergers, sales and leases of assets, issuances of securities and similar transactions by a corporation or a subsidiary with an interested stockholder that beneficially owns 15% or more of a corporation’s voting stock, within three years after the person becomes an interested stockholder, unless:

- the transaction that will cause the person to become an interested stockholder is approved by the board of directors of the target prior to the transactions;
- after the completion of the transaction in which the person becomes an interested stockholder, the interested stockholder holds at least 85% of the voting stock of the corporation not including shares owned by persons who are directors and officers of interested stockholders and shares owned by specified employee benefit plans; or
- after the person becomes an interested stockholder, the business combination is approved by the board of directors of the corporation and holders of at least 66.67% of the outstanding voting stock, excluding shares held by the interested stockholder.

A Delaware corporation may elect not to be governed by Section 203 by a provision contained in the original certificate of incorporation of the corporation or an amendment to the original certificate of incorporation or to the bylaws of the company, which amendment must be approved by a majority of the shares entitled to vote and may not be further amended by the board of directors of the corporation. Such an amendment is not effective until 12 months following its adoption.

Inspection of Books and Records

The Netherlands. The management board and the supervisory board provide the general meeting, within a reasonable amount of time, all information that the shareholders require for the exercise of their powers, unless this would be contrary to an overriding interest of our Company. If the management board or supervisory board invokes such an overriding interest, it must give reasons.

Delaware. Under the Delaware General Corporation Law, any stockholder may inspect for any proper purpose certain of the corporation’s books and records during the corporation’s usual hours of business.

Dismissal of Directors

The Netherlands. Under our articles of association, the general meeting shall at all times be entitled to dismiss a management board member or supervisory board member. The general meeting may only adopt a resolution to suspend or dismiss a management board member or supervisory board member by at least a two-thirds majority of the votes cast, provided that such majority represents more than half of the issued share capital, unless the proposal was made by the supervisory board, in which latter case a simple majority is sufficient.

Delaware. Under the Delaware General Corporation Law, any director or the entire board of directors may be removed, with or without cause, by the holders of a majority of the shares then entitled to vote at an election of directors, except (i) unless the certificate of incorporation provides otherwise, in the case of a corporation whose board is classified, stockholders may effect such removal only for cause, or (ii) in the case of a corporation having cumulative voting, if less than the entire board is to be removed, no director may be removed without cause if the votes cast against such director’s removal would be sufficient to elect such director if then cumulatively voted at an election of the entire board of directors, or, if there are classes of directors, at an election of the class of directors of which he or she is a part.

Issuance of Shares

The Netherlands. Under Dutch law, a company’s general meeting is the corporate body authorized to resolve on the issuance of shares and the granting of rights to subscribe for shares. The general meeting can delegate such authority to another corporate body of the company, such as the management board, for a period not exceeding five years; this authorization may only be extended from time to time for a maximum period of five years.

Our management board has been authorized until the fifth anniversary of the pricing of this offering to issue shares or grant rights to subscribe for shares up to our authorized share capital from time to time. We may not subscribe for our own shares on issue.

Delaware. All creation of shares require the board of directors to adopt a resolution or resolutions, pursuant to authority expressly vested in the board of directors by the provisions of the company's certificate of incorporation.

Preemptive Rights

The Netherlands. Under Dutch law, in the event of an issuance of shares, each shareholder will have a pro rata preemptive right in proportion to the aggregate nominal value of the shares held by such holder (with the exception of shares to be issued to employees or shares issued against a contribution other than in cash or pursuant to the exercise of a previously acquired right to subscribe for shares). Under our articles of association, the preemptive rights in respect of newly issued shares may be restricted or excluded by a resolution of the general meeting. Another corporate body, such as the management board, may restrict or exclude the preemptive rights in respect of newly issued shares if it has been designated as the authorized body to do so by the general meeting. Such designation can be granted for a period not exceeding five years. A resolution of the general meeting to restrict or exclude the preemptive rights or to designate another corporate body as the authorized body to do so requires a majority of not less than two-thirds of the votes cast, if less than one-half of our issued share capital is represented at the meeting. Our management board has been authorized until the fifth anniversary of the pricing of this offering to limit or exclude preemptive rights in relation to an issuance of shares or a grant of rights to subscribe for shares that the management board is authorized to resolve upon (see above under "Issuance of Shares").

Delaware. Under the Delaware General Corporation Law, stockholders have no preemptive rights to subscribe for additional issues of stock or to any security convertible into such stock unless, and to the extent that, such rights are expressly provided for in the certificate of incorporation.

Dividends

The Netherlands. Dutch law provides that dividends (if it concerns a distribution of profits) may be distributed after adoption of the annual accounts by the general meeting from which it appears that such dividend distribution is allowed. Moreover, dividends may be distributed, whether as a distribution of profits or of freely distributable reserves, only to the extent the shareholders' equity exceeds the amount of the paid-in and called-up issued share capital and the reserves that must be maintained under the law or the articles of association. Interim dividends may be declared as provided in the articles of association and may be distributed to the extent that the shareholders' equity exceeds the amount of the paid-in and called-up issued share capital plus any reserves as described above as apparent from our consolidated interim financial statements prepared under Dutch law.

Under our articles of association, our management board, with the approval of our supervisory board, may decide that all or part of the profits are carried to reserves. After the reservation of any profit, the remaining profit will be at the disposal of the general meeting at the proposal of the management board for distribution on the shares, subject to restrictions of Dutch law and approval by our supervisory board of such proposal of our management board. Our management board is permitted, subject to certain requirements, to declare interim dividends without the approval of the general meeting, but only with the approval of the supervisory board. Dividends and other distributions shall be made payable not later than the date determined by the management board. Claims to dividends and other distributions not made within five years from the date that such dividends or distributions became payable will lapse and any such amounts will be considered to have been forfeited to us (*verjaring*).

Delaware. Under the Delaware General Corporation Law, a Delaware corporation may pay dividends out of its surplus (the excess of net assets over capital), or in case there is no surplus, out of its net profits for the fiscal year in which the dividend is declared and/or the preceding fiscal year (provided that the amount of the capital of the corporation is not less than the aggregate amount of the capital represented by the issued and outstanding stock of all classes having a preference upon the distribution of assets). In determining the amount of surplus of a Delaware corporation, the assets of the corporation, including stock of

subsidiaries owned by the corporation, must be valued at their fair market value as determined by the board of directors, without regard to their historical book value. Dividends may be paid in the form of common stock, property or cash.

Shareholder Vote on Certain Reorganizations

The Netherlands. Under Dutch law, the general meeting must approve resolutions of the management board relating to a significant change in the identity or the character of the company or the business of the company, which includes:

- a transfer of the business or virtually the entire business to a third party;
- the entry into or termination of a long-term cooperation of the company or a subsidiary with another legal entity or company or as a fully liable partner in a limited partnership or general partnership, if such cooperation or termination is of a far-reaching significance for the company; and
- the acquisition or divestment by the company or a subsidiary of a participating interest in the capital of a company having a value of at least one-third of the amount of its assets according to its balance sheet and explanatory notes or, if the company prepares a balance sheet, according to its balance sheet and explanatory notes in the last adopted annual accounts of the company.

Delaware. Under the Delaware General Corporation Law, the vote of a majority of the outstanding shares of capital stock entitled to vote thereon generally is necessary to approve a merger or consolidation or the sale of all or substantially all of the assets of a corporation. The Delaware General Corporation Law permits a corporation to include in its certificate of incorporation a provision requiring for any corporate action the vote of a larger portion of the stock or of any class or series of stock than would otherwise be required.

Under the Delaware General Corporation Law, no vote of the stockholders of a surviving corporation to a merger is needed, however, unless required by the certificate of incorporation, if (i) the agreement of merger does not amend in any respect the certificate of incorporation of the surviving corporation, (ii) the shares of stock of the surviving corporation are not changed in the merger and (iii) the number of shares of common stock of the surviving corporation into which any other shares, securities or obligations to be issued in the merger may be converted does not exceed 20% of the surviving corporation's common stock outstanding immediately prior to the effective date of the merger. In addition, stockholders may not be entitled to vote in certain mergers with other corporations that own 90% or more of the outstanding shares of each class of stock of such corporation, but the stockholders will be entitled to appraisal rights.

Remuneration of Management Board Members and Supervisory Board Members

The Netherlands. Under Dutch law and our articles of association, we must adopt a compensation policy for our management board. Such compensation policy and any changes thereto shall require the adoption by the general meeting. The supervisory board determines the remuneration of individual management board members with due observance of the compensation policy at the recommendation of our compensation committee. A proposal with respect to remuneration schemes in the form of shares or rights to shares in which management board members may participate is subject to approval by our general meeting. Such a proposal must set out at least the maximum number of shares or rights to subscribe for shares to be granted to the management board and the criteria for granting or amendment. The compensation for our supervisory board members is set by the general meeting.

Delaware. Under the Delaware General Corporation Law, the stockholders do not generally have the right to approve the compensation policy for directors or the senior management of the corporation, although certain aspects of the compensation policy may be subject to stockholder vote due to the provisions of U.S. federal securities and tax law.

COMMON SHARES ELIGIBLE FOR FUTURE SALE

COMMON SHARES ELIGIBLE FOR FUTURE SALE

Prior to this offering, there has been no market for our common shares. Future sales of substantial amounts of our common shares in the public market could adversely affect market prices prevailing from time to time. Furthermore, because only a limited number of common shares will be available for sale shortly after this offering due to existing contractual and legal restrictions on resale as described below, there may be sales of substantial amounts of our common shares in the public market after such restrictions lapse. This may adversely affect the prevailing market price and our ability to raise equity capital in the future.

Upon completion of this offering, we will have 70,581,903 common shares and 3,000,000 high voting shares outstanding assuming the issuance of 25,468,644 additional common shares against no consideration to our existing shareholders immediately prior to pricing of this offering, the exercise in full of the underwriters' option to purchase additional common shares from us as well as the full conversion of the mandatory convertible senior notes into our common shares. Of these shares, 65,256,279 common shares, or 66,756,279 common shares if the underwriters exercise their option in full to purchase additional common shares from us, sold in this offering will be freely transferable without restriction or registration under the Securities Act, except for any common shares purchased by one of our existing "affiliates," as that term is defined in Rule 144 under the Securities Act. The remaining 3,825,624 common shares existing are "restricted shares" as defined in Rule 144. Restricted shares may be sold in the public market only if registered or if they qualify for an exemption from registration under Rules 144 or 701 of the Securities Act. As a result of the provisions of Rules 144 and 701, these shares will be available for sale in the public market as follows.

Rule 144

In general, under Rule 144 under the Securities Act as in effect on the date of this prospectus, a person who has beneficially owned our common shares that are restricted shares for at least six months would be entitled to sell such securities, provided that (i) such person is not deemed to have been one of our affiliates at the time of, or at any time during the 90 days preceding, a sale and (ii) we are subject to the Exchange Act periodic reporting requirements for at least 90 days before the sale. Persons who have beneficially owned our common shares that are restricted shares for at least six months but who are our affiliates at the time of, or any time during the 90 days preceding, a sale, would be subject to additional restrictions, by which such person would be entitled to sell within any three-month period only a number of securities that does not exceed the greater of either of the following:

- 1% of the number of common shares then outstanding, which will equal approximately 690,819 common shares immediately after the completion of this offering, assuming no exercise of the underwriters' option to purchase additional shares; and
- the average weekly trading volume of our common shares on The Nasdaq Global Market during the four calendar weeks preceding the filing of a notice on Form 144 with respect to the sale; provided, in each case, that we are subject to the Exchange Act periodic reporting requirements for at least 90 days before the sale. Such sales both by affiliates and by non-affiliates must also comply with the manner of sale, current public information and notice provisions of Rule 144 to the extent applicable.

Sales of restricted common shares under Rule 144 held by our affiliates are also subject to requirements regarding the manner of sale, notice and the availability of current public information about us. Rule 144 also requires that affiliates relying on Rule 144 to sell common shares that are not restricted shares must nonetheless comply with the same restrictions applicable to restricted shares, other than the holding period requirement. In addition, in each case, these common shares would remain subject to lock-up arrangements and would only become eligible for sale when the lock-up period expires.

Regulation S

Regulation S under the Securities Act provides that common shares owned by any person may be sold without registration in the United States, provided that the sale is effected in an offshore transaction and no directed selling efforts are made in the United States (as these terms are defined in Regulation S), subject to certain other conditions. In general, this means that our shares may be sold outside the United States without registration in the United States being required.

Rule 701

Under Rule 701 under the Securities Act, common shares acquired by any of our employees, management board members, supervisory board members, consultants or advisors upon the exercise of options or pursuant to other rights granted under a written compensatory stock or option plan or other written agreement in compliance with Rule 701 may be resold, by:

- persons other than affiliates, beginning 90 days after the effective date of the registration statement of which this prospectus forms a part, subject only to the manner-of-sale provisions of Rule 144; and
- our affiliates, beginning 90 days after the effective date of the registration statement of which this prospectus forms a part, subject to the manner-of-sale and volume limitations, current public information and filing requirements of Rule 144, in each case, without compliance with the six-month holding period requirement of Rule 144.

The SEC has indicated that Rule 701 will apply to typical share options granted by an issuer before it becomes subject to the reporting requirements of the Exchange Act, along with the shares acquired upon exercise of such options, including exercises after the date of this prospectus. Securities issued in reliance on Rule 701 are restricted securities and, subject to the contractual restrictions described above, beginning 90 days after the date of this prospectus, may be sold by persons other than “affiliates,” as defined in Rule 144, subject only to the manner of sale provisions of Rule 144 and by “affiliates” under Rule 144 without compliance with its one-year minimum holding period requirement.

Registration Rights

On December 10, 2020, we issued to certain new investors mandatory convertible senior notes, governed by German law and having an aggregate nominal value of €6.8 million. The subscription agreements with these investors provide them with certain registration rights. These registration rights provide them with certain demand registration rights, short-form registration rights and piggyback registration rights in respect of any common shares and related indemnification rights from us, subject to customary restrictions and exceptions. In case of a demand registration, all parties to the Registration Rights Agreement will be informed and offered the opportunity to participate in the transaction. All fees, costs and expenses of registrations, other than underwriting discounts and commissions and such underwriting expenses to be borne by the underwriters, will be borne by us.

TAXATION

TAXATION

The following summary contains a description of Dutch, German and U.S. federal income tax considerations generally applicable to the acquisition, ownership and disposition of common shares, but it does not purport to be a comprehensive description of all the tax considerations that may be relevant to a decision to purchase common shares. The summary is based upon the tax laws of The Netherlands and regulations thereunder, the tax laws of Germany and regulations thereunder and the tax laws of the United States and regulations thereunder as of the date hereof, which are subject to change. The discussion in this section reflects the views of NautaDutilh N.V. insofar as it relates to matters of Dutch tax law, Ebner Stolz Mönning Bachem Wirtschaftsprüfer Steuerberater Rechtsanwälte Partnerschaft mbB insofar as it relates to matters of German tax law and Sullivan & Cromwell LLP insofar as it relates to matters of United States federal income tax law. You should consult your tax advisor regarding the applicable tax consequences to you of investing in our common shares.

Material Dutch Tax Consideration

General

The following is a general summary of certain material Dutch tax consequences of the acquisition, ownership and disposal of our common shares. This summary does not purport to set forth all possible tax considerations or consequences that may be relevant to a holder or prospective holder or our common shares and does not purport to deal with the tax consequences applicable to all categories of investors, some of which (such as trusts or similar arrangements) may be subject to special rules. In view of its general nature, it should be treated with corresponding caution.

This summary is based on the tax laws of The Netherlands, published regulations thereunder and published authoritative case law, all as in effect on the date hereof, and all of which are subject to change, possibly with retroactive effect. Where the summary refers to “The Netherlands” or “Dutch” it refers only to the part of the Kingdom of The Netherlands located in Europe.

This discussion is for general information purposes and is not tax advice or a complete description of all Dutch tax consequences relating to the acquisition, ownership and disposal of our common shares. Holders or prospective holders of our common shares should consult their own tax advisor regarding the tax consequences relating to the acquisition, holding and disposal of our common shares in light of their particular circumstances.

Please note that this section does not set forth the tax considerations for:

- holders of common shares if such holders, and in the case of individuals, such holder’s partner or certain relatives by blood or marriage in the direct line (including foster children), have a substantial interest (*aanmerkelijk belang*) or deemed substantial interest (*fictief aanmerkelijk belang*) in us within the meaning of chapter 4 of the Dutch Income Tax Act 2001 (*Wet inkomstenbelasting 2001*). Generally, a holder of securities in a company is considered to hold a substantial interest in such company if such holder alone or, in the case of individuals, together with such holder’s partner (as defined in the Dutch Income Tax Act 2001), directly or indirectly holds (i) an interest of 5% or more of the total issued and outstanding capital of that company or of 5% or more of the issued and outstanding capital of a certain class of shares of that company; or (ii) rights to acquire, directly or indirectly, such interest; or (iii) certain profit sharing rights in that company that relate to 5% or more of the company’s annual profits and/or to 5% or more of the company’s liquidation proceeds. A deemed substantial interest exists if a substantial interest (or part thereof) in a company has been disposed of, or is deemed to have been disposed of, on a non-recognition basis;
- holders of common shares that are not individuals and for which the common shares qualify or qualified as a participation (*deelneming*) for purposes of the participation exemption (*deelnemingsvrijstelling*) as defined in Section 13 of the Dutch Corporate Income Tax Act 1969 (*Wet op de vennootschapsbelasting 1969*). Generally, the common shares qualify as a participation as a result of which the participation exemption applies to the common shares if the holder of common shares is subject to Dutch corporate income tax and it, or a related entity, holds 5% or more in our nominal paid-in share capital (or, in certain cases, in voting rights);

- pension funds, investment institutions (*fiscale beleggingsinstellingen*), exempt investment institutions (*vrijgestelde beleggingsinstellingen*) (as defined in the Dutch Corporate Income Tax Act 1969) and other entities that are, in whole or in part, not subject to or exempt from corporate income tax in The Netherlands as well as entities that are exempt from corporate income tax in their country of residence, such country of residence being another state of the EU, Norway, Liechtenstein, Iceland or any other state with which The Netherlands has agreed to exchange information in line with international standards; and
- holders of common shares who are individuals and for whom the common shares or any benefit derived from the common shares are a remuneration or deemed to be a remuneration for (employment) activities performed by such holders or certain individuals related to such holders (as defined in the Dutch Income Tax Act 2001).

Dividend Withholding Tax

Dividends distributed by us generally are subject to Dutch dividend withholding tax at a rate of 15%. Generally, we are responsible for the withholding of such dividend withholding tax at source; the Dutch dividend withholding tax is for the account of the holder of our common shares.

However, as long as we continue to have our place of effective management solely in Germany, and not in The Netherlands, under the double tax treaty between Germany and The Netherlands, we will be considered to be exclusively tax resident in Germany and we will not be required to withhold Dutch dividend withholding tax. This exemption from withholding does not apply to dividends distributed by us to a holder who is resident or deemed to be resident in The Netherlands for Dutch income tax purposes or to holders of common shares that are neither resident nor deemed to be resident of The Netherlands if the common shares are attributable to a Dutch permanent establishment of such non-resident holder, in which case the following paragraph applies. See also “*Risk Factors—Regulatory, Legal and Tax Risks—If we do pay dividends, we may need to withhold tax on such dividends payable to holders of our shares in both Germany and The Netherlands.*”

Dividends distributed by us to individuals and corporate legal entities who are resident or deemed to be resident in The Netherlands for Dutch income tax purposes (“Dutch Resident Individuals” and “Dutch Resident Entities,” as the case may be) or to holders of common shares that are neither resident nor deemed to be resident of The Netherlands if the common shares are attributable to a Dutch permanent establishment of such non-resident holder are subject to Dutch dividend withholding tax at a rate of 15%.

The expression “dividends distributed” includes, among other things:

- distributions in cash or in kind, deemed and constructive distributions and repayments of paid-in capital not recognized for Dutch dividend withholding tax purposes;
- liquidation proceeds, proceeds of redemption of common shares, or proceeds of the repurchase of common shares by us or one of our subsidiaries or other affiliated entities to the extent such proceeds exceed the average paid-in capital of those common shares as recognized for purposes of Dutch dividend withholding tax;
- an amount equal to the par value of common shares issued or an increase of the par value of common shares, to the extent that it does not appear that a related contribution, recognized for purposes of Dutch dividend withholding tax, has been made or will be made; and
- partial repayment of the paid-in capital, recognized for purposes of Dutch dividend withholding tax, if and to the extent that we have net profits (*zuivere winst*), unless (i) the general meeting has resolved in advance to make such repayment and (ii) the par value of the common shares concerned has been reduced by an equal amount by way of an amendment of our articles of association.

Dutch Resident Individuals and Dutch Resident Entities generally are entitled to an exemption or a credit for any Dutch dividend withholding tax against their income tax or corporate income tax liability and to a refund of any residual Dutch dividend withholding tax. The same generally applies to holders of common shares that are neither resident nor deemed to be resident of The Netherlands if the common shares are attributable to a Dutch permanent establishment of such non-resident holder.

Dividend stripping.

Pursuant to legislation to counteract “dividend stripping,” a reduction, exemption, credit or refund of Dutch dividend withholding tax is denied if the recipient of the dividend is not the beneficial owner (*uiteindelijk gerechtigde*) of the dividend as described in the Dutch Dividend Withholding Tax Act 1965 (*Wet op de dividendbelasting 1965*). This legislation generally targets situations in which a shareholder retains its economic interest in shares but reduces the withholding tax costs on dividends by a transaction with another party. It is not required for these rules to apply that the recipient of the dividends is aware that a dividend stripping transaction took place.

The Dutch State Secretary for Finance takes the position that the definition of beneficial owner introduced by this legislation will also be applied in the context of a double taxation convention.

Taxes on Income and Capital GainsDutch Resident Entities

Generally speaking, if the holder of common shares is a Dutch Resident Entity, any benefits derived or deemed to be derived from the common shares or any gain or loss realized on the disposal or deemed disposal of the common shares is subject to Dutch corporate income tax at a rate of 15% with respect to taxable profits up to €245,000 and 25% with respect to taxable profits in excess of that amount (rates and brackets for 2021).

Dutch Resident Individuals

If the holder of common shares is a Dutch Resident Individual, any benefits derived or deemed to be derived from the common shares or any gain or loss realized on the disposal or deemed disposal of the common shares is taxable at the progressive Dutch income tax rates (with a maximum of 49.50% in 2021), if:

- (i) the common shares are attributable to an enterprise from which the holder of common shares derives a share of the profit, whether as an entrepreneur (*ondernemer*) or as a person who has a co-entitlement to the net worth (*medegerechtigd tot het vermogen*) of such enterprise without being a shareholder (as defined in the Dutch Income Tax Act 2001); or
- (ii) the holder of common shares is considered to perform activities with respect to the common shares that go beyond ordinary asset management (*normaal, actief vermogensbeheer*) or derives benefits from the common shares that are taxable as benefits from other activities (*resultaat uit overige werkzaamheden*).

If the above-mentioned conditions (i) and (ii) do not apply to the individual holder of common shares, such holder will be taxed annually on a deemed return (with a maximum of 5.69% in 2021) on the individual’s net investment assets (*rendementsgrondslag*) for the year, insofar the individual’s net investment assets for the year exceed a statutory threshold (*heffingvrij vermogen*). The deemed return on the individual’s net investment assets for the year is taxed at a flat rate of 31%. Actual income, gains or losses in respect of the common shares are as such not subject to Dutch income tax.

The net investment assets for the year are the fair market value of the investment assets less the allowable liabilities on January 1 of the relevant calendar year. The common shares are included as investment assets. For the net investment assets on January 1, 2021, the deemed return ranges from 1.90% up to 5.69% (depending on the aggregate amount of the net investment assets of the individual on January 1, 2021). The deemed return will be adjusted annually on the basis of historic market yields.

Non-residents of The Netherlands

A holder of common shares that is neither a Dutch Resident Entity nor a Dutch Resident Individual will not be subject to Dutch taxes on income or capital gains in respect of any payment under the common shares or in respect of any gain or loss realized on the disposal or deemed disposal of the common shares, provided that:

- (i) such holder does not have an interest in an enterprise or deemed enterprise (as defined in the Dutch Income Tax Act 2001 and the Dutch Corporate Income Tax Act 1969) which, in whole or in part, is either effectively managed in The Netherlands or carried on through a permanent establishment, a deemed permanent establishment or a permanent representative in The Netherlands and to which enterprise or part of an enterprise the common shares are attributable; and
- (ii) in the event the holder is an individual, such holder does not carry out any activities in The Netherlands with respect to the common shares that go beyond ordinary asset management and does not derive benefits from the common shares that are taxable as benefits from other activities in The Netherlands.

Gift and Inheritance Taxes

Residents of The Netherlands

Gift or inheritance taxes will arise in The Netherlands with respect to a transfer of common shares by way of a gift by, or on the death of, a holder of such common shares who is resident or deemed resident of The Netherlands at the time of the gift or the holder's death.

Non-residents of The Netherlands

No gift or inheritance taxes will arise in The Netherlands with respect to a transfer of common shares by way of gift by, or on the death of, a holder of common shares who is neither resident nor deemed to be resident of The Netherlands, unless:

- (i) in the case of a gift of common shares by an individual who at the date of the gift was neither resident nor deemed to be resident of The Netherlands, such individual dies within 180 days after the date of the gift, while being resident or deemed to be resident of The Netherlands; or
- (ii) in the case of a gift of common shares is made under a condition precedent, the holder of the common shares is resident or is deemed to be resident of the Netherlands at the time the condition is fulfilled; or
- (iii) the transfer is otherwise construed as a gift or inheritance made by, or on behalf of, a person who, at the time of the gift or death, is or is deemed to be resident of The Netherlands.

For purposes of Dutch gift and inheritance taxes, among others, a person that holds the Dutch nationality will be deemed to be resident of The Netherlands if such person has been resident in The Netherlands at any time during the ten (10) years preceding the date of the gift or such person's death. Additionally, for purposes of Dutch gift tax, among others, a person not holding the Dutch nationality will be deemed to be resident of The Netherlands if such person has been resident in The Netherlands at any time during the twelve (12) months preceding the date of the gift. Applicable tax treaties may override deemed residency.

Value Added Tax (VAT)

No Dutch VAT will be payable by a holder of common shares in respect of any payment in consideration for the holding or disposal of the common shares.

Other Taxes and Duties

No Dutch registration tax, stamp duty or any other similar documentary tax or duty will be payable by a holder of common shares in respect of any payment in consideration for the holding or disposal of the common shares.

Material German Tax Considerations

The following section is the opinion of Ebner Stolz Mönning Bachem Wirtschaftsprüfer Steuerberater Rechtsanwälte Partnerschaft mbB ("German Tax Counsel") of the material German tax considerations that become relevant when purchasing, holding or transferring the Company's shares. The Company expects

and intends to have its sole place of management in Germany and, therefore, qualifies as a corporation subject to German unlimited corporate income taxation; however, because a company's tax residency depends on future facts regarding the location in which the Company is managed and controlled, German Tax Counsel cannot opine as to whether the Company will actually qualify as a corporation subject to German unlimited corporate income taxation and such a scenario in which the company does not qualify as a corporation subject to German unlimited income taxation is not discussed herein. This section does not set forth all German tax aspects that may be relevant for shareholders. The section is based on the German tax law applicable as of the date of this prospectus. It should be noted that the law may change following the issuance of this prospectus and that such changes may have retroactive effect.

The material German tax principles of purchasing, owning and transferring of shares are set forth in the following. This section does not purport to be a comprehensive or complete analysis or listing of all potential tax effects of the purchase, ownership or disposition of shares and does not set forth all tax considerations that may be relevant to a particular person's decision to acquire common shares. All of the following is subject to change. Such changes could apply retroactively and could affect the consequences set forth below. This section does not refer to any U.S. Foreign Account Tax Compliance Act aspects.

Shareholders are advised to consult their own tax advisers with regard to the application of German tax law to their particular situations, in particular with respect to the procedure to be complied with to obtain a (potential) relief of withholding tax on dividends and on capital gains (*Kapitalertragsteuer*) and with respect to the influence of double tax treaty provisions, as well as any tax consequences arising under the laws of any state, local or other foreign jurisdiction. For German tax purposes, a "shareholder" may include an individual who or an entity that does not have the legal title to the shares, but to whom the shares are nevertheless attributed, based either on such individual or entity owning a beneficial interest in the shares or based on specific statutory provisions.

This section does not constitute particular tax advice. Potential purchasers of the Company's shares are urged to consult their own tax advisers regarding the tax consequences of the purchase, ownership and disposition of shares in light of their particular circumstances.

Dividends Tax

Withholding Tax on Dividends

Dividends distributed from a company to its shareholders are subject to withholding tax, subject to certain exemptions (for example, repayments of capital from the tax equity account (*steuerliches Einlagekonto*)), as described in the following. The withholding tax rate is 25% plus 5.5% solidarity surcharge (*Solidaritatzuschlag*) thereon (in total 26.375%) and, if applicable, church tax (*Kirchensteuer*) of the gross dividend approved by the ordinary shareholders' meeting. Withholding tax is to be withheld and passed on for the account of the shareholders by a domestic branch of a domestic or foreign credit or financial services institution (*Kredit- und Finanzdienstleistungsinstitut*), by the domestic securities trading company (*inlandisches Wertpapierhandelsunternehmen*) or a domestic securities trading bank (*inlandische Wertpapierhandelsbank*) which keeps and administers the shares and disburses or credits the dividends or disburses the dividends to a foreign agent, or by the securities custodian bank (*Wertpapiersammelbank*) to which the shares were entrusted for collective custody if the dividends are distributed to a foreign agent by such securities custodian bank (which is referred to as the "Dividend Paying Agent"). In case the shares are not held in collective deposit with a Dividend Paying Agent, the company is responsible for withholding and remitting the tax to the competent tax office.

Such withholding tax is levied and withheld irrespective of whether and to what extent the dividend distribution is taxable at the level of the shareholder and whether the shareholder is a person residing in Germany or in a foreign country.

In the case of dividends distributed to a parent company within the meaning of Art. 3 of the amended EU Directive 2011/96/EU of the Council of November 30, 2011 (the "EU Parent Subsidiary Directive") domiciled in another Member State of the EU, an exemption from withholding tax will be granted upon request if further prerequisites are satisfied (*Freistellung im Steuerabzugsverfahren*). This also applies to dividends distributed to a permanent establishment located in another Member State of the EU of such a parent company or of a parent company tax resident in Germany if the participation in the company is

attributable to this permanent establishment. The key prerequisite for the application of the EU Parent Subsidiary Directive is that the shareholder has held a direct participation in the share capital of the company of at least 10% for at least twelve months. If such twelve month period is only completed after the receipt of the dividends, an exemption is not possible based on the EU Parent Subsidiary Directive. Rather, only a refund of withholding tax might be possible, subject to further prerequisites.

The withholding tax on distributions to other foreign resident shareholders might be reduced fully or partly in accordance with a double taxation treaty if Germany has concluded such double taxation treaty with the country of residence of the shareholder and if the shareholder does not hold his shares either as part of the assets of a permanent establishment or a fixed place of business in Germany or as business assets for which a permanent representative has been appointed in Germany. If the requirements for such a reduction are fulfilled, the reduction of the withholding tax would procedurally be granted in such a manner that the difference between the total amount withheld, including the solidarity surcharge, and the tax liability determined on the basis of the tax rate set forth in the applicable double taxation treaty (generally 15% unless further qualifications are met) is refunded by the German tax administration upon request (Federal Central Office for Taxes (*Bundeszentralamt für Steuern*), main office in Bonn-Beuel, An der Kuppe 1, 53225 Bonn, Germany) subject to the treaty and German anti-abuse rules.

In the case of dividends received by corporations whose statutory seat and effective place of management are not located in Germany and who are therefore not tax resident in Germany, two-fifths of the withholding tax deducted and remitted are refunded without the need to fulfill all prerequisites required for such refund under the EU Parent Subsidiary Directive or under a double taxation treaty or if no double taxation treaty has been concluded with the state of residence of the shareholder.

In order to receive a refund pursuant to a double taxation treaty or the aforementioned option for foreign corporations, the shareholder has to submit a completed form for refund (available at the Federal Central Office for Taxes (<http://www.bzst.de>) as well as at the German embassies and consulates) together with a withholding tax certificate (*Kapitalertragsteuerbescheinigung*) issued by the institution that withheld the tax.

The exemption from withholding tax in accordance with the EU Parent Subsidiary Directive or a double tax treaty and the aforementioned options for a refund of the withholding tax (with or without protection under a double taxation treaty) depend on whether certain additional prerequisites (in particular so-called substance requirements) are fulfilled. The applicable withholding tax relief will only be granted if the preconditions of the German anti avoidance rules (so called Directive Override or Treaty Override), in particular Section 50d, paragraph 3, German Income Tax Act (*Einkommensteuergesetz*) in its current version upon receipt of the dividends are fulfilled. In addition, e. g. Article 28 of the Convention between the Federal Republic of Germany and the United States of America for the Avoidance of Double Taxation and the Prevention of Fiscal Evasion with respect to Taxes on Income and Capital and to certain other Taxes of August 29, 1989 in the amended version of June 4, 2008 (*Bundesgesetzblatt II 2008, p. 611*) provides for further prerequisites that need to be fulfilled in the case of a shareholder who is resident of the United States. Other treaties might provide for additional requirements.

The aforementioned reductions of (or exemptions from) withholding tax are further restricted if (i) the applicable double taxation treaty provides for a tax reduction resulting in an applicable tax rate of less than 15% and (ii) the shareholder is not a corporation that directly holds at least 10% in the equity capital of the distributing company and is subject to tax on its income and profits in its state of residence without being exempt. In this case, the reduction of (or exemption from) withholding tax is subject to the following three cumulative prerequisites: (i) the shareholder must qualify as beneficial owner of the shares in the distributing company for a minimum holding period of 45 consecutive days occurring within a period of 45 days prior and 45 days after the due date of the dividends, (ii) the shareholder has to bear at least 70% of the change in value risk related to the shares in the distributing company during the minimum holding period without being directly or indirectly hedged and (iii) the shareholder must not be required to fully or largely compensate directly or indirectly the dividends to third parties. However, these further prerequisites do not apply if the shareholder has been the beneficial owner of the shares in the distributing company for at least one uninterrupted year upon receipt of the dividends.

For individual or corporate shareholders tax resident outside Germany not holding the shares through a permanent establishment (*Betriebsstätte*) in Germany or as business assets (*Betriebsvermögen*) for which a permanent representative (*ständiger Vertreter*) has been appointed in Germany, any non-refundable part of any paid withholding tax (if any) is final (i.e., not creditable or otherwise refundable in respect of such shareholder's income tax liability) and settles the shareholder's limited tax liability in Germany. For individual or corporate shareholders tax resident in Germany (that are, for example, shareholders whose residence, domicile, registered office or place of management is located in Germany) holding their shares as business assets, as well as for shareholders tax resident outside of Germany holding their shares through a permanent establishment in Germany or as business assets for which a permanent representative has been appointed in Germany, the withholding tax withheld (including solidarity surcharge) can be credited against the shareholder's personal income tax or corporate income tax liability in Germany. Any withholding tax (including solidarity surcharge) in excess of such tax liability is refunded. For individual shareholders tax resident in Germany holding the company's shares as private assets, the withholding tax is generally a final tax (*Abgeltungsteuer*).

Pursuant to special rules on the restriction of the aforementioned withholding tax credit, the credit of withholding tax is subject to the following three cumulative prerequisites: (i) the shareholder must qualify as beneficial owner of the shares in the distributing company for a minimum holding period of 45 consecutive days occurring within a period of 45 days prior and 45 days after the due date of the dividends, (ii) the shareholder has to bear at least 70% of the change in value risk related to the shares in the distributing company during the minimum holding period without being directly or indirectly hedged and (iii) the shareholder must not be required to fully or largely compensate directly or indirectly the dividends to third parties. Absent the fulfillment of all of the three prerequisites, three-fifths of the withholding tax imposed on the dividends must not be credited against the shareholder's (corporate) income tax liability, but may, upon application, be deducted from the shareholder's tax base for the relevant assessment period. A shareholder that has received gross dividends without any deduction of withholding tax in particular due to a tax exemption or to whom a withholding tax deduction has been refunded without qualifying for a full tax credit has to notify the competent local tax office accordingly, has to file withholding tax returns subject to specific filing requirements and has to make a payment in the amount of 15% withholding tax. The special rules on the restriction of withholding tax credit do not apply to a shareholder whose overall dividend earnings within an assessment period do not exceed €20,000 or that has been the beneficial owner of the shares in the company for at least one uninterrupted year upon receipt of the dividends.

Taxation of Dividend Income of Shareholders Tax Resident in Germany Holding the Company's Shares as Private Assets

For individual shareholders (individuals) resident in Germany holding the Company's shares as private assets, dividends are subject to a flat tax rate which is satisfied by the withholding tax actually withheld (*Abgeltungsteuer*). Accordingly, dividend income will be taxed at a flat tax rate of 25% plus 5.5% solidarity surcharge thereon (in total 26.375%) and church tax (*Kirchensteuer*) in case the shareholder is subject to church tax because of his individual circumstances. An automatic procedure for deduction of church tax by way of withholding will apply to shareholders being subject to church tax unless the shareholder has filed a blocking notice (*Sperrvermerk*) with the German Federal Tax Office (details related to the computation of the concrete tax rate including church tax are to be discussed with the individual tax adviser of the relevant shareholder). Except for an annual lump sum savings allowance (*Sparer-Pauschbetrag*) of up to €801 (for individual filers) or up to €1,602 (for married couples and for partners in accordance with the registered partnership law (*Gesetz über die Eingetragene Lebenspartnerschaft*) filing jointly), private individual shareholders will not be entitled to deduct expenses incurred in connection with the capital investment from their dividend income.

The income tax owed for the dividend income is satisfied by the withholding tax withheld by the Dividend Paying Agent. However, if the flat tax results in a higher tax burden as opposed to the private shareholder's individual tax rate, the private shareholder can opt for taxation at his individual personal income tax rate. In that case, the final withholding tax will be credited against the income tax. However, pursuant to the German tax authorities and a court ruling, private shareholders are nevertheless not entitled to deduct expenses incurred in connection with the capital investment from their income. The option can be exercised

only for all capital income from capital investments received in the relevant assessment period uniformly, and married couples as well as partners in accordance with the registered partnership law filing jointly may only jointly exercise the option.

Exceptions from the flat tax rate (satisfied by withholding at source) (*Abgeltungsteuer*) may apply—that is, only upon application—for shareholders who have a shareholding of at least 25% in the company and for shareholders who have a shareholding of at least 1% in the company and work for a company in a professional capacity through which the shareholder can exert significant entrepreneurial influence on the Company's economic activity. In such a case, the same rules apply as for sole proprietors holding the shares as business assets. See “—*Taxation of dividend income of shareholders tax resident in Germany holding the Company's shares as business assets—Sole proprietors.*”

Taxation of Dividend Income of Shareholders Tax Resident in Germany Holding the Company's Shares as Business Assets

If a shareholder holds the company's shares as business assets, the taxation of the dividend income depends on whether the respective shareholder is a corporation, a sole proprietor or a partnership.

Corporations

Dividend income of corporate shareholders is exempt from corporate income tax, provided that the incorporated entity holds a direct participation of at least 10% in the share capital of a company at the beginning of the calendar year in which the dividends are paid. The acquisition of a participation of at least 10% in the course of a calendar year is deemed to have occurred at the beginning of such calendar year for the purpose of this rule. Participations in the share capital of the company which a corporate shareholder holds through a partnership, including co-entrepreneurships (*Mitunternehmenschaften*), are attributable to such corporate shareholder only on a pro rata basis at the ratio of the interest share of the corporate shareholder in the assets of the relevant partnership. However, 5% of the tax exempt dividends are deemed to be non-deductible business expenses for tax purposes and therefore are subject to corporate income tax (plus solidarity surcharge) and trade tax, i.e., tax exemption of 95%. Business expenses incurred in connection with the dividends received are generally entirely tax-deductible.

For trade tax purposes the entire dividend income is subject to trade tax (i.e., the tax-exempt dividends must be added back when determining the trade taxable income), unless the corporation shareholder holds at least 15% of the company's registered share capital at the beginning of the relevant tax assessment period (*Erhebungszeitraum*). In case of an indirect participation via a partnership please refer to the section “*Partnerships*” below.

If the shareholding is below 10% in the share capital, dividends are taxable at the applicable corporate income tax rate of 15% plus 5.5% solidarity surcharge thereon and trade tax (the rate of which depends on the municipalities the corporate shareholder resides in).

Special regulations apply which abolish the 95% tax exemption if the company's shares are held as trading portfolio assets in the meaning of Section 340e of the German commercial code (*Handelsgesetzbuch*) by (i) a credit institution (*Kreditinstitut*) or (ii) a financial service institution (*Finanzdienstleistungsinstitut*). The 95% tax exemption is also abolished if the company's shares have to be shown as current assets at the time of acquisition by a financial enterprise within the meaning of the German Banking Act (*Kreditwesengesetz*), in case more than 50% of the shares of such financial enterprise are held directly or indirectly by a credit institution or a financial service institution, as well as if the company's shares are held by a life insurance company, a health insurance company or a pension fund in case the shares are attributable to the capital investments, resulting in fully taxable income.

Sole Proprietors

For sole proprietors (individuals) resident in Germany holding shares as business assets dividends are subject to the partial income rule (*Teileinkünfteverfahren*). Accordingly, only (i) 60% of the dividend income will be taxed at his/her individual personal income tax rate plus 5.5% solidarity surcharge thereon and church tax (if applicable) and (ii) 60% of the business expenses related to the dividend income are deductible for tax purposes. In addition, the dividend income is entirely subject to trade tax if the shares are held as

business assets of a permanent establishment in Germany within the meaning of the German Trade Tax Act (*Gewerbsteuergesetz*), unless the shareholder holds at least 15% of the company's registered share capital at the beginning of the relevant tax assessment period. The trade tax levied is generally eligible for credit against the shareholder's personal income tax liability based on the applicable municipal trade tax rate (but limited to a maximum rate) and the individual tax situation of the shareholder.

Partnerships

In case shares are held by a partnership, the partnership itself is not subject to corporate income tax or personal income tax. In this regard, corporate income tax or personal income tax (and church tax, if applicable) as well as solidarity surcharge, are levied only at the level of the partner with respect to their relevant part of the profit and depending on their individual circumstances.

If the partner is a corporation, the dividend income will be subject to corporate income tax plus solidarity surcharge. See "*—Corporations.*"

If the partner is an individual, the dividend income will be subject to the partial income rule. See "*—Sole Proprietors.*"

The dividend income is subject to trade tax at the level of the partnership (provided that the partnership is liable to trade tax), unless the partnership holds at least 15% of a company's registered share capital at the beginning of the relevant assessment period, in which case the dividend income is exempt from trade tax. There are no explicit statutory provisions concerning the taxation of dividends with regard to a corporate shareholder of the partnership. However, trade tax should be levied on 5% of the dividends to the extent they are attributable to the shares of such corporate partners to whom at least 10% of the shares of the company are attributable on a look-through basis, since such portion of the dividends should be deemed to be non-deductible business expenses.

If a partner is an individual, depending on the applicable municipal trade tax rate and the individual tax situation, the trade tax paid at the level of the partnership is generally partly or entirely be credited against the partner's personal income tax liability, if further prerequisites are satisfied.

Special regulations apply if the shares are held as trading portfolio assets by a partnership that qualifies as a credit institution, a financial service institution or a financial enterprise within the meaning of the German Banking Act (*Kreditwesengesetz*). In that case the partial income rule (*Teileinkünfteverfahren*) is not applicable.

In case of a corporation being a partner, special regulations apply with respect to trading portfolio assets of credit institutions, financial service institutions or financial enterprises within the meaning of the German Banking Act (*Kreditwesengesetz*) or life insurance companies, health insurance companies or pension funds. See "*—Corporations.*"

The actual trade tax charge, if any, at the level of the partnership depends on the shareholding quota of the partnership and the nature of the partners (e.g., individual or corporation).

Taxation of Dividend Income of Shareholders Tax Resident Outside of Germany

For foreign individual or corporate shareholders tax resident outside of Germany not holding the shares through a permanent establishment in Germany or as business assets for which a permanent representative has been appointed in Germany, the deducted withholding tax (possibly reduced by way of a tax relief under a double tax treaty or domestic tax law, such as in connection with the EU Parent Subsidiary Directive) is final (that is, not refundable) and settles the shareholder's limited tax liability in Germany, unless the shareholder is entitled to apply for a withholding tax refund or exemption.

In contrast, individual or corporate shareholders tax resident outside of Germany holding the company's shares through a permanent establishment in Germany or as business assets for which a permanent representative has been appointed in Germany are subject to the same rules as applicable (and described above) to shareholders resident in Germany holding the shares as business assets. The withholding tax withheld (including solidarity surcharge) is credited against the shareholder's personal income tax or corporate income tax liability in Germany.

Taxation of Capital Gains

Withholding tax on capital gains

Capital gains realized on the disposal of shares are subject to withholding tax if a German branch of a German or foreign credit or financial institution, a German securities trading company or a German securities trading bank stores or administers or carries out the sale of the shares and pays or credits the capital gains. In those cases, the institution (and not the company) is required to deduct the withholding tax at the time of payment for the account of the shareholder and has to pay the withholding tax to the competent tax authority. In case the shares are held (i) as business assets by a sole proprietor, a partnership or a corporation and such shares are attributable to a German business or (ii) in case of a corporation being subject to unlimited corporate income tax liability in Germany, the capital gains are not subject to withholding tax. In case of clause (i), the withholding tax exemption is subject to the condition that the paying agent has been notified by the beneficiary (*Gläubiger*) that the capital gains are exempt from withholding tax. The respective notification has to be filed by using the officially prescribed form.

Taxation of Capital Gains Realized by Shareholders Tax Resident in Germany Holding Shares as Private Assets

For individual shareholders (individuals) resident in Germany holding shares as private assets, capital gains realized on the disposal of shares are subject to final withholding tax. Accordingly, capital gains will be taxed at a flat tax rate of 25% plus a 5.5% solidarity surcharge thereon (in total 26.375%) and church tax, in case the shareholder is subject to church tax because of his individual circumstances. An automatic procedure for deduction of church tax by way of withholding will apply to shareholders being subject to church tax unless the shareholder has filed a blocking notice (*Sperrvermerk*) with the German Central Federal Tax Office (details related to the computation of the concrete tax rate including church tax are to be discussed with the individual tax adviser of the relevant shareholder). The taxable capital gain is calculated by deducting the acquisition costs of the shares and the expenses directly related to the disposal from the proceeds of the disposal. Apart from that, except for an annual lump sum savings allowance (*Sparer-Pauschbetrag*) of up to €801 (for individual filers) or up to €1,602 (for married couples and for partners in accordance with the registered partnership law (*Gesetz über die Eingetragene Lebenspartnerschaft*) filing jointly), private individual shareholders will not be entitled to deduct expenses incurred in connection with the capital investment from their capital gain.

In case the flat tax results in a higher tax burden as opposed to the private shareholder's individual tax rate, the private shareholder can opt for taxation at his or her individual personal income tax rate. In that case, the withholding tax (including solidarity surcharge) withheld will be credited against the income tax. However, pursuant to the German tax authorities and case law the private shareholders are nevertheless not entitled to deduct expenses incurred in connection with the capital investment from their income. The option can be exercised only for all capital income from capital investments received in the relevant assessment period uniformly, and married couples as well as for partners in accordance with the registered partnership law filing jointly may only jointly exercise the option.

Capital losses arising from the sale of the shares can only be offset against other capital gains resulting from the disposition of the shares or shares in other stock corporations during the same calendar year. Offsetting of overall losses with other income (such as business or rental income) and other capital income is not possible. Such losses are to be carried forward and to be offset against positive capital gains deriving from the sale of shares in stock corporations in future years. In case of a derecognition or transfer of worthless shares (or other capital assets), the utilization of such loss is further restricted and can only be offset up to the amount of EUR 20,000 per calendar year.

The final withholding tax would not apply if the seller of the shares or, in the case of gratuitous transfer, its legal predecessor has held, directly or indirectly, at least 1% of the company's registered share capital at any time during the five years prior to the disposal. In that case capital gains are subject to the partial income rule (*Teileinkünfteverfahren*). Accordingly, only (i) 60% of the capital gains would be taxed at his/her individual personal income tax rate plus a 5.5% solidarity surcharge thereon and church tax (if applicable) and (ii) 60% of the business expenses related to the capital gains are deductible for tax purposes. The withholding tax withheld (including solidarity surcharge) would be credited against the shareholder's personal income tax liability in Germany.

Taxation of Capital Gains Realized by Shareholders Tax Resident in Germany Holding the Company's Shares as Business Assets

If a shareholder holds shares as business assets, the taxation of capital gains realized on the disposal of such shares depends on whether the respective shareholder is a corporation, a sole proprietor or a partnership:

Corporations

Capital gains realized on the disposal of shares by a corporate shareholder are generally exempt from corporate income tax and trade tax. However, 5% of the tax-exempt capital gains are deemed to be non-deductible business expenses for tax purposes and therefore are subject to corporate income tax (plus solidarity surcharge) and trade tax, i.e., tax exemption of 95%. Business expenses incurred in connection with the capital gains are entirely tax-deductible.

Capital losses incurred upon the disposal of shares or other impairments of the share value are not tax-deductible.

Special regulations apply if the shares are held as trading portfolio assets by a credit institution, a financial service institution or a financial enterprise within the meaning of the German Banking Act (*Kreditwesengesetz*) as well as by a life insurance company, a health insurance company or a pension fund. See "*Taxation of dividend income of shareholders tax resident in Germany holding the Company's shares as business assets—Corporations.*"

Sole Proprietors

If the shares are held by a sole proprietor, capital gains realized on the disposal of the shares are subject to the partial income rule (*Teileinkünfteverfahren*). Accordingly, only (i) 60% of the capital gains will be taxed at his/her individual personal income tax rate plus a 5.5% solidarity surcharge thereon and church tax (if applicable) and (ii) 60% of the business expenses related to the capital gains are deductible for tax purposes. In addition, 60% of the capital gains are subject to trade tax if the shares are held as business assets of a permanent establishment in Germany within the meaning of the German Trade Tax Act (*Gewerbesteuerengesetz*). The trade tax levied, depending on the applicable municipal trade tax rate and the individual tax situation, is generally partly or entirely credited (but limited to a maximum rate) against the shareholder's personal income tax liability.

Partnerships

In case the shares are held by a partnership, the partnership itself is not subject to corporate income tax or personal income tax as well as a solidarity surcharge (and church tax) since partnerships qualify as transparent for German tax purposes. In this regard, corporate income tax or personal income tax as well as a solidarity surcharge (and church tax, if applicable), are levied only at the level of the partner with respect to their relevant part of the profit and depending on their individual circumstances.

If the partner is a corporation, the capital gains will be subject to corporate income tax plus a solidarity surcharge at the level of the partner. See "*—Corporations.*" Trade tax will be levied at the level of the partnership. With respect to both corporate income and trade tax, the 95% exemption rule as described above applies.

If the partner is an individual, the capital gains are subject to the partial income rule. See "*—Sole Proprietors.*"

In addition, if the partnership is liable to trade tax, 60% of the capital gains are subject to trade tax at the level of the partnership, to the extent the partners are individuals, and 5% of the capital gains are subject to trade tax, to the extent the partners are corporations. However, if a partner is an individual, depending on the applicable municipal trade tax rate and the individual tax situation, the trade tax paid at the level of the partnership is generally partly or entirely credited against the partner's personal income tax liability (but limited to a maximum rate), if further prerequisites are satisfied.

Special regulations apply if the shares are held as trading portfolio assets by a partnership that qualifies as a credit institution, a financial service institution or a financial enterprise within the meaning of the German Banking Act (*Kreditwesengesetz*). In that case the partial income rule (*Teileinkünfteverfahren*) is not applicable.

With regard to corporate partners, special regulations apply if they are held as trading portfolio assets by credit institutions, financial service institutions or financial enterprises within the meaning of the German Banking Act or life insurance companies, health insurance companies or pension funds, as described above.

Taxation of Capital Gains Realized by Shareholders Tax Resident Outside of Germany.

Capital gains realized on the disposal of the shares by a shareholder tax resident outside of Germany are subject to German taxation provided that (i) the company's shares are held as business assets of a permanent establishment or as business assets for which a permanent representative has been appointed in Germany, or (ii) the shareholder or, in case of a gratuitous transfer, its legal predecessor has held, directly or indirectly, at least 1% of the company's shares capital at any time during a five-year period prior to the disposal. In these cases, capital gains are generally subject to the same rules as described above for shareholders resident in Germany. However, in case the shares held by a non-German tax resident corporation are not attributable to a German permanent establishment or permanent representative, the 5% taxation (see "*Taxation of capital gains realized by shareholders tax resident in Germany holding the company's shares as business assets*") as a consequence of deemed non-deductible business expenses shall not apply to such non-German tax resident shareholders and such capital gains are consequently fully exempt from German corporate income and trade tax.

However, except for the cases referred to in clause (i) above, some of the double tax treaties concluded with Germany provide for a full exemption from German taxation.

Inheritance and Gift Tax

The transfer of the shares in Sono Group N.V. to another person by way of succession or donation is subject to German inheritance and gift tax (*Erbschaft- und Schenkungsteuer*) if:

(i) the decedent, the donor, the heir, the donee or any other beneficiary has his/her/its residence, domicile, registered office or place of management in Germany at the time of the transfer, or is a German citizen who has not stayed abroad for more than five consecutive years without having a residence in Germany, or is a non-resident German citizen employed by a legal entity organized under German public law or is a dependent having German citizenship and living in the household of such citizen, if further prerequisites are satisfied; or

(ii) irrespective of the personal circumstances the shares are held by the decedent or donor as business assets for which a permanent establishment in Germany is maintained or a permanent representative is appointed in Germany; or

(iii) irrespective of the personal circumstances at least 10% of the shares are held, directly or indirectly by the decedent or donor, himself or together with a related party in terms of Section 1 para. 2 Foreign Tax Act (*Außensteuergesetz*).

Special regulations apply to qualified German citizens who maintain neither a residence nor their domicile in Germany but in a low tax jurisdiction, and to former German citizens, also resulting in inheritance and gift tax provided that certain conditions are met. The few double tax treaties on inheritance and gift tax which Germany has entered seek to prevent or mitigate a double taxation.

Abolishment of Solidarity Surcharge

The solidarity surcharge (*Solidaritätszuschlag*) has been partially abolished as of the assessment period 2021 for certain individuals. The solidarity surcharge shall, however, continue to apply for capital investment and, thus, on withholding taxes levied. In addition, the solidarity surcharge continues to apply to corporations.

Other Taxes

No German capital transfer tax (*Kapitalverkehrsteuer*), value-added tax (*Umsatzsteuer*), stamp duty (*Stempelgebühr*) or similar taxes are levied when acquiring, holding or transferring shares in a company. No

value-added tax will be levied unless the shareholder validly opts for it. Net wealth tax (*Vermögensteuer*) is currently not levied in Germany.

On January 22, 2013, the Council of the European Union approved the resolution of the ministers of finance from 11 EU member states (including Germany) to introduce a Financial Transaction Tax (“FTT”) within the framework of enhanced cooperation. On February 14, 2013, the European Commission published a proposal for a Council Directive implementing enhanced cooperation in the area of financial transaction tax. The plan focuses on levying a tax of 0.1% (0.01% for derivatives) on the purchase and sale of financial instruments.

On December 9, 2019, the German Federal Finance Minister announced another proposal for a Directive for a financial transaction tax by way of an enhanced cooperation mechanism with 9 other participating EU member states (“New FTT”). Such proposal was revised again in April 2020. In addition, the German Federal Finance Ministry further prepared the implementation of the FTT or the new FTT by the creation of a new department (*Referat*) within the Federal Finance Ministry. Such new department is referred to as “Finanztransaktionssteuer” (financial transaction tax).

The FTT and the New FTT proposal remain subject to negotiation between the participating Member States and are subject to political discussion. They may, therefore, be altered prior to the implementation, the timing of which remains unclear. Additional EU member states may decide to participate.

Prospective holders of the shares are advised to seek their own professional advice in relation to FTT.

U.S. Federal Income Tax Considerations

This section describes United States federal income tax considerations generally applicable to owning common shares. It applies to you only if you acquire your common shares in this offering and you hold your common shares as capital assets for tax purposes. This discussion addresses only United States federal income taxation and does not discuss all of the tax consequences that may be relevant to you in light of your individual circumstances, including foreign, state or local tax consequences, estate and gift tax consequences, and tax consequences arising under the Medicare contribution tax on net investment income or the alternative minimum tax. This section does not apply to you if you are a member of a special class of holders subject to special rules, including:

- a broker or dealer in securities,
- a trader in securities that elects to use a mark-to-market method of accounting for securities holdings,
- a tax-exempt organization or governmental organization,
- a tax-qualified retirement plan,
- a bank, insurance company or other financial institution,
- a real estate investment trust or regulated investment company,
- a person that actually or constructively owns 10% or more of the combined voting power of our voting stock or of the total value of our stock,
- a person that holds common shares as part of a straddle or a hedging or conversion transaction,
- a person that purchases or sells common shares as part of a wash sale for tax purposes,
- a U.S. holder (as defined below) whose functional currency is not the U.S. dollar,
- a U.S. expatriate or former citizen or long-term resident of the United States,
- a corporation that accumulates earnings to avoid U.S. federal income tax,
- an S corporation, partnership or other entity or arrangement treated as a partnership for U.S. federal income tax purposes (and investors therein), or
- a person deemed to sell common shares under the constructive sale provisions of the Internal Revenue Code of 1986.

This section is based on the Internal Revenue Code of 1986, as amended, its legislative history, existing and proposed regulations, published rulings and court decisions, all as currently in effect, as well as on the Convention Between the United States of America and Germany (the "Treaty"). These laws are subject to change, possibly on a retroactive basis.

If an entity or arrangement that is treated as a partnership for United States federal income tax purposes holds the common shares, the United States federal income tax treatment of a partner will generally depend on the status of the partner and the tax treatment of the partnership. A partner in a partnership holding the common shares should consult its tax advisor with regard to the United States federal income tax treatment of an investment in the common shares.

You are a U.S. holder if you are a beneficial owner of common shares and you are, for United States federal income tax purposes:

- a citizen or resident of the United States,
- a domestic corporation,
- an estate whose income is subject to United States federal income tax regardless of its source, or
- a trust if a United States court can exercise primary supervision over the trust's administration and one or more United States persons are authorized to control all substantial decisions of the trust.

A "non-U.S. holder" is a beneficial owner of common shares that is not a United States person and is not a partnership for United States federal income tax purposes.

You should consult your own tax advisor regarding the United States federal, state and local tax consequences of owning and disposing of shares and common shares in your particular circumstances.

Except as described below under "U.S. Holders—PFIC Rules," this discussion assumes that we are not, and will not become, a PFIC for United States federal income tax purposes.

U.S. Holders

Dividends

If you are a U.S. holder, the gross amount of any distribution we pay out of our current or accumulated earnings and profits (as determined for United States federal income tax purposes), other than certain pro-rata distributions of our shares, will be treated as a dividend that is subject to United States federal income taxation. If you are a noncorporate U.S. holder, dividends that constitute qualified dividend income will be taxable to you at the preferential rates applicable to long-term capital gains provided that you hold the common shares for more than 60 days during the 121-day period beginning 60 days before the ex-dividend date and other requirements are met. Dividends we pay with respect to the common shares generally will be qualified dividend income provided that, in the year that you receive the dividend, the common shares are readily tradable on an established securities market in the United States. Our common shares will be listed on Nasdaq and we therefore expect that dividends will be qualified dividend income.

You must include any German tax withheld from the dividend payment in this gross amount even though you do not in fact receive it. The dividend is taxable to you when you receive the dividend, actually or constructively. The dividend will not be eligible for the dividends-received deduction generally allowed to United States corporations in respect of dividends received from other United States corporations. The amount of the dividend distribution that you must include in your income will be the U.S. dollar value of the Euro payments made, determined at the spot Euro/U.S. dollar rate on the date the dividend distribution is includible in your income, regardless of whether the payment is in fact converted into U.S. dollars. Generally, any gain or loss resulting from currency exchange fluctuations during the period from the date you include the dividend payment in income to the date you convert the payment into U.S. dollars will be treated as ordinary income or loss and will not be eligible for the special tax rate applicable to qualified dividend income. The gain or loss generally will be income or loss from sources within the United States for foreign tax credit limitation purposes. Distributions in excess of current and accumulated earnings and profits, as determined for United States federal income tax purposes, will be treated as a non-taxable return of

capital to the extent of your basis in the common shares and thereafter as capital gain. However, we do not expect to calculate earnings and profits in accordance with United States federal income tax principles. Accordingly, you should expect to generally treat distributions we make as dividends.

Subject to certain limitations, the German tax withheld in accordance with the Treaty and paid over to Germany will be creditable or deductible against your United States federal income tax liability. Special rules apply in determining the foreign tax credit limitation with respect to dividends that are subject to the preferential tax rates. To the extent a reduction or refund of the tax withheld is available to you under German law or under the Treaty, the amount of tax withheld that could have been reduced or that is refundable will not be eligible for credit against your United States federal income tax liability. See “—*Material German Tax Considerations—Dividends Tax—Withholding Tax on Dividends*,” above, for the procedures for obtaining a tax refund.

Dividends will generally be income from sources outside the United States and will generally be “passive” income for purposes of computing the foreign tax credit allowable to you. However, if (a) we are 50% or more owned, by vote or value, by United States persons and (b) at least 10% of our earnings and profits are attributable to sources within the United States, then for foreign tax credit purposes, a portion of our dividends would be treated as derived from sources within the United States. With respect to any dividend paid for any taxable year, the United States source ratio of our dividends for foreign tax credit purposes would be equal to the portion of our earnings and profits from sources within the United States for such taxable year, divided by the total amount of our earnings and profits for such taxable year.

Capital Gains

If you are a U.S. holder and you sell or otherwise dispose of your common shares, you will recognize capital gain or loss for United States federal income tax purposes equal to the difference between the U.S. dollar value of the amount that you realize and your tax basis, determined in U.S. dollars, in your common shares. Capital gain of a noncorporate U.S. holder is generally taxed at preferential rates where the property is held for more than one year. The gain or loss will generally be income or loss from sources within the United States for foreign tax credit limitation purposes.

PFIC Rules

We believe that the common shares should not currently be treated as stock of a PFIC for United States federal income tax purposes and we do not expect to become a PFIC in the foreseeable future. However, this conclusion is a factual determination that is made annually and thus may be subject to change. It is therefore possible that we could become a PFIC in a future taxable year. In addition, our current position that we are not a PFIC is based in part upon the value of our goodwill which is based on the market value for our common shares. Accordingly, we could become a PFIC in the future if there is a substantial decline in the value of our common shares.

In general, if you are a U.S. holder, we will be a PFIC with respect to you if for any taxable year in which you held our common shares:

- at least 75% of our gross income for the taxable year is passive income, or
- at least 50% of the value, determined on the basis of a quarterly average, of our assets is attributable to assets that produce or are held for the production of passive income.

“Passive income” generally includes dividends, interest, gains from the sale or exchange of investment property, rents and royalties (other than certain rents and royalties derived in the active conduct of a trade or business) and certain other specified categories of income. If a foreign corporation owns at least 25% by value of the stock of another corporation, the foreign corporation is treated for purposes of the PFIC tests as owning its proportionate share of the assets of the other corporation, and as receiving directly its proportionate share of the other corporation’s income.

If we are treated as a PFIC, and you are a U.S. holder that did not make a mark-to-market election, as described below, you will generally be subject to special rules with respect to:

- any gain you realize on the sale or other disposition of your common shares and

- any excess distribution that we make to you (generally, any distributions to you during a single taxable year, other than the taxable year in which your holding period in the common shares begins, that are greater than 125% of the average annual distributions received by you in respect of the common shares during the three preceding taxable years or, if shorter, your holding period for the common shares that preceded the taxable year in which you receive the distribution).

Under these rules:

- the gain or excess distribution will be allocated ratably over your holding period for the common shares,
- the amount allocated to the taxable year in which you realized the gain or excess distribution or to prior years before the first year in which we were a PFIC with respect to you will be taxed as ordinary income,
- the amount allocated to each other prior year will be taxed at the highest tax rate in effect for that year, and
- the interest charge generally applicable to underpayments of tax will be imposed in respect of the tax attributable to each such year.

Special rules apply for calculating the amount of the foreign tax credit with respect to excess distributions by a PFIC.

If we are a PFIC in a taxable year and our common shares are treated as “marketable stock” in such year, you may make a mark-to-market election with respect to your common shares. If you make this election, you will not be subject to the PFIC rules described above. Instead, in general, you will include as ordinary income each year the excess, if any, of the fair market value of your common shares at the end of the taxable year over your adjusted basis in your common shares. You will also be allowed to take an ordinary loss in respect of the excess, if any, of the adjusted basis of your common shares over their fair market value at the end of the taxable year (but only to the extent of the net amount of previously included income as a result of the mark-to-market election). Your basis in the common shares will be adjusted to reflect any such income or loss amounts. Any gain that you recognize on the sale or other disposition of your common shares would be ordinary income and any loss would be an ordinary loss to the extent of the net amount of previously included income as a result of the mark-to-market election and, thereafter, a capital loss.

Because we do not intend to provide the information necessary for a U.S. holder to comply with the requirements of a “qualified electing fund” election, such election will not be available to you with respect to your common shares.

Your common shares will generally be treated as stock in a PFIC if we were a PFIC at any time during your holding period in your common shares, even if we are not currently a PFIC.

In addition, notwithstanding any election you make with regard to the common shares, dividends that you receive from us will not constitute qualified dividend income to you if we are a PFIC (or are treated as a PFIC with respect to you) either in the taxable year of the distribution or the preceding taxable year. Dividends that you receive that do not constitute qualified dividend income are not eligible for taxation at the preferential rates applicable to qualified dividend income. Instead, you must include the gross amount of any such dividend paid by us out of our accumulated earnings and profits (as determined for United States federal income tax purposes) in your gross income, and it will be subject to tax at rates applicable to ordinary income.

If we are a PFIC and, at any time, have a foreign subsidiary that is classified as a PFIC, you generally would be deemed to own a portion of the shares of such lower-tier PFIC, and generally could incur liability for the deferred tax and interest charge described above if we receive a distribution from, or dispose of all or part of our interest in, the lower-tier PFIC or you otherwise were deemed to have disposed of an interest in the lower-tier PFIC. A mark-to-market election generally would not be available with respect to such lower-tier PFIC.

If you own common shares during any year that we are a PFIC with respect to you, you may be required to file U.S. Internal Revenue Service (“IRS”) Form 8621.

Shareholder Reporting.

A U.S. holder that owns “specified foreign financial assets” with an aggregate value in excess of \$50,000 (and in some circumstances, a higher threshold) may be required to file an information report with respect to such assets with its tax return. “Specified foreign financial assets” may include financial accounts maintained by foreign financial institutions, as well as the following, but only if they are held for investment and not held in accounts maintained by financial institutions: (i) stocks and securities issued by non-United States persons, (ii) financial instruments and contracts that have non-United States issuers or counterparties, and (iii) interests in foreign entities. U.S. Holders are urged to contact their tax advisors regarding these filing requirements.

Non-U.S. HoldersDividends

If you are a non-U.S. holder, dividends paid to you in respect of common shares will not be subject to United States federal income tax unless the dividends are “effectively connected” with your conduct of a trade or business within the United States, and the dividends are attributable to a permanent establishment that you maintain in the United States if that is required by an applicable income tax treaty as a condition for subjecting you to United States taxation on a net income basis. In such cases you generally will be taxed in the same manner as a U.S. holder. If you are a corporate non-U.S. holder, “effectively connected” dividends may, under certain circumstances, be subject to an additional “branch profits tax” at a 30% rate or at a lower rate if you are eligible for the benefits of an income tax treaty that provides for a lower rate.

Capital Gains

If you are a non-U.S. holder, you will not be subject to United States federal income tax on gain recognized on the sale or other disposition of your common shares unless:

- the gain is “effectively connected” with your conduct of a trade or business in the United States, and the gain is attributable to a permanent establishment that you maintain in the United States if that is required by an applicable income tax treaty as a condition for subjecting you to United States taxation on a net income basis, or
- you are an individual, you are present in the United States for 183 or more days in the taxable year of the sale and certain other conditions exist.

If you are a corporate non-U.S. holder, “effectively connected” gains that you recognize may also, under certain circumstances, be subject to an additional “branch profits tax” at a 30% rate or at a lower rate if you are eligible for the benefits of an income tax treaty that provides for a lower rate.

Backup Withholding and Information Reporting

If you are a noncorporate U.S. holder, information reporting requirements, on IRS Form 1099, generally will apply to dividend payments or other taxable distributions made to you within the United States, and the payment of proceeds to you from the sale of common shares effected at a United States office of a broker.

Additionally, backup withholding may apply to such payments if you fail to comply with applicable certification requirements or (in the case of dividend payments) are notified by the IRS that you have failed to report all interest and dividends required to be shown on your federal income tax returns.

If you are a non-U.S. holder, you are generally exempt from backup withholding and information reporting requirements with respect to dividend payments made to you outside the United States by us or another non-United States payor. You are also generally exempt from backup withholding and information reporting requirements in respect of dividend payments made within the United States and the payment of the proceeds from the sale of common shares effected at a United States office of a broker, as long as either (i) the payor or broker does not have actual knowledge or reason to know that you are a United States person and you have furnished a valid IRS Form W-8 or other documentation upon which the payor or broker may rely to treat the payments as made to a non-United States person, or (ii) you otherwise establish an exemption.

Payment of the proceeds from the sale of common shares effected at a foreign office of a broker generally will not be subject to information reporting or backup withholding. However, a sale effected at a foreign office of a broker could be subject to information reporting in the same manner as a sale within the United States (and in certain cases may be subject to backup withholding as well) if (i) the broker has certain connections to the United States, (ii) the proceeds or confirmation are sent to the United States or (iii) the sale has certain other specified connections with the United States.

You generally may obtain a refund of any amounts withheld under the backup withholding rules that exceed your income tax liability by filing a refund claim with the IRS.

THE DISCUSSION ABOVE IS A GENERAL SUMMARY. IT DOES NOT COVER ALL TAX MATTERS THAT MAY BE IMPORTANT TO YOU. EACH PROSPECTIVE PURCHASER SHOULD CONSULT ITS OWN TAX ADVISOR ABOUT THE TAX CONSEQUENCES OF AN INVESTMENT IN SHARES UNDER THE INVESTOR'S OWN CIRCUMSTANCES.

UNDERWRITERS

UNDERWRITERS

We and the underwriters for the offering named below have entered into an underwriting agreement with respect to the common shares being offered. Subject to the terms and conditions of the underwriting agreement, each underwriter has severally agreed to purchase from us the number of shares of our common shares set forth opposite its name below. Berenberg Capital Markets LLC is the representative of the underwriters.

Underwriters	Number of common shares
Berenberg Capital Markets LLC	
Craig-Hallum Capital Group LLC	
Total	10,000,000

The underwriters are collectively referred to as the “underwriters”. The underwriting agreement provides that the obligations of the underwriters are subject to certain conditions precedent and that the underwriters have agreed, severally and not jointly, to purchase all of the shares sold under the underwriting agreement if any of these shares are purchased, other than those shares covered by the option to purchase additional shares described below. If an underwriter defaults, the underwriting agreement provides that the purchase commitments of the non-defaulting underwriters may be increased or the underwriting agreement may be terminated.

We have agreed to indemnify the underwriters against certain liabilities, including liabilities under the Securities Act, and to contribute to payments the underwriters may be required to make in respect of those liabilities.

The underwriters are offering the shares, subject to prior sale, when, as and if issued to and accepted by them, subject to approval of legal matters by their counsel, including the validity of the shares, and other conditions contained in the underwriting agreement, such as the receipt by the underwriters of officer’s certificates and legal opinions. The underwriters reserve the right to withdraw, cancel or modify offers to the public and to reject orders in whole or in part.

Option to Purchase Additional Shares

We have granted to the underwriters an option, exercisable for 30 days from the date of this prospectus, to purchase up to 1,500,000 additional common shares at the public offering price listed on the cover page of this prospectus, less underwriting discounts and commissions. This option is exercisable for a period of 30 days. To the extent the underwriters exercise this option, the underwriters will purchase additional shares from us in approximately the same proportion as shown in the table above.

Commissions and Discounts

The following table shows the price per common shares and total public offering price, underwriting discounts and commissions, and proceeds before expenses to us. These amounts are shown assuming both no exercise and full exercise of the underwriters’ option to purchase up to an additional 1,500,000 common shares.

We estimate that the total expenses of the offering, excluding underwriting discounts and commissions, will be approximately \$4,312,906.80 and are payable by us. We have agreed to reimburse the underwriters for up to \$25,000.00 for their Financial Industry Regulatory Authority (“FINRA”) counsel fee and for up to \$5,000.00 for their blue sky counsel fee. In accordance with FINRA Rule 5110, this reimbursed fee is deemed underwriting compensation for this offering.

	Per Common Share	Total	
		Non Exercise	Full Exercise
Public offering price	\$	\$	\$
Underwriting discounts and commissions to be paid by us			
Proceeds, before expenses, to us	\$	\$	\$

Shares sold by the underwriters to the public will initially be offered at the initial public offering price set forth on the cover of this prospectus. Any shares sold by the underwriters to securities dealers may be sold at a discount of up to \$ _____ per share from the initial public offering price. After the initial offering of the shares, the representative may change the offering price and the other selling terms. The offering of the shares by the underwriters is subject to receipt and acceptance and subject to the underwriters' right to reject any order in whole or in part.

Discretionary Discount

The underwriters do not intend to confirm sales of the shares to any accounts over which they have discretionary authority.

Pricing of the Offering

Prior to this offering, there has been no public market for our common shares. The initial public offering price will be determined by negotiations between us and the representative. In addition to prevailing market conditions, the factors to be considered in these negotiations will include:

- the history of, and prospects for, our company and the industry in which we compete;
- our past and present financial information;
- an assessment of our management; its past and present operations, and the prospects for, and timing of, our future revenues;
- the present state of our development; and
- the above factors in relation to market values and various valuation measures of other companies engaged in activities similar to ours.

We have applied to list our common shares on the Nasdaq under the symbol "SEV."

The underwriters have informed us that they do not intend sales to discretionary accounts to exceed 5% of the total number of common shares offered by them.

Stabilization

In connection with this offering, the underwriters may engage in stabilizing transactions, overallotment transactions, syndicate covering transactions, penalty bids and purchases to cover positions created by short sales.

Stabilizing transactions permit bids to purchase shares of our common shares so long as the stabilizing bids do not exceed a specified maximum, and are engaged in for the purpose of preventing or retarding a decline in the market price of the common shares while the offering is in progress.

Overallotment transactions involve sales by the underwriters of shares of our common shares in excess of the number of shares the underwriters are obligated to purchase. This creates a syndicate short position which may be either a covered short position or a naked short position. In a covered short position, the number of shares over-allotted by the underwriters is not greater than the number of shares that they may purchase pursuant to the option to purchase additional shares. In a naked short position, the number of shares involved is greater than the number of shares that the underwriters have the option to purchase. The underwriters may close out any short position by exercising their option to purchase additional shares and/or purchasing shares in the open market.

Syndicate covering transactions involve purchases of our common shares in the open market after the distribution has been completed in order to cover syndicate short positions. In determining the source of shares to close out the short position, the underwriters will consider, among other things, the price of shares available for purchase in the open market as compared with the price at which they may purchase shares through exercise of the option to purchase additional shares. If the underwriters sell more shares than could be covered by exercise of the option to purchase additional shares and, therefore, have a naked short position, the position can be closed out only by buying shares in the open market. A naked short position is

more likely to be created if the underwriters are concerned that after pricing there could be downward pressure on the price of the shares in the open market that could adversely affect investors who purchase in the offering.

Penalty bids permit the representative to reclaim a selling concession from a syndicate member when the common shares originally sold by that syndicate member are purchased in stabilizing or syndicate covering transactions to cover syndicate short positions.

These stabilizing transactions, syndicate covering transactions and penalty bids may have the effect of raising or maintaining the market price of our common shares or preventing or retarding a decline in the market price of our common shares. As a result, the price of our common shares in the open market may be higher than it would otherwise be in the absence of these transactions. Neither we nor the underwriters make any representation or prediction as to the effect that the transactions described above may have on the price of our common shares. These transactions may be effected on the Nasdaq Global Market, in the over-the-counter market or otherwise and, if commenced, may be discontinued at any time.

Passive Market Making

In connection with this offering, underwriters and selling group members may engage in passive market making transactions in our common shares on Nasdaq in accordance with Rule 103 of Regulation M under the Securities Exchange Act of 1934, as amended, during a period before the commencement of offers or sales of common shares and extending through the completion of the distribution. A passive market maker must display its bid at a price not in excess of the highest independent bid of that security. However, if all independent bids are lowered below the passive market maker's bid, such bid must then be lowered when specified purchase limits are exceeded.

Lock-Up Agreements

Pursuant to certain "lock-up" agreements, we and our management board members, all of the holders of our outstanding common shares and holders of certain mandatory convertible senior notes, have agreed, subject to certain exceptions, not to, and not to cause or direct any of its affiliates, to offer, sell, assign, transfer, pledge, contract to sell, or otherwise dispose of or announce the intention to otherwise dispose of, or enter into, or announce the intention to enter into, any swap, hedge or similar agreement or arrangement (including, without limitation, the purchase or sale of, or entry into, any put or call option, or combination thereof, forward, swap or any other derivative transaction or instrument, however described or defined) that transfers, is designed to transfer or reasonably could be expected to transfer (whether by the stockholder or someone other than the stockholder), in whole or in part, directly or indirectly the economic consequence of ownership of, directly or indirectly, or make any demand or request or exercise any right with respect to the registration of, or file with the SEC a registration statement under the Securities Act relating to, any common shares or securities convertible into or exchangeable or exercisable for any common shares without the prior written consent of Berenberg Capital Markets LLC, as representative of the underwriters, for a period of 180 days, or 90 days in case of the holders of our outstanding common shares and holders of the mandatory convertible senior notes issued between December 2020 and June 2021, after the date of the pricing of the offering.

This lock-up provision will apply to common shares and to securities convertible into or exchangeable or exercisable for common shares. The exceptions will permit us, among other things and subject to restrictions, to: (a) effect the transactions contemplated by the underwriting agreement, (b) effect the conversion of our mandatory convertible senior notes, (c) issue common shares or options pursuant to employee benefit plans, (d) issue common shares upon exercise of outstanding options or warrants, (e) file registration statements on Form S-8, (f) issue shares in connection with a merger, acquisition or strategic investment, (g) issue shares to unaffiliated collaborators, manufacturers, distributors or other similar parties or (h) issue shares to unaffiliated financial institutions or current lenders. The exceptions will permit parties to the "lock-up" agreements, among other things and subject to restrictions, to: (a) make certain gifts, (b) if the party is a corporation, partnership, limited liability company or other business entity, make transfers to any stockholders, partners, members of, or owners of similar equity interests in, the party, if such transfer is not for value, (c) if the party is a corporation, partnership, limited liability company or other business entity, make transfers in connection with the sale or transfer of all of the party's capital stock,

partnership interests, membership interests or other similar equity interests, as the case may be, or all or substantially all of the party's assets, in any such case not undertaken for the purpose of avoiding the restrictions imposed by the "lock-up" agreement, (d) enter into transactions relating to shares of our common shares acquired in open market transactions after completion of the offering, provided that no public announcement or filing is required to be made regarding such transaction during the 180-day or 90-day lock-up period, as the case may be, and (e) enter into a 10b5-1 trading plan, provided that such plan does not permit the sale of any common shares during the 180-day lock-up period and no public announcement or filing is made regarding such plan during the 180-day or 90-day lock-up period. In addition, the lock-up provision will not restrict broker-dealers from engaging in market making and similar activities conducted in the ordinary course of their business.

The representative, in its sole discretion, may release our common shares and other securities subject to the lock-up agreements described above in whole or in part at any time. When determining whether or not to release our common shares and other securities from lock-up agreements, the representative will consider, among other factors, the holder's reasons for requesting the release, the number of shares for which the release is being requested and market conditions at the time of the request. In the event of such a release or waiver for one of our management board members, the representative shall provide us with notice of the impending release or waiver at least three business days before the effective date of such release or waiver and we will announce the impending release or waiver by issuing a press release at least two business days before the effective date of the release or waiver.

Stamp Taxes

If you purchase common shares offered in this prospectus, you may be required to pay stamp taxes and other charges under the laws and practices of the country of purchase, in addition to the offering price listed on the cover page of this prospectus.

Electronic Distribution

In connection with the offering, certain of the underwriters or securities dealers may distribute prospectuses by electronic means, such as e-mail.

A prospectus in electronic format may be made available on websites maintained by one or more of the underwriters, or selling group members, if any, participating in this offering. The representative may agree to allocate a number of common shares to underwriters or selling group members for sale to their online brokerage account holders. Internet distributions will be allocated by the representative to underwriters and selling group members that may make internet distributions on the same basis as other allocations. Other than the prospectus in electronic format, the information on these websites is not part of this prospectus or the registration statement of which this prospectus forms a part, has not been approved or endorsed by us or any underwriter in its capacity as underwriter, and should not be relied upon by investors.

Other Relationships

The underwriters and their respective affiliates are full service financial institutions engaged in various activities, which may include securities sales and trading, commercial and investment banking, financial advisory, investment management, investment research, principal investment, hedging, market making, financing and brokerage and other financial and non-financial activities and services. Certain of the underwriters and their respective affiliates have provided and may in the future provide various investment banking, commercial banking and other financial advisory and investment banking services for us and our affiliates, for which they received or will receive customary fees and expenses.

In addition, in the ordinary course of their various business activities, the underwriters and their respective affiliates, officers, directors and employees may purchase, sell, make or hold a broad array of investments and actively trade debt and equity securities, derivatives, loans, commodities, currencies, credit default swaps and other financial instruments (including bank loans) for their own account and for the accounts of their customers, and such investment and trading activities may involve or relate to assets, securities and/or instruments of the issuer (directly, as collateral securing other obligations or otherwise) and/or persons and entities with relationships with the issue, and may at any time hold long and short

positions in such securities and instruments. Such investment and securities activities may involve our securities and instruments. The underwriters and their respective affiliates may also communicate independent investment recommendations market color, or trading ideas and/or publish or express independent research views in respect of such assets, securities or instruments and may at any time hold, or recommend to clients that they acquire, long and/or short positions in such securities and instruments.

An affiliate of Berenberg Capital Markets LLC acquired 258,917 of our common shares in a private placement that occurred prior to the filing of the registration statement for this offering. Following the issuance of additional common shares to all of our existing shareholders immediately prior to the pricing of this offering, as described elsewhere in this prospectus, the affiliate of Berenberg Capital Markets LLC will own 442,748 of our common shares (the “Acquired Shares”). Such Acquired Shares will be deemed underwriting compensation in connection with this offering and will be subject to lock-up restrictions, as required by FINRA Rule 5110(e)(1). The Acquired Shares may not be sold, transferred, assigned, pledged, or hypothecated, or be the subject of any hedging, short sale, derivative, put, or call transaction that would result in the effective economic disposition of such securities for a period of 180 days beginning on the date of commencement of sales of this offering, except as provided in FINRA Rule 5110(e)(2).

Selling Restrictions

Notice to Prospective Investors in the European Economic Area

In relation to each Member State of the European Economic Area (each a “Relevant State”), no shares have been offered or will be offered to the public in that Relevant State in connection with this offering prior to the publication of a prospectus in relation to the shares that has been approved by the competent authority in that Relevant State or, where appropriate, approved by the competent authority in another Relevant State and notified to the competent authority in that Relevant State, all in accordance with the Prospectus Regulation, except that offers of shares may be made to the public in that Relevant State at any time under the following exemptions under the Prospectus Regulation:

- (a) to any legal entity which is a qualified investor as defined in the Prospectus Regulation;
- (b) to fewer than 150 natural or legal persons (other than qualified investors as defined in the Prospectus Regulation), subject to obtaining the prior consent of the representative of the underwriters named above for any such offer; or
- (c) in any other circumstances falling within Article 1(4) of the Prospectus Regulation,

provided that no such offer of shares shall require us or any representative of the underwriters named above to publish a prospectus pursuant to Article 3 of the Prospectus Regulation or supplement a prospectus pursuant to Article 23 of the Prospectus Regulation. Neither we nor the representative of the underwriters named above have authorized, nor do they authorize, the making of any offer of shares in circumstances in which an obligation arises for us or the underwriters to publish a prospectus for such offer pursuant to Article 3 of the Prospectus Regulation or supplement a prospectus pursuant to Article 23 of the Prospectus Regulation.

Each person in a Relevant State who initially acquires any shares or to whom any offer is made will be deemed to have represented, acknowledged and agreed to and with our Company and the representative of the underwriters named above that it is a qualified investor within the meaning of the Prospectus Regulation.

In the case of any shares being offered to a financial intermediary as that term is used in Article 5(1) of the Prospectus Regulation, each such financial intermediary will be deemed to have represented, acknowledged and agreed to and with our Company and the representative of the underwriters named above that the shares acquired by it in the offer have not been acquired on a non-discretionary basis on behalf of, nor have they been acquired with a view to their offer or resale to, persons in circumstances which may give rise to an offer of shares to the public other than their offer or resale in a Relevant State to qualified investors within the meaning of the Prospectus Regulation, in circumstances in which the prior consent of the representative of the underwriters named above has been obtained to each such proposed offer or resale.

We, the representative of the underwriters named above and our and its respective affiliates will rely upon the truth and accuracy of the foregoing representations, acknowledgements and agreements.

For the purposes of this selling restriction, the expression an “offer to the public” in relation to any shares in any Relevant State means the communication in any form and by any means of sufficient information on the terms of the offer and any shares to be offered so as to enable an investor to decide to purchase or subscribe for any shares, and the expression “Prospectus Regulation” means Regulation (EU) 2017/1129.

This selling restriction is in addition to any other selling restrictions set out below.

Notice to Prospective Investors in the United Kingdom

In relation to the United Kingdom, no shares have been offered or will be offered to the public in the United Kingdom in connection with this offering prior to the publication of a prospectus in relation to the shares that either (i) has been approved by the Financial Conduct Authority or (ii) is to be treated as if it had been approved by the Financial Conduct Authority in accordance with the transitional provisions in Regulation 74 of the Prospectus (Amendment etc.) (EU Exit) Regulations 2019, except that offers of shares may be made to the public in the United Kingdom at any time under the following exemptions under the UK Prospectus Regulation:

- (a) to any legal entity which is a qualified investor as defined in Article 2 of the UK Prospectus Regulation;
- (b) to fewer than 150 natural or legal persons (other than qualified investors as defined in Article 2 of the UK Prospectus Regulation), subject to obtaining the prior consent of the representative of the underwriters named above for any such offer; or
- (c) in any other circumstances falling within section 86 of the Financial Services and Markets Act 2000 (as amended, the “FSMA”),

provided that no such offer of shares shall require us or the representative of the underwriters named above to publish a prospectus pursuant to section 85 of the FSMA or supplement a prospectus pursuant to Article 23 of the UK Prospectus Regulation. Neither we nor the representative of the underwriters named above have authorized, nor do they authorize, the making of any offer of shares in circumstances in which an obligation arises for us or the underwriters to publish a prospectus for such offer pursuant to section 85 of the FSMA or supplement a prospectus pursuant to Article 23 of the UK Prospectus Regulation.

Each person in the United Kingdom who initially acquires any shares or to whom any offer is made will be deemed to have represented, acknowledged and agreed to and with our Company and the representative of the underwriters named above that it is a qualified investor within the meaning of the UK Prospectus Regulation.

In the case of any shares being offered to a financial intermediary as that term is used in Article 5(1) of the UK Prospectus Regulation, each such financial intermediary will be deemed to have represented, acknowledged and agreed to and with our Company and the representative of the underwriters named above that the shares acquired by it in the offer have not been acquired on a non-discretionary basis on behalf of, nor have they been acquired with a view to their offer or resale to, persons in circumstances which may give rise to an offer of shares to the public other than their offer or resale in the United Kingdom to qualified investors within the meaning of the UK Prospectus Regulation, in circumstances in which the prior consent of the representative of the underwriters named above has been obtained to each such proposed offer or resale.

We, the representative of the underwriters named above and our and its respective affiliates will rely upon the truth and accuracy of the foregoing representations, acknowledgements and agreements.

For the purposes of this selling restriction, the expression an “offer to the public” in relation to any shares in the United Kingdom means the communication in any form and by any means of sufficient information on the terms of the offer and any shares to be offered so as to enable an investor to decide to purchase or subscribe for any shares, and the expression “UK Prospectus Regulation” means Regulation (EU) 2017/1129 as it forms part of domestic law by virtue of the European Union (Withdrawal) Act 2018

In the United Kingdom, this document is for distribution only to persons who (i) have professional experience in matters relating to investments and who qualify as investment professionals within the meaning of Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 (as amended, the “Financial Promotion Order”), (ii) are persons falling within Article 49(2)(a) to (d) (“high net worth companies, unincorporated associations etc.”) of the Financial Promotion Order, or (iii) are persons to whom an invitation or inducement to engage in investment activity (within the meaning of Section 21 of the FSMA) in connection with the issue or sale of any securities may otherwise lawfully be communicated or caused to be communicated (all such persons together being referred to as “relevant persons”). This document is directed only at relevant persons and must not be acted on or relied on by persons who are not relevant persons. Any investment or investment activity to which this document relates is available only to relevant persons and will be engaged in only with relevant persons.

Notice to Prospective Investors in Canada

The shares may be sold only to purchasers purchasing, or deemed to be purchasing, as principal that are accredited investors, as defined in National Instrument 45-106 *Prospectus Exemptions* or subsection 73.3(1) of the *Securities Act* (Ontario), and are permitted clients, as defined in National Instrument 31-103 *Registration Requirements, Exemptions and Ongoing Registrant Obligations*. Any resale of the shares must be made in accordance with an exemption from, or in a transaction not subject to, the prospectus requirements of applicable securities laws.

Securities legislation in certain provinces or territories of Canada may provide a purchaser with remedies for rescission or damages if this prospectus (including any amendment thereto) contains a misrepresentation, provided that the remedies for rescission or damages are exercised by the purchaser within the time limit prescribed by the securities legislation of the purchaser’s province or territory. The purchaser should refer to any applicable provisions of the securities legislation of the purchaser’s province or territory for particulars of these rights or consult with a legal advisor.

Pursuant to section 3A.3 (or, in the case of securities issued or guaranteed by the government of a non-Canadian jurisdiction, section 3A.4) of National Instrument 33-105 *Underwriting Conflicts* (NI 33-105), the underwriters are not required to comply with the disclosure requirements of NI 33-105 regarding underwriter conflicts of interest in connection.

Notice to Prospective Investors in Switzerland

The securities will not be offered, directly or indirectly, to the public in Switzerland and this prospectus does not constitute a public offering prospectus as that term is understood pursuant to article 652a or 1156 of the Swiss Federal Code of Obligations.

Notice to Prospective Investors in Hong Kong

The shares have not been offered or sold and will not be offered or sold in Hong Kong, by means of any document, other than (a) to “professional investors” as defined in the Securities and Futures Ordinance (Cap. 571 of the Laws of Hong Kong) (the “SFO”) of Hong Kong and any rules made thereunder; or (b) in other circumstances which do not result in the document being a “prospectus” as defined in the Companies (Winding Up and Miscellaneous Provisions) Ordinance (Cap. 32) of Hong Kong) (the “CO”), or which do not constitute an offer to the public within the meaning of the CO. No advertisement, invitation or document relating to the shares has been or may be issued or has been or may be in the possession of any person for the purposes of issue, whether in Hong Kong or elsewhere, which is directed at, or the contents of which are likely to be accessed or read by, the public of Hong Kong (except if permitted to do so under the securities laws of Hong Kong) other than with respect to shares which are or are intended to be disposed of only to persons outside Hong Kong or only to “professional investors” as defined in the SFO and any rules made thereunder.

Notice to Prospective Investors in Singapore

Each underwriter has acknowledged that this prospectus has not been registered as a prospectus with the Monetary Authority of Singapore. Accordingly, each underwriter has represented and agreed that it has not offered or sold any shares or caused the shares to be made the subject of an invitation for subscription

or purchase and will not offer or sell any shares or cause the shares to be made the subject of an invitation for subscription or purchase, and has not circulated or distributed, nor will it circulate or distribute, this prospectus or any other document or material in connection with the offer or sale, or invitation for subscription or purchase, of the shares, whether directly or indirectly, to any person in Singapore other than:

- (a) to an institutional investor (as defined in Section 4A of the Securities and Futures Act (Chapter 289) of Singapore, as modified or amended from time to time (the “SFA”)) pursuant to Section 274 of the SFA;
- (b) to a relevant person (as defined in Section 275(2) of the SFA) pursuant to Section 275(1) of the SFA, or any person pursuant to Section 275(1A) of the SFA, and in accordance with the conditions specified in Section 275 of the SFA; or
- (c) otherwise pursuant to, and in accordance with the conditions of, any other applicable provision of the SFA.

Where the shares are subscribed or purchased under Section 275 of the SFA by a relevant person which is:

- (a) a corporation (which is not an accredited investor (as defined in Section 4A of the SFA)) the sole business of which is to hold investments and the entire share capital of which is owned by one or more individuals, each of whom is an accredited investor; or
- (b) a trust (where the trustee is not an accredited investor) whose sole purpose is to hold investments and each beneficiary of the trust is an individual who is an accredited investor,

securities or securities-based derivatives contracts (each term as defined in Section 2(1) of the SFA) of that corporation or the beneficiaries’ rights and interest (however described) in that trust shall not be transferred within six months after that corporation or that trust has acquired the shares pursuant to an offer made under Section 275 of the SFA except:

- (i) to an institutional investor or to a relevant person, or to any person arising from an offer referred to in Section 275(1A) or Section 276(4)(i)(B) of the SFA;
- (ii) where no consideration is or will be given for the transfer;
- (iii) where the transfer is by operation of law;
- (iv) as specified in Section 276(7) of the SFA; or
- (v) as specified in Regulation 37A of the Securities and Futures (Offers of Investments) (Securities and Securities-based Derivatives Contracts) Regulations 2018.

Singapore SFA Product Classification—In connection with Section 309B of the SFA and the CMP Regulations 2018, unless otherwise specified before an offer of shares, we have determined, and hereby notify all relevant persons (as defined in Section 309A(1) of the SFA), that the shares are “prescribed capital markets products” (as defined in the CMP Regulations 2018) and Excluded Investment Products (as defined in MAS Notice SFA 04-N12: Notice on the Sale of Investment Products and MAS Notice FAA-N16: Notice on Recommendations on Investment Products).

Notice to Prospective Investors in Australia

This prospectus is not a disclosure document for the purposes of Australia’s Corporations Act 2001 (Cth) of Australia, or Corporations Act, has not been lodged with the Australian Securities & Investments Commission and is only directed to the categories of exempt persons set out below. Accordingly, if you receive this prospectus in Australia:

You confirm and warrant that you are either:

- a “sophisticated investor” under section 708(8)(a) or (b) of the Corporations Act;

- a “sophisticated investor” under section 708(8)(c) or (d) of the Corporations Act and that you have provided an accountant’s certificate to the Company which complies with the requirements of section 708(8)(c)(i) or (ii) of the Corporations Act and related regulations before the offer has been made; or
- a “professional investor” within the meaning of section 708(11)(a) or (b) of the Corporations Act

To the extent that you are unable to confirm or warrant that you are an exempt sophisticated investor or professional investor under the Corporations Act any offer made to you under this prospectus is void and incapable of acceptance.

You warrant and agree that you will not offer any of the common shares issued to you pursuant to this prospectus for resale in Australia within 12 months of those securities being issued unless any such resale offer is exempt from the requirement to issue a disclosure document under section 708 of the Corporations Act.

Notice to Investors in the People’s Republic of China

This prospectus has not been and will not be circulated or distributed in the People’s Republic of China (“PRC”), and no securities may be offered or sold, or will be offered or sold, to any person for re-offering or resale, directly or indirectly, to any resident of the PRC except pursuant to applicable laws and regulations of the PRC.

We have not authorized and do not authorize the making of any offer of securities through any financial intermediary on our behalf, other than offers made by the underwriters and their respective affiliates, with a view to the final placement of the securities as contemplated in this document. Accordingly, no purchaser of the shares, other than the underwriters, is authorized to make any further offer of shares on our behalf or on behalf of the underwriters.

EXPENSES OF THE OFFERING

Set forth below is an itemization of the total expenses, excluding underwriting discounts and commissions, that we expect to incur in connection with the offer and sale of our common shares. With the exception of the Securities and Exchange Commission registration fee, the Nasdaq listing fee and the FINRA filing fee, all of these amounts are estimates.

<u>Expenses</u>	<u>Amount</u>
U.S. Securities and Exchange Commission registration fee	\$ 17,057
FINRA filing fee	28,100
Nasdaq listing fee	25,000
Legal fees and expenses	1,800,000
Accounting fees and expenses	1,362,000
Corporate advisory fees and expenses	200,000
Printing fee	144,000
Other fees and expenses	736,750
Total	\$4,312,907

LEGAL MATTERS

The validity of the common shares and certain other matters of Dutch law will be passed upon for us by NautaDutilh N.V. We are also being represented as to certain matters of U.S. federal law and New York state law by Sullivan & Cromwell LLP. The underwriters are being represented as to certain matters of U.S. federal law and New York state law by Skadden, Arps, Slate, Meagher & Flom (UK) LLP.

EXPERTS

The financial statements as of December 31, 2020 and 2019 and for the years then ended included in this prospectus have been so included in reliance on the report (which contains explanatory paragraphs relating to the Company's restatement of its financial statements and the Company's ability to continue as a going concern as described in Notes 4 and 5.11.1 to the financial statements, respectively) of PricewaterhouseCoopers GmbH Wirtschaftsprüfungsgesellschaft, an independent registered public accounting firm, given on the authority of said firm as experts in auditing and accounting. PricewaterhouseCoopers GmbH Wirtschaftsprüfungsgesellschaft is a member of the Chamber of Public Accountants (*Wirtschaftsprüferkammer*), Berlin, Germany.

The current address of PricewaterhouseCoopers GmbH Wirtschaftsprüfungsgesellschaft, is Bernhard-Wicki-Straße 8, 80636 Munich, Germany.

ENFORCEMENT OF CIVIL LIABILITIES

We are organized and existing under the laws of The Netherlands, and, as such, under Dutch private international law rules the rights of our shareholders and the civil liability of our management board members, supervisory board members and executive officers are governed in certain respects by the laws of The Netherlands. The ability of our shareholders in certain countries other than The Netherlands to bring an action against us, our management board members, supervisory board members and executive officers may be limited under applicable law. In addition, substantially all of our assets are located outside the United States.

As a result, it may not be possible for shareholders to effect service of process within the United States upon us or our management board members, supervisory board members and executive officers or to enforce judgments against us or them in U.S. courts, including judgments predicated upon the civil liability provisions of the federal securities laws of the United States. In addition, it is not clear whether a Dutch court would impose civil liability on us or any of our management board members, supervisory board members and executive officers in an original action based solely upon the federal securities laws of the United States brought in a court of competent jurisdiction in The Netherlands.

As of the date of this prospectus, the United States and The Netherlands do not have a treaty providing for the reciprocal recognition and enforcement of judgments, other than arbitration awards, in civil and commercial matters. With respect to choice of court agreements in civil or commercial matters, it is noted that the Hague Convention on Choice of Court Agreements entered into force for The Netherlands, but has not entered into force for the United States. Accordingly, a judgment rendered by a court in the United States, whether or not predicated solely upon U.S. securities laws, would not automatically be recognized and enforced by the competent Dutch courts. However, if a person has obtained a judgment rendered by a court in the United States that is enforceable under the laws of the United States and files a claim with the competent Dutch court, the Dutch court will in principle give binding effect to a foreign judgment if (i) the jurisdiction of the foreign court was based on a ground of jurisdiction that is generally acceptable according to international standards, (ii) the judgment by the foreign court was rendered in legal proceedings that comply with the Dutch standards of proper administration of justice including sufficient safeguards (*behoorlijke rechtspleging*), (iii) binding effect of such foreign judgment is not contrary to Dutch public order (*openbare orde*) and (iv) the judgment by the foreign court is not incompatible with a decision rendered between the same parties by a Dutch court, or with a previous decision rendered between the same parties by a foreign court in a dispute that concerns the same subject and is based on the same cause, provided that the previous decision qualifies for recognition in The Netherlands. Even if such a foreign judgment is given binding effect, a claim based thereon may, however, still be rejected if the foreign judgment is not or no longer formally enforceable.

Based on the lack of a treaty as described above, U.S. investors may not be able to enforce against us or our management board members, supervisory board members or certain experts named herein who are residents of The Netherlands or countries other than the United States any judgments obtained in U.S. courts in civil and commercial matters, including judgments under the U.S. federal securities laws.

The United States and Germany currently do not have a treaty providing for the reciprocal recognition and enforcement of judgments, in civil and commercial matters. Consequently, a final judgment for payment or declaratory judgments given by a court in the United States, whether or not predicated solely upon U.S. securities laws, would not automatically be recognized or enforceable in Germany. German courts may deny the recognition and enforcement of a judgment rendered by a U.S. court if they consider the U.S. court not to be competent or the decision to be in violation of German public policy principles. For example, judgments awarding punitive damages are generally not enforceable in Germany. A German court may reduce the amount of damages granted by a U.S. court and recognize damages only to the extent that they are necessary to compensate actual losses or damages.

In addition, actions brought in a German court against us, our management board and supervisory board and the experts named herein to enforce liabilities based on U.S. federal securities laws may be subject to certain restrictions. In particular, German courts generally do not award punitive damages. Litigation in Germany is also subject to rules of procedure that differ from the U.S. rules, including with respect to the taking and admissibility of evidence, the conduct of the proceedings and the allocation of costs. German

procedural law does not provide for pre-trial discovery of documents, nor does Germany support pre-trial discovery of documents under the 1970 Hague Evidence Convention. Proceedings in Germany would have to be conducted in the German language and all documents submitted to the court would, in principle, have to be translated into German. For these reasons, it may be difficult for a U.S. investor to bring an original action in a German court predicated upon the civil liability provisions of the U.S. federal securities laws against us, our management board and supervisory board and the experts named in this prospectus.

WHERE YOU CAN FIND MORE INFORMATION

We have filed with the U.S. Securities and Exchange Commission a registration statement (including amendments and exhibits to the registration statement) on Form F-1 under the Securities Act. This prospectus, which is part of the registration statement, does not contain all of the information set forth in the registration statement and the exhibits and schedules to the registration statement. For further information, we refer you to the registration statement and the exhibits and schedules filed as part of the registration statement. If a document has been filed as an exhibit to the registration statement, we refer you to the copy of the document that has been filed. Each statement in this prospectus relating to a document filed as an exhibit is qualified in all respects by the filed exhibit.

Upon completion of this offering, we will become subject to the informational requirements of the Exchange Act. Accordingly, we will be required to file reports and other information with the SEC, including annual reports on Form 20-F and reports on Form 6-K. The SEC maintains an Internet website that contains reports and other information about issuers, like us, that file electronically with the SEC. The address of that website is www.sec.gov.

As a foreign private issuer, we are exempt under the Exchange Act from, among other things, the rules prescribing the furnishing and content of proxy statements, and our executive officers, management board members, supervisory board members and principal shareholders are exempt from the reporting and short-swing profit recovery provisions contained in Section 16 of the Exchange Act. In addition, we will not be required under the Exchange Act to file periodic reports and financial statements with the SEC as frequently or as promptly as U.S. companies whose securities are registered under the Exchange Act.

We will send the transfer agent a copy of all notices of shareholders' meetings and other reports, communications and information that are made generally available to shareholders. The transfer agent has agreed to mail to all shareholders a notice containing the information (or a summary of the information) contained in any notice of a meeting of our shareholders received by the transfer agent and will make available to all shareholders such notices and all such other reports and communications received by the transfer agent.

Our SEC filings, including the registration statement on Form F-1, are also available to you on the SEC's website at <http://www.sec.gov>.

NOTES TO THE INTERIM CONSOLIDATED FINANCIAL STATEMENTS

1. Basis of preparation of interim financial statements

These consolidated interim financial statements for the interim reporting period ended June 30, 2021, have been prepared in accordance with accounting standard IAS 34 Interim Financial Reporting as issued by the International Accounting Standards Board (“IASB”).

The consolidated interim financial statements do not include all the notes of the type normally included in annual financial statements. Accordingly, these interim financial statements are to be read in conjunction with the annual financial statements for the year ended December 31, 2020.

The accounting policies adopted are consistent with those of the previous financial year and corresponding interim reporting period.

The Group did not have to change its accounting policies or make retrospective adjustments as a result of adopting new standards.

All figures shown are rounded, so minor discrepancies may arise from addition of these amounts.

2. General information

Sono Group N.V. (“Sono N.V.”) is registered in the business register (Netherlands Chamber of Commerce) and its corporate seat is in Amsterdam. The Company has its business exclusively in Germany as the management is located there and the business address is Waldmeisterstraße 76, 80935 Munich, Germany (trade register number: 80683568). Sono N.V.’s sole (and wholly-owned) subsidiary, Sono Motors GmbH (“Sono Motors”), is registered in the commercial register (*Handelsregister*) at the local court (*Amtsgericht*) of Munich/Germany under HRB 224131. Sono Motors’ registered headquarter is Waldmeisterstraße 76, 80935 Munich, Germany. Hereinafter, Sono N.V. and its consolidated subsidiary is referred to as the “Sono Group”. Sono Group develops and plans to sell mainly electric vehicles with integrated solar panels, started business in January 2016, expects to complete prototype testing in 2022 and start serial production in the first half of 2023 subject to sufficient financing available (see 3.1. Going concern).

In the second half-year 2020 Sono Group undertook a reorganization pursuant to which (i) Sono Motors founded Sono Motors Finance B.V. (a Dutch corporation), (ii) the shareholders of Sono Motors transferred their shares in Sono Motors as non-cash contribution to Sono Motors Finance B.V. in exchange for newly-issued shares of Sono Motors Finance B.V. and (iii) Sono Motors Finance B.V. was converted into a “naamloze vennootschap” (N.V.) and changed its legal name from Sono Motors Finance B.V. to Sono Group N.V. (collectively, the “Reorganization”).

3. Significant accounting matters

3.1. Going concern

Management assessed Sono Group’s ability to continue as a going concern, evaluating whether there are conditions and events, considered in the aggregate, that raise substantial doubt about its ability to continue as a going concern using all information available about the future, focusing on the twelve-month period following the issuance date of the condensed consolidated interim financial statements.

As of June 30, 2021, Sono Group had an accumulated deficit of kEUR 108,808 (Dec 31, 2020: kEUR 83,123), of which kEUR 28,128 is not covered by equity (as of Dec 31, 2020: kEUR 5,026 not covered by equity). Sono Group has financed its operations to date primarily through capital raises and loans from shareholders and private investors as well as through advance payments received from customers. Since its inception Sono Group has incurred recurring losses and negative cash flows from operations. In the six months ended June 30, 2021, the Sono Group had net losses for the period of kEUR 25,686 (June 30, 2020: kEUR 9,829). The Group expects to continue to generate operating losses for the foreseeable future until the start of production of the Sion and possibly later. While the Sono Group seeks to increase monetization of its solar technology, it is not anticipated that the Group will generate commercial revenue or positive operating cash flows from vehicle sales of the Sion until the start of production or later.

Management anticipates in its current plan that the Sion will generate high one-digits gross margins in the mid-term after start of production (SOP). In addition, management expects revenues from emission certificate pooling under relevant EU regulations on CO2 target emissions ("CO2 pooling") and from the monetization of their solar technology and other expected revenues from after-sales and the sharing business.

The Group's ability to continue as a going concern is largely dependent on its ability to raise additional funds through debt or equity transactions, additional advance payments, or other means, and ultimately, to achieve serial production of the Sion. It is uncertain if sufficient financing can be obtained to continue as a going concern and further to achieve serial production of the Sion. The Group's forecasted cash required to fund operations, excluding future financing efforts, indicates that the Group does not have sufficient funds to support operations through the twelve-month period from the issuance date of these financial statements. Accordingly, there is substantial doubt about the Group's ability to continue as a going concern within twelve months from the date that these financial statements are issued.

Based on the cash position as of August 31, 2021 and the Group's business plan (excluding any targeted proceeds from an initial public offering ("IPO")), as of August 31, 2021, the Group would become insolvent by December 2021 or shortly thereafter if no additional financing can be raised.

Securing the financing of development activities and operations represents an ongoing challenge for the Sono Group. Structural changes in the German and international automotive industry in the recent past as well as changes in the capital markets have made it difficult to attract large, strategic investors. Additionally, the ongoing corona-pandemic may negatively affect the Group's business, liquidity and financial position going forward (see note 3.2.).

Sono Group's management plans to address this going concern uncertainty by raising the required financing through an IPO before December 2021 and is seeking proceeds of at least mEUR 149, which are expected to be used mainly to finalize the development of the prototype SVC 3 which is the basis for the serial production and thus an important milestone in the business plan of the Sono Group. As further financing is currently uncertain, the IPO proceeds will also be used to maintain liquidity until May 2023 (including a reserve of mEUR 39 to maintain the ability to repay customer advance payments) to meet legal financial obligations, to pay ongoing overhead cost and to maintain going concern of the Company until May 2023. Additional financing will be necessary to undertake additional development activities for the car and solar technology to begin serial production and pay overhead costs.

The timely realization of the IPO transaction with the proceeds of at least mEUR 149 as well as obtaining further required financing, based on management's current estimates, of at least mEUR 205 (by a second offering or other means of financing) is crucial for the Sono Group's ability to achieve start of serial production within the first half of 2023. For the period after SOP, the management expects that the operating business can stay solvent primarily based on the anticipated sales and (if necessary) further financing means such as a working capital credit line. There is no certainty that Sono Group will be successful in obtaining sufficient funding on terms acceptable to the Group or even obtain additional funding at all. If the Group is unable to obtain additional funding in due time, (unsuccessful IPO or insufficient volume of the IPO transaction, unsuccessful second offering, inability to raise other means of funding or if funding needs increase beyond the current projections) Sono Motors will be forced to delay, reduce, or eliminate some or all of its development activities and production efforts and, subsequently, could be subject to cancellations and demands for repayment of advance payments received from customers and other financing received, which will lead to a liquidity shortage or may even lead to the insolvency of the Sono Group.

The condensed consolidated interim financial statements have been prepared on a going concern basis, which contemplates the realization of assets and satisfaction of liabilities and commitments in the ordinary course of business. The condensed consolidated interim financial statements do not include any adjustments relating to the recoverability and classification of recorded asset amounts or the amounts and classification of liabilities that may result from the outcome of this uncertainty.

3.2. Corona pandemic

COVID-19 is still the globally dominant topic. In the first half-year 2021, successful vaccination campaigns led to the lowering of state and private measures. In line with the economic recovery associated

with these reliefs, the automotive industry in Germany expects a slight increase in the number of vehicles sold in 2021 as compared to the prior year, but expectations are still below the pre-COVID-19 level. With regard to the Group, in the first half of 2021, COVID-19 had a slightly negative impact on advance payments received from customers. The current situation continues to recover compared to the year 2020 but is still negative compared to the pre-COVID-19 state.

The continuing COVID-19 measures may stabilize the existing trend to work from home, which could result in lower demand for cars and could negatively impact the Group's sales and marketing activities. The pandemic may also affect the interest of Sono Motors' customers in their car-sharing and ride-pooling networks. Based on the most recent information, COVID-19 might continue to have a negative effect on advance payments received from customers in 2021. Other than that, Sono Motors cannot yet foresee the full extent of COVID-19's impact on its business and operations and such impact will depend on future developments of the outbreak, including new information concerning the global severity of and actions taken to contain the ongoing pandemic, which are highly uncertain and unpredictable. These aspects could have a material impact on Sono Motors' result from operations, liquidity and capital management, including financing. Sono Motors will continue to monitor the situation and the effect of this development on its liquidity and capital management. At the same time, Sono Motors has taken actions to maintain operations and protect employees from infection.

4. Segment information

An operating segment is defined as a component of an entity for which discrete financial information is available and whose operating results are regularly reviewed by the management (chief operating decision maker within the meaning of IFRS 8). Sono Motors is a start-up company that has not yet started production. As all Group's activities relate to the development of the solar electrical car, the Sion, and the solar technology and as management makes decisions about allocating resources and assessing performance based on the entity as a whole, management has determined that Sono Group operates in one operating and reportable business segment. Furthermore, Sono Group is currently solely active in Germany and therefore all noncurrent assets are located in Germany. Thus, Sono Group does not report any additional segment information.

5. Income statement disclosures

5.1. Significant events and transactions

Sono Motors is still in an early development phase. Due to the ongoing development of the Group and its core product, the Group's operations were more extensive in the first half of 2021 than they were in the first half of the previous year. Consequently, there were increases in several line items in the consolidated statement of income (loss). In particular, the continuing and expanded development of prototypes led to a significant increase in the cost of research and development. The hiring of additional staff with administrative tasks and the augmented use of professional services also increased general and administrative expenses. The Conversion Stock Option Program (CSOP) remuneration model has also only been accounted for since the second half of 2020. As the Group has not entered serial production yet, selling and distribution expenses have risen to a smaller extent, as compared to the first half of 2020.

5.2. Cost of research and development

The table below presents details on the cost of research and development:

	Six months ended June 30, 2021	Six months ended June 30, 2020
	kEUR	kEUR
Personnel expenses	3,115	1,692
Development cost of prototypes	8,787	3,981
Professional services	380	128
Other development	655	464
Depreciation and amortization	105	85
Other	433	66
	<u>13,475</u>	<u>6,416</u>

There are no research expenses included in the profit and loss of Sono Group in the first half-year 2021 and prior periods, as the Group does not perform research. As the recognition criteria for development cost have not been met, all development expenses have been recognized in profit or loss as incurred in the first half of 2021 and prior periods.

5.3. General and administrative expenses

The below table displays details included in general and administrative expenses:

	Six months ended June 30, 2021	Six months ended June 30, 2020
	kEUR	kEUR
Personnel expenses	2,695	821
thereof related to the CSOP (IFRS 2)	1,165	—
Professional services	3,216	500
Impairment	1,882	—
Other	475	209
	<u>8,268</u>	<u>1,530</u>

The personnel expenses concern mainly employees responsible for Finance, Human Resources, Business Development, Administration etc. and the share of the employee participation program (CSOP) attributable to them. The professional services include accounting, tax and legal services as well as other external services. The increase of expenses for professional services mainly concerns professional services related to the initial preparation of consolidated financial statements in accordance with IFRS and their audit under consideration of PCAOB requirements as well as legal and tax opinions prepared in this context.

In the first half of 2021, an impairment loss of kEUR 1,882 for assets intended for the development of prototypes has been recognized in the general and administrative expense. For details, please refer to section 6.1.

6. Balance sheet disclosures

6.1. Property, plant and equipment

The decrease in property, plant and equipment (kEUR 526, Dec 31,2020: kEUR 2,102) is mainly due to the impairment of the advances paid in the amount of kEUR 1,882.

The impairment loss of kEUR 1,882 included in the general and administrative expense relates to advance payments on assets intended for the tooling of batteries that had been recognized in 2020. Management has determined that, due to an unforeseen change in the specifications of the battery, the assets that the advance payments referred to were no longer needed in the Group's development of prototypes. As the Group may not be able to reclaim the payments made under the contract with the supplier of the tools, the advance payments' fair value (determined as the market value of reclaimable payments at level 1 of the fair value hierarchy) and recoverable amount are EUR 0. It cannot be ruled out that the supplier of the tool will still assert additional claims from this, but the company considers this to be very unlikely.

6.2. Other current financial assets

The other current financial assets as of June 30, 2021 (kEUR 5,241; Dec 31,2020: kEUR 5,404) mainly consist of PayPal reserves (kEUR 4,980; Dec 31,2020: kEUR 4,655), receivables from crowdfunding and deposits (kEUR 226; Dec 31,2020: kEUR 179) and debtor creditors (kEUR 19; Dec 31,2020: kEUR 539).

The PayPal reserve relates to the reclassification of the specific reserve imposed by PayPal due to the crowdfunding campaign. Since March 2020, Sono Motors has no access to the PayPal reserve and it is unclear when the reserve will be released by PayPal. The PayPal reserve is classified as current asset because the Company expects that the reserve will ultimately be released within twelve months from the balance sheet date. The principal reason for the accumulation of the reserve in 2020 was the unexpectedly high volume of transactions as a result of the crowdfunding campaign in 2020. As a result, PayPal asserted that they

are exposed to heightened risk in relation to the Company's balance and withheld the total amount of payments received. However, the Company's legal advisor has advised the Company that PayPal has no legal basis to continue withholding the reserve and concluded that the Company could legally enforce a claim for the release of the reserve. As of August 17, 2021, the Company started the process to file a complaint against PayPal due to the unlawful withholding of account balances.

6.3. Other current non-financial assets

Other current non-financial assets as of June 30, 2021 (kEUR 3,185; Dec 31,2020: kEUR 579) mainly consist of prepaid expenses (kEUR 1,102; Dec 31,2020: kEUR 256), of which kEUR 302 relate to directly attributable costs to the planned IPO transaction, VAT receivables (kEUR 1,686; Dec 31,2020: kEUR 257) and advance payments made (kEUR 386; Dec 31,2020: kEUR 20).

6.4. Equity

Total equity of Sono Group comprises subscribed capital, capital and other reserves, and accumulated deficit. The subscribed capital amounts to kEUR 6,472 and is divided into 35,871,333 member shares with a par value of EUR 0.06 (ordinary shares) and EUR 1.50 (high voting shares). During the first half-year of 2021 an amount of 68,136 new shares have been issued relating to two new investors. Capital reserves include any amounts paid in by the owners that exceed the member shares' par value. Other reserves include mainly effects from equity-settled stock-option. Accumulated deficit consists of losses from prior periods.

6.5. Advance payments received from customers

The below table shows the noncurrent advance payments received from customers:

	<u>June 30, 2021</u>	<u>Dec. 31, 2020</u>
	kEUR	kEUR
Advance payments received from customers	<u>40,693</u>	<u>38,972</u>
	<u>40,693</u>	<u>38,972</u>

Depending on the general terms and conditions, in some cases, a cancellation by the customer is possible in less than twelve months. Customers may provide their advance payments in several installments, the latest of which determines the applicable cancellation policy. As of June 30, 2021, for customers who made their latest installment on or before November 30, 2019, cancellation is possible at any time. For customers who made their latest installment on or before November 25, 2020, but later than November 30, 2019, cancellation is possible on January 1, 2022, or later. For customers who made their latest installment later than November 25, 2020, cancellation is possible on July 1, 2023, or later. Deviating from these conditions, in November 2020, Sono Group approached all German-speaking customers that had made their latest installment during the Crowdfunding Campaign from December 1, 2019, until and including January 20, 2020, and asked them to accept a change in the terms and conditions to waive their cancellation right until December 31, 2022. In effect, those customers who accepted the change may cancel their advance payment on January 1, 2023, or later.

As of June 30, 2021, currently 11% are cancelable. 20% will be cancelable from January 1, 2022, 64% will be cancelable from January 1, 2023, and 5% will be cancelable from July 1, 2023. The percentages calculated are based on the nominal values of the advance payments excluding IFRS adjustments (interest effect).

As of December 31, 2020, currently 11% are cancelable. 1% will be cancelable from January 1, 2021, 21% will be cancelable from January 1, 2022, 66% will be cancelable from January 1, 2023, and 1% will be cancelable from July 1, 2023.

Sono Group expects to recognize revenue from vehicle sales with start of production in the first half of 2023.

The table below shows the development of the advance payments received from customers:

	Balance as of Jan. 1, 2021	Additions	Repayment	Interest effect	Balance as of June 30, 2021
	kEUR	kEUR	kEUR	kEUR	kEUR
Advance payments received from customers	38,972	1,403	-488	806	40,693
	<u>38,972</u>	<u>1,403</u>	<u>-488</u>	<u>806</u>	<u>40,693</u>

	Balance as of Jan. 1, 2020	Additions	Repayment	Interest effect	Balance as of Dec. 31, 2020
	kEUR	kEUR	kEUR	kEUR	kEUR
Advance payments received from customers	11,164	30,565	-4,116	1,360	38,972
	<u>11,164</u>	<u>30,565</u>	<u>-4,116</u>	<u>1,360</u>	<u>38,972</u>

In the first half year 2020 Sono Group raised significant additions to advanced payments due to campaign efforts. The potential customers acquired reservations for future vehicles.

6.6. Financial liabilities

The below table shows the composition of the financial liabilities:

	June 30, 2021	Dec. 31, 2020
	kEUR	kEUR
Other financial liabilities	14,369	12,765
Lease liabilities	3,334	1,958
	<u>17,703</u>	<u>14,723</u>

7. Disclosure of financial instruments

Trade and other payables	2,874	FLAC	n/a*	n/a

* The carrying amount approximately equals the fair value, thus no separate fair value disclosure is needed according to IFRS 7.29

All financial assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorized with the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1—Inputs use quoted prices in active markets for identical assets or liabilities
- Level 2—Inputs are inputs, other than quoted prices included in Level 1, which are directly or indirectly observable
- Level 3—Inputs are unobservable and have values estimated by management based on market participant assumptions which are reasonably available

Due to their short nature, the carrying amounts of the cash and cash equivalents and other current financial assets and liabilities approximate their fair value. The fair value of noncurrent financial assets and liabilities is determined by applying the discounted cash flow method (valuation technique). In doing so, future cash flows resulting from the financial asset or liability are discounted using an interest rate derived from an estimated credit rating. In case of noncurrent financial assets, the counterparties are reputable financial institutions, thus credit risk has no significant influence on fair value, which leads to level 2.

As of June 30, 2021, management has determined that the fair values of noncurrent financial liabilities at amortized cost remain unchanged at level 3 as the credit rating is a non-observable input factor with significant influence on the fair value.

As of June 30, 2021, management has determined that the fair values of noncurrent financial liabilities at fair value through profit or loss, which consists solely of mandatory convertible notes, are level 3 as the assumptions for future payouts are a non-observable input factors with significant influence on the fair value.

The finance department of Sono Group performs valuations for financial instruments classified as fair value through profit & loss. Discussions of valuation processes and results are held between the CFO and the valuation team as well as external consultants.

The main level 3 inputs used by the group are derived and evaluated as follows:

- Discount rates for financial liabilities reflect current market assessments of the time value of money and the risk specific to the liabilities.
- Expected cash outflows are estimated based on contractual terms and the management's knowledge of probabilities of occurrence of possible contractual payouts and of possible events.

The following table summarizes the quantitative information about significant unobservable inputs used in level 3 fair value measurement:

Description	Fair value at June 30, 2021 kEUR	Unobservable input	Range of inputs (most likely outcome) June 30, 2021	Relationship of unobservable inputs to fair value
Mandatory convertible notes	8,520	Probability of an 'exit event' (IPO or SPAC) in the fourth quarter of 2021	50% – 100% (90%)	An increase of the probability to 100% (absolute) would increase FV by kEUR 907, A decrease of the probability to 50% (absolute) would decrease FV by kEUR – 3,630,

Description	Fair value at Dec. 31, 2020 kEUR	Unobservable input	Range of inputs (most likely outcome) Dec. 31, 2020	Relationship of unobservable inputs to fair value
Mandatory convertible notes	6,859	Probability of an 'exit event' (IPO or SPAC) in the second quarter of 2021	50% – 100% (75%)	An increase of the probability to 100% (absolute) would increase FV by kEUR 2,170, A decrease of the probability to 50% (absolute) would decrease FV by kEUR – 2,170,

Differences may arise between the fair value at initial recognition (which, in accordance with IFRS 13 and IFRS 9, is generally the transaction price) and the amount determined at initial recognition using the valuation technique.

The following table presents the changes in level 3 items for the periods ended June 30, 2021:

	June 30, 2021 kEUR	Dec. 31, 2020 kEUR
Balance at beginning of period	6,859	—
New transactions	—	6,800
Amount presented in other comprehensive income	106	21
Amount presented in profit or loss (interest and other expenses)	1,555	38
Balance at end of period	<u>8,520</u>	<u>6,859</u>

For the financial liability designated as at fair value through profit or loss in accordance with IFRS 9.4.3.5, the cumulative change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability is kEUR -126 (Dec 31, 2020: kEUR -21). The difference between the financial

liability's carrying amount and the amount Sono Group would be contractually required to pay at maturity is kEUR 1 (December 31, 2020 kEUR 1,662).

8. Other disclosures

8.1. Earnings per share

Basic earnings per share is calculated by dividing earnings attributable to Sono N.V. shareholders by the weighted average number of ordinary and high voting shares outstanding during the reporting period. Since the Company generated a loss for each of the periods presented, any outstanding options would be anti-dilutive. The high voting shares entitle the shareholders to additional voting rights, but not to higher dividend rights.

Sono Motors has received a loan amounting to kEUR 185 from Sono Motors Investment UG in 2019. The loan was due December 31, 2020, interest-paying at arm's length (4 % p.a.) and unsecured and was paid back on January 5, 2021.

8.3. Subsequent events

IPO

Sono N.V. is currently in preparation of listing on a US stock exchange ("IPO") as part of an initial public offering (IPO) and thus, raising additional capital. For further details regarding the legal reorganization in this context, we refer to note 1.

Report of Independent Registered Public Accounting Firm

To the Management Board and Shareholders of Sono Group N.V.

Opinion on the Financial Statements

We have audited the accompanying consolidated balance sheets of Sono Group N.V. (the “Company”) as of December 31, 2020, December 31, 2019 and January 1, 2019, and the related consolidated statements of income (loss) and of comprehensive income (loss), changes in equity and cash flows for the years ended December 31, 2020 and 2019, including the related notes (collectively referred to as the “consolidated financial statements”). In our opinion, the consolidated financial statements present fairly, in all material respects, the financial position of the Company as of December 31, 2020, December 31, 2019 and January 1, 2019, and the results of its operations and its cash flows for the years ended December 31, 2020 and 2019 in conformity with International Financial Reporting Standards as issued by the International Accounting Standards Board.

Restatement of Previously Issued Financial Statements

As discussed in Note 4 to the consolidated financial statements, the Company has restated its 2019 financial statements to correct an error.

Substantial Doubt about the Company’s Ability to Continue as a Going Concern

The accompanying consolidated financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 5.11.1. to the consolidated financial statements, the Company has incurred recurring losses since inception, expects to continue to generate operating losses for the foreseeable future, has a net capital deficiency as of December 31, 2020 and is dependent on additional financing to continue development, commence serial production and meet repayment obligations for advance payments received from customers and other financing received that raise substantial doubt about its ability to continue as a going concern. Management’s plans in regard to these matters are also described in Note 5.11.1. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty.

Basis for Opinion

These consolidated financial statements are the responsibility of the Company’s management. Our responsibility is to express an opinion on the Company’s consolidated financial statements based on our audits. We are a public accounting firm registered with the Public Company Accounting Oversight Board (United States) (PCAOB) and are required to be independent with respect to the Company in accordance with the U.S. federal securities laws and the applicable rules and regulations of the Securities and Exchange Commission and the PCAOB.

We conducted our audits of these consolidated financial statements in accordance with the standards of the PCAOB. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the consolidated financial statements are free of material misstatement, whether due to error or fraud.

Our audits included performing procedures to assess the risks of material misstatement of the consolidated financial statements, whether due to error or fraud, and performing procedures that respond to those risks. Such procedures included examining, on a test basis, evidence regarding the amounts and disclosures in the consolidated financial statements. Our audits also included evaluating the accounting principles used and significant estimates made by management, as well as evaluating the overall presentation of the consolidated financial statements. We believe that our audits provide a reasonable basis for our opinion.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS

1. General information

Sono Group N.V. (“Sono N.V.”) is registered in the business register (Netherlands Chamber of Commerce) and its corporate seat is in Amsterdam. The Company has its business exclusively in Germany as the management is located there and the business address is Waldmeisterstraße 76, 80935 Munich, Germany (trade register number: 80683568). Sono N.V.’s sole (and wholly-owned) subsidiary, Sono Motors GmbH (“Sono Motors”), is registered in the commercial register (*Handelsregister*) at the local court (*Amtsgericht*) of Munich/Germany under HRB 224131. Sono Motors’ registered headquarters is Waldmeisterstraße 76, 80935 Munich, Germany. Hereinafter, Sono N.V. and its consolidated subsidiary is referred to as the “Sono Group.” Sono Group develops and plans to sell mainly electric vehicles with integrated solar panels, started business in January 2016, expects to complete prototype testing in 2021 and start serial production in the first half of 2023.

In 2020, in preparation for a potential initial public offering (“IPO”), Sono Group undertook a reorganization pursuant to which (i) Sono Motors founded Sono Motors Finance B.V. (a Dutch corporation), (ii) the shareholders of Sono Motors transferred their shares in Sono Motors as non-cash contribution to Sono Motors Finance B.V. in exchange for newly-issued shares of Sono Motors Finance B.V. and (iii) Sono Motors Finance B.V. was converted into a “naamloze vennootschap” (N.V.) and changed its legal name from Sono Motors Finance B.V. to Sono Group N.V. (collectively, the “Reorganization”).

2. Basis of preparation

The consolidated financial statements of Sono Group have been prepared in accordance with International Financial Reporting Standards (IFRS) as issued by the International Accounting Standards Board (IASB), and are prepared in euro, which is also the Group’s functional currency. Unless otherwise stated, all amounts are given in thousands of euros (“kEUR”).

The consolidated financial statements as of December 31, 2020 have been authorized by the management board for presentation to the shareholders on March 19, 2021.

In 2020 Sono Group performed a legal reorganization. The reorganization was applied fully retrospectively, so that the accounts reflect the respective carrying values. The earnings per share calculation has been adjusted as well for 2019. The Equity statement has not been adjusted but represents the legal status as of every balance sheet date.

These consolidated financial statements are prepared on a historical cost basis under the going concern assumption which contemplates the realization of assets and the settlement of liabilities and commitments in the normal course of business. The consolidated financial statements do not reflect any adjustments relating to the recoverability and classification of assets or the amounts and classification of liabilities that might be necessary if the Group is unable to continue as a going concern. In accordance with IAS 1.25, management identified material uncertainties related to events or conditions regarding Sono Group’s financing that raise substantial doubt upon its ability to continue as a going concern. For further details, we refer to note 5.11.1 Going concern.

The significant accounting policies adopted in the preparation of these consolidated financial statements are described below. These accounting policies have been consistently applied to all years presented. For the change in accounting policies with respect to advance payments received from customers please refer to note 4 Change in accounting policies and errors (IAS 8).

The preparation of consolidated financial statements requires the use of certain accounting estimates. The areas that require a higher degree of judgment or complexity, or areas where assumptions and estimates are significant to the consolidated financial statements, are disclosed below.

All figures shown are rounded, so minor discrepancies may arise from addition of these amounts.

The income statement was prepared using the cost of sales method.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)**3. Basis of consolidation**

The consolidated financial statements reflect the assets, liabilities and results of operations of Sono N.V. and its sole (and wholly-owned) subsidiary Sono Motors, over which Sono N.V. has control. Control over an entity exists when Sono Group is exposed to, or has rights to, variable returns from its involvement with the entity and has the ability to affect those returns through its power to direct the activities of the entity. Controlled subsidiaries are fully consolidated from the date on which control is transferred to Sono Group.

The fiscal year of both Group entities corresponds to the calendar year ending December 31.

All intra-group assets and liabilities, equity, income, expenses and cash flows relating to transactions between members of the Sono Group are eliminated upon consolidation.

The assets and liabilities of both companies included in the consolidated financial statements are recognized in accordance with the uniform accounting policies used within the Sono Group.

The consolidation process involves adjusting the items in the separate financial statements of the parent and its subsidiary and presenting them as if they were those of a single economic entity. Intercompany profits or losses are eliminated in Group noncurrent assets. Deferred taxes, if any, are recognized for consolidation adjustments, and deferred tax assets and liabilities are offset where taxes are levied by the same tax authority and have the same maturity.

4. Change in accounting policies and errors (IAS 8)**Correction of an error**

Through December 31, 2019, Sono Group accounted for advance payments from customers as financial liabilities in accordance with IFRS 9. During 2020, prompted by the prevalence of these transactions in 2020, Sono Group re-evaluated and determined that these advance payments should have been accounted for as contract liabilities in accordance with IFRS 15 given the commitment to deliver a car to customers

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)

4. Change in accounting policies and errors (IAS 8) (continued)

(if they so choose) in exchange for the advance payment. In accordance with IAS 8, *Accounting policies, changes in accounting estimates and errors*, the error has been corrected retrospectively as summarized below:

	As of and for the Year Ended December 31, 2019			As of January 1, 2019

The respective disclosures in the notes to these consolidated financial statements have been corrected accordingly.

Standards issued but not yet effective

Certain new accounting standards and interpretations have been published that are not mandatory for the consolidated financial statements as of December 31, 2020 and have not been early adopted by Sono N.V. These standards are not expected to have a material impact on Sono N.V.'s consolidated financial statements in the current or future reporting periods and on foreseeable future transactions.

5. Significant accounting policies

5.1. Grants from government agencies and similar bodies

Sono N.V. receives grants from government agencies and similar bodies like the European Union for the participation in specific research and development projects. The grants are recognized when there is reasonable assurance that the grant will be received, and all grant conditions will be met. If grant funds are received prior to qualifying expenses being incurred or assets purchased, they are deferred and recognized in other liabilities. If the funds reimburse expenses, the liability is amortized into other operating income on a systematic basis over the period in which the corresponding expenses are incurred. If the funds reimburse

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)**5. Significant accounting policies (continued)**

purchased assets, the liability is reduced with a corresponding amount deducted from the asset's carrying amount upon recording of the qualified asset.

5.2. Financial instruments**Initial recognition**

A financial instrument is any contract that gives rise to a financial asset of one entity and a financial liability or equity instrument of another entity. Sono Group initially recognizes financial instruments when it becomes party to the instrument. Regular way purchases and sales of financial assets are recognized on trade date, i.e., the date on which the Group commits to purchase or sell the asset.

Offsetting of financial assets and financial liabilities

Financial assets and liabilities are only offset if offsetting the amounts is legally enforceable at the current time and if there is an actual intention to offset. In general, the Group does not offset financial assets and liabilities and no material offsetting potential exists.

5.2.1. Financial assets**Initial measurement**

Sono Group's financial assets include cash and cash equivalents, deposits and other financial receivables. In the reporting year, Sono Group has not incurred any revenues and thus has not recognized any trade receivables. At initial recognition, Sono Group measures a financial asset at its fair value plus, in the case of a financial asset not at fair value through profit or loss, transaction costs that are directly attributable to the acquisition of the financial asset.

After the initial measurement, financial assets are subsequently classified as either measured at amortized cost (AC), fair value through other comprehensive income (FVOCI), or fair value through profit or loss (FVPL). The classification depends on the financial asset's contractual cash flow characteristics and the business model ('hold to collect', 'hold to collect and sell' and 'other') for managing them. Assets that are held for collection of contractual cash flows (business model 'hold to collect'), where those cash flows represent solely payments of principal and interest (SPPI), are measured at amortized cost. The SPPI-test is performed at an instrument level, whereby the business model is assessed on portfolio level.

Subsequent measurement

Management has determined that all financial assets are to be measured at amortized cost as they are held within the business model 'hold to collect' and have passed the SPPI-test.

Financial assets at amortized cost are subsequently measured using the effective interest (EIR) method and are subject to impairment. Gains and losses are recognized in the statement of profit or loss when the asset is derecognized, modified or impaired.

Derecognition

A financial asset (or, where applicable, a part of a financial asset or part of a group of similar financial assets) is primarily derecognized when Sono Group no longer has the contractual rights to the asset or the rights to receive cash flows from the asset have expired.

Impairment

The expected credit loss (ECL) model under IFRS 9 takes in loss allowances for financial assets for which there are no objective indications of impairment and loss allowances for financial assets that are credit impaired. An allowance for ECLs is to be recognized for all debt instruments not held at fair value through profit or loss. ECLs are based on the difference between the contractual cash flows due in accordance with the contract and all the cash flows that Sono Group expects to receive, discounted at an approximation

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)**5. Significant accounting policies (continued)**

of the original EIR. The expected cash flows will include cash flows from the sale of collateral held or other credit enhancements that are integral to the contractual terms.

For the calculation of impairment losses, IFRS 9 distinguishes between the general approach and the simplified approach.

Under the general approach, financial assets are allocated to one of three stages. For financial assets not yet credit-impaired at initial recognition, ECLs are provided for credit losses that result from default events that are possible within the next 12 months (12-month ECL, Stage 1). For credit exposures for which there has not been a significant increase in credit risk since initial recognition, 12-month ECL are provided. For those credit exposures for which there has been a significant increase in credit risk since initial recognition, a loss allowance is required for credit losses expected over the remaining life of the exposure, irrespective of the timing of the default (lifetime ECL, Stage 2). Financial assets with objective indications of default are allocated to Stage 3, for which also lifetime expected credit losses are calculated. Under the simplified approach, the ECLs are consistently determined for the entire life of the assets.

Sono Group applies the general approach unless the simplified approach is required. The simplified approach is required for trade receivables or contract assets resulting from transactions within the scope of IFRS 15 that do not contain a significant financing component. As of the reporting date, such trade receivables and contract assets are not recognized on the balance sheet of Sono Group as the Group has not incurred any revenues.

Sono Group generally presumes all financial assets that are 30 days past due to have a significant increase in credit risk and accounts for expected losses over the remaining lifetime of those financial assets. Sono Group presumes a default, based on experience and the business conduct within Sono Group's line of business, to occur when financial assets are 90 days past due (Stage 3). However, due to the manageable number and respective gross carrying amount of financial assets in Sono Group's statements of financial position, Sono Group decided to test all financial assets, regardless of their maturity, individually for expected credit loss, using reasonable and supportable historic and forward-looking information.

5.2.2. Financial liabilities**Initial measurement**

Sono Group's financial liabilities include lease liabilities, loans from shareholders and private investors, participation rights, and trade and other payables. Regarding lease liabilities, please refer to note 5.5.2 Lease liabilities.

All financial liabilities in the scope of IFRS 9 are initially measured at their fair value minus, in the case of financial liabilities not at fair value through profit or loss (FVPL), transaction costs that are directly attributable to the issue of the financial liabilities. In case of financial liabilities at FVPL, transaction costs are directly recognized through profit or loss. After initial measurement, the financial liabilities are subsequently classified as measured either at amortized cost or fair value through profit or loss.

Sono Group analyzes all contracts to determine whether the underlying contracts are debt or equity.

An embedded derivative in a hybrid contract, with a financial liability or non-financial host, is separated from the host and accounted for as a separate derivative if: the economic characteristics and risks are not closely related to the host; a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and the hybrid contract is not measured at fair value through profit or loss. Reassessment of bifurcation requirement only occurs if there is either a change in the terms of the contract that significantly modifies the cash flows that would otherwise be required. Separately accounted for embedded derivatives are measured at fair value with changes in fair value recognized in profit or loss.

Subsequent measurement

The measurement of financial liabilities of Sono Group depends on their classification as follows:

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)**5. Significant accounting policies (continued)**

1. Financial liabilities at fair value through profit or loss (FVPL): This category solely consists of mandatory convertible loans that contain one or more embedded derivatives and are designated as at fair value through profit or loss in accordance with IFRS 9.4.3.5. by Sono Group. Gains and losses are recognized in the income statement.
2. Financial liabilities measured at amortized cost (FLAC): After initial recognition, these are measured at amortized cost using the EIR method. Gains and losses are recognized in profit or loss when the liabilities are derecognized as well as in case of amortization using EIR method. Amortization according to the EIR method is included in interest expenses in the profit and loss account. Amortized cost is calculated by considering any discount or premium on acquisition and fees or costs that are an integral part of the EIR.

Derecognition

A financial liability is derecognized when the obligation under the liability is discharged or cancelled or expires. When an existing financial liability is replaced by another from the same lender on substantially different terms, or the terms of an existing liability are substantially modified, such an exchange or modification is treated as the derecognition of the original liability and the recognition of a new liability. The difference between the carrying amount of a financial liability (or part of a financial liability) extinguished or transferred to another party and the consideration paid, including any non-cash assets transferred or liabilities assumed, is recognized in profit or loss.

5.3. Intangible assets**5.3.1. Internally generated intangible assets**

In accordance with IAS 38, research activities undertaken with the prospect of gaining new scientific or technical knowledge and understanding are expensed as incurred.

Development costs for future series products (Sion, Sono Digital and Sono Solar) and other internally generated intangible assets may be capitalized at cost if they are directly attributable to the design and testing of identifiable and unique products controlled by Sono Group and the criteria of IAS 38.57 are met. Capitalized development costs then must include all direct costs that are attributable to the development process.

If the criteria for recognition of assets are not met, the expenses are recognized in the income statement in the year in which they are incurred.

As of the end of the reporting period as well as in prior years, Management has determined that the criteria for capitalization of development costs have not been met, given the fact that financing to finalize the development activities is not yet readily available. Consequently, all development costs were recognized in profit or loss as incurred.

5.3.2. Acquired intangible assets

Acquired intangible assets are initially measured at cost and amortized over their useful life using the straight-line method.

5.3.3. Subsequent measurement

Following initial recognition, intangible assets are carried at cost less any accumulated amortization and any accumulated impairment losses. There were no triggering events identified in 2020 and in prior periods that would require an impairment test.

Intangible assets with finite useful lives are amortized over their useful life, generally using the straight-line method. The amortization period and the amortization method for an intangible asset with a finite useful

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)

5. Significant accounting policies (continued)

life are reviewed at least annually at each fiscal year end. Changes in the expected useful life or the expected pattern of consumption of future economic benefits are accounted for prospectively. Amortization of an intangible asset is reported in the statement of profit or loss and other comprehensive income in accordance with the function of the intangible asset.

Gains or losses arising from derecognition of an intangible asset are measured as the difference between the net disposal proceeds and the carrying amount of the asset and are recognized in the statement of profit or loss in the period in which the asset is derecognized.

The estimated useful live for the website is 1 to 4 years.

5.4. Property, plant and equipment

Property, plant and equipment are stated at cost less accumulated depreciation and impairments. These costs also comprise the costs for replacement parts, which are recognized at the time they are incurred, providing they meet the recognition criteria. All other repair and maintenance costs are expensed as incurred. Depreciation begins with the start of use.

Property, plant and equipment are depreciated using the straight line-method over the useful life as displayed in the below table:

	Equipment / Hardware	Advance payments to technical equipment and machinery
Useful life (years)	3 - 13	—

Impairment losses on property, plant and equipment are recognized in accordance with IAS 36 where the recoverable amount of the respective asset has fallen below the carrying amount. Recoverable amount is the higher of value in use and fair value less costs to sell. If the reasons for impairments recognized in previous years no longer apply, the impairment losses are reversed up to a maximum of the amount that would have been determined if no impairment loss had been recognized.

There were no triggering events identified in 2020 and prior periods that would require an impairment test. There were also no reversals of impairments in the fiscal year 2020 and prior periods.

Property, plant and equipment are derecognized upon disposal or when no further economic benefits are expected from their continued use or sale. The gain or loss on derecognition is determined as the difference between the net disposal proceeds and the carrying amount and recognized in profit or loss in the period in which the item is derecognized.

The residual values of the assets, useful lives and depreciation methods are reviewed at the end of each fiscal year and any changes are accounted for prospectively.

The residual values of the assets are generally considered to be zero.

5.5. Leases

Applying IFRS 16, at inception of a contract, Sono Group assesses whether a contract is, or contains, a lease. A contract is, or contains, a lease if the contract conveys the right to control the use of an identified asset for a period in exchange for consideration.

5.5.1. Right-of-use assets

Sono Group recognizes right-of-use assets at the commencement date of the lease (i.e., the date the underlying asset is available for use). Right-of-use assets are measured at cost, less any accumulated depreciation and impairment losses, and adjusted for any remeasurement of lease liabilities. The cost of right-of-use assets includes the amount of lease liabilities recognized, initial direct costs incurred, and lease

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)**5. Significant accounting policies (continued)**

payments made at or before the commencement date less any lease incentives received as well as any estimated costs to be incurred by the lessee for dismantling and removing the underlying asset. Unless Sono Group is reasonably certain to obtain ownership of the leased asset at the end of the lease term, the recognized right-of-use assets are depreciated on a straight-line basis over the shorter of its estimated useful life, and the lease term. Right-of-use assets are subject to impairment according to IAS 36.

5.5.2. Lease liabilities

At the commencement date of the lease, Sono Group recognizes lease liabilities measured at the present value of lease payments to be made over the lease term. The lease payments include fixed payments (including in-substance fixed payments) less any lease incentives receivable, variable lease payments that depend on an index or a rate, and amounts expected to be paid under residual value guarantees. The lease payments also include the exercise price of a purchase option reasonably certain to be exercised by Sono Group and payments of penalties for terminating a lease, if the lease term reflects Sono Group exercising the option to terminate. The variable lease payments that do not depend on an index or a rate are recognized as expenses in the period on which the event or condition that triggers the payment occurs. In calculating the present value of lease payments, Sono Group uses the incremental borrowing rate at the lease commencement date if the interest rate implicit in the lease is not readily determinable. After the commencement date, the amount of lease liabilities is increased to reflect the accretion of interest and reduced for the lease payments made. In addition, the carrying amount of lease liabilities is remeasured if there is a modification, a change in the lease term, a change in the in-substance fixed lease payments or a change in the assessment to purchase the underlying asset.

When the lease liability is remeasured, a corresponding adjustment is made to the carrying amount for the right-of-use asset or is recorded in profit or loss if the carrying amount of the right-of-use asset has been reduced to zero.

5.5.3. Short-term leases and leases of low-value assets

Sono Group applies the short-term lease recognition exemption to its short-term leases of buildings and cars (i.e., leases that have a lease term of twelve months or less from the commencement date and do not contain a purchase option). It also applies the lease of low-value assets recognition exemption to leases of office equipment that are considered of low value. Lease payments on short-term leases (contracts with a term of twelve months or less) and leases of low-value assets (Sono Group threshold of fair value of leased asset < kEUR 5) are recognized as expense on a straight-line basis over the lease term.

5.6. Cash and cash equivalents

Cash and cash equivalents include PayPal accounts to the extent that these can be disposed of at short notice (regular rolling reserve), bank balances on demand and money in transit with an original maturity of three months or less.

5.7. Advance payments received from customers

Advance payments received from customers are recognized at the time the cash is collected by Sono Group. As the expected delivery of the car is in 2023, all advance payments are shown as longterm, even though some of the customers might be able to cancel their contract (depending on the general terms in some cases cancellation is possible in less than 12 months) and demand the money back. Due to an original term of the advance payments which is more than 12 months, the advance payments include a significant financing component according to IFRS 15.60. The compounding effect is recognized in interest expense and increases the advance payments received from customers. Sales revenues from advance payments received from customers will be recognized at the point of delivery of the car.

5.8. Provisions

Provisions for bonus and settlement payments or any other obligations are recognized when the group has a present legal or constructive obligation as a result of past events, if it is probable that an outflow of

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)

5. Significant accounting policies (continued)

resources will be required to settle the obligation, and the amount can be reliably estimated. Provisions are not recognized for future operations.

Provisions are measured at the present value of management's best estimate of the expenditure required to settle the present obligation at the end of the reporting period. As of December 31, 2020, and 2019, there were no provisions to be discounted.

5.9. Taxes

5.9.1. Current tax assets and liabilities

Current tax assets and liabilities are measured at the amount expected to be recovered from or paid to the taxation authorities based on the tax rates and tax laws that are enacted or substantively enacted at the end of the reporting period.

5.9.2. Deferred taxes

Deferred tax is recognized using the liability method on temporary differences as of the end of the reporting period between the carrying amounts of assets and liabilities and their tax bases.

Deferred tax liabilities are recognized for all taxable temporary differences. The only exception is if the deferred income tax arises from initial recognition of an asset or liability in a transaction other than a business combination which, at the time of the transaction, affects neither accounting profit nor loss nor taxable profit or loss.

Deferred tax assets are recognized for deductible temporary differences and to the extent that it is probable that future taxable income will allow the deferred tax asset to be realized. Deferred tax liabilities are recognized for all taxable temporary differences associated with investments in subsidiaries and associates, except where the Group is able to control the reversal of the temporary differences and it is probable that the temporary difference will not reverse in the foreseeable future. However, only up to 60% of the taxable income, to the extent such taxable income exceeds an amount of kEUR 1,000, may be offset against carry forward tax losses. The remaining 40% of the taxable income are subject to corporate income and trade tax under the so-called minimum taxation rules. Taxable income for corporate income tax and trade tax purposes of up to an amount of kEUR 1,000 could fully be offset against tax loss carry forwards.

Deferred tax assets and deferred tax liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized, or the liability is settled based on tax rates (and tax laws) that have been enacted or substantively enacted by the end of the reporting period.

If transactions and other events are recognized directly in equity, any related taxes on income are also recognized directly in equity. Although transaction costs are recognized in the capital reserve, no corresponding (deferred) tax effects are recognized due to the loss situation of Sono Group and the fact that deferred taxes for losses carryforwards were not recognized.

Deferred tax assets and deferred tax liabilities are offset if there is a legally enforceable right to offset current tax assets and current tax liabilities and these relate to income taxes levied by the same tax jurisdiction.

5.9.3. Tax losses carried forward

Based on Management's estimation, a deferred tax asset is recognized for the tax losses carried forward to the extent that it is probable that future taxable profit will be available against which the unused tax losses and unused tax credits can be utilized. Only up to 60% of our annual taxable income, to the extent such taxable income exceeds kEUR 1,000, may be offset against tax loss carry forwards. The remaining 40% of the taxable income are subject to corporate income and trade tax under the so-called minimum taxation rules. Annual taxable income for corporate income tax and trade tax purposes of up to kEUR 1,000 could fully be offset against tax loss carry forwards. For further information regarding the tax losses carried forward see note 5.11.5 Recoverability of deferred tax assets in relation to loss carryforwards.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)**5. Significant accounting policies (continued)****5.10. Share-based payment**

Share-based payment transaction include:

- a) equity-settled share-based payment transactions,
- b) cash-settled share-based payment transactions, and
- c) transactions in which the entity receives or acquires goods or services and the terms of the arrangement provide either the entity or the supplier of those goods or services with a choice of whether the entity settles the transaction in cash (or other assets) or by issuing equity instrument and are accounted for in accordance with IFRS 2.

For equity-settled share-based payment transactions, on grant date, Sono Group initially measures the fair value of the received services by reference to the fair value of the equity instruments granted. Sono Group recognizes the fair value of the goods or services as expenses and a corresponding increase in equity when the services are received.

Vesting conditions, other than market conditions, are not considered when estimating the fair value of the equity instruments at the measurement date. Instead, vesting conditions, other than market conditions, are considered by adjusting the number of equity instruments included in the measurement of the transaction amount. Non-vesting conditions are considered when estimating the fair value of the equity instruments granted.

If Sono Group and the supplier of services did not agree on service conditions and the supplier of services is unconditionally entitled to the equity instruments, Sono Group presumes, that the services have been received on grant date and recognizes the services received in full, with a corresponding increase in equity. If Sono Group and the supplier of services did agree on service conditions, the Group accounts for the services as they are rendered by the participant during the vesting period., with a corresponding increase in equity.

For further details, please refer to note 10.3. Remuneration based on shares (share-based payment).

5.11. Significant accounting judgments, estimates and assumptions

The preparation of consolidated financial statements in conformity with IFRS requires management to make judgments, estimates and assumptions that affect the reported amounts in the financial statements. Management continually evaluates its judgments and estimates in relation to assets, liabilities, contingent liabilities and expenses. Management bases its judgments and estimates on historical experience and on other various factors, it believes to be reasonable under the circumstances, the result of which forms the basis of the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions and conditions and may materially affect the financial results or the financial position reported in future periods.

In the process of applying the accounting policies, management has made the following judgments, which have the most significant effect on the amounts recognized in the consolidated financial statements.

5.11.1. Going concern

Management assessed Sono Group's ability to continue as a going concern and evaluated whether there are conditions and events, considered in the aggregate, that raise substantial doubt about the Group's ability to continue as a going concern using all information available about the future, focusing on the twelve-month period after the issuance date of the consolidated financial statements.

Historically, Sono Group has funded its operations primarily through capital raises and with loans from shareholders and private investors as well as through advance payments received from customers.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)

5. Significant accounting policies (continued)

Since its inception Sono Group has incurred recurring losses and negative cash flows from operations including net losses of kEUR 56,032 for the year 2020 (previous year: kEUR 9,971).

As of December 31, 2020, Sono Group had an accumulated deficit according to IFRS of kEUR 83,123 (previous year: kEUR 27,091), of which kEUR 5,026 is not covered by equity (previous year: kEUR 18,568 not covered by equity). The Group expects to continue to generate operating losses for the foreseeable future.

As of December 31, 2020, Sono Group shows cash and cash equivalents in the amount of kEUR 43,264 (previous year kEUR 407). During the year ended December 31, 2020 further net financing has been received from advance payments from customers in the amount of kEUR 26,448, cash proceeds from borrowings in the amount of kEUR 8,330, and kEUR 36,037 proceeds from issue of shares to private investors. Additionally, management has approached its German-speaking customers that have provided advance payments after December 1, 2019 to accept a change in the terms and conditions to waive the right to reclaim any advance payments until December 31, 2022. The maturity of the Group's total liabilities as of December 31, 2020 is < 1-year 14,062 kEUR, and between 1 to 5 years kEUR 44,307).

Securing the financing of development activities and operations represents an ongoing challenge for Sono Group. Structural changes in the German and international automotive industry in the recent past have made it difficult to attract large, strategic investors. Additionally, the ongoing corona-pandemic may negatively affect the Group's business, liquidity and financial position going forward (see note 5.11.3 Corona pandemic).

According to the business plan developed by the Sono Group an amount of approximately mEUR 276.4 is needed from January 2021 until end of the first half year of 2023 for additional development activities and the start of serial production and an amount of mEUR 96.7 is needed for overhead costs during the same period. Of which, liquidity in the amount of mEUR 43.3 was available as of December 31, 2020. Sono Group will also need sufficient funds to pay back any due advance payments reclaimed by customers as well as other financing proceeds received. However, the Group cannot predict with certainty the actual amount of financing that will be received, the total cost of the production of the car and potential cancellations.

Management plans to finance the above investments and costs with an Initial Public Offering (IPO) in the first half of 2021. The timely realization of the IPO is crucial for the Group's ability to achieve start of serial production within the first half of 2023 and to continue as a going concern. A delay or insufficient volume of the IPO funding can lead to a delay or suspension of the development and start of serial production due to insufficient financing and subsequently to cancellations and demands for repayment of advance payments received from customers and other financing received. In case the planned IPO does not reach the required level of financing, Sono Group would need to seek additional funding through new investors or shareholders or other means.

There is no certainty that Sono Group will be successful in obtaining sufficient funding on terms acceptable to the Group or even obtain additional funding at all. If the Group is unable to obtain additional funding, Sono Motors will be forced to delay, reduce or eliminate some or all of its development activities and production efforts, which could adversely affect its business prospects, or Sono Motors may be unable to continue operations.

Based on its recurring losses from operations since inception, expectation of continuing operating losses for the foreseeable future, the net capital deficiency, the need to raise additional capital to finance its future operations and in order to be able to potentially repay advance payments received from customers and other financing received, as of March 19, 2021, the issuance date of the consolidated financial statements for the year ended December 31, 2020, Sono Group has concluded that there is substantial doubt about its ability to continue as a going concern within one year after the date of the original issuance date of these consolidated financial statements. The consolidated financial statements do not include any adjustments that might result from the outcome of this uncertainty. Accordingly, the consolidated financial statements

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)**5. Significant accounting policies (continued)**

have been prepared on a basis that assumes that Sono Group will continue as a going concern and which contemplates the realization of assets and satisfaction of liabilities and commitments in the ordinary course of business.

5.11.2. Remuneration based on shares (share-based payment)

For equity-settled share-based payment transactions (see note 5.10 Share-based payment), on grant date, Sono Group initially measures the fair value of the received services by reference to the fair value of the equity instruments granted. The fair value measurement of the share options for the equity-settled share-based transactions requires assumptions about the input data for using Black-Scholes Model. The expected life of the share options is based on current expectations and is not necessarily indicative of exercise patterns that may occur. The expected volatility was based on an evaluation of historical volatilities of comparable listed peer group companies. The expected volatility reflects the assumption that the historical volatility over a period similar to the life of the options is indicative of future trends, which may not necessarily be the actual outcome. For further details about the input factors used see note 10.3 Remuneration based on shares (share-based payment).

5.11.3. Corona pandemic

In 2020, COVID-19 caused a global pandemic. In response to this pandemic, governments as well as private organizations implemented numerous measures seeking to contain the virus. These measures disrupted the manufacturing, delivery and overall supply chain of vehicle manufacturers and suppliers and led to a global decrease in vehicle sales. These measures may also lead to a trend to work-from-home, which could result in lower demand for cars and could negatively impact our sales and marketing activities. The pandemic may also affect the interest of Sono Motors' customers in their car-sharing and ride-pooling networks. Sono Motors cannot yet foresee the full extent of COVID-19's impact on its business and operations and such impact will depend on future developments of the outbreak, including new information concerning the global severity of and actions taken to contain the outbreak, which are highly uncertain and unpredictable. The effects could have a material impact on Sono Motors' results of operations, liquidity and capital management. Sono Motors will continue to monitor the situation and the effect of this development on its liquidity and capital management. At the same time, Sono Motors has taken actions to maintain operations and protect employees from infection. In 2020, COVID-19 had a slightly negative impact on orders and advance payments received from customers. Based on the most available information, COVID-19 might continue to have a negative effect on orders and advance payments received from customers in 2021.

5.11.4. Sono Points

Sono Motors has carried out several crowdfunding campaigns in which the Sion could be reserved against an advance payment received from customers of various amounts. With the reservation, the customer is entitled to the right to conclude a contract for the purchase of the Sion. The customer can withdraw from the reservation if he or she decides not to conclude the purchase contract or Sono Motors has not offered a purchase contract by the respective date defined by the underlying terms and conditions. In December 2019, a crowdfunding campaign with the aim of raising a predefined target amount was launched. In connection with the campaign, so-called Sono Points were introduced and communicated on December 15, 2019. The three founders, Laurin Hahn, Navina Persteiner and Jona Christians, announced that they would be giving a majority of their profit participation rights (for clarification: The voting rights remain with the founders), in numbers 64.07% of all profit participation rights at the moment of time (as of December 31, 2019) to a "community pool", from which the so-called Sono Points would be awarded. The number of Sono Points, through which the participants in the crowdfunding and pre-orders should participate in the community pool is significantly influenced by the time and amount of the individual deposit. The maximum number of possible Sono Points in total is not limited. In case a Sono Point holder should revoke or withdraw from the reservation or should revoke or withdraw from the purchase contract concluded based on the reservation, the Sono Points will expire.

According to the current assessment of the management (based on legal assessments), Management concludes that Sono Points do not impact Sono Group as the obligation relates only to the founders.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)

5. Significant accounting policies (continued)

5.11.5. Recoverability of deferred tax assets in relation to loss carryforwards

Management has determined that these tax losses represent start-up losses as a result of establishing Sono Motors' business. The tax losses can be carried forward indefinitely and have no expiry date. Management does not expect a (proportional) reduction of deductible tax loss carryforwards due to any future corporate restructuring or due to the corporate reorganization of Sono Group in November 2020, particularly about the swap of shares ("harmful acquisition", for further details, please refer to note 1 General information). Management expects that the "hidden reserves clause" can be asserted and that the tax losses can still be carried forward.

6. Segment information

An operating segment is defined as a component of an entity for which discrete financial information is available and whose operating results are regularly reviewed by the Management (chief operating decision maker within the meaning of IFRS 8). Sono Motors is a start-up company that has not yet started production. As all Group's activities relate to the development of the electrical car Sion and Management makes decisions about allocating resources and assessing performance based on the entity as a whole. Management has determined that Sono Group operates in one operating and reportable business segment. Furthermore, Sono Group is currently solely active in Germany and therefore all noncurrent assets are located in Germany. Thus, Sono Group does not report any additional segment information.

7. Income statement disclosures

7.1. Additional information

The below table displays the depreciation and amortization expenses as well as personnel expenses included in cost of research and development, selling and distribution costs and general and administrative expenses:

	<u>2020</u>	<u>2019</u>
	kEUR	kEUR
Personnel expenses	39,291	5,151
Depreciation and amortization	384	224
	<u>39,675</u>	<u>5,375</u>

The increase of personnel expenses mainly concerns the new equity-settled employee participation program (Conversion Stock Option Program or CSOP, 2020: kEUR 32,160, 2019: kEUR 0), which has been offered all participants of the previous employee participation program and new participants, who have not been part of the previous employee participation program, on December 14, 2020 (see note 10.3 Remuneration based on shares (share-based payment)).

7.2. Cost of research and development

The table below presents details on the cost of research and development:

	<u>2020</u>	<u>2019</u>
	kEUR	kEUR
Personnel expenses	21,652	2,243
thereof related to the CSOP (IFRS 2)	17,723	—
Development cost of prototypes	7,338	1,637
Professional services	267	284
Other development	895	464
Depreciation and amortization	171	78
Other	145	230
	<u>30,469</u>	<u>4,937</u>

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)

7. Income statement disclosures (continued)

There are no research expenses included in the profit and loss of Sono Group in financial year 2020 and prior periods, as the Group does not perform research. As the recognition criteria for development cost have not been met, all development expenses have been recognized in profit or loss as incurred in 2020 and prior periods. The personnel expenses concern employees responsible for development activities and the share of the employee participation program (Conversion Stock Option Program or CSOP) attributable to them (see note 10.3 Remuneration based on shares (share-based payment)).

7.3. Selling and distribution expenses

The below table displays details included in selling and distribution expenses:

	<u>2020</u>	<u>2019</u>
	kEUR	kEUR
Personnel expenses	8,490	1,582
thereof related to the CSOP (IFRS 2)	6,949	—
Professional services	171	103
Advertising	84	113
Other	355	336
	<u>9,100</u>	<u>2,135</u>

The personnel expenses concern mainly employees responsible for marketing activities like roadshows, test rides and social media and the share of the employee participation program (Conversion Stock Option Program or CSOP) attributable to them (see note 10.3 Remuneration based on shares (share-based payment)).

7.4. General and administrative expenses

The below table displays details included in general and administrative expenses:

	<u>2020</u>	<u>2019</u>
	kEUR	kEUR
Personnel expenses	9,148	1,325
thereof related to the CSOP (IFRS 2)	7,488	—
Professional services	4,830	670
Expenses without sufficient supporting documentation	21	70
Other	405	352
	<u>14,404</u>	<u>2,417</u>

The personnel expenses concern mainly employees responsible for Finance, Human Resources, Business Development, Administration etc. and the share of the employee participation program (Conversion Stock Option Program or CSOP) attributable to them (see note 10.3 Remuneration based on shares (share-based payment)). The professional services include accounting, tax and legal services as well as other external services. The increase of expenses for professional services mainly concerns professional services related to the initial preparation of consolidated financial statements in accordance with IFRS and their audit under consideration of PCAOB requirements as well as legal and tax opinions prepared in this context.

While preparing the consolidated financial statements 2019, due to material weaknesses in its internal controls over financial reporting, Sono Group identified disbursements amounting to kEUR 21 (previous year: kEUR 70), for which Sono Motors did not retain sufficient supporting documentation, including underlying invoices. These amounts were recorded under expenses without sufficient supporting documentation.

7.5. Other operating income/expenses

Other operating income (kEUR 334, previous year: kEUR 220) mainly includes agency fees from the Renault ZOE conversion (kEUR 240, previous year: kEUR 0), donations, statutory reimbursements for personnel expenses and government grants.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)

7. Income statement disclosures (continued)

On February 3, 2020, Sono Motors entered into a framework agreement with Renault Deutschland AG (Renault) for electric vehicles (Renault ZOE). According to the agreement, customers, who have made advance payments for the Sion, can enter into a lease agreement with Renault for a Renault ZOE and use their advance payments to partly offset their lease payments. Customers can use advance payments made up to EUR 4,000. According to the framework agreement with Renault, Sono Motors receives a fixed agency fee per lease contract and transfers the advance payment to Renault. Sono Motors recognizes the respective agency fee as operating income and derecognizes the advance payment received in the moment the customer enters into the lease contract with Renault.

Other operating expenses (kEUR 349, previous year: kEUR 0) include solely expenses that relate to a project termination with a supplier. For further information see also note 8.2 Property, plant and equipment.

7.6. Impairment losses on financial assets

Impairment losses on financial assets (kEUR 6, previous year: kEUR 0) primarily relate to bank balances (see note 8.7 Cash and cash equivalents).

7.7. Other interest and similar income

Other interest and similar income (kEUR 2, previous year: -kEUR 0) relates to interest income from VAT taxes.

7.8. Interest and other expenses

Interest and other expenses (kEUR 2,040, previous year: kEUR 702) largely consist of interest expenses related to the compounding effect for advance payments received from customers (kEUR 1,360, previous year kEUR 415, see note 5.7 Advance payments received from customers) and financial liabilities (kEUR 614, previous year: kEUR 287).

7.9. Tax on income and earnings

The below tables display the development of deferred tax assets and liabilities:

	Dec. 31, 2020	Dec. 31, 2019	Jan. 1, 2019
	kEUR	kEUR	kEUR
Deferred tax assets

Deferred tax assets/liabilities, net	<u><u>0</u></u>	<u><u>0</u></u>	<u><u>0</u></u>

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)

7. Income statement disclosures (continued)

Given the loss history of Sono Motors, deferred tax assets are not recognized on the balance sheet. The amount of deferred tax assets / liabilities as of January 1, 2019, December 31, 2019 and December 31, 2020 is zero.

Of the gross deferred tax assets, kEUR 806 as of December 31, 2020 (December 31, 2019: kEUR 221; January 1, 2019: kEUR 84) are current and of the gross deferred tax liabilities, kEUR 73 as of December 31, 2020 (December 31, 2019: kEUR 0; January 1, 2019: kEUR 0) are current. Current deferred taxes are reported under non-current assets and non-current liabilities.

There are no deferred taxes with regard to Outside Basis Differences as those are permanent differences. The amount of temporary differences on balance sheet positions for which no deferred tax asset has been recognized is displayed in the table below:

	<u>Dec. 31, 2020</u>	<u>Dec. 31, 2019</u>	<u>Jan. 1, 2019</u>
	kEUR	kEUR	kEUR
Lease liabilities	931	464	—
Advance payments received from customers	966	140	175
Other financial assets	2	—	—
Cash & cash deposits	1	—	—
Prepaid expenses	193	—	—
	<u>2,093</u>	<u>604</u>	<u>175</u>
Potential tax benefit at a total tax rate of 32.98%	<u>690</u>	<u>199</u>	<u>58</u>

The amount of unused tax losses for which no deferred tax asset has been recognized is displayed in the table below:

	<u>Dec. 31, 2020</u>	<u>Dec. 31, 2019</u>	<u>Jan. 1, 2019</u>
	kEUR	kEUR	kEUR
Unused tax losses for which no deferred tax asset has been recognized (corporate tax)	51,316	26,288	16,694
Unused tax losses for which no deferred tax asset has been recognized (trade tax)	51,083	26,202	16,689
Potential tax benefit at a total tax rate of 32.98%	16,885	8,656	5,505

Thereof, as of December 31, 2020, kEUR 723 (December 31, 2019: kEUR 36, January 1, 2019: kEUR 10) deferred tax assets on transactions costs would have been recognized directly in equity if deferred tax assets would have been recognized on losses carryforwards.

The following table presents a numerical reconciliation of expected to effective income tax.

	<u>2020</u>	<u>2019</u>
	kEUR	kEUR
Income (loss) before tax for the period	(56,032)	(9,971)
Expected income tax (income (-)/expense (+) at a tax rate of 32.98%	(18,479)	(3,288)
Reconciliation:		
Non-tax-deductible expenses	9	(27)
Non-tax-deductible expenses (CSOP)	10,606	—
Changes in unrecognized tax losses	8,254	3,164
Changes in deferred taxes on balance positions	690	199
Tax-deductible transaction costs	(723)	(36)
Other	(357)	(66)
Effective income tax income for the period	<u>0</u>	<u>0</u>

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)

7. Income statement disclosures (continued)

The non-tax-deductible expenses preliminary relate to provisions for payments in the event of an IPO. For non-tax-deductible expenses in 2019, please refer to note 7.4 General and administrative expenses.

As Sono N.V. is also fully taxable in Munich, Germany, the tax rate in 2019 and 2020 is unchanged.

8. Balance sheet disclosures

8.1. Intangible assets

<u>Historical cost</u>	<u>Website kEUR</u>

Carrying Amount Jan. 1, 2020	156	2,313	2,469
Carrying Amount Dec. 31, 2020	137	1,965	2,102

The depreciation expenses for property, plant and equipment amounting to kEUR 61 (previous year: kEUR 50) are included in research and development (kEUR 28, previous year: kEUR 19), selling and distribution costs (kEUR 15, previous year: kEUR 18) and general and administrative expenses (kEUR 18, previous year: kEUR 13).

The deduction of advance payments to technical equipment and machinery amounting to kEUR 348 relates to cancellations costs due to a termination of a sub-supplier contract.

8.3. Right-of-use assets

Sono Motors leases buildings and warehouses at its headquarters in Munich and three electrical cars including batteries. At the end of the reporting period, the remaining lease terms for the buildings were 7 years and for the cars 3 to 4 years. There were no leased cars at the end of the fiscal year 2018.

The below table presents details on the lease agreements of Sono Motors:

	Buildings	Cars	Total
	kEUR	kEUR	kEUR
Right-of-use assets on January 1, 2020	2,211	24	2,235
Additions to right-of-use assets	—	15	15
Depreciation of right-of-use assets	305	8	313
Right-of-use assets on December 31, 2020	1,906	31	1,937
Interest expense on lease liabilities	35	4	39
Expense relating to short-term leases	—	—	—
Total cash outflow for leases	311	12	323
	Buildings	Cars	Total
	kEUR	kEUR	kEUR
Right-of-use assets on January 1, 2019	—	—	—

Interest expense on lease liabilities	22	1	23
Expense relating to short-term leases	84	—	84
Total cash outflow for leases	271	5	276

The depreciation expenses for right-of-use assets amounting to kEUR 313 (prior year: kEUR 163) are included in research and development (kEUR 144, prior year: kEUR 61), selling and distribution costs (kEUR 77, prior year: kEUR 56) and general and administrative expenses (kEUR 92, prior year: kEUR 46).

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)

8. Balance sheet disclosures (continued)

There were no lease commitments for short-term leases on December 31, 2020 (December 31, 2019: kEUR 84). At the end of both the reporting period and the prior fiscal year, there were no obligations from sale and lease back transactions and Sono Motors was not exposed to any potential future cash outflows for lease payments that are not reflected in the measurement of lease liabilities.

The below table presents the maturity profiles of future lease payments:

kEUR	< 1 year	1 to 5 years	>5 years
Buildings	311	1,302	421
Cars	12	24	—
Total December 31, 2020	323	1,326	421
kEUR	< 1 year	1 to 5 years	>5 years
Buildings	311	1,279	755
Cars	8	21	—
Total December 31, 2019	319	1,300	755

Sono Group does not act as a lessor or sublessor in any lease agreements.

8.4. Other noncurrent financial assets

Other noncurrent financial assets as of December 31, 2020 (kEUR 41; December 31, 2019: kEUR 28; January 1, 2019: kEUR 11) consist solely of deposits.

8.5. Other current financial assets

The below table displays details included in other current financial assets:

	Dec. 31, 2020	Dec. 31, 2019	Jan. 1, 2019
	kEUR	kEUR	kEUR
PayPal reserve	4,655	—	—
Debtor creditors	539	—	—
Receivables from crowdfunding and deposits	179	341	80
Other	24	1	2
Current trade receivables (affiliated companies)	11	—	—
Allowances	(4)	—	—
Total	5,404	342	82

The PayPal reserve in 2020 relates to the reclassification of the specific reserve imposed by PayPal due to the crowdfunding campaign. Since March 2020, Sono Motors has no access to the PayPal reserve and it is unclear when the reserve will be released by PayPal. As Sono Group expects a repayment within 12 months after the balance sheet date, the PayPal reserve is classified a short-term.

The debtor creditors mainly concern one creditor (kEUR 517), whose invoice was overpaid in 2020 and refunded in January 2021.

8.6. Other current non-financial assets

Other current non-financial assets as of December 31, 2020 (kEUR 579; December 31, 2019 kEUR 193; January 1, 2019: kEUR 620) mainly consist of prepaid expenses (kEUR 256, previous year kEUR 28), of which kEUR 135 relate to directly attributable costs to the planned IPO transaction, and VAT receivables (kEUR 257, previous year: kEUR 165).

8.7. Cash and cash equivalents

Cash and cash equivalents include the following amounts:

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)

8. Balance sheet disclosures (continued)

	<u>Dec. 31, 2020</u>	<u>Dec. 31, 2019</u>	<u>Jan. 1, 2019</u>
	kEUR	kEUR	kEUR
Balances on demand	43,266	142	1,154
PayPal accounts including reserves	—	244	231
Money in transit	—	21	130
Allowances	(2)	—	—
Total	<u>43,264</u>	<u>407</u>	<u>1,515</u>

The decrease of the PayPal accounts in 2020 relates to the reclassification of the full PayPal accounts to other current financial assets. In prior years, the PayPal accounts including reserves consisted of the regular rolling reserves (see note 8.5 Other current financial assets).

8.8. Equity

Total equity of Sono Group comprises subscribed capital, capital reserves, other reserves and retained earnings. The subscribed capital amounts to kEUR 6,468 (prior year: kEUR 34) and is divided into 35,803,197 (prior year: 33,588) member shares with a par value of EUR 0.06 (ordinary shares, prior year: EUR 1.00) and EUR 1.50 (high voting shares). Capital reserves include any amounts paid in by the owners that exceed the member shares' par value. Other reserves include mainly effects from equity-settled stock-option. Retained earnings consist of losses from prior periods.

At the general meeting on November 25, 2020, the owners agreed to a capital increase against contribution in cash in the nominal amount and part of the loan claims (debt-equity swap, see note 8.10.2 Other noncurrent financial liabilities) as contribution in kind at the level of Sono N.V..

For the reorganization of the structure of Sono Motors and Sono N.V. we refer to note 1 General information. In the course of the reorganization, a split of the shares (30,588,000, nominal value ordinary shares of EUR 0.06) and a conversion of high voting shares (3,000,000, nominal value high voting shares of EUR 1.50) has taken place, including an increase in share capital of kEUR 1,835 and kEUR 4,500 as well as an offsetting effect in the capital reserve (kEUR -1,835 and kEUR -4,500).

The capital increase resulting from the debt-equity swap and the issuance of new shares (480,000 and 1,735,197 new shares) as well as the modification of the original liability amounting to kEUR 1,427 and kEUR 38,200 on December 10, 2020 (closing date of issuance of new shares) resulted in an increase in subscribed capital of kEUR 133 and a corresponding increase in capital reserves of kEUR 37,302, net of tax after deducting transaction costs of kEUR 2,192. The Management of Sono N.V. has decided that the transaction costs of kEUR 135, which are directly attributable to the planned IPO in 2021, are deferred in a separate line item and not deducted from equity yet.

For the increase in the capital reserve (kEUR 32,160) due to the new equity-settled employee participation program (Conversion Stock Option Program or CSOP), please see note 5.10 Share-based payment and 10.3 Remuneration based on shares (share-based payment).

Under Dutch law Sono Group authorized shared capital is the maximum capital that can be issued without amending the articles of association. As of December 31, 2020 the authorized shared capital amounts to kEUR 25,200 divided into 320,000 common shares and 4,000,000 high voting shares. The high voting shares carry the same economic rights entitlements as the common shares and only carry different voting rights.

For the settlement agreement please see note 8.10.2 Other noncurrent financial liabilities.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)

8. Balance sheet disclosures (continued)

8.9. Advance payments received from customers

The below table shows the noncurrent advance payments received from customers:

	Dec. 31, 2020	Dec. 31, 2019	Jan. 1, 2019
	kEUR	kEUR	kEUR
Advance payments received from customers	38,972	11,164	9,949
	<u>38,972</u>	<u>11,164</u>	<u>9,949</u>

Depending on the general terms in some cases cancellation by the customer is possible in less than 12 months, Sono Group expects to recognize revenue with start of production in the first half of 2023.

The table below shows the development of the advance payments received from customers:

	Balance as of Jan. 1, 2020	Additions	Repayment	Compounding effect	Balance as of Dec. 31, 2020
	kEUR	kEUR	kEUR	kEUR	kEUR

* Shareholder transaction

As of December 31, 2020, the remaining outstanding amount of the settlement agreement (kEUR 200) is presented in trade and other payables (see note 8.11 Trade and other payables).

Loan 1

Loan 1 consists of nine individual loans with a total nominal value of kEUR 1,225, and interest rate of 4% p.a. and a maturity in December 2023.

Loan 2

Loan 2 includes two loans with a nominal value of kEUR 185 and kEUR 100, respectively, and an annual interest rate of 4% p.a. each. These loans were repayable including interest at maturity in December 2020. The loan with the nominal amount of kEUR 185 had not been repaid as of the balance sheet date but was paid back on January 5, 2021.

Loan 3

Loan 3 included a loan with a contractual two-year term with an interest rate of 12% p.a. and a total nominal value of kEUR 2,500. Following a settlement agreement in November 2020, part of the loan was paid back to the capital providers, while the remaining amount was converted into ordinary shares of Sono N.V. for an additional cash payment of kEUR 29. In addition, Sono N.V. agreed to pay one of the capital providers a total amount of kEUR 250 in five equal monthly installments starting in December 2020 and one lump sum payment of kEUR 250 after a successful IPO of Sono N.V. This modification of the original liability resulted in derecognition of the unpaid liability and a recognition of a new liability for the five installments. The effect of the modification was recorded in equity as it resulted from the relationship with a shareholder. The total amount recognized in equity due to the settlement agreement was kEUR 1,427.

Sono Motors has pledged non-financial items (patents) as securities for this long-term loan with a total face value of kEUR 2,500. The underlying security agreement was cancelled as part of a settlement agreement of November 25, 2020 due to the redemption of the loan in 2020 ((partial) repayment of the loan and (partial) contribution in kind of the loan in connection with a capital increase at Sono Group N.V.).

Subordinated loans (crowdfunding)

The crowdfunding loans consist of several crowdfunding loans with interest rates of 6% p.a. and different terms, varying between less than one year and up to 4 years. Issuing period ended in December 2020.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)

8. Balance sheet disclosures (continued)

Mandatory convertible loans

The convertible notes amounting to kEUR 6,859 (nominal value kEUR 6,800) are considered current financial liabilities due to the management's expectation that any event leading either to conversion or redemption in 2021 is considered to be more likely than the repayment at maturity.

Participation rights

Between October 2018 and November 2019, Sono Motors issued participation rights with a total face value of kEUR 1,383 that bear a fixed interest rate of 3.5% p.a., plus a one-time bonus payment at maturity of 0.52% p.a. of the face value for each 1,000 cars reserved by potential customers between October 18, 2018 and December 31, 2019. More than 2,000 reservations were made during that period; the carrying amount of the liability has been adjusted accordingly to include the one-time bonus payment.

8.10.2. Other noncurrent financial liabilities

The below table displays details on items included in other noncurrent financial liabilities:

	<u>Dec. 31, 2020</u>	<u>Dec. 31, 2019</u>	<u>Jan. 1, 2019</u>

	<u>636</u>	<u>(630)</u>	<u>0</u>	<u>105</u>	<u>111</u>

9. Disclosure of financial instruments and risk management

9.1. Type and management of financial risks

9.1.1. General information

Sono Group is exposed to certain financial risks with respect to its financial assets and liabilities and the transactions associated with its business model. These risks generally relate to credit risks, liquidity risks and market risks (especially interest rate risk).

The aim of risk management is to limit the potential negative impact on expected cash flows and take advantage of any opportunities that arise.

9.1.2. Credit risk

Credit risk is managed by Sono Motors finance department. Credit risk arises from cash and cash equivalents and other financial assets. To limit credit risk, cash deposits and investments are placed only with reputable financial institutions, based on a qualitative assessment by Sono Motors finance department under consideration of the creditworthiness of the financial institutions as well as ecological aspects. Consequently, the risk of default is considered to be low.

For fiscal year 2020 and previous year, there were no significant increases in credit risks for financial assets (no transfer from Stage 1 to Stage 2). Therefore, the loss allowance for all financial assets is measured at an amount equal to 12-month ECL (Stage 1). 12-month ECL is determined using external default ratings as well as external recovery rates.

Exposure to credit risk results from other current and noncurrent financial assets and cash & cash equivalents. The loss allowance for these financial assets as at 31 December reconciles to the opening loss allowance as follows:

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)

9. Disclosure of financial instruments and risk management (continued)

	<u>Total</u> <u>kEUR</u>
Opening loss allowance as at January 1, 2019	—
Increase in the allowance recognized in profit or loss during the period	—
Closing loss allowance as at December 31, 2019	—
Opening loss allowance as at January 1, 2020	—
Increase in the allowance recognized in profit or loss during the period	6
Closing loss allowance as at December 31, 2020	<u>6</u>

Changes in the gross carrying amount of financial assets contributed kEUR 6 to changes in the loss allowance.

The table below displays the gross carrying amount of Sono Motors' financial assets by credit risk rating grades.

	<u>Credit risk</u> <u>rating grade</u>	<u>Gross carrying</u> <u>amount</u> <u>(12m ECL)</u> <u>kEUR</u>
January 1, 2019	Risk class 1	1,608
December 31, 2019	Risk class 1	777
December 31, 2020	Risk class 1	48,709

9.1.3. Liquidity risk

Liquidity risk is the risk that Sono Group will encounter difficulty in meeting its obligations associated with financial liabilities that are settled by delivering cash or another financial asset. Sono Group mainly relies on financing from shareholders and private investors and participation rights. Thus, lack of external financial support and any reclaims of the advance payments received from customers could expose Sono Motors to a risk of going concern. External financial support is highly dependent on further progress in the development of Sono Motors' core product and successful communication to potential external investors. Reclaims of the advance payments received from customers are possible because, according to the applicable terms and conditions, customers can choose between reclaiming their advance payment or purchasing the vehicle at the time Sono Motors offers a purchase contract for the vehicle. Based on the specific terms of the agreement between Sono Motors and the customer, some customers may also reclaim their advance payments earlier.

As of the reporting date, Management concludes that Sono Group's liquidity risk is high. Despite successful current crowdfunding campaigns and issuance of convertible notes, there are material uncertainties related to events or conditions regarding Sono Motors' future financing that cast significant doubt upon the Group's ability to continue as a going concern (see note 5.11.1 Going concern for further details). Therefore, Sono Motors' liquidity management focuses on the availability of cash and cash equivalents for operational activities and further investments by means of timely and thorough budget planning and appropriate reactions to expected cash restrictions.

Sono Motors has established an appropriate approach to managing short-, medium- and long-term financing and liquidity requirements. It manages liquidity risks by holding appropriate reserves, as well as by monitoring forecasted and actual cash flows. To monitor the availability of liquidity, cash flow forecasts are developed on a regular basis. Based on these cash flow forecasts, a run rate, which displays the period Sono Motors is able to carry on its current operations without additional financing, is determined. As a safeguard for legal risks associated with liquidity issues, external legal advice is sought in order to comply with German insolvency laws.

The table below summarizes the maturity profile of Sono Group's financial liabilities based on contractual undiscounted payments:

9.1.4. Interest rate risk

Interest rate risk is the risk that the fair value or future cash flows of a financial instrument will fluctuate because of changes in market interest rates. Sono Group's exposure to the risk of changes in market interest rates relates primarily to cash and cash equivalents, as financial liabilities bear no or fixed interest rates. Due to persistent low-interest-rates, Sono Group is exposed to the risk of being charged negative interest rates on its bank deposits at a fixed interest rate.

9.2. Capital management

For the purpose of Sono Group's capital management, capital includes share capital and all other equity reserves attributable to equity holders. The total amount of capital in the reporting year was kEUR -5,026 (December 31, 2019: kEUR -18,568, January 1, 2019: kEUR -13,786). The primary objective of Sono Group's capital management is to maximize the shareholder value through investment in its development activities.

Based on the current stage of the business cycle of Sono Motors' products, the electric vehicle Sion, the Sono Digital App and Sono Solar, Sono relies almost exclusively on external financing until the start of production.

According to Sec. 30 GmbHG, Sono Motors may not distribute capital if such distribution affects the maintenance of Sono Motors' subscribed capital. Other than that, Sono Motors is not subject to externally imposed capital requirements.

For information on the capital raised in 2020, please refer to Note 8.10.2 Other noncurrent financial liabilities.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)

9. Disclosure of financial instruments and risk management (continued)

9.3. Additional information on financial instruments

9.3.1. Offsetting of financial assets and liabilities

Sono Motors neither applies offsetting in the balance sheet nor has any instruments that are subject to a legally enforceable master netting arrangement or a similar agreement.

9.3.2. Carrying amounts and fair values

The table below displays information on fair value measurements, carrying amounts and categorization of financial instruments of Sono Group.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)

9. Disclosure of financial instruments and risk management (continued)

The carrying amounts of each of the categories listed above as defined according to IFRS 9 as of the reporting dates were as follows:

	Dec. 31, 2020	Dec. 31, 2019	Jan. 1, 2019
	kEUR	kEUR	kEUR
Financial assets measured at amortized cost (AC)	48,709	777	1,608
Financial liabilities measured at amortized cost (FLAC)	8,779	9,953	7,164
Financial liabilities measured at fair value through profit or loss (FVTPL)	6,859	—	—

All financial assets and liabilities for which fair value is measured or disclosed in the consolidated financial statements are categorized with the fair value hierarchy, described as follows, based on the lowest level input that is significant to the fair value measurement as a whole:

- Level 1—Inputs use quoted prices in active markets for identical assets or liabilities
- Level 2—Inputs are inputs, other than quoted prices included in Level 1, which are directly or indirectly observable
- Level 3—Inputs are unobservable and have values estimated by management based on market participant assumptions which are reasonably available

Due to their short nature, the carrying amounts of the cash and cash equivalents and other current financial assets and liabilities approximate their fair value. The fair value of noncurrent financial assets and liabilities is determined by applying the discounted cash flow method (valuation technique). In doing so, future cash flows resulting from the financial asset or liability are discounted using an interest rate derived from an estimated credit rating. In case of noncurrent financial assets, the counterparties are reputable financial institutions, thus credit risk has no significant influence on fair value, which leads to level 2.

At the end of fiscal year 2020, Management has determined that the fair values of noncurrent financial liabilities at amortized cost are level 3 as the credit rating is a non-observable input factor with significant influence on the fair value.

Differences may arise between the fair value at initial recognition (which, in accordance with IFRS 13 and IFRS 9, is generally the transaction price) and the amount determined at initial recognition using the valuation technique.

At the end of fiscal year 2020, Management has determined that the fair values of noncurrent financial liabilities at fair value through profit or loss, which consists solely of mandatory convertible notes, are level 3 as the assumptions for future payouts are a non-observable input factors with significant influence on the fair value.

The finance department of Sono Group performs valuations including level 3 fair values. Discussions of valuation processes and results are held between the CFO and the valuation team as well as external consultants.

The main level 3 inputs used by the group are derived and evaluated as follows:

- Discount rates for financial liabilities reflect current market assessments of the time value of money and the risk specific to the liabilities.
- Expected cash outflows are estimated based on contractual terms and the management's knowledge of probabilities of possible contractual payouts.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)

9. Disclosure of financial instruments and risk management (continued)

The following table summarizes the quantitative information about significant unobservable inputs used in level 3 fair value measurement:

Description	Fair value at			Unobservable input	Range of inputs (most likely outcome)	Relationship of unobservable inputs to fair value
	Dec. 31, 2020	Dec. 31, 2019	Jan. 1, 2019		Dec. 31, 2020	
	kEUR	kEUR	kEUR			
Mandatory convertible notes	6,859	—	—	Probability of an 'exit event' in the second quarter of 2021	50% – 100% (75%)	An increase of the probability to 100% would increase FV by kEUR 2,170. A decrease of the probability to 50% would decrease FV by kEUR -2,170.

The following table presents the changes in level 3 items for the period ended December 31, 2020, December 31, 2019 and January 1, 2019:

	Dec. 31, 2020	Dec. 31, 2019	Jan. 1, 2019
	kEUR	kEUR	kEUR
Balance at beginning of year	—	—	—
New transactions	6,800	—	—
Amount presented in other comprehensive income	21	—	—
Amount presented in profit or loss (interest and other expenses)	38	—	—
Balance at end of year	<u>6,859</u>	<u>—</u>	<u>—</u>

For the financial liability designated as at fair value through profit or loss in accordance with IFRS 9.4.3.5, the cumulative change in the fair value of the financial liability that is attributable to changes in the credit risk of that liability is kEUR -21.

For the financial liability designated as at fair value through profit or loss in accordance with IFRS 9.4.3.5., the difference between the financial liability's carrying amount and the amount Sono Group would be contractually required to pay at maturity is kEUR 1,662.

9.3.3. Income and expenses

Total interest income and total interest expense are calculated by applying the EIR to the gross carrying amount of financial assets and liabilities measured at amortized cost. Total interest income and expenses were as follows:

	2020	2019
	kEUR	kEUR
Total interest expense for financial assets at amortized cost	43	1
Total interest expense for financial liabilities at amortized cost	560	287

The table below shows the net gains or losses of financial instruments by measurement categories:

	2020	2019
	kEUR	kEUR
Net loss for financial assets at amortized cost	49	1
Net loss for financial liabilities at amortized cost	560	287
Net loss for financial liabilities at fair value through profit or loss	59	—

Net losses for financial assets at amortized cost include changes in the loss allowance as well as losses from interest expenses. Net losses for financial liabilities at amortized cost include losses from interest expenses.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)**9. Disclosure of financial instruments and risk management (continued)**

Net losses for financial liabilities at fair value through profit or loss include changes in the fair value measurement of convertible notes. There were no financial instruments categorized at fair value through profit or loss 2019 and therefore there are no net gains or losses for 2019.

10. Other disclosures**10.1. Defined contribution plans**

Sono Motors make payments under defined contributions plans, related to government-run pension plans. In the financial year 2020, the total expense recognized amounted to kEUR 491 (prior year: kEUR 329).

10.2. Government grants

In fiscal year 2020, other operating income includes an amount of kEUR 68 (previous year: kEUR 15) related to a grant, which Sono Motors received from the European Union to promote the development of open-source hardware as part of the "OPEN_NEXT" project. There are no unfulfilled conditions or other contingencies attaching to these grants. Sono Motors did not benefit from any other forms of government assistance.

The grant amounts to kEUR 134 and was received by Sono Motors in two installments paid out in 2019 and 2020, each payment amounting to kEUR 67. The grant has the purpose to reimburse Sono Motors for direct personnel costs, direct costs of subcontracting, other direct costs and indirect costs in relation to the development of open-source hardware in form of company-community collaborations. The payments are deferred and recognized in profit and loss over a period of 18 months each to match them with the costs that they are intended to compensate.

10.3. Remuneration based on shares (share-based payment)

In the first half of 2018, the management of Sono Motors has set up two similar employee participation programs for staff members and selected managers of Sono Motors. The employee participation programs are based on virtual shares. The virtual share of each employee is determined based on a point system (staff members) respectively a percentage defined in the employment contract (manager). The program provides remuneration in form of the right to participate in Sono Motors' exit proceeds. The remuneration for managers is subject to the fulfillment of specific vesting conditions. In both programs, which have no time limit regarding the 'exit-event', the right to receive a remuneration based on the exit proceeds is achieved if 95% of the shares of Sono Motors are sold and transferred to a new owner or all material assets of Sono Motors (especially patents) are sold to a third party. Both employee participation programs are accounted for as cash-settled share-based transactions. However, no expense and liability has been recognized because an 'exit-event' and consequently a payment was not probable as of December 31, 2019.

Modification of share-based payment arrangements

In December 2020, Management has offered all participants of the existing employee participation program as well as five additional staff members (one active and four former staff members) the opportunity to transfer respectively join into a new employee participation program (Conversion Stock Option Program or CSOP), which is equity-settled. Therefore, all participants have been asked to leave the current employee participation program by signing a cancellation agreement and to join the new program in due time. As of December 31, 2020, 88 employees, including all management-level employees, have signed the CSOP. All participants of the employee participants program for managers have been transferred to the CSOP by December 31, 2020. Consequently, the employee participants program for managers is obsolete as of December 31, 2020.

The table below shows the current status as of December 31, 2020:

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)

10. Other disclosures (continued)

	<u>Cash-settled program</u>	<u>Equity-settled program</u>
Staff members	1	85
Managers	—	3
	<u>1</u>	<u>88</u>

At the time of issuance of these consolidated financial statements, Sono Group is pursuing an IPO or merger with a special purpose acquisition company. Management has determined that either transaction would constitute an 'exit-event' according to the CSOP.

No expense and liability have been recognized for the one participant remaining in the cash-settled program because management does not consider the pursued IPO an 'exit-event' in accordance with the old employee participation program and consequently does not consider a payment to the remaining participant probable as of December 31, 2020.

For all staff members as well as one manager in the CSOP, all granted share options are fully vested as of December 31, 2020. They become exercisable one year after an 'exit-event'. All unexercised share options expire four years after an 'exit-event'.

Two managers in the CSOP have a vesting period of 36 months (service condition) for their granted share options, beginning at a contractually set date. If the employment of the managers with Sono Motors GmbH, Munich/Germany, ends during the vesting period, a pro rata exercisability of the share options might be granted, depending on contractually agreed good or bad leaver scenarios. After the vesting period all granted share options become exercisable. Other than that, there are no vesting conditions.

Sono N.V. initially measures the fair value of the received services by reference to the fair value of the equity instruments (share options) granted and the number of share options contractually agreed on with each participant. Sono N.V. recognizes the fair value of the services as expenses and a corresponding increase in equity when the services are received. If Sono N.V. and the participant did not agree on service conditions (86 participants) and the participant is unconditionally entitled to the share options, Sono N.V. presumes, that the services have been received on grant date and recognizes the services received in full, with a corresponding increase in equity. If Sono N.V. and the participant did agree on service conditions (two participants), Sono N.V. accounts for the services as they are rendered by the participant during the vesting period., with a corresponding increase in equity.

The following table illustrates the volume of the program, the weighted average fair value at grant date as well as the total expense of the period and the corresponding increase in equity:

<u>December 31, 2020</u>	<u>Equity-settled</u>
Number of options granted	1,805,100
Weighted average fair value at grant date (EUR)	19.26
Expense of the period (EUR)	32,159,781.40
Increase in equity (EUR)	32,159,781.40

The following table illustrates the number of, and movements in, share options during the year:

<u>2020</u>	<u>Share options</u>
January 1, 2020	0
Granted	1,805,100
Forfeited	0
December 31, 2020	1,805,100

The exercise price of all share options will be EUR 0.06.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)

10. Other disclosures (continued)

The fair value of the share options for the equity-settled share-based transactions is measured using Black-Scholes Model and the following inputs:

<u>Input factor</u>	
Weighted average share price (EUR)	22.01
Exercise price (EUR)	0.06
Expected volatility	75%
Option life (yrs.)	1.29
Expected dividends (EUR)	0.00
Risk-free interest rate	(0.73)%
Lack of marketability discount	14.39%

The expected life of the share options is based on current expectations and is not necessarily indicative of exercise patterns that may occur. The expected volatility was based on an evaluation of historical volatilities of comparable listed peer group companies. The expected volatility reflects the assumption that the historical volatility over a period similar to the life of the options is indicative of future trends, which may not necessarily be the actual outcome.

As of December 31, 2020, the full fair value for the participants, who did not agree on service conditions (86 participants) for the new Conversion Stock Option Program, was recognized as a personnel expense as the program for these participants is fully vested. For the participants, who did agree on service conditions (two participants), Sono N.V. recognized the proportionate fair value as a personnel expense as the program for these participants is not yet fully vested.

10.4. Earnings per share

Basic earnings per share is calculated by dividing earnings attributable to Sono N.V. shareholders by the weighted average number of ordinary and high voting shares outstanding during the reporting period. Since the IPO is planned only for 2021 the share-based payment program has no effect on the calculation of diluted earnings per share. The high voting shares entitle the shareholders to additional voting rights, but not to higher dividend rights.

Basic earnings per share

	<u>2020</u>	<u>2019</u>
	EUR	EUR
From continuing operations attributable to the ordinary equity holders of the company	<u>(1.66)</u>	<u>(0.30)</u>
	<u>(1.66)</u>	<u>(0.30)</u>

Due to the consideration of the share split (increase in weighted average shares from 33,252 to 33,251,883) and the change in accounting policies for advance payments from customers (increase of loss for the period from kEUR 9,556 to kEUR 9,971), the basic earnings per share 2019 have increased from EUR -284.50 to EUR -0.30.

10.5. Related parties

Sono Group defines a related party as a person or a close member of that person's family if that person:

- has control or joint control of Sono Motors,
- has significant influence over Sono Motors or
- is a member of key management personnel of Sono Motors.

Close family members are:

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)

10. Other disclosures (continued)

- the person's children and spouse or partner,
- children of the person's spouse or partner and
- dependents of the person's spouse or partner.

Sono N.V. defines a related party as an entity if any of the following conditions applies:

- the entity and Sono N.V. are members of the same group,
- Sono N.V. is a joint venture or associate of the entity or the entity is a joint venture or associate of Sono N.V.,
- Sono N.V. and the entity are joint ventures of the same third party,
- Sono N.V. is joint venture of a third party and the entity is an associate of the same third party and vice versa,
- the entity is a post-employment benefit plan for the benefit of Sono N.V.'s employees or the benefit of employees of a Sono N.V. related entity,
- the entity is controlled or jointly controlled by a Sono N.V. related person.

Sono N.V. is not controlled by any other entity, but controls Sono Motors GmbH as of December 31, 2020.

The below table displays the compensation of key management personnel:

	<u>2020</u>	<u>2019</u>
	kEUR	kEUR

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)

10. Other disclosures (continued)

loan amounting to kEUR 185 from Sono Motors Investment UG in 2019. The loan is due December 31, 2020, interest-paying at arm's length (4% p.a.) and unsecured. As of December 31, 2020, the loan had not been repaid as of the balance sheet date. Instead, it was paid back on January 5, 2021.

10.6. Cash flow statement

The statement of cash flows presents information on the cash flow from operating, financing and investing activities. In fiscal year 2020 and prior year, non-cash financing and investing activities include the acquisition of right-of-use assets (see note 8.3 Right-of-use assets). The table below presents a reconciliation of liabilities arising from financing activities.

	Jan. 1, 2019	Cash flows	Non-cash changes			Dec. 31, 2019

In fiscal year 2020 other non-cash changes include a debt to equity swap (kEUR -1,648) in connection with a settlement agreement with a capital provider. For further details, we refer to note 8.10.1 Financial liabilities overview.

10.7. Subsequent events

IPO

Sono N.V. is currently in preparation of listing on a US stock exchange ("IPO") as part of an initial public offering (IPO) and thus, generating additional capital. For further details regarding the legal reorganization in this context, we refer to note 1 General information.

11. First time adoption of IFRS

The date of transition to IFRS is January 1, 2019.

The application of IFRS 1 requires that Sono Group adopts accounting policies based on the standards and related interpretations effective at the reporting date of its first annual IFRS statements. IFRS 1 allows first-time adopters certain exemptions from the full retrospective application of the requirements under IFRS. All relevant mandatory exceptions have been applied in full. Sono Group has applied the following exemption:

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)

11. First time adoption of IFRS (continued)

Leases (IFRS 1 D9D (b)): No right-of-use assets and lease liabilities were recognized for leases with a remaining lease term of less than twelve months as at the date of transition to IFRS and instead, they are accounted for as if they were short-term leases. Therefore, the amount recognized for the right-of-use assets and lease liabilities as of January 1, 2019 is zero.

The transition from German Commercial Code (hereafter, "HGB") to IFRS resulted in accounting policies that affected the financial position and financial performance as follows.

The below table reconciles Sono Group's equity in accordance with HGB to its equity in accordance with IFRS as of the date of transition.

	HGB Jan. 1, 2019 kEUR	Adjustments						IFRS Jan. 1, 2019 kEUR

The deviation of the opening balance is caused by differences in the measurement of equipment. In the German GAAP financial statements low value equipment is fully depreciated in the year of addition, whereas under IFRS, equipment is depreciated over its individual useful life, regardless of its value.

The application of IFRS 16 results in a separate recognition of the right-of-use assets for identified leases and corresponding lease liabilities for the expected future lease payments. Expenses for rent of office spaces as well as expenses related to other lease contracts were presented in the statement of profit or loss under other operating expenses under HGB. Moreover, some expenses for modernization of office spaces that qualify as part of the right-of-use asset under IFRS were capitalized as property, plant and equipment under HGB. Under IFRS 16, the depreciation of the right-of-use assets is included in the depreciation and amortization, while the interest expense of the lease liabilities is presented within interest and other expenses in profit and loss as well as in the cash flow statement.

The deviation of other financial liabilities is caused by differences in measurement of financial liabilities at amortized cost. Firstly, according to IFRS, amortized costs of financial liabilities are calculated by considering any discount or premium on acquisition and fees or costs that are an integral part of the EIR, whereas in the HGB financial statements, any discount or premium on acquisition and fees or costs are accounted for in profit and loss when they occur. This aspect affects the measurement of loans from shareholders and private investors as well as participation rights.

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)

11. First time adoption of IFRS (continued)

Interest-free noncurrent advance payments received from customers, where a reclaim of the payments by the customer is not possible within twelve months after the reporting date, according to the applicable terms and conditions, are discounted according to IFRS. Thus, the IFRS carrying amount deviates from the HGB carrying amount (nominal value). The table below reconciles the 2019 total comprehensive income in accordance with IFRS to profit and loss in accordance with HGB:

	Adjustments						Total kEUR	IFRS 2019 kEUR
	HGB 2019 kEUR	Equipment kEUR	Leases kEUR	Advance payments kEUR	Loans and participation rights kEUR	Capital transaction kEUR		
Revenue	—	—	—	—	—	—	—	—
Cost of sale	—	—	—	—	—	—	—	—
Gross result	—	—	—	—	—	—	—	—
Cost of research and development	(4,944)	(1)	0	—	—	8	7	(4,937)
Selling and distribution costs	(2,135)	(1)	1	—	—	—	0	(2,135)
General and administrative expenses	(2,555)	(1)	—	—	37	102	138	(2,417)
Other operating income/expenses	220	—	—	—	—	—	—	220
Operating Loss	(9,414)	(3)	1	—	37	110	145	(9,269)
Interest and other expenses	(263)	—	(24)	(415)	—	—	(439)	(702)
Loss before tax	(9,677)	(3)	(23)	(415)	37	110	(294)	(9,971)
Taxes on income	—	—	—	—	—	—	—	—
Loss for the period	(9,677)	(3)	(23)	(415)	37	110	(294)	(9,971)
Other comprehensive loss	—	—	—	—	—	—	—	—
Total comprehensive loss for the period	(9,677)	(3)	(23)	(415)	37	110	(294)	(9,971)

The financial statements according to HGB are based on the total-cost method, whereas the cost of sales method is used for IFRS purposes.

Differences in subsequent measurement of financial liabilities at amortized cost result in a deviation in general administrative expenses as well as in interest and other expenses. According to IFRS, amortized costs of financial liabilities are calculated by considering any discount or premium on acquisition and fees or costs that are an integral part of the EIR, whereas in the HGB financial statements, any discount or premium on acquisition and fees or costs are accounted for in profit and loss when they occur.

Additionally, the on-balance approach of IFRS 16 for operating leases in comparison to the off-balance approach of HGB causes a deviation in general administrative expenses and interest and other expenses. The application of IFRS 16 results in a separate recognition of the right-of-use assets for identified leases and corresponding lease liabilities for the expected future lease payments. Expenses for rent of office spaces as well as expenses related to other lease contracts were presented in the statement of profit or loss under general administrative expenses under HGB. Under IFRS 16, the depreciation of the right-of-use assets is included in the depreciation and amortization (cost of research and development, selling and distribution costs and general and administrative expense), while the interest expense of the lease liabilities is presented within finance expenses.

Further differences in initial and subsequent measurement of advance payments received from customers between HGB and IFRS result in a deviation in interest and other expenses, advance payments received from customers include a significant financing component according to IFRS 15.60. The compounding effect is recognized in interest expense and increases the advance payments received from customers.

Due to an original term of the advance payments which is more than 12 months, the advance payments include a significant financing component according to IFRS 15.60. The compounding effect is recognized

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS (continued)**11. First time adoption of IFRS (continued)**

in interest expense and increases the advance payments received from customers. Sales revenues from advance payments received from customers will be recognized at the point of delivery of the car.

An additional deviation in general administrative expenses is caused by incremental costs directly attributable to equity transactions, which in IFRS are accounted for as a deduction from equity, whereas in HGB they are accounted for in profit and loss when they occur.

THE FUTURE OF MOBILITY IS SOLAR.

Through and including _____, 2021 (25 days after the commencement of this offering), all dealers that buy, sell or trade our common shares, whether or not participating in this offering, may be required to deliver a prospectus. This delivery requirement is in addition to the dealers' obligation to deliver a prospectus when acting as underwriters and with respect to their unsold allotments or subscriptions.

PART II

INFORMATION NOT REQUIRED IN PROSPECTUS

Item 6. Indemnification of Directors and Officers

Under Dutch law, management board members and supervisory board members may be held liable for damages in the event of improper or negligent performance of their duties. They may be held jointly and severally liable for damages to the company and to third parties for infringement of the articles of association or of certain provisions of Dutch law. In certain circumstances, they may also incur additional specific civil and criminal liabilities. Subject to certain exceptions, our articles of association provide for indemnification of our current and former management board members and supervisory board members (and other current and former officers and employees as designated by our management board, subject to approval by our supervisory board). No indemnification shall be given to an indemnified person:

- (a) if a competent court or arbitral tribunal has established, without having (or no longer having) the possibility for appeal, that the acts or omissions of such indemnified person that led to the financial losses, damages, expenses, suit, claim, action or legal proceedings as described above are of an unlawful nature (including acts or omissions which are considered to constitute malice, gross negligence, intentional recklessness and/or serious culpability attributable to such indemnified person);
- (b) to the extent that his or her financial losses, damages and expenses are covered under insurance and the relevant insurer has settled, or has provided reimbursement for, these financial losses, damages and expenses (or has irrevocably undertaken to do so);
- (c) in relation to proceedings brought by such indemnified person against the company, except for proceedings brought to enforce indemnification to which he is entitled pursuant to our articles of association, pursuant to an agreement between such indemnified person and the company which has been approved by the management board or pursuant to insurance taken out by the company for the benefit of such indemnified person; and
- (d) for any financial losses, damages or expenses incurred in connection with a settlement of any proceedings effected without the company's prior consent.

Under our articles of association, our management board may stipulate additional terms, conditions and restrictions in relation to the indemnification described above.

Item 7. Recent Sales of Unregistered Securities

Set forth below are the sales of all securities sold by Sono Motors GmbH within the past three years (i.e., since January 1, 2018 up to the date of this registration statement) which were not registered under the Securities Act:

- On January 31, 2018, our share capital as registered with the commercial register was increased by €908.00 to €32,045.00 by issuing 908 shares. In addition to the nominal value of shares (€ 908.00), the shareholders made cash contributions into our capital reserves of € 1,734,280.00.
- On February 5, 2019, our share capital as registered with the commercial register was increased by €467.00 to €32,512.00 by issuing 467 shares. In addition to the nominal value of shares (€ 467.00), the shareholders made cash contributions into our capital reserves of € 1,603,058.20.
- On April 5, 2019, our share capital as registered with the commercial register was increased by €1,076.00 to €33,588.00 by issuing 1,076 shares. In addition to the nominal value of shares (€ 1,076.00), the shareholders made cash contributions into our capital reserves of € 3,693,650.93.
- On November 25, 2020, a newly incorporated private company with limited liability under Dutch law, Sono Motors Finance B.V., issued 34,068,000 ordinary shares in its capital to the shareholder of Sono Motors GmbH, by way of a capital increase against contribution in kind of all shares in the capital of Sono Motors GmbH. Consequently, the subscribed capital as registered with the trade register of the Dutch Chamber of Commerce amounted to €2,044,080.
- On November 27, 2020, Sono Motors Finance B.V. was converted into a public company with limited liability under Dutch law, named Sono Group N.V., and 3,000,000 ordinary shares were

converted into 3,000,000 high voting shares. Consequently, the subscribed capital of Sono Group N.V. as registered with the trade register of the Dutch Chamber of Commerce was increased by €2,044,080 to €6,364,080.

- On December 10, 2020, the subscribed capital of Sono Group N.V. as registered with the trade register of the Dutch Chamber of Commerce was increased by €104,111.82 to €6,468,191.82 by issuing 1,735,197 ordinary shares. In addition to the nominal value of ordinary shares (€ 104,111.82), the shareholders made cash contributions into our share premium reserves of € 38,095,888.18.
- On May 7, 2021, the subscribed capital of Sono Group N.V. as registered with the trade register of the Dutch Chamber of Commerce was increased by €2,725.44 to €6,470,917.26 by issuing 45,424 ordinary shares. In addition to the nominal value of ordinary shares (€2,725.44), the shareholders made cash contributions into our share premium reserves of €992,274.56.
- On June 25, 2021, the subscribed capital of Sono Group N.V. as registered with the trade register of the Dutch Chamber of Commerce was increased by €1,362.72 to €6,472,279.98 by issuing 22,712 ordinary shares. In addition to the nominal value of ordinary shares (€1,362.72), the shareholders made cash contributions into our share premium reserves of €498,637.28.

The issuances of restricted securities in the transactions described above were deemed to be exempt from registration under the Securities Act in reliance upon the Section 4(a)(2) of the Securities Act and/or Regulation S promulgated under the Securities Act.

Item 8. Exhibits and Financial Statement Schedule

The exhibits listed in the exhibit index, appearing elsewhere in this registration statement, have been filed as a part of this registration statement.

All schedules have been omitted since they are not required or are not applicable or the required information is shown in the consolidated financial statements or notes thereto.

Item 9. Undertakings

(1) The undersigned registrant hereby undertakes to provide to the underwriter at the closing specified in the underwriting agreements, certificates in such denominations and registered in such names as required by the underwriter to permit prompt delivery to each purchaser.

(2) Insofar as indemnification for liabilities arising under the Securities Act of 1933 may be permitted to directors, officers and controlling persons of the registrant pursuant to the foregoing provisions, or otherwise, the registrant has been advised that in the opinion of the U.S. Securities and Exchange Commission such indemnification is against public policy as expressed in the Act and is, therefore, unenforceable. In the event that a claim for indemnification against such liabilities (other than the payment by the registrant of expenses incurred or paid by a director, officer, or controlling person of the registrant in the successful defense of any action, suit or proceeding) is asserted by such director, officer or controlling person in connection with the securities being registered, the registrant will, unless in the opinion of its counsel the matter has been settled by controlling precedent, submit to a court of appropriate jurisdiction the question of whether such indemnification by it is against public policy as expressed in the Act and will be governed by the final adjudication of such issue.

(3) The undersigned registrant hereby undertakes that:

(a) For purposes of determining any liability under the Securities Act, the information omitted from the form of prospectus filed as part of this registration statement in reliance upon Rule 430A and contained in a form of prospectus filed by the registrant pursuant to Rule 424(b)(1) or (4) or 497(h) under the Securities Act shall be deemed to be part of this registration statement as of the time it was declared effective.

(b) For the purpose of determining any liability under the Securities Act, each post-effective amendment that contains a form of prospectus shall be deemed to be a new registration statement relating to the securities offered therein, and the offering of such securities at that time shall be deemed to be the initial bona fide offering thereof.

SIGNATURE OF AUTHORIZED REPRESENTATIVE IN THE UNITED STATES

Pursuant to the Securities Act of 1933, as amended, the undersigned, the duly appointed representative in the United States of Sono Group N.V. has signed this registration statement or amendment thereto in the city of Newark, State of Delaware on November 8, 2021

Puglisi & Associates

By: /s/ Donald J. Puglisi

Name: Donald J. Puglisi

Title: Managing Director

Sono Group N.V.

[●] Common Shares

UNDERWRITING AGREEMENT

New York, New York
[●], 2021

Berenberg Capital Markets LLC
As Representative of the several Underwriters listed in Schedule I hereto,

c/o Berenberg Capital Markets LLC
1251 Avenue of the Americas, 53rd Floor
New York, New York 10020

Ladies and Gentlemen:

Sono Group N.V. is a public limited liability company (*naamloze vennootschap*) incorporated under the laws of the Netherlands (the "Company"). The share capital of the Company in the amount of €[●] consists of [●] common shares with a nominal value of €0.06 per share and [●] high voting shares with nominal value of €1.50 per share (together, the "Shares"). The Company agrees with the several Underwriters named in Schedule I (the "Underwriters") to this underwriting agreement (this "Agreement"), for whom you (the "Representative") are acting as representative, to issue and sell, and the Underwriters severally agree to purchase, an aggregate of [●] common shares, nominal value €0.06 per share (the "Common Shares") in the capital of the Company (said shares to be issued and sold by the Company being hereinafter called the "Initial Securities").

The Company also proposes to grant the Underwriters an option to purchase an aggregate of up to [●] additional Common Shares (the "Option Securities") on any Option Closing Date (as defined below). The Initial Securities and the Option Securities are hereinafter together referred to as the "Securities".

The Company understands that the Underwriters propose to make a public offering of the Securities in the United States of America (the "Offering") as soon as the Representative deems advisable after this Agreement has been executed and delivered.

As used in this Agreement,

the "Registration Statement" means the registration statement referred to in Section 1(a)(i) hereof, including the exhibits, schedules and financial statements and a prospectus relating to the Securities and the information, if any, deemed part of such registration statement pursuant to Rule 430A ("Rule 430A") under the Securities Act of 1933, as amended, and the rules and regulations promulgated thereunder (the "Securities Act"), as amended at the date and time that this Agreement is executed and delivered by the parties hereto (the "Execution Time"), and, in the event any post-effective amendment thereto or any registration statement and any amendments thereto filed pursuant to Rule 462(b) under the Securities Act (a "Rule 462(b) Registration Statement") becomes effective prior to the Closing Date (as defined in Section 2 hereof), shall also mean such registration statement as so amended or such Rule 462(b) Registration Statement, as the case may be;

the "Effective Date" means each date and time that the Registration Statement, any post-effective amendment or amendments thereto or any Rule 462(b) Registration Statement became or becomes effective;

the “Preliminary Prospectus” means any preliminary prospectus with respect to the offering of the Securities in the United States of America (the “United States”) included in the Registration Statement at the Effective Date that omits information with respect to the Securities and the offering thereof permitted to be omitted from the Registration Statement when it becomes effective pursuant to Rule 430A;

the “Prospectus” means the prospectus with respect to the offering of the Securities in the United States that is first filed with the Securities and Exchange Commission (the “Commission”) pursuant to Rule 424(b) (“Rule 424(b)”) under the Securities Act after the Execution Time;

and the “Disclosure Package” means (i) the Preliminary Prospectus, as generally distributed to investors and used to offer the Securities, (ii) any issuer free writing prospectus, as defined in Rule 433 under the Securities Act (“Rule 433” and, any such issuer free writing prospectus, an “Issuer Free Writing Prospectus”), identified in Schedule II hereto, and (iii) any other free writing prospectus, as defined in Rule 405 under the Securities Act (“Rule 405” and, any such free writing prospectus, a “Free Writing Prospectus”), that the parties hereto shall hereafter expressly agree in writing to treat as part of the Disclosure Package and the information included on Schedule III hereto.

1. Representations and Warranties.

- (a) Representations and Warranties of the Company. The Company represents and warrants to, and agrees with, each Underwriter as set forth below in this paragraph (a), as of the date hereof, the Effective Date, the Closing Date and, if applicable, each Option Closing Date.
- (i) Filing and Effectiveness of Registration Statement. The Company has prepared and filed with the Commission a Registration Statement (File No. 333-[●]) on Form F-1, including the related Preliminary Prospectus, for the registration of the offering and sale of the Securities under the Securities Act. Such Registration Statement, including any amendments thereto filed prior to the Execution Time, has become effective. The Company may have filed one or more amendments thereto, including the related Preliminary Prospectus, each of which has previously been furnished to you. No stop order suspending the effectiveness of the Registration Statement or any post-effective amendment thereto has been issued under the Securities Act, no order preventing or suspending the use of any Preliminary Prospectus or the Prospectus has been issued and no proceedings for any of those purposes have been instituted or are pending or, to the Company’s knowledge, contemplated. The Company has complied with each request (if any) from the Commission for additional information. The Company will file with the Commission a Prospectus relating to the Securities in accordance with Rule 424(b) after the Execution Time. As filed, such Prospectus shall contain all information required by the Securities Act and, except to the extent the Representative shall agree in writing to a modification, shall be in all substantive respects in the form furnished to you prior to the Execution Time or, to the extent not completed at the Execution Time, shall contain only such specific additional information and other changes (beyond that contained in the latest Preliminary Prospectus) as the Company has advised you, prior to the Execution Time, will be included or made therein.
- (ii) Compliance with Securities Act Requirements. (i) On the Effective Date, the Registration Statement did, and when the Prospectus is first filed in accordance with Rule 424(b), on the Closing Date and on each Option Closing Date (in each case as defined in Section 2 hereof), the Prospectus (and any supplements thereto) will, comply in all material respects with the applicable requirements of the Securities Act, as amended, and the rules and regulations promulgated thereunder; (ii) on the Effective Date and at the Execution Time, the Registration Statement did not and on the Closing Date and on each Option Closing Date (in each case as defined in Section 2 hereof), the Registration Statement will not, contain any untrue statement of a material fact or omit to state any material fact required to be stated therein or necessary in order to make the statements therein not misleading; and (iii) on the date of any filing pursuant to Rule 424(b), on the Closing Date and on each Option Closing Date (in each case as defined in Section 2 hereof), the Prospectus (together with any supplement thereto) will not include any untrue statement of a material fact or omit to state a material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading; provided, however, that the Company makes no representations or warranties as to the information contained in or omitted from the Registration Statement or the Prospectus (or any supplement thereto) in reliance upon and in conformity with information furnished in writing to the Company by or on behalf of any Underwriter through the Representative specifically for inclusion in the Registration Statement or the Prospectus (or any supplement thereto), it being understood and agreed that the only such information furnished by any Underwriter consists of the information described as such in Section 6 hereof. Each Preliminary Prospectus delivered to the Underwriters for use in connection with this offering and the Prospectus was or will be identical to the electronically transmitted copies thereof filed with the Commission pursuant to EDGAR, except to the extent permitted by Regulation S-T.

- (iii) *[Reserved]*
- (iv) *[Reserved]*
- (v) *[Reserved]*
- (vi) Authorization and Description of Securities. The Securities to be purchased by the Underwriters from the Company have been duly authorized for issuance and sale to the Underwriters pursuant to this Agreement and, when issued and delivered by the Company pursuant to this Agreement against payment of the consideration set forth herein, will be validly issued and fully paid and non-assessable; and the issuance of the Securities is not subject to the preemptive or other similar rights of any security holder of the Company, except as have been duly and validly waived. The Securities conform in all material respects to all statements relating thereto contained in the Registration Statement, the Disclosure Package and the Prospectus and such description conforms in all material respects to the rights set forth in the instruments defining the same. No holder of Securities will be subject to personal liability by reason of being such a holder.
- (vii) Absence of Stamp Duties and Transfer Taxes. No stamp duty, stamp duty reserve, registration, issuance, transfer taxes or other similar documentary taxes, duties, fees or charges ("Transfer Taxes") are payable or required to be paid by or on behalf of the Underwriters in Germany or the Netherlands or any political subdivision, authority or agency thereof or therein having power to tax in connection with (i) the execution, delivery and performance of this Agreement, (ii) the issuance and delivery of the Securities in the manner contemplated by this Agreement and the Prospectus, or (iii) the sale and delivery by the Underwriters of the Securities as contemplated herein and in the Prospectus.
- (viii) Dividends and Payments in Foreign Currency. Except as described in each of the Disclosure Package and the Prospectus, (i) all dividends and other distributions declared and payable on the Shares may under current Dutch law and regulations be paid to the Depositary and to the holders of Securities, as the case may be, in Euros and may be converted into foreign currency that may be transferred out of the Netherlands and (ii) all such payments made to holders thereof or therein who are non-residents of the Netherlands will not be subject to income, withholding or other taxes under laws and regulations of the Netherlands or any political subdivision or taxing authority thereof or therein and will otherwise be free and clear of any other tax, duty, withholding or deduction in Germany or any political subdivision or taxing authority thereof or therein and without the necessity of obtaining any governmental authorization in Germany or any political subdivision or taxing authority thereof or therein.

- (ix) Passive Foreign Investment Company. The Company does not expect to be a Passive Foreign Investment Company (“PFIC”) within the meaning of Section 1297 of the United States Internal Revenue Code of 1986, as amended for its current taxable year or in the foreseeable future.
- (x) Disclosure Package. (i) The Disclosure Package, (ii) each electronic road show, when taken together as a whole with the Disclosure Package, and (iii) any individual Written Testing-the-Waters Communication (as defined in Section 1(a)(xiii) hereof), when taken together as a whole with the Disclosure Package does not contain any untrue statement of a material fact or omit to state any material fact necessary in order to make the statements therein, in the light of the circumstances under which they were made, not misleading. The preceding sentence does not apply to statements in or omissions from the Disclosure Package based upon and in conformity with written information furnished to the Company by any Underwriter through the Representative specifically for use therein, it being understood and agreed that the only such information furnished by or on behalf of any Underwriter consists of the information described as such in Section 6 hereof.
- (xi) Ineligible Issuer. (i) At the time of filing the Registration Statement and any post-effective amendment thereto, (ii) at the earliest time after filing the Registration Statement that the Company or another offering participant made a *bona fide* offer (within the meaning of Rule 164(h)(2) under the Securities Act) and (iii) as of the Execution Time (with such date being used as the determination date for purposes of this clause (iii)), the Company was not and is not an Ineligible Issuer (as defined in Rule 405), without taking account of any determination by the Commission pursuant to Rule 405 that it is not necessary that the Company be considered an Ineligible Issuer.
- (xii) Emerging Growth Company. From the time of initial confidential submission of the Registration Statement to the Commission through the Execution Time, the Company is and has been and is an “emerging growth company,” as defined in Section 2(a) of the Securities Act (an “Emerging Growth Company”).
- (xiii) Testing-the-Waters Communication. The Company (i) has not alone engaged in any Testing-the-Waters Communication and (ii) has not authorized anyone other than the Underwriters to engage in Testing-the-Waters Communications. The Company reconfirms that the Underwriters have been authorized to act on its behalf in undertaking Testing-the-Waters Communications. The Company has not distributed any Written Testing-the-Waters Communications. “Written Testing-the-Waters Communication” means any Testing-the-Waters Communication that is a written communication within the meaning of Rule 405.
- (xiv) Issuer Free Writing Prospectus. Each Issuer Free Writing Prospectus, as of its issue date and at all subsequent times through the completion of the Offering, did not and will not include any information that conflicts with the information contained in the Registration Statement. The foregoing sentence does not apply to statements in or omissions from any Issuer Free Writing Prospectus based upon and in conformity with written information furnished to the Company by any Underwriter through the Representative specifically for use therein, it being understood and agreed that the only such information furnished by or on behalf of any Underwriter consists of the information described as such in Section 6 hereof.
- (xv) [Reserved]

- (xvi) Good Standing. Each of the Company and its subsidiaries has been duly formed or incorporated, as applicable, and is validly existing and is in good standing under the laws of the jurisdiction in which it is chartered or organized (to the extent applicable) with full power and authority to own or lease, as the case may be, and to operate its properties and conduct its business as described in the Registration Statement, the Disclosure Package and the Prospectus, and is duly qualified to do business as a foreign corporation and is in good standing under the laws of each jurisdiction which requires such qualification, except where the failure to be so qualified or in good standing would not reasonably be expected, individually or in the aggregate, to have a material adverse effect on the condition (financial or otherwise), prospects, earnings, business or properties of the Company and its subsidiaries, taken as a whole, whether or not arising from transactions in the ordinary course of business (a “Material Adverse Effect”).
- (xvii) Capitalization. The authorized, issued and outstanding share capital of the Company are as set forth in the Registration Statement, the Disclosure Package and the Prospectus in the column entitled “Actual” under the caption “Capitalization” (except for subsequent issuances, if any, pursuant to this Agreement, pursuant to reservations, agreements or employee benefit plans referred to in the Registration Statement, the Disclosure Package and the Prospectus or pursuant to the exercise of convertible securities or options referred to in the Registration Statement, the Disclosure Package and the Prospectus). There are no authorized or outstanding phantom equity, rights to receive shares, options, conversion rights, warrants, preemptive rights, rights of first refusal or other rights to purchase, or equity or debt securities convertible into or exchangeable or exercisable for or that can be settled in, any share capital of the Company or any of its subsidiaries other than those described in the Registration Statement, the Disclosure Package and the Prospectus. The issued share capital of the Company and the Securities have been duly authorized and validly issued and are fully paid and non-assessable. None of the issued shares of the Company were issued in violation of the preemptive or other similar rights of any security holder of the Company. All outstanding shares in the capital of the Company, and, when the Securities have been delivered and paid for in accordance with this Agreement on the Closing Date or each Option Closing Date (in each case as defined in Section 2 hereof), will be, validly issued, fully paid, non-assessable, freely transferable and free of any third party rights and conform to the description of the Offered Securities contained in the Disclosure Package and the Prospectus; any preemptive rights of any existing shareholders in connection with the offer and sale of the Securities are validly excluded or waived and will be validly excluded or waived at the respective time of delivery.
- (xviii) Capital Stock of Subsidiaries. All the outstanding shares of capital stock of each subsidiary have been duly and validly authorized and issued and are fully paid and non-assessable, and, except as otherwise set forth in the Registration Statement, the Disclosure Package and the Prospectus (exclusive of any amendment or supplement thereto), all outstanding shares of capital stock of the subsidiaries are owned by the Company either directly or through wholly owned subsidiaries free and clear of any perfected security interest or any other security interests, mortgages, pledges, claims, liens, encumbrances or equity.
- (xix) Finder’s Fee. Except as disclosed in the Registration Statement, the Disclosure Package and the Prospectus (exclusive of any amendment or supplement thereto), there are no contracts, agreements or understandings between the Company and any person that would give rise to a valid claim against the Company or any Underwriter for a brokerage commission, finder’s fee or other like payment in connection with this Offering.
- (xx) Listing. The Securities have been approved for listing on the Nasdaq Global Market, subject to notice of issuance.
- (xxi) Material Contracts. There is no franchise, contract or other document of a character required to be described in the Registration Statement or Prospectus, or to be filed as an exhibit thereto, which is not described or filed as required (and the Preliminary Prospectus contains in all material respects the same description of the foregoing matters that will be contained in the Prospectus).

- (xxii) Due Authorization. This Agreement has been duly authorized, executed and delivered by the Company.
- (xxiii) No Material Adverse Change in Business. Except as disclosed in the Disclosure Package and the Prospectus (exclusive of any amendment or supplement thereto), since June 30, 2021, (i) there has been no change, nor any development or event involving a prospective change, in the condition (financial or otherwise), results of operations, business, properties or prospects of the Company and its subsidiaries, taken as a whole that is material and adverse to the Company and its subsidiaries, (ii) there has been no dividend or distribution of any kind declared, paid or made by the Company on any class of its capital stock and (iii) there has been no material adverse change in the capital stock, short-term indebtedness, long-term indebtedness, net current assets or net assets of the Company and its subsidiaries.
- (xxiv) Investment Company Act. The Company is not and, after giving effect to the offering and sale of the Securities and the application of the proceeds thereof as described in the Disclosure Package and the Prospectus, will not be an "Investment Company" as defined in the Investment Company Act of 1940, as amended.
- (xxv) Absence of Further Requirements. No consent, approval, authorization, filing with or order of any relevant court or governmental agency or body is required in connection with the transactions contemplated herein, except (i) such as have been obtained under the Securities Act, the Exchange Act, the listing rules of the Nasdaq Stock Market ("Nasdaq"), applicable rules of the Financial Industry Regulatory Authority, Inc. ("FINRA") and (ii) such as may be required under the "blue sky" or similar laws of any U.S. or foreign jurisdiction in connection with the purchase and distribution of the Securities by the Underwriters in the manner contemplated herein and in the Disclosure Package and the Prospectus.
- (xxvi) Absence of Defaults and Conflicts Resulting from Transaction. Neither the issue and sale of the Securities nor the consummation of any other of the transactions herein contemplated or the fulfillment of the terms hereof will conflict with, result in a breach or violation of, or imposition of any lien, charge or encumbrance upon any property or assets of the Company or any of its subsidiaries pursuant to, (i) the articles of association of the Company or any of its subsidiaries, (ii) the terms of any indenture, contract, lease, mortgage, deed of trust, note agreement, loan agreement or other agreement, obligation, condition, covenant or instrument to which the Company or any of its subsidiaries is a party or bound or to which its or their property is subject, or (iii) any statute, law, rule, regulation, judgment, order or decree applicable to the Company or any of its subsidiaries of any court, regulatory body, administrative agency, governmental body, arbitrator or other authority having jurisdiction over the Company or any of its subsidiaries or any of its or their properties, except in the case of clauses (ii) and (iii) hereof for any such breach, violation or imposition as would not reasonably be expected, individually or in the aggregate, to have a Material Adverse Effect.
- (xxvii) Registration Rights. Except as described in the Prospectus and Disclosure Package (exclusive of any amendment or supplement thereto), no holders of securities of the Company have rights to the registration of such securities under the Registration Statement.

- (xxviii) Financial Statements. The consolidated historical financial statements and schedules of the Company and its consolidated subsidiaries included in the Disclosure Package, the Prospectus and the Registration Statement present fairly in all material aspects the financial condition, results of operations and cash flows of the Company and its consolidated subsidiaries as of the dates and for the periods indicated, comply as to form, in all material aspects with the applicable accounting requirements of the Securities Act and have been prepared in conformity with international financial reporting standards as issued by the International Accounting Standards Board (“IFRS”) and applied on a consistent basis throughout the periods involved (except as otherwise noted therein). The supporting schedules, if any, present fairly in accordance with IFRS the information required to be stated therein in all material respects. The summary financial information included in the Disclosure Package, the Prospectus and Registration Statement fairly present, in all material respects, on the basis stated in the Disclosure Package, the Prospectus and the Registration Statement, the information included therein and have been compiled on a basis consistent with that of the audited financial statements included therein.
- (xxix) Litigation. No action, suit or proceeding (including any inquiries or investigations) by or before any court or governmental agency, authority or body or any arbitrator involving the Company or any of its subsidiaries or its or their property is pending or, to the knowledge of the Company, threatened that (i) would reasonably be expected to have a material adverse effect on the performance of this Agreement or the consummation of any of the transactions contemplated hereby or (ii) could reasonably be expected to have a Material Adverse Effect.
- (xxx) Title to Property; Leases. Each of the Company and each of its subsidiaries owns or leases all such properties and assets as are necessary to the conduct of its operations as presently conducted except as would not reasonably be expected to have a Material Adverse Effect.
- (xxxi) Absence of Existing Defaults and Conflicts. Neither the Company nor any subsidiary is in violation or default of (i) any provision of its articles of association or bylaws, (ii) the terms of any indenture, contract, lease, mortgage, deed of trust, note agreement, loan agreement or other agreement, obligation, condition, covenant or instrument to which it is a party or bound or to which its property is subject, or (iii) any statute, law, rule, regulation, judgment, order or decree of any court, regulatory body, administrative agency, governmental body, arbitrator or other authority having jurisdiction over the Company or such subsidiary or any of its properties, as applicable, except in the case of clauses (ii) and (iii) for any such breach, violation or imposition as would not reasonably be expected, individually or in the aggregate, to have a Material Adverse Effect.
- (xxxii) Independent Public Accountants. PricewaterhouseCoopers GmbH Wirtschaftsprüfungsgesellschaft (“PwC”), who have audited the financial statements of the Company and its consolidated subsidiaries and delivered their report with respect to the audited consolidated financial statements and schedules included in the Registration Statement, the Disclosure Package and the Prospectus, are independent public accountants with respect to the Company within the meaning of the Securities Act and the applicable published rules and regulations thereunder.
- (xxxiii) Absence of Tax Issues. The Company and its subsidiaries have filed all tax returns that are required to be filed or have requested extensions thereof (except in any case in which the failure to so file would not have a Material Adverse Effect or except as set forth in or contemplated in the Disclosure Package and the Prospectus) and have paid all taxes required to be paid by them and any other assessment, fine or penalty levied against them, to the extent that any of the foregoing is due and payable, except for any such assessment, fine or penalty that is currently being contested in good faith, or as would not reasonably be expected to have a Material Adverse Effect, or except as set forth in or contemplated in the Disclosure Package and the Prospectus; and there is no tax deficiency which has been or might reasonably be expected to be asserted or threatened against the Company or any of its subsidiaries, except as would not reasonably be expected to have a Material Adverse Effect.

- (xxxiv) Absence of Labor Disputes. No labor problem or dispute with the current or former employees of the Company or any of its subsidiaries exists or is threatened in writing or to the Company's knowledge, imminent, and the Company is not aware of any existing or imminent labor disturbance by the current or former employees of any of its or its subsidiaries' principal suppliers, manufacturers, contractors or customers, that would reasonably be expected to have a Material Adverse Effect, except as set forth in the Registration Statement, the Disclosure Package and the Prospectus (exclusive of any amendment or supplement thereto).
- (xxxv) Insurance Coverage. The Company and each of its subsidiaries are insured by insurers of recognized financial responsibility against such losses and risks and in such amounts as the Company reasonably believes are adequate and customary in the businesses in which they are engaged; all policies of insurance and fidelity or surety bonds insuring the Company or any of its subsidiaries or their respective businesses, assets, employees, officers and directors are in full force and effect; the Company and its subsidiaries are in compliance with the terms of such policies and instruments in all material respects; and there are no material claims by the Company or any of its subsidiaries under any such policy or instrument as to which any insurance company is denying liability or defending under a reservation of rights clause; neither the Company nor any such subsidiary has been refused any insurance coverage sought or applied for; and neither the Company nor any such subsidiary has any reason to believe that it will not be able to renew its existing insurance coverage as and when such coverage expires or to obtain similar coverage from similar insurers as may be necessary to continue its business at a cost that would not reasonably be expected have a Material Adverse Effect.
- (xxxvi) Subsidiary Dividends. No subsidiary of the Company is currently prohibited, directly or indirectly, from paying any dividends to the Company, from making any other distribution on such subsidiary's capital stock, from repaying to the Company any loans or advances to such subsidiary from the Company or from transferring any of such subsidiary's property or assets to the Company or any other subsidiary of the Company.
- (xxxvii) Possession of Licenses and Permits. The Company and its subsidiaries possess all licenses, certificates, permits, approvals, consents and other authorizations (collectively, the "Permits") issued by all applicable authorities necessary to conduct their respective businesses as presently conducted, except where the failure to possess such Permits would not, individually or in the aggregate, reasonably be expected to have a Material Adverse Effect, and neither the Company nor any such subsidiary has received any notice of proceedings relating to the revocation or modification of any such Permit which, singly or in the aggregate, if the subject of an unfavorable decision, ruling or finding, would reasonably be expected to have a Material Adverse Effect.
- (xxxviii) Internal Controls. The Company and each subsidiary maintain a system of internal accounting controls sufficient to provide reasonable assurance that (i) transactions are executed in accordance with management's general or specific authorizations; (ii) transactions are recorded as necessary to permit preparation of financial statements in conformity with IFRS and to maintain asset accountability; (iii) access to assets is permitted only in accordance with management's general or specific authorization; and (iv) the recorded accountability for assets is compared with the existing assets at reasonable intervals and appropriate action is taken with respect to any differences. Except as set forth in the Registration Statement, Disclosure Package and the Prospectus (exclusive of any amendment or supplement thereto), the Company and its subsidiaries' internal control over financial reporting (as defined under Rule 13a-15(f) of the Exchange Act) are effective and the Company and its subsidiaries are not aware of any material weakness in their internal controls over financial reporting.

- (xxxix) *Absence of Accounting Issues*. To the Company's knowledge, the board of directors and, solely as of the Option Closing Date, the audit committee is not reviewing or investigating, and neither the Company's independent auditors nor its internal auditors have recommended that the audit committee review or investigate, (i) adding to, deleting, changing the application of, or changing the Company's disclosure with respect to any of the Company's material accounting policies; or (ii) any matter which would reasonably be expected to result in a restatement of the Company's financial statements and the schedules attached thereto for the annual or interim periods for which financial statements are included in the Registration Statement, the Disclosure Package and the Prospectus.
- (xl) *Disclosure Controls and Procedures*. The Company and its subsidiaries maintain "disclosure controls and procedures" (as such term is defined in Rule 13a-15(e) under the Exchange Act) that have been designed to ensure that material information relating to the Company and its subsidiaries is made known to the Company's principal executive officer and principal financial officer by others within those entities and such disclosure controls and procedures are effective in all material respects to perform the functions for which they were established.
- (xli) *Absence of Manipulation*. Neither the Company nor any affiliate of the Company has taken, nor will the Company or any affiliate take, directly or indirectly (without giving effect to the activities of the Underwriters), any action designed to or that would constitute or that might reasonably be expected to cause or result in stabilization or manipulation of the price of any security of the Company to facilitate the sale or resale of the Securities or to result in a violation of Regulation M under the Exchange Act.
- (xlii) *Environmental Laws (Compliance)*. The Company and its subsidiaries (i) are in compliance with any and all applicable foreign, federal, state and local laws and regulations and any order of any governmental agency or body or any court, domestic or foreign, relating to the protection of human health and safety, the environment or hazardous or toxic substances or wastes, pollutants or contaminants ("*Environmental Laws*"), (ii) have received and are in compliance with all permits, licenses or other approvals required of them under applicable Environmental Laws to conduct their respective businesses and (iii) have not received notice of any actual or potential liability under any Environmental Law, except where such non-compliance with Environmental Laws, failure to receive required permits, licenses or other approvals, or liability would not, individually or in the aggregate, have a Material Adverse Effect. Except as set forth in the Registration Statement, the Disclosure Package and the Prospectus (exclusive of any amendment or supplement thereto), neither the Company nor any of the subsidiaries has been named as a "potentially responsible party" under the Comprehensive Environmental Response, Compensation, and Liability Act of 1980, as amended, or equivalent legislation.
- (xliii) *Environmental Laws (Monitoring)*. In the ordinary course of its business, the Company periodically reviews the effect of Environmental Laws on the business, operations and properties of the Company and its subsidiaries, in the course of which it identifies and evaluates associated costs and liabilities (including, without limitation, any capital or operating expenditures required for clean-up, closure of properties or compliance with Environmental Laws, or any permit, license or approval, any related constraints on operating activities and any potential liabilities to third parties). On the basis of such review and to the best of its knowledge, the Company has reasonably concluded that such associated costs and liabilities would not, singly or in the aggregate, reasonably be expected to have a Material Adverse Effect, except as set forth in the Registration Statement, the Disclosure Package and the Prospectus (exclusive of any amendment or supplement thereto).

- (xliv) Absence of Compensation Issues. None of the following events has occurred, exists or is reasonably likely to occur that would, individually or in the aggregate, reasonably be expected to have a Material Adverse Effect or except as set forth in or contemplated in the Disclosure Package and the Prospectus: (i) a failure by the Company or any of its subsidiaries to fulfill its obligations, if any, under the minimum funding standards of any applicable pension, labor, employee benefits or similar laws or regulations; (ii) an audit or investigation by any taxing authority, any labor authority, any pension regulator or any other governmental agency or regulatory agency with respect to the employment or compensation of employees by any of the Company or any of its subsidiaries; (iii) any breach of any contractual obligation, or any violation of law, with respect to (x) any employee benefit plans, agreements or arrangements or (y) the employment or compensation of employees by the Company or any of its subsidiaries; (iv) any event or condition giving rise to a liability under any pension, labor employee benefits or similar laws or regulations; or (v) the filing of a claim by, for or in respect of one or more employees or former employees of the Company or any of its subsidiaries related to (x) any employee benefit plans, agreements or arrangements or (y) their employment or compensation.
- (xlv) Compliance with Sarbanes-Oxley Act and Exchange Rules. There is and has been no failure on the part of any of the Company and to the knowledge of the Company, any of the Company's directors or members of senior management, in their capacities as such, to comply with any provision of the Sarbanes-Oxley Act of 2002, as amended, and the rules and regulations promulgated thereunder (the "Sarbanes-Oxley Act") that are in effect and with which the Company is required to comply as of the Effective Date, including Section 402 relating to loans.
- (xlvi) Compliance with Anti-Bribery Laws. Neither the Company nor any of its subsidiaries nor, to the knowledge of the Company, any director, officer, agent, employee, affiliate or other person acting on behalf of the Company or any of its subsidiaries is aware of or has taken any action, directly or indirectly, that could result in a violation or a sanction for violation by such persons of the Foreign Corrupt Practices Act of 1977 or the U.K. Bribery Act 2010, each as may be amended, or similar law of any other relevant jurisdiction, or the rules or regulations thereunder; and the Company and its subsidiaries have instituted and maintain policies and procedures to ensure compliance therewith. No part of the proceeds of the Offering will be used, directly or indirectly, in violation of the Foreign Corrupt Practices Act of 1977 or the U.K. Bribery Act 2010, each as may be amended, or similar law of any other relevant jurisdiction, or the rules or regulations thereunder.
- (xlvii) Compliance with Anti-Money Laundering Laws. The operations of the Company and its subsidiaries are and have been conducted at all times in compliance with applicable financial recordkeeping and reporting requirements and the money laundering statutes and the rules and regulations thereunder and any related or similar rules, regulations or guidelines, issued, administered or enforced by any relevant governmental agency (collectively, the "Money Laundering Laws") and no action, suit or proceeding by or before any court or governmental agency, authority or body or any arbitrator involving the Company or any of its subsidiaries with respect to the Money Laundering Laws is pending or, to the knowledge of the Company, threatened.

- (xlviii) Compliance with Sanctions Laws (I). Neither the Company nor any of its subsidiaries nor, to the knowledge of the Company, any director, officer, agent, employee or affiliate of the Company or any of its subsidiaries (i) is, or is controlled or 50% or more owned in the aggregate by or is acting on behalf of, one or more individuals or entities that are currently the subject of any sanctions administered or enforced by the United States (including any administered or enforced by the Office of Foreign Assets Control of the U.S. Department of the Treasury, the U.S. Department of State or the Bureau of Industry and Security of the U.S. Department of Commerce), the United Nations Security Council, the European Union, a member state of the European Union, sanctions administered or enforced by Her Majesty's Treasury of the United Kingdom, or other relevant sanctions authority (collectively, "Sanctions" and such persons, "Sanctioned Persons" and each such person, a "Sanctioned Person"), (ii) is located, organized or resident in a country or territory that is, or whose government is, the subject of Sanctions that broadly prohibit dealings with that country or territory (collectively, "Sanctioned Countries" and each, a "Sanctioned Country,") or (iii) will, directly or indirectly, use the proceeds of this Offering, or lend, contribute or otherwise make available such proceeds to any subsidiary, joint venture partner or other individual or entity in any manner that would result in a violation of any Sanctions by, or could result in the imposition of Sanctions against, any individual or entity (including any individual or entity participating in the Offering, whether as underwriter, advisor, investor or otherwise).
- (xlix) Compliance with Sanctions Laws (II). Neither the Company nor any of its subsidiaries has engaged in any dealings or transactions with or for the benefit of a Sanctioned Person, or with or in a Sanctioned Country, in the preceding three years, nor does the Company or any of its subsidiaries have any plans to engage in dealings or transactions with or for the benefit of a Sanctioned Person, or with or in a Sanctioned Country.
- (l) Significant Subsidiaries. The subsidiaries listed on Schedule IV attached hereto are the only significant subsidiaries of the Company as defined by Rule 1-02 of Regulation S-X.

- (i) Intellectual Property. The Company and its subsidiaries own, possess, license or have other valid rights to use, on reasonable terms, all patents, patent applications, trade and service marks, trade and service mark registrations, trade names, copyrights, licenses, inventions, trade secrets, technology, know-how and other intellectual property necessary for the conduct of the Company's business as now conducted or as proposed in the Disclosure Package and Prospectus to be conducted (collectively, the "Intellectual Property"). Except as set forth in the Registration Statement, the Disclosure Package and the Prospectus, (i) there are no rights of third parties to any Intellectual Property and the Intellectual Property is owned by the Company or any of its subsidiaries free and clear of all liens, security interests, or encumbrances; (ii) there is no material infringement, misappropriation or other violation by third parties of any Intellectual Property, and there is no pending or threatened action, suit, proceeding or claim by the Company or its subsidiaries against any third party for such infringement, misappropriation or other violation, and neither the Company nor its subsidiaries are aware of any facts which would form a reasonable basis for any such action, suit, proceeding or claim; (iii) there is no pending or, to the Company's knowledge, threatened action, suit, proceeding or claim by others against the Company or its subsidiaries challenging the Company's or its subsidiaries' rights in or to any Intellectual Property, and neither the Company nor its subsidiaries are aware of any facts which would form a reasonable basis for any such action, suit, proceeding or claim; (iv) there is no pending or, to the Company's knowledge, threatened material action, suit, proceeding or claim by others challenging the validity or scope of any Intellectual Property, including interferences, oppositions, reexaminations, or government proceedings, and neither the Company nor its subsidiaries are aware of any facts which would form a reasonable basis for any such material action, suit, proceeding or claim; (v) the patents, trademarks and copyrights included within the Intellectual Property are valid, enforceable and subsisting, and the patent, trademark, and copyright applications included within the Intellectual Property are subsisting and have not been abandoned; (vi) there is no pending or, to the Company's knowledge, threatened action, suit, proceeding or claim by others that the Company or its subsidiaries infringe, misappropriate or otherwise violate, or would, upon the commercialization of any product or service described in the Disclosure Package and the Prospectus infringe, misappropriate, or otherwise violate, any patent, trademark, copyright, trade secret or other proprietary rights of others, and neither the Company nor its subsidiaries are aware of any facts which would form a reasonable basis for any such action, suit, proceeding or claim; (vii) the development, manufacture, sale, and any current or proposed use of any of the products, proposed products or processes of the Company and its subsidiaries referred to in the Disclosure Package and the Prospectus, in the current or proposed conduct of the business of the Company and its subsidiaries, have not, do not currently, and to the Company's knowledge, will not upon commercialization, infringe, misappropriate or otherwise violate any patent, trademark, copyright, trade secret or other proprietary right of any third party; (viii) all Intellectual Property owned by or licensed to the Company or its subsidiaries or under which the Company or its subsidiaries have rights has been duly and properly filed and maintained and there are no material defects in any of the patents or patent applications in the Intellectual Property; (ix) no Intellectual Property has been adjudged by a court of competent jurisdiction invalid or unenforceable, in whole or in part; (x) to the Company's knowledge, there is no prior art that may render any issued patent held by the Company invalid; (xi) all prior art of which the Company or its subsidiaries are aware that is material to the validity of a U.S. patent or to the patentability of a pending U.S. patent application that the Company or its subsidiaries own, possess, license or have other rights to use has been disclosed to the U.S. Patent and Trademark Office in compliance with 37 CFR § 1.56 during the prosecution of such applicable patent or applicable patent application, and, in the case of all other patents and patent applications included in the Intellectual Property, all such prior art has been disclosed to the patent office of other jurisdictions where required; and (xii) to the Company's knowledge, there is no reason for the scope of any issued claims under any patents included in the Intellectual Property, or for the scope of any claims that issue under any pending patent applications included in the Intellectual Property, to be materially less than the scope reflected in such patent or patent application, respectively, as of the date hereof. Each person who has created or developed any Intellectual Property as an employee of or contractor to the Company or its subsidiaries has done so pursuant to a binding and enforceable written agreement (or pursuant to similar obligations by operation of law) which includes provisions sufficient to ensure that the Company or its subsidiaries are the exclusive owner of such Intellectual Property. To the Company's knowledge, no employee, consultant or independent contractor of the Company is in or has ever been in violation in any material respect of any term of any employment contract, patent disclosure agreement, invention assignment agreement, non-competition agreement, non-solicitation agreement, non-disclosure agreement or any restrictive covenant to or with a former employer or independent contractor where the basis of such violation relates to such employee's employment or independent contractor's engagement with the Company or its subsidiaries or actions undertaken while employed or engaged with the Company or its subsidiaries. The Company and its subsidiaries have taken and will take reasonable steps in accordance with standard industry practices to maintain and protect the confidentiality of the trade secrets and other confidential Intellectual Property used in connection with the businesses of the Company and its subsidiaries and, to the knowledge of the Company, such confidential Intellectual Property has not been compromised or disclosed to or accessed by any third party except pursuant to nondisclosure and confidentiality agreements.
- (ii) Fair Summaries. There is no franchise, contract or other document of a character required to be described in the Registration Statement or Prospectus, or to be filed as an exhibit thereto, which is not described or filed as required (and the Preliminary Prospectus contains in all material respects the same description of the foregoing matters contained in the Prospectus); and the statements contained in the Disclosure Package and the Prospectus under the captions "Business—Intellectual Property", "Business—Legal Proceedings", "Regulatory Environment", and "Description of Share Capital and Articles of Association" in each case insofar as such statements summarize legal matters, agreements, documents, or proceedings discussed therein, are accurate and fair summaries of such legal matters, agreements, documents or proceedings, and the statements contained in the Registration Statement, the Disclosure Package and the Prospectus under the caption "Taxation," insofar as such statements purport to summarize certain federal income tax laws of the United States and certain tax laws of the Netherlands and Germany, constitute a fair summary of the principal U.S. federal income tax consequences, Dutch tax consequences and German tax consequences, respectively, of an investment in the Securities as per the date of the Registration Statement, the Disclosure Package and the Prospectus.

- (liii) Cybersecurity. (i) Except as may be included in the Registration Statement, the Disclosure Package and the Prospectus, (x) to the Company's knowledge, there has been no material security breach or incident, unauthorized access or disclosure, or other material compromise of or relating to any of the Company's or its subsidiaries' information technology and computer systems, networks, hardware, software, data and databases (including the data of their respective customers, employees, suppliers, vendors and any third party data maintained by or on behalf of them), equipment or technology (collectively, "IT Systems and Data") and (y) the Company and its subsidiaries have not been notified in writing of, and have no knowledge of any event or condition that would reasonably be expected to result in, any material security breach or incident, unauthorized access or disclosure or other material compromise to their IT Systems and Data; (ii) the Company and its subsidiaries have been and are presently in compliance with all applicable laws or statutes, all judgments, orders, rules and regulations of any relevant court or arbitrator or governmental or regulatory authority, internal policies and contractual obligations relating to the privacy and security of IT Systems and Data and to the protection of such IT Systems and Data from unauthorized use, access, misappropriation or modification, and (iii) except as may be included in the Registration Statement, the Disclosure Package and the Prospectus, the Company and its subsidiaries have implemented commercially reasonable controls, policies, procedures, and technological safeguards and backup and disaster recovery technology to maintain and protect the integrity, continuous operation, redundancy and security of their IT Systems and Data consistent with industry standards and practices, or as required by applicable regulatory standards, except as would not, in the case of clause (ii), individually or in the aggregate, reasonably be expected to have a Material Adverse Effect.
- (liv) Statistical and Market-Related Data. (i) Any third-party statistical and market-related data included in the Registration Statement, the Disclosure Package or the Prospectus, including but not limited to [the market reports referred to in the Disclosure Package and the Prospectus under the heading [●]] are based on or derived from sources that the Company reasonably believes to be reliable and accurate, (ii) to the extent required, the Company has obtained the written consent to the use of such data from such sources, and (iii) the Company's expectations or estimates included in the Registration Statement, the Disclosure Package or the Prospectus based on such third-party statistical and market-related data represent the Company's good faith expectations or estimates.
- (lv) Lending Relationship. Except as disclosed in the Registration Statement, the Disclosure Package and the Prospectus (exclusive of any amendment or supplement thereto), the Company (i) does not have any material lending or other relationship with any bank or lending affiliate of any Underwriter and (ii) does not intend to use any of the proceeds from the sale of the Securities hereunder to repay any outstanding debt that is to the best knowledge of the Company owed to any affiliate of any Underwriter.
- (lvi) Personal Jurisdiction. The Company has validity and irrevocably submitted to the personal jurisdiction of any state or Federal court in the City of New York, New York, for any suit, action or proceeding arising out of or based upon this Agreement and has validly and irrevocably waived any objection to the venue of a proceeding in any such court.

- (lvii) Absence of Immunity from Jurisdiction. Neither the Company nor any of its subsidiaries nor any of its or their properties or assets has any immunity from the jurisdiction of any court or from any legal process (whether through service or notice, attachment prior to judgment, attachment in aid of execution or otherwise) under the laws of (i) any jurisdiction in which they own or lease property or assets, (ii) the United States or the State of New York, or (iii) the Netherlands or any political subdivision thereof with respect to themselves or their property and assets.
- (lviii) Maintenance of Rating. At the date of this Agreement, neither the Company nor its subsidiaries have any debt securities or preferred shares that are rated by any “nationally recognized statistical rating agency” (as defined in Section 3(a)(62) of the Exchange Act)

(b) Any certificate signed by any two officers of the Company and delivered to the Representative or counsel for the Underwriters in connection with the Offering shall be deemed a representation and warranty by the Company, as to matters covered thereby as of the date thereof, to each Underwriter.

2. Purchase, Sale and Delivery of and Payment for the Securities.

(a) Purchase and Sale of Initial Securities

(i) Each Underwriter, on the basis of the representations, warranties and agreements set forth herein and subject to the conditions set forth herein, agrees, severally and not jointly, to purchase from the Company the respective number of Initial Securities set forth opposite such Underwriter’s name in Schedule I hereto at the price set forth in Schedule I hereto, plus any additional number of Initial Securities which such Underwriter may become obligated to purchase pursuant to the provisions of Section [7] hereof, subject, in each case, to such adjustments among the Underwriters as the Representative in its sole discretion shall make to eliminate any sales or purchases of fractional shares.

(b) Purchase and Sale of Option Securities

(i) Subject to the terms and conditions and in reliance upon the representations and warranties herein set forth, the Company hereby grants an option to the several Underwriters to purchase, severally and not jointly, up to [●] Option Securities at the same purchase price per share as the Underwriters shall pay for the Initial Securities set forth in Schedule I hereto, less an amount per share equal to any dividends or distributions declared by the Company and payable on the Initial Securities but not payable on the Option Securities. Said option may be exercised in whole or in part at any time on or before the 30th day after the date of the Prospectus upon written, electronic or telegraphic notice by the Representative to the Company setting forth the number of Option Securities as to which the several Underwriters are exercising the option and the date of payment and delivery for such Option Securities. Any such time and date of delivery (an “Option Closing Date”) shall be determined by the Representative upon consultation with the Company, but shall not be later than seven full business days after the exercise of said option, nor in any event prior to the Closing Date. If the option is exercised as to all or any portion of the Option Securities, each of the Underwriters, acting severally and not jointly, will purchase that proportion of the total number of Option Securities then being purchased which the number of Initial Securities set forth in Schedule I opposite the name of such Underwriter bears to the total number of Initial Securities, subject, in each case, to such adjustments as the Representative in its sole discretion shall make to eliminate any sales or purchases of fractional shares.

(c) Delivery and Payment.

- (i) It is understood that the several Underwriters are to make an Offering of the Securities in the manner contemplated in the Registration Statement as soon as the Representative deems it advisable to do so. In connection with the Offering, the Securities will be offered in a public offering in the United States of America.
- (ii) Delivery of and payment of the purchase price for the Initial Securities shall be made [at the offices of Skadden, Arps, Slate, Meagher & Flom (UK) LLP, 40 Bank Street, E145DS, London, UK, or at such other place as shall be agreed upon by the Representative and the Company, at [●] (New York City time) on the second (third, if the pricing occurs after 4:30 P.M. (New York City time) on any given day) business day after the date hereof (unless postponed in accordance with the provisions of Section 10), or such other time not later than ten business days after such date as shall be agreed upon by the Representative and the Company (such time and date of payment and delivery being herein called "Closing Date").
- (iii) In addition, in the event that any or all of the Option Securities are purchased by the Underwriters, payment of the purchase price for, and delivery of, such Option Securities shall be made at [the above-mentioned offices], or at such other place as shall be agreed upon by the Representative and the Company, on each Option Closing Date as specified in the notice from the Representative to the Company.
- (iv) Payment shall be made to the Company in same day funds by wire transfer to the account(s) designated by the Company against delivery to the Representative for their respective accounts of the several Underwriters of the Securities purchased by them. It is understood that each Underwriter has authorized the Representative, for its account, to accept delivery of, receipt for, and make payment of the purchase price for, the Initial Securities and the Option Securities, if any, which it has agreed to purchase.
- (v) Delivery of the Initial Securities and any Option Securities shall be made through the facilities of The Depository Trust Company.

3. Agreements.

(a) The Company agrees with the several Underwriters that:

- (i) Additional Filings. Prior to the termination of the Offering, the Company will not file any amendment of the Registration Statement or supplement to the Prospectus or any Preliminary Prospectus or any Rule 462(b) Registration Statement unless the Company has furnished the Underwriters a copy for their review prior to filing and will not file any such proposed amendment or supplement without the prior consent of the Representative, which will not be unreasonably withheld, conditioned or delayed. The Company will cause the Prospectus, properly completed, and any supplement thereto to be filed in a form approved by the Representative with the Commission pursuant to the applicable paragraph of Rule 424(b) within the time period prescribed and will provide evidence satisfactory to the Representative of such timely filing.

- (ii) Filing of Amendments; Response to Commission Requests. The Company will promptly advise the Representative (i) when the Prospectus, and any supplement thereto, shall have been filed (if required) with the Commission pursuant to Rule 424(b) or when any Rule 462(b) Registration Statement shall have been filed with the Commission, (ii) when, prior to termination of the Offering, any amendment to the Registration Statement shall have been filed or become effective, (iii) of any request by the Commission or its staff for any amendment of the Registration Statement or any Rule 462(b) Registration Statement, or for any supplement to the Prospectus or for any additional information, (iv) of the issuance by the Commission of any stop order suspending the effectiveness of the Registration Statement or of any notice objecting to its use or the institution or threatening of any proceeding for that purpose and (v) of the receipt by the Company of any notification with respect to the suspension of the qualification of the Securities for sale in any jurisdiction or the institution or threatening of any proceeding for such purpose. The Company will use its best efforts to prevent the issuance of any such stop order or the occurrence of any such suspension or objection to the use of the Registration Statement and, upon such issuance, occurrence or notice of objection, to obtain as soon as possible the withdrawal of such stop order or relief from such occurrence or objection, including, if necessary, by filing an amendment to the Registration Statement or a new registration statement and using its best efforts to have such amendment or new registration statement declared effective as soon as practicable.
- (iii) Duty to Amend or Supplement the Disclosure Package. If, at any time prior to the filing of the Prospectus pursuant to Rule 424(b), any event occurs as a result of which the Disclosure Package would include any untrue statement of a material fact or omit to state any material fact necessary in order to make the statements therein in the light of the circumstances under which they were made or the circumstances then prevailing not misleading, the Company will (i) notify promptly the Representative so that any use of the Disclosure Package may cease until it is amended or supplemented; (ii) amend or supplement the Disclosure Package to correct such statement or omission; and (iii) supply any amendment or supplement to you in such quantities as you may reasonably request.
- (iv) Duty to Amend or Supplement the Prospectus. If, at any time when a prospectus relating to the Securities is required to be delivered under the Securities Act (including in circumstances where such requirement may be satisfied pursuant to Rule 172 under the Securities Act (“Rule 172”)), any event occurs as a result of which the Prospectus as then supplemented would include any untrue statement of a material fact or omit to state any material fact necessary in order to make the statements therein in the light of the circumstances under which they were made or the circumstances then prevailing not misleading, or if it shall be necessary to amend the Registration Statement or supplement the Prospectus to comply with the Securities Act or the Exchange Act or the respective rules thereunder, including in connection with the use or delivery of the Prospectus, the Company promptly will (i) notify the Representative of any such event; (ii) prepare and file with the Commission, subject to the second sentence of paragraph (i) of this Section 3, an amendment or supplement which will correct such statement or omission or effect such compliance; (iii) use its reasonable best efforts to have any amendment to the Registration Statement or new registration statement declared effective as soon as practicable in order to avoid any disruption in the use of the Prospectus and (iv) supply any supplemented Prospectus to you in such quantities as you may reasonably request.
- (v) Availability of Earnings Statement. As soon as practicable, the Company will make generally available to its security holders and to the Representative an earnings statement or statements of the Company and its subsidiaries which will satisfy the provisions of Section 11(a) of the Securities Act and Rule 158 under the Securities Act.
- (vi) Copies of Registration Statements and Prospectus. The Company will furnish to the Representative and counsel for the Underwriters, without charge, signed copies of the Registration Statement (including exhibits thereto) and to each other Underwriter a copy of the Registration Statement (without exhibits thereto) and, so long as delivery of a prospectus by an underwriter or dealer may be required (including in circumstances where such requirement may be satisfied pursuant to Rule 172) by the Securities Act, as many copies of the Preliminary Prospectus, the Prospectus and each Issuer Free Writing Prospectus and any supplement thereto as the Representative may reasonably request. The Company will pay the expenses of printing or other production of all documents relating to the Offering. The copies of the documentation furnished by the Company pursuant to this clause, except as otherwise stated in this clause, will be identical to the electronically transmitted copies thereof filed with the Commission pursuant to EDGAR, except to the extent permitted by Regulation S-T.

- (vii) Qualification of Securities. The Company will arrange, if necessary, for the qualification of the Securities for sale under (or obtain exemptions from the application of) the laws of such jurisdictions as the Representative may designate and will maintain such qualifications in effect so long as required for the distribution of the Securities; provided that in no event shall the Company be obligated to (i) qualify to do business in any jurisdiction where it is not now so qualified or (ii) to take any action that would subject it to service of process in suits, other than those arising out of the offering or sale of the Securities, in any jurisdiction where it is not now so subject, or (iii) subject itself to taxation in any jurisdiction in which it is not otherwise so subject.
- (viii) Lock-Up Period. The Company will not, without the prior written consent of the Representative, offer, sell, issue, contract to sell, pledge, or otherwise dispose of, (or enter into any transaction which is designed to, or might reasonably be expected to, result in the disposition (whether by actual disposition or effective economic disposition due to cash settlement or otherwise) by the Company or any affiliate of the Company or any person in privity with the Company or any affiliate of the Company) directly or indirectly, including the filing (or participation in the filing) of a registration statement with the Commission in respect of, or establish or increase a put equivalent position or liquidate or decrease a call equivalent position within the meaning of Section 16 of the Exchange Act, any other Common Shares or any securities convertible into, or exercisable, or exchangeable for, Common Shares; or publicly announce an intention to effect any such transaction, for a period of 180 days after the date of this Agreement (the "Lock-Up Period"), provided, however, that the Company may:
- (i) effect the transactions contemplated hereby; (ii) effecting the conversion of the Company's previously issued convertible senior notes into Common Shares concurrently with the consummation of the Offering, (iii) issue and sell Common Shares pursuant to any employee stock option plan, incentive plan, employee stock purchase plan, stock bonus plan, stock option ownership plan, dividend reinvestment plan or warrant program of the Company in effect at the Execution Time or adopted in connection with the offering contemplated by this Agreement and described in the Disclosure Package, and the Company may issue Common Shares issuable upon the conversion of securities or the exercise of warrants outstanding at the Execution Time; (iv) file one or more registration statements on Form S-8 relating to stock options or employee benefit plans of the Company described in the Disclosure Package and Prospectus; (v) offer, issue and sell Common Shares in connection with any merger, acquisition or strategic investment (including any joint venture, strategic alliance, partnership, the acquisition or license of the business, property, technology or other assets of another individual or entity, or the assumption of an employee benefit plan in connection with such a merger or acquisition); (vi) offer, issue and sell Common Shares, on an arm's length basis to, to any unaffiliated collaborators, manufacturers, distributors, or any other similar parties pursuant to a collaboration, licensing agreement, strategic alliance, manufacturing, distribution or settlement agreement or similar transaction; or (vii) offer, issue and sell Common Shares, on an arm's length basis to, to unaffiliated financial institutions or current lenders of the Company or one of its subsidiaries pursuant to a commercial agreement, equipment financing transaction, commercial property lease transaction or in lieu of repayment of outstanding indebtedness, provided, however, that the aggregate number of Common Shares that the Company may issue or agree to issue pursuant to clauses (v), (vi) and (vii) shall not exceed 5% of the number of Common Shares outstanding immediately after the issuance and sale of securities, and provided, further, that each recipient of such securities agrees to restrictions on the resale of securities that are consistent with the provisions set forth in the lock-up letter described in Section 6(r) hereof.

- (ix) Press Release. If the Representative, in its sole discretion, agrees to release or waive the restrictions set forth in a Lock-Up Letter for an officer or director of the Company and provides the Company with notice (substantially in the form of Exhibit B hereto) of the impending release or waiver at least three business days before the effective date of the release or waiver, the Company agrees to announce the impending release or waiver by a press release substantially in the form of Exhibit C hereto through a major news service at least two business days before the effective date of the release or waiver.
- (x) Absence of Manipulation. The Company will not take, directly or indirectly, without giving effect to activities by the Underwriters, any action designed to or that would constitute or that might reasonably be expected to cause or result in, under the Exchange Act or otherwise, stabilization or manipulation of the price of any security of the Company to facilitate the sale or resale of the Securities.
- (xi) [Reserved].
- (xii) (Issuer) Free Writing Prospectus. The Company agrees that, unless it has or shall have obtained the prior written consent of the Representative, it has not made and will not make any offer relating to the Securities that would constitute an Issuer Free Writing Prospectus or that would otherwise constitute a Free Writing Prospectus required to be filed by the Company with the Commission or retained by the Company under Rule 433; provided that the prior written consent of the parties hereto shall be deemed to have been given in respect of the Free Writing Prospectuses included in Schedule II hereto and any electronic road show. Any such free writing prospectus consented to by the Representative or the Company is hereinafter referred to as a "Permitted Free Writing Prospectus." The Company agrees that (x) it has treated and will treat, as the case may be, each Permitted Free Writing Prospectus as an Issuer Free Writing Prospectus and (y) it has complied and will comply, as the case may be, with the requirements of Rule 164 under the Securities Act ("Rule 164") and Rule 433 applicable to any Permitted Free Writing Prospectus, including in respect of timely filing with the Commission, legending and record keeping.
- (xiii) Emerging Growth Company. The Company will promptly notify the Representative if the Company ceases to be an Emerging Growth Company at any time prior to the later of (a) completion of the distribution of the Securities within the meaning of the Securities Act and (b) completion of the Lock-Up Period referred to in Section (viii) hereof.
- (xiv) Written Testing-the-Waters Communication. If at any time following the distribution of any Written Testing-the-Waters Communication, any event occurs as a result of which such Written Testing-the-Waters Communication would include any untrue statement of a material fact or omit to state any material fact necessary in order to make the statements therein in the light of the circumstances under which they were made or the circumstances then prevailing not misleading, the Company will (i) notify promptly the Representative so that use of the Written Testing-the-Waters Communication may cease until it is amended or supplemented; (ii) amend or supplement the Written Testing-the-Waters Communication to correct such statement or omission; and (iii) supply any amendment or supplement to the Representative in such quantities as may be reasonably requested.
- (xv) Use of Proceeds. The Company will use the net proceeds received in connection with this Offering in the manner described in the "Use of Proceeds" section of the Registration Statement, the Disclosure Package and the Prospectus and the Company does not intend to use any of the proceeds from the sale of the Securities hereunder to repay any outstanding debt owed to any affiliate of any Underwriter.

- (xvi) Annual Report to Shareholders. During the period of three years hereafter, the Company will furnish to the Representative and, upon request, to each of the other Underwriters, as soon as practicable after the end of each fiscal year, a copy of its annual report to shareholders for such year; and the Company will furnish to the Representative from time to time such other information concerning the Company as the Representative may reasonably request. However, so long as the Company is subject to the reporting requirements of either Section 13 or Section 15(d) of the Exchange Act and is timely filing reports with the Commission on its Electronic Data Gathering, Analysis and Retrieval system, it is not required to furnish such reports or statements to the Underwriters.
- (xvii) Reporting Requirements. The Company, during the period when a Prospectus relating to the Securities is (or, but for the exception afforded by Rule 172, would be) required to be delivered under the Securities Act, will file all documents required to be filed with the Commission pursuant to the Exchange Act within the time periods required by the Exchange Act and the applicable regulations thereunder. Additionally, the Company shall report the use of proceeds from the issuance of the Common Shares as may be required under Rule 463 under the Securities Act.
- (xviii) Costs and Expenses. The Company agrees to pay the costs and expenses relating to the following matters: (i) the preparation, printing or reproduction and filing with the Commission of the Registration Statement (including financial statements and exhibits thereto), the Preliminary Prospectus, the Prospectus, each Issuer Free Writing Prospectus and each amendment or supplement to any of them; (ii) the printing (or reproduction) and delivery (including postage, air freight charges and charges for counting and packaging) of such copies of the Registration Statement, the Preliminary Prospectus, the Prospectus and each Issuer Free Writing Prospectus and all amendments or supplements to any of them, as may, in each case, be reasonably requested for use in connection with the Offering; (iii) the preparation, printing, authentication, issuance and delivery of certificates for the Securities, including any Transfer Taxes in connection with the original issuance and sale of the Securities; (iv) the printing (or reproduction) and delivery of this Agreement, any blue sky memorandum and all other agreements or documents printed (or reproduced) and delivered in connection with the Offering; (v) the registration of the Securities under the Exchange Act and the listing of the Securities on Nasdaq; (vi) any registration or qualification of the Securities for offer and sale under the securities or blue sky laws of the several states (including filing fees and the reasonable fees and expenses of counsel for the Underwriters relating to such registration and qualification, provided that such counsel fees and expenses shall not exceed \$5,000); (viii) any filings required to be made with FINRA including filing fees and the reasonable fees and expenses of counsel for the Underwriters relating to such filings (provided that such counsel fees and expenses shall not exceed \$25,000); (ix) the transportation and other expenses incurred by or on behalf of Company representatives in connection with presentations to prospective purchasers of the Securities; (x) the fees and expenses of the Company's accountants and the fees and expenses of counsel (including local and special counsel) for the Company; and (xi) all other costs and expenses incident to the performance by the Company of their obligations under this Agreement.
- (xix) Stamp and Other Taxes. The Company will indemnify and hold harmless the Underwriters against any Transfer Taxes including any interest and penalties payable by the Underwriters, on or in connection with (i) the creation, issue and sale of the Securities, and (ii) the execution and delivery of this Agreement, and the performance of the obligations under it. All payments to be made by the Company hereunder shall be made without withholding or deduction for or on account of any present or future taxes, levies, imposts, duties, fees, assessments or other governmental charges whatsoever, and all interest, penalties, or similar liabilities with respect thereto (each of the above, as well as together, "Taxes") unless the Company is compelled by law to deduct or withhold such Taxes. In that event, the Company shall pay such additional amounts as may be necessary in order that the net amounts received after such withholding or deduction shall equal the amounts that would have been received if no withholding or deduction had been made.

(xx) Maintenance of Listing. The Company will use its reasonable best efforts to maintain the listing for the Securities on Nasdaq for 24 months from the Closing Date.

4. Conditions to the Obligations of the Underwriters. The obligations of the Underwriters to purchase the Initial Securities and the Option Securities, as the case may be, shall be subject to the accuracy of the representations and warranties on the part of the Company contained in this Agreement as of the Execution Time, the Closing Date and each Option Closing Date, to the accuracy of the statements of the Company made in any certificates pursuant to the provisions hereof, to the performance by the Company of its obligations under this Agreement and to the following additional conditions:

- (a) Registration Compliance; No Stop Order. The Registration Statement has become effective and, on the Closing Date, no order suspending the effectiveness of the Registration Statement (including, for avoidance of doubt, any Rule 462(b) Registration Statement) has been issued, no order preventing or suspending the use of any Preliminary Prospectus or the Prospectus has been issued, and no proceeding for any of those purposes or pursuant to Section 8A under the Securities Act have been instituted or are pending before or, to the knowledge of the Company, threatened by the Commission; the Prospectus and each Issuer Free Writing Prospectus shall have been timely filed with the Commission under the Securities Act (in the case of an Issuer Free Writing Prospectus, to the extent required by Rule 433 under the Securities Act) and in accordance with Section 5(c) hereof. The Company has complied with each request (if any) from the Commission for additional information.
- (b) No Material Adverse Change. Since the date of this Agreement, no event or condition of a type described in Section 1(a)(xxiii) hereof shall have occurred or shall exist, which event or condition is not described or contemplated in the Disclosure Package (excluding any amendment or supplement thereto) and the Prospectus (excluding any amendment or supplement thereto) and the effect of which in the judgment of the Representative makes it impracticable or inadvisable to proceed with the offering, sale or delivery of the Securities on the Closing Date or each Option Closing Date, as the case may be, on the terms and in the manner contemplated by this Agreement, the Disclosure Package and the Prospectus.
- (c) Company Officer's Certificate. The Representative shall have received, on and as of the Closing Date and, if applicable, each Option Closing Date, as the case may be, a certificate of the chief financial officer of the Company and one additional member of the management board or another senior executive officer of the Company who is reasonably satisfactory to the Representative, in each case in their capacity as officers of the Company and not in their individual capacity (i) confirming that such officers have carefully reviewed the Registration Statement, the Disclosure Package and the Prospectus and, to the knowledge of such officers, the representations set forth in Section 1(a) hereof are true and correct on and as of the Closing Date or each applicable Option Closing Date with the same effect as if made on the Closing Date or each applicable Option Closing Date, (ii) confirming that the Company has complied in all material respects with all agreements and satisfied all conditions on its part to be performed or satisfied hereunder at or prior to the Closing Date or each applicable Option Closing Date, as the case may be, (ii) confirming that at the Closing Date or each applicable Option Closing Date, there have not been, since the date hereof or since the respective dates as of which information is given in the Registration Statement, the Disclosure Package or the Prospectus, any Material Adverse Effect on the condition, financial or otherwise, or in the earnings, business affairs or business prospects of the Company and its subsidiaries considered as one enterprise, whether or not arising in the ordinary course of business and (iii) no stop order suspending the effectiveness of the Registration Statement (including, for avoidance of doubt, any Rule 462(b) Registration Statement), or any post-effective amendment thereto or any notice objective to their use, has been issued and no proceeding for such purpose or pursuant to Section 8A under the Securities Act shall be pending before or, to the knowledge of the Company, threatened by the Commission.

- (d) [Reserved].
- (e) [Reserved].
- (f) Comfort Letters. On the date of this Agreement and on the Closing Date or each applicable Option Closing Date, as the case may be, (i) PWC shall have furnished to the Representative, at the request of the Company, letters, dated the respective date of delivery thereof and addressed to the Underwriters, in form and substance reasonably satisfactory to the Representative, containing statements and information of the type customarily included in accountants' "comfort letters" to underwriters with respect to the financial statements and certain financial information of the Company and its consolidated subsidiaries contained in or incorporated by reference in each of the Registration Statement, the Disclosure Package and the Prospectus; provided, that the letter delivered by PWC on the Closing Date or each applicable Option Closing Date, as the case may be, shall use a "cut-off" date no more than [●] business days prior to such Closing Date or such Option Closing Date, as the case may be.
- (g) Opinion and 10b-5 Statement of Counsel for the Company. The Representative shall have received on and as of the Closing Date or the applicable Option Closing Date, as the case may be, (i) a U.S. opinion and 10b-5 letter, addressed to the Underwriters, of Sullivan & Cromwell LLP, counsel for the Company (ii) a Dutch opinion, addressed to the Underwriters, of NautaDutilh N.V., Dutch counsel for the Company with respect to such matters as the Representative may reasonably request, (iii) a German opinion, addressed to the Underwriters, of [●], (iv) an opinion with respect to intellectual property by [●], addressed to the Underwriters, and (v) an opinion with respect to trademarks by [-], addressed to the Underwriters in form and substance reasonably satisfactory to the Representative, and such counsel shall have received such documents and information as they may reasonably request to enable them to pass upon such matters.
- (h) [Reserved].
- (i) [Reserved].
- (j) Opinion and 10b-5 Statement of Counsel for the Underwriters. The Representative shall have received on and as of the Closing Date or each applicable Option Closing Date, as the case may be, (i) a U.S. opinion and 10b-5 letter, addressed to the Underwriters, of Skadden, Arps, Slate, Meagher & Flom (UK) LLP counsel for the Underwriters with respect to such matters as the Representative may reasonably request, and such counsel shall have received such documents and information as they may reasonably request to enable them to pass upon such matters.
- (k) [Reserved].
- (l) Exchange Listing. The Securities to be delivered on the Closing Date or each applicable Option Closing Date, as the case may be, shall have been duly listed on [●], subject to official notice of issuance.
- (m) Lock-up Agreements. The "lock-up" agreements, each substantially in the form of Exhibit A hereto, between you and certain shareholders identified in Schedule V hereto relating to sales and certain other dispositions of Common Shares or certain other securities, delivered to you on or before the date hereof, shall be full force and effect on the Closing Date or each applicable Option Closing Date, as the case may be.

- (n) [Reserved].
- (o) [Reserved].
- (p) [Reserved].
- (q) Additional Information upon Representative's Request. The Company will furnish the Representative with such information, opinions, certificates, letters and documents as the Representative reasonably requests. The Representative may in its sole discretion waive on behalf of the Underwriters compliance with any conditions to the obligations of the Underwriters hereunder, whether in respect of the Execution Time, the Closing Date, each Option Closing Date or otherwise.

If any of the conditions specified in this Section 4 shall not have been fulfilled when and as provided in this Agreement, or if any of the opinions and certificates mentioned above or elsewhere in this Agreement shall not be reasonably satisfactory in form and substance to the Representative and counsel for the Underwriters, this Agreement and all obligations of the Underwriters hereunder may be canceled at, or at any time prior to, the Closing Date by the Representative. Notice of such cancellation shall be given to the Company in writing or by telephone or facsimile confirmed in writing.

5. [Reserved].

6. Indemnification and Contribution.

- (a) Indemnification of Underwriters by the Company and Sono Motors GmbH. Each of the Company and Sono Motors GmbH agrees, jointly and severally, to indemnify and hold harmless each Underwriter, the directors, officers, employees, affiliates and agents of each Underwriter and each person who controls any Underwriter within the meaning of either the Securities Act or the Exchange Act against any and all losses, claims, damages or liabilities, joint or several, to which they or any of them may become subject under the Securities Act, the Exchange Act or other Federal or state statutory law or regulation, at common law or otherwise, insofar as such losses, claims, damages or liabilities (or actions in respect thereof) arise out of or are based upon any untrue statement or alleged untrue statement of a material fact contained in the Registration Statement for the registration of the Securities as originally filed or in any amendment or supplement thereof, or in the Preliminary Prospectus, or in the Prospectus, any Issuer Free Writing Prospectus or in any Written Testing-the-Waters Communication or in any amendment thereof or supplement thereto, or arise out of or are based upon the omission or alleged omission to state therein a material fact required to be stated therein or necessary to make the statements therein not misleading, and agrees to reimburse each such indemnified party, as incurred, for any legal or other expenses incurred by them in connection with investigating or defending any such loss, claim, damage, liability or action; provided, however, that the Company and Sono Motors GmbH will not be liable in any such case to the extent that any such loss, claim, damage or liability arises out of or is based upon any such untrue statement or alleged untrue statement or omission or alleged omission made therein in reliance upon and in conformity with written information furnished to the Company by or on behalf of any Underwriter through the Representative specifically for inclusion therein, it being understood and agreed that the only such information furnished by any Underwriter consists of the information described in paragraph (d) below. This indemnity agreement will be in addition to any liability which the Company may otherwise have.
- (b) [Reserved].

- (c) [Reserved].
- (d) Indemnification of the Company by the Underwriters. Each Underwriter severally and not jointly agrees to indemnify and hold harmless the Company, each of its directors, each of its officers who signs the Registration Statement, and each person who controls the Company within the meaning of either the Securities Act or the Exchange Act to the same extent as the foregoing indemnity to each Underwriter, but only with reference to written information relating to such Underwriter furnished to the Company by or on behalf of such Underwriter through the Representative specifically for inclusion in the documents referred to in the foregoing indemnity. This indemnity agreement will be in addition to any liability which any Underwriter may otherwise have. The Company acknowledges that the statements set forth in [●], each under the caption “Underwriting” in the Preliminary Prospectus and the Prospectus, constitute the only information furnished in writing by or on behalf of the several Underwriters for inclusion in the Preliminary Prospectus, the Prospectus or any Issuer Free Writing Prospectus.
- (e) Actions against Parties; Notification. Promptly after receipt by an indemnified party under this Section 6 of notice of the commencement of any action, such indemnified party will, if a claim in respect thereof is to be made against the indemnifying party under this Section 6, notify the indemnifying party in writing of the commencement thereof; but the failure so to notify the indemnifying party (i) will not relieve it from liability under paragraph (a) or (d) above unless and to the extent it did not otherwise learn of such action and such failure results in the forfeiture by the indemnifying party of substantial rights and defenses and (ii) will not, in any event, relieve the indemnifying party from any obligations to any indemnified party other than the indemnification obligation provided in paragraph (a) or (d) above. The indemnifying party shall be entitled to appoint counsel of the indemnifying party’s choice at the indemnifying party’s expense to represent the indemnified party in any action for which indemnification is sought (in which case the indemnifying party shall not thereafter be responsible for the fees and expenses of any separate counsel retained by the indemnified party or parties except as set forth below); provided, however, that such counsel shall be satisfactory to the indemnified party. Notwithstanding the indemnifying party’s election to appoint counsel to represent the indemnified party in an action, the indemnified party shall have the right to employ separate counsel (including local counsel), and the indemnifying party shall bear the reasonable and documented fees, costs and expenses of such separate counsel if (i) the use of counsel chosen by the indemnifying party to represent the indemnified party would present such counsel with a conflict of interest, (ii) the actual or potential defendants in, or targets of, any such action include both the indemnified party and the indemnifying party and the indemnified party shall have reasonably concluded that there may be legal defenses available to it and/or other indemnified parties which are different from or additional to those available to the indemnifying party, (iii) the indemnifying party shall not have employed counsel satisfactory to the indemnified party to represent the indemnified party within a reasonable time after notice of the institution of such action or (iv) the indemnifying party shall authorize the indemnified party to employ separate counsel at the expense of the indemnifying party. An indemnifying party will not, without the prior written consent of the indemnified parties, settle or compromise or consent to the entry of any judgment with respect to any pending or threatened claim, action, suit or proceeding in respect of which indemnification or contribution may be sought hereunder (whether or not the indemnified parties are actual or potential parties to such claim or action) unless such settlement, compromise or consent (i) includes an unconditional release of each indemnified party from all liability arising out of such claim, action, suit or proceeding and (ii) does not include a statement as to or an admission of fault, culpability or a failure to act, by or on behalf of any indemnified party.

- (f) Contribution. In the event that the indemnity provided in paragraph (a) or (d) of this Section 6 is unavailable to or insufficient to hold harmless an indemnified party for any reason, the Company and the Underwriters severally agree to contribute to the aggregate losses, claims, damages and liabilities (including legal or other expenses reasonably incurred in connection with investigating or defending the same) (collectively, "Losses") to which the Company and one or more of the Underwriters may be subject in such proportion as is appropriate to reflect the relative benefits received by the Company on the one hand and by the Underwriters on the other from the Offering. If the allocation provided by the immediately preceding sentence is unavailable for any reason, the Company and the Underwriters severally shall contribute in such proportion as is appropriate to reflect not only such relative benefits but also the relative fault of the Company on the one hand and of the Underwriters on the other in connection with the statements or omissions which resulted in such Losses as well as any other relevant equitable considerations. Benefits received by the Company shall be deemed to be equal to the total net proceeds from the Offering (before deducting expenses) received by it, and benefits received by the Underwriters shall be deemed to be equal to the total underwriting discounts and commissions, in each case as set forth on the cover page of the Prospectus. Relative fault shall be determined by reference to, among other things, whether any untrue or any alleged untrue statement of a material fact or the omission or alleged omission to state a material fact relates to information provided by the Company on the one hand or the Underwriters on the other, the intent of the parties and their relative knowledge, access to information and opportunity to correct or prevent such untrue statement or omission. The Company and the Underwriters agree that it would not be just and equitable if contribution were determined by pro rata allocation or any other method of allocation which does not take account of the equitable considerations referred to above. Notwithstanding the provisions of this paragraph (f), in no event shall any Underwriter be required to contribute any amount in excess of the amount by which the total underwriting discounts and commissions received by such Underwriter with respect to the Offering exceeds the amount of any damages that such Underwriter has otherwise been required to pay by reason of such untrue or alleged untrue statement or omission or alleged omission. Notwithstanding the provisions of this paragraph (f), no person guilty of fraudulent misrepresentation (within the meaning of Section 11(f) of the Securities Act) shall be entitled to contribution from any person who was not guilty of such fraudulent misrepresentation. For purposes of this Section 6, each person who controls an Underwriter within the meaning of either the Securities Act or the Exchange Act and each director, officer, employee, affiliate and agent of an Underwriter shall have the same rights to contribution as such Underwriter, and each person who controls the Company within the meaning of either the Securities Act or the Exchange Act, each officer of the Company who shall have signed the Registration Statement and each director of the Company shall have the same rights to contribution as the Company, subject in each case to the applicable terms and conditions of this paragraph (f).
7. Default by an Underwriter. If any one or more Underwriters shall fail to purchase and pay for any of the Securities agreed to be purchased by such Underwriter or Underwriters under this Agreement and such failure to purchase shall constitute a default in the performance of its or their obligations under this Agreement, the remaining Underwriters shall be obligated severally to take up and pay for (in the respective proportions which the amount of Securities set forth opposite their names in Schedule I hereto bears to the aggregate amount of Securities set forth opposite the names of all the remaining Underwriters) the Securities which the defaulting Underwriter or Underwriters agreed but failed to purchase; provided, however, that in the event that the aggregate amount of Securities which the defaulting Underwriter or Underwriters agreed but failed to purchase shall exceed 10% of the aggregate amount of Securities set forth in Schedule I hereto, the remaining Underwriters shall have the right to purchase all, but shall not be under any obligation to purchase any, of the Securities, and if such non-defaulting Underwriters do not purchase all the Securities, this Agreement will terminate without liability to any non-defaulting Underwriter or the Company, other than as contemplated by Sections 3(xviii), 5 and 6. In the event of a default by any Underwriter as set forth in this Section 7, the Closing Date shall be postponed for such period, not exceeding five business days, as the Representative shall determine in order that the required changes in the Registration Statement and the Prospectus or in any other documents or arrangements may be effected. Nothing contained in this Agreement shall relieve any defaulting Underwriter of its liability, if any, to the Company and any non-defaulting Underwriter for damages occasioned by its default under this Agreement.
8. Termination [/ Downsizing].
- (a) [Reserved].

- (b) **Termination s.** This Agreement shall be subject to termination in the absolute discretion of the Representative, by notice given to the Company prior to delivery of and payment for the Securities, if at any time prior to such delivery and payment (i) there has been, in the judgment of the Representative, since the time of execution of this Agreement or since the respective dates as of which information is given in the Registration Statement, the Disclosure Package or the Prospectus, any material adverse change in the condition, financial or otherwise, or in the earnings, business affairs or business prospects of the Company and its subsidiaries considered as one enterprise, whether or not arising in the ordinary course of business, (ii) trading in the Company's Common Shares shall have been suspended by the Commission or the Nasdaq Global Market or trading in securities generally on the New York Stock Exchange or the Nasdaq Global Market shall have been suspended or limited or minimum prices shall have been established on either of such exchanges, (iii) a banking moratorium shall have been declared by U.S. Federal, New York State or Dutch authorities, (iv) there shall have occurred a material disruption in commercial banking or securities settlement or clearance services or (v) there has occurred any material adverse change in the financial markets in the United States or the international financial markets, any outbreak or escalation of hostilities, declaration by the United States, any member state of the European Union of a national emergency or war, or other calamity or crisis the effect of which on financial markets is such as to make it, in the sole judgment of the Representative, impractical or inadvisable to proceed with the offering or delivery of the Securities as contemplated by the Preliminary Prospectus or the Prospectus (exclusive of any amendment or supplement thereto).
9. **Representations and Indemnities to Survive.** The respective agreements, representations, warranties, indemnities and other statements of the Company or its officers or directors and of the Underwriters set forth in or made pursuant to this Agreement will remain in full force and effect, regardless of any investigation made by or on behalf of any Underwriter or the Company or any of the officers, directors, employees, agents, affiliates or controlling persons (as applicable) referred to in **Section 6** hereof, and will survive delivery of and payment for the Securities. The provisions of **Sections 1, 3(a)(xviii), 5, 6, 7, 11 and 18** hereof shall survive the termination or cancellation of this Agreement.
10. **Notices.** All communications hereunder will be in writing and effective only on receipt, and, if sent to the Representative, will be mailed, delivered or telefaxed to Berenberg Capital Markets LLC, 1251 Avenue of the Americas, 53rd Floor, New York, New York 10020, Attention: Equity Capital Markets, Email: ecm-bcm@berenberg-us.com, Tel: +1 (646) 949-9166, Fax: +1 (646) 949-9283, will be mailed, delivered or telefaxed to Sono Group N.V., Waldmeisterstraße 76, 80935 Munich, Germany, Attention: Johannes Trischler and Benedict Schneider, E-Mail: IPO@sonomotors.com.
11. **Successors.** This Agreement will inure to the benefit of and be binding upon the parties hereto and their respective successors and the officers, directors, employees, agents and controlling persons (as applicable) referred to in **Section 6** hereof, and no other person will have any right or obligation hereunder.
12. **Representation of Underwriters.** The Representative will act for the several Underwriters in connection with this transaction, and any action under this Agreement taken by the Representative will be binding upon all the Underwriters.
13. **Jurisdiction.** The Company and Sono Motors GmbH agrees that any suit, action or proceeding against the Company or Sono Motors GmbH brought by any Underwriter, the directors, officers, employees, affiliates and agents of any Underwriter, or by any person who controls any Underwriter, arising out of or based upon this Agreement or the transactions contemplated hereby may be instituted in any State or U.S. federal court in The City of New York and County of New York, and waives any objection which it may now or hereafter have to the laying of venue of any such proceeding, and irrevocably submits to the non-exclusive jurisdiction of such courts in any suit, action or proceeding. The Company and Sono Motors GmbH have appointed Puglisi & Associates, with offices at 850 Library Avenue, Suite 204, Newark, Delaware 19711, as its authorized agent (the "**Authorized Agent**") upon whom process may be served in any suit, action or proceeding arising out of or based upon this Agreement or the transactions contemplated herein that may be instituted in any State or U.S. federal court in The City of New York and County of New York, by any Underwriter, the directors, officers, employees, affiliates and agents of any Underwriter, or by any person who controls any Underwriter, and expressly accepts the non-exclusive jurisdiction of any such court in respect of any such suit, action or proceeding. The Company and Sono Motors GmbH hereby represent and warrant that the Authorized Agent has accepted such appointment and has agreed to act as said agent for service of process, and the Company and Sono Motors GmbH agree to take any and all action, including the filing of any and all documents that may be necessary to continue such appointment in full force and effect as aforesaid. Service of process upon the Authorized Agent shall be deemed, in every respect, effective service of process upon the Company or Sono Motors GmbH. Notwithstanding the foregoing, any action arising out of or based upon this Agreement may be instituted by any Underwriter, the directors, officers, employees and agents of any Underwriter, or by any person who controls any Underwriter, in any court of competent jurisdiction in Germany.

14. No Fiduciary Duty. The Company hereby acknowledges that (a) the purchase and sale of the Securities pursuant to this Agreement is an arm's-length commercial transaction between the Company on the one hand, and the Underwriters and any affiliate through which it may be acting, on the other, (b) the Underwriters are acting as principal and not as an agent or fiduciary of the Company, (c) the Company's engagement of the Underwriters in connection with the Offering and the process leading up to the Offering is as independent contractors and not in any other capacity and (d) none of the activities of the Underwriters in connection with the transactions contemplated herein constitutes a recommendation, investment advice, or solicitation of any action by the Underwriters with respect to any entity or natural person. Furthermore, the Company agrees that it is solely responsible for making its own judgments in connection with the Offering (irrespective of whether any of the Underwriters has advised or is currently advising the Company on related or other matters). The Company agrees that it will not claim that the Underwriters have rendered advisory services of any nature or respect, or owe an agency, fiduciary or similar duty to the Company, in connection with such transaction or the process leading thereto.
15. Integration. This Agreement supersedes all prior agreements and understandings (whether written or oral) between the Company and the Underwriters, or any of them, with respect to the subject matter hereof, except any engagement letter between any Underwriter and the Company and/or Sono Motors GmbH.
16. Applicable Law. This Agreement will be governed by and construed in accordance with the laws of the State of New York applicable to contracts made and to be performed within the State of New York.
17. Currency. Each reference in this Agreement to U.S. Dollars (the "Relevant Currency") is of the essence. To the fullest extent permitted by law, the obligations of the Company in respect of any amount due under this Agreement will, notwithstanding any payment in any other currency (whether pursuant to a judgment or otherwise), be discharged only to the extent of the amount in the Relevant Currency that the party entitled to receive such payment may, in accordance with its normal procedures, purchase with the sum paid in such other currency (after any premium and costs of exchange) on the business day immediately following the day on which such party receives such payment. If the amount in the Relevant Currency that may be so purchased for any reason falls short of the amount originally due, the Company making such payment will pay such additional amounts, in the Relevant Currency, as may be necessary to compensate for the shortfall. Any obligation of the Company not discharged by such payment will, to the fullest extent permitted by applicable law, be due as a separate and independent obligation and, until discharged as provided herein, will continue in full force and effect.
18. Recognition of the U.S. Special Resolution Regimes.
 - (a) Transfer. In the event that any Underwriter that is a Covered Entity (as defined below) becomes subject to a proceeding under a U.S. Special Resolution Regime (as defined below), the transfer from such Underwriter of this Agreement, and any interest and obligation in or under this Agreement, will be effective to the same extent as the transfer would be effective under the U.S. Special Resolution Regime (as defined below) if this Agreement, and any such interest and obligation, were governed by the laws of the United States or a state of the United States.

- (b) Default Rights. In the event that any Underwriter that is a Covered Entity (as defined below) or a BHC Act Affiliate (as defined below) of such Underwriter becomes subject to a proceeding under a U.S. Special Resolution Regime (as defined below), Default Rights (as defined below) under this Agreement that may be exercised against such Underwriter are permitted to be exercised to no greater extent than such Default Rights (as defined below) could be exercised under the U.S. Special Resolution Regime (as defined below) if this Agreement were governed by the laws of the United States or a state of the United States.
- (c) Definitions. As used in this Section 18 only, the meaning of the following terms is as follows: “Affiliate” has the meaning given in section 2(k) of the Bank Holding Company Act (12 U.S.C. 1841(k)) and section 225.2(a) of the Board’s Regulation Y (12 CFR 225.2(a)). “Covered Entity” means any of the following: (i) a “covered entity” as that term is defined in, and interpreted in accordance with, 12 C.F.R. § 252.82(b), (ii) a “covered bank” as that term is defined in, and interpreted in accordance with, 12 C.F.R. § 47.3(b) or (iii) a “covered FSI” as that term is defined in, and interpreted in accordance with, 12 C.F.R. § 382.2(b). “Default Right” means any: (i) Right of a party, whether contractual or otherwise (including, without limitation, rights incorporated by reference to any other contract, agreement, or document, and rights afforded by statute, civil code, regulation, and common law), to liquidate, terminate, cancel, rescind, or accelerate such agreement or transactions thereunder, set off or net amounts owing in respect thereto (except rights related to same-day payment netting), exercise remedies in respect of collateral or other credit support or property related thereto (including the purchase and sale of property), demand payment or delivery thereunder or in respect thereof (other than a right or operation of a contractual provision arising solely from a change in the value of collateral or margin or a change in the amount of an economic exposure), suspend, delay, or defer payment or performance thereunder, or modify the obligations of a party thereunder, or any similar rights; and (ii) Right or contractual provision that alters the amount of collateral or margin that must be provided with respect to an exposure thereunder, including by altering any initial amount, threshold amount, variation margin, minimum transfer amount, the margin value of collateral, or any similar amount, that entitles a party to demand the return of any collateral or margin transferred by it to the other party or a custodian or that modifies a transferee’s right to reuse collateral or margin (if such right previously existed), or any similar rights, in each case, other than a right or operation of a contractual provision arising solely from a change in the value of collateral or margin or a change in the amount of an economic exposure. “U.S. Special Resolution Regime” means the Federal Deposit Insurance Act (12 U.S.C. 1811—1835a) and regulations promulgated thereunder and Title II of the Dodd-Frank Wall Street Reform and Consumer Protection Act (12 U.S.C. 5381—5394) and regulations promulgated thereunder.
19. Waiver of Immunity. To the extent that the Company has or hereafter may acquire any immunity (sovereign or otherwise) from any legal action, suit or proceeding, from jurisdiction of any court or from set-off or any legal process (whether service or notice, attachment in aid or otherwise) with respect to itself or any of its property, the Company hereby irrevocably waives and agrees not to plead or claim such immunity in respect of its obligations under this Agreement
20. WAIVER OF JURY TRIAL. THE COMPANY HEREBY IRREVOCABLY WAIVE, TO THE FULLEST EXTENT PERMITTED BY APPLICABLE LAW, ANY AND ALL RIGHT TO TRIAL BY JURY IN ANY LEGAL PROCEEDING ARISING OUT OF OR RELATING TO THIS AGREEMENT OR THE TRANSACTIONS CONTEMPLATED HEREBY.
21. Counterparts. This Agreement may be signed in one or more counterparts, each of which shall constitute an original and all of which together shall constitute one and the same agreement.
22. Headings. The section and paragraph headings used herein are for convenience only and shall not affect the construction hereof.

If the foregoing is in accordance with your understanding of our agreement, please sign and return to us the enclosed duplicate hereof, whereupon this letter and your acceptance shall represent a binding agreement among the Company and the several Underwriters in accordance with its terms.

Very truly yours,

Sono Group N.V.

Berenberg Capital Markets LLC
As Representative of the several Underwriters

c/o Berenberg Capital Markets LLC
1251 Avenue of the Americas, 53rd Floor
New York, New York 10020

Ladies and Gentlemen:

This letter is being delivered to you in connection with the proposed Underwriting Agreement (the "Underwriting Agreement"), between Sono Group N.V., a public limited liability company (*naamloze vennootschap*) incorporated under the laws of the Netherlands (the "Company"), and you as representative of a group of Underwriters (the "Underwriters") named therein, relating to an underwritten public offering of common shares with a nominal value of [●] each ("Shares") of the Company (the "Offering").

In order to induce you and the other Underwriters to enter into the Underwriting Agreement, the undersigned agrees that it will not, without the prior written consent of Berenberg Capital Markets LLC, offer, sell, contract to sell, pledge or otherwise dispose of, (or enter into any transaction which is designed to, or might reasonably be expected to, result in the disposition (whether by actual disposition or effective economic disposition due to cash settlement or otherwise) by the undersigned or any affiliate of the undersigned or any person in privity with the undersigned or any affiliate of the undersigned), directly or indirectly, including the filing (or participation in the filing) of a registration statement with the Securities and Exchange Commission (the "Commission") in respect of, or establish or increase a put equivalent position or liquidate or decrease a call equivalent position within the meaning of Section 16 of the Securities Exchange Act of 1934, as amended (the "Exchange Act"), and the rules and regulations of the Commission promulgated thereunder with respect to, any Shares or any securities convertible into, or exercisable or exchangeable for Shares, or publicly announce an intention to effect any such transaction, for a period from the date hereof until 180² days after the date of the Underwriting Agreement (the "Lock-Up Period"), other than:

(i) Shares disposed of as a bona fide gift or gifts where each recipient of a gift of shares of Shares agrees in writing to be bound by the same restrictions in place for the undersigned pursuant to this letter for the duration that such restrictions remain in effect at the time of transfer;

(ii) the surrender or forfeiture by the undersigned of Shares to the Company, or the disposition of Shares by the undersigned, in each case, solely to satisfy tax obligations or other obligations as a result of testate succession or intestate distribution;

(iii) transfers of Shares or any security convertible into or exercisable for Shares to an "immediate family member" (for purposes of this letter agreement, "immediate family member" shall mean any relationship by blood, marriage, civil union or adoption, and shall include former spouses and partners, not more remote than first cousin) or a trust for the benefit of the undersigned or an immediate family member or to any corporation, partnership, limited liability company or other entity that is a direct or indirect affiliate of the undersigned and/or one or more immediate family members of the undersigned in a transaction not involving a disposition for value or as part of a divorce decree, legal divorce or separation or separation agreement, provided that (1) each recipient of such Shares or other securities agrees in writing to be bound by the same restrictions in place for the undersigned pursuant to this letter for the duration that such restrictions remain in effect at the time of transfer and (2) no filing under the Exchange Act is required or made by or on behalf of the undersigned or such transferee or the Company prior to the expiration of the Lock-Up Period with regard to any such Shares or other securities;

² 90 days for pre-IPO investors who have undertaken a pre-IPO lock-up.

(iv) transfers of Shares or any security convertible into or exercisable for Shares upon death by will or intestate succession;

(v) the establishment of one or more contracts, instructions or plans (a “Plan”) that satisfies all of the requirements of Rule 10b5-1(c)(1)(i)(B) under the Exchange Act provided that no sales (or other transactions restricted by the second paragraph of this letter) of the undersigned’s Shares shall be made pursuant to such a Plan prior to the expiration of the Lock-up Period and no public announcement or filing under the Exchange Act is required or made by or on behalf of the undersigned or the Company regarding the establishment of such plan (other than a filing on Form 13F or a filing on Schedule 13D or Schedule 13G (or 13D-A or 13G-A) that is required by law to be made after the expiration of the Lock-up Period); and

(vi) any Shares acquired by the undersigned in the open market or in the Offering (other than any issuer-directed Shares purchased in the Offering by an officer or director of the Company), provided that no filing or public announcement related to the acquired Shares under the Exchange Act is required or made prior to the expiration of the Lock-Up Period.

If the undersigned is an officer or director of the Company, (i) the undersigned further agrees that the foregoing restrictions shall be equally applicable to any issuer-directed shares of Shares the undersigned may purchase in the Offering, if applicable, (ii) the Representative agrees that, at least three business days before the effective date of any release or waiver of the foregoing restrictions in connection with a transfer of shares of Shares, the Representative will notify the Company of the impending release or waiver, and (iii) the undersigned further agrees that the foregoing restrictions shall be equally applicable to any issuer-directed Shares the undersigned may purchase in the Offering. Any release or waiver granted by the Representative hereunder to any such officer or director shall only be effective two business days after the publication date of such press release. The provisions of this paragraph will not apply if (a) the release or waiver is effected solely to permit a transfer not for consideration and (b) the transferee has agreed in writing to be bound by the same terms described in this letter to the extent and for the duration that such terms remain in effect at the time of the transfer.

Notwithstanding anything to the contrary contained herein, this letter agreement will automatically terminate and the undersigned will be released from all of his, her or its obligations hereunder upon the earliest to occur, if any, of (i) the date that the Company, on the one hand, or you, on the other hand, advises in writing, prior to the execution of the Underwriting Agreement, that it has determined not to proceed with the Offering, (ii) the date, prior to the execution of the Underwriting Agreement, that the Company withdraws the Registration Statement, (iii) the date that the Underwriting Agreement is terminated (other than the provisions thereof which survive termination) prior to payment for and delivery of the Shares to be sold thereunder, or (iv) December 31, 2021, in the event that the Underwriting Agreement has not been executed by such date (provided that the Company may by written notice to the undersigned prior to December 31, 2021 extend such date for a period of up to an additional three months).

[Signature Page Follows]

If for any reason the Underwriting Agreement shall be terminated prior to the Closing Date (as defined in the Underwriting Agreement), the agreement set forth above shall likewise be terminated.

Yours very truly,

By: _____

EXHIBIT B

FORM OF WAIVER OF LOCK-UP

[insert letterhead of relevant Representative]

Sono Group N.V.
Public Offering of Common Shares

[Date]

[name and address of officer or director requesting waiver]

Dear Mr./Ms. [insert name]:

This letter is being delivered to you in connection with the offering by Sono Group N.V. (the "Company") of [•] common shares, nominal value €0.06 (the "Shares") in the capital of the Company (the "Offering") and the lock-up letter dated [•] (the "Lock-up Letter"), executed by you in connection with such Offering, and your request for a [waiver] [release] dated [•], with respect to [•] Shares.

Each of Berenberg Capital Markets LLC hereby agree to [waive] [release] the transfer restrictions set forth in the Lock-up Letter, but only with respect to the Shares, effective [•]; provided, however, that such [waiver] [release] is conditioned on the Company announcing the impending [waiver] [release] by press release through a major news service at least two business days before effectiveness of such [waiver] [release]. This letter will serve as notice to the Company of the impending [waiver] [release].

Except as expressly [waived] [released] hereby, the Lock-up Letter shall remain in full force and effect.

Yours very truly,

Berenberg Capital Markets LLC

EXHIBIT C

FORM OF PRESS RELEASE

Sono Group N.V.
[insert date]

Sono Group N.V. (the "Company") announced today that Berenberg Capital Markets LLC, the lead book-running manager in the Company's recent public sale of [[●] common shares, nominal value €0.06 (the "Shares") in the capital of the Company, is [waiving] [releasing] a lock-up restriction with respect to [●]Shares held by [certain officers or directors] [an officer or director] of the Company. The [waiver] [release] will take effect on [●], and the shares may be sold on or after such date.

This press release is not an offer for sale of the securities in the United States or in any other jurisdiction where such offer is prohibited, and such securities may not be offered or sold in the United States absent registration or an exemption from registration under the United States Securities Act of 1933, as amended.

MANAGEMENT BOARD RULES

SONO GROUP N.V.

INTRODUCTION

Article 1

- 1.1 These rules govern the organisation, decision-making and other internal matters of the Management Board. In performing their duties, the Managing Directors shall comply with these rules.
- 1.2 These rules shall be posted on the Website.

DEFINITIONS AND INTERPRETATION

Article 2

- 2.1 In these rules the following definitions shall apply:

Article	An article of these rules.
Articles of Association	The Company's articles of association.
Board Meeting	A meeting of the Management Board.
CEO	A chief executive officer of the Company.
CFO	The Company's chief financial officer.
Company	Sono Group N.V.
Conflict of Interests	A direct or indirect personal interest which conflicts with the interests of the Company and of the business connected with it.
Diversity Policy	The Company's diversity policy.
Family Member	A Managing Director's spouse, registered partner or other life companion, foster child or any relative or in-law up to the second degree.
General Meeting	The Company's general meeting.
Management Board	The Company's management board.
Managing Director	A member of the Management Board.
Simple Majority	More than half of the votes cast.
Supervisory Board	The Company's supervisory board.
Website	The Company's website.

- 2.2 References to statutory provisions are to those provisions as they are in force from time to time.
- 2.3 Terms that are defined in the singular have a corresponding meaning in the plural.
- 2.4 Words denoting a gender include each other gender.
- 2.5 Except as otherwise required by law, the terms "written" and "in writing" include the use of electronic means of communication.

COMPOSITION

Article 3

- 3.1 The Management Board consists of up to five Managing Directors.
 - 3.2 The composition of the Management Board shall be determined taking into consideration the provisions of the Diversity Policy.
 - 3.3 The Managing Directors shall be appointed, suspended and dismissed in accordance with the Articles of Association and applicable law.
 - 3.4 A person may be appointed as Managing Director for a term of up to four years, without limitation on the number of consecutive terms which a Managing Director may serve.
 - 3.5 The Supervisory Board shall elect one or more Managing Directors to be CEO. The Supervisory Board may dismiss the CEO, provided that the Managing Director so dismissed shall subsequently continue his term of office as a Managing Director without having the title of CEO.
 - 3.6 The Management Board may elect a Managing Director to be the CFO. The Management Board may dismiss the CFO, provided that the Managing Director so dismissed shall subsequently continue his term of office as a Managing Director without having the title of CFO.
 - 3.7 A Managing Director shall retire in the event of inadequate performance, structural incompatibility of interests, and in other instances where early retirement of the Managing Director is considered necessary by the Supervisory Board.
 - 3.8 The acceptance by a Managing Director of a position as supervisory director or non-executive director with another company or entity shall be subject to the approval of the Supervisory Board. A Managing Director shall notify the Supervisory Board in advance of any other position he wishes to pursue.
-

DUTIES AND ORGANISATION**Article 4**

- 4.1 The Management Board is charged with the management of the Company, subject to the restrictions contained in the Articles of Association. In performing their duties, Managing Directors shall be guided by the interests of the Company and of the business connected with it.
- 4.2 The Management Board shall provide the Supervisory Board with the information necessary for the performance of its tasks in a timely fashion. At least once a year, the Management Board shall inform the Supervisory Board in writing of the main features of the strategic policy, the general and financial risks and the administration and control system of the Company.
- 4.3 All Managing Directors shall follow an induction programme geared to their role, covering general financial, social and legal affairs, financial reporting by the Company, specific aspects that are unique to the Company and its business, the Company's corporate culture, the Company's relationship with employees and the responsibilities of a Managing Director under applicable law.
- 4.4 The Management Board shall ensure that internal procedures are established and maintained which safeguard that relevant information is or becomes known to the Management Board and the Supervisory Board in a timely fashion.
- 4.5 At least annually, the Management Board shall evaluate its own functioning and the functioning of the individual Managing Directors, shall discuss the conclusions of such evaluations, and shall identify aspects where the Managing Directors require further training or education. Each Managing Director may require that all Managing Directors be able to express their views confidentially during such evaluation.

DECISION-MAKING**Article 5**

- 5.1 The Management Board shall meet as often as any Managing Director deems necessary or appropriate.
- 5.2 A Board Meeting may be convened by, or at the request of, any Managing Director by means of a written notice sent to all Managing Directors. Notice of a Board Meeting shall include the date, time, place and agenda for that Board Meeting. Board Meetings can be held through audio-communication facilities.
- 5.3 All Managing Directors shall be given reasonable notice of at least five days for all Board Meetings, unless a shorter notice is required to avoid a delay which could reasonably be expected to have an adverse effect on the Company and/or the business connected with it.
- 5.4 If a Board Meeting has not been duly convened, resolutions may nevertheless be passed at that Board Meeting if all Managing Directors not present or represented at that Board Meeting have waived compliance with the convening formalities in writing.
-

- 5.5 All Board Meetings shall be chaired by the CEO or, in his absence, by another Managing Director designated by the Managing Directors present at the relevant Board Meeting. The chairperson of the Board Meeting shall appoint a secretary to prepare the minutes of the proceedings at such Board Meeting. The secretary does not necessarily need to be a Managing Director.
- 5.6 Minutes of the proceedings at a Board Meeting shall be sufficient evidence thereof and of the observance (or waiver) of all necessary formalities, provided that such minutes are certified by a Managing Director.
- 5.7 Without prejudice to Article 5.10, each Managing Director may cast one vote in the decision-making of the Management Board. Invalid votes, blank votes and abstentions shall not be counted as votes cast.
- 5.8 A Managing Director can be represented by another Managing Director holding a written proxy for the purpose of the deliberations and the decision-making of the Management Board.
- 5.9 Resolutions of the Management Board shall be passed, irrespective of whether this occurs at a Board Meeting or otherwise, by Simple Majority, unless these rules provide differently.
- 5.10 Where there is a tie in any vote of the Management Board, the CEOs, collectively, shall have a casting vote, provided that there are at least three Managing Directors in office. Otherwise, or if the CEOs in case of a tied vote do not reach a joint decision on how to exercise their casting vote, the relevant resolution shall not have been passed.
- 5.11 Resolutions of the Management Board may, instead of at a Board Meeting, be passed in writing, provided that all Managing Directors are familiar with the resolution to be passed and none of them objects to this decision-making process. Articles 5.7 through 5.10 apply mutatis mutandis.
- 5.12 The Management Board may require that officers and external advisers of the Company attend Board Meetings.
- 5.13 The Management Board requires the approval of the Supervisory Board on the Supervisory Board reserved matters as described in Annex A.

CONFLICT OF INTERESTS

Article 6

- 6.1 A Managing Director shall promptly report any actual or potential Conflict of Interests in a transaction that is of material significance to the Company and/or such Managing Director to the chairperson of the Supervisory Board and to the other Managing Directors, providing all relevant information relating to such transaction, including the involvement of any Family Member.
- 6.2 The determination whether a Managing Director has a Conflict of Interests shall primarily be the responsibility of that Managing Director. However, in case of debate, that determination shall be made by the Supervisory Board without the Managing Director concerned being present.
-

- 6.3** A Managing Director shall not participate in the deliberations and decision-making of the Management Board on a matter in relation to which he has a Conflict of Interests. If, as a result thereof, no resolution can be passed by the Management Board, the resolution shall be passed by the Supervisory Board.
- 6.4** Transactions in respect of which a Managing Director has a Conflict of Interests shall be agreed on arms' length terms. Any such transactions where the Conflict of Interests is of material significance to the Company and/or to the Managing Director concerned shall be subject to the approval of the Supervisory Board.
- 6.5** In order to avoid potential Conflicts of Interests, or the appearance thereof, Managing Directors shall not:
- a.** enter into competition with the Company;
 - b.** demand or accept substantial gifts from the Company for themselves or for their respective Family Members;
 - c.** provide unjustified advantages to third parties to the detriment of the Company;
 - d.** take advantage of business opportunities to which the Company would be entitled for themselves or for their respective Family Members.
- 6.6** The Company shall not grant its Managing Directors or their respective Family Members any personal loans, guarantees or similar financial arrangements.

OWNERSHIP OF AND TRADING IN FINANCIAL INSTRUMENTS

Article 7

The Managing Directors shall be subject to the Company's insider trading policy. In addition, each Managing Director shall practice great reticence:

- a.** when trading in shares or other financial instruments issued by another listed company, if this could reasonably create the appearance of such Managing Director violating applicable insider trading and/or market manipulation prohibitions; and
- b.** when trading in shares or other financial instruments issued by another listed company which is a direct competitor of the Company.

AMENDMENTS AND DEVIATIONS

Article 8

Pursuant to a resolution to that effect, the Management Board may, with the approval of the Supervisory Board, amend or supplement these rules and allow temporary deviations from these rules, subject to ongoing compliance with applicable law and stock exchange requirements.

GOVERNING LAW AND JURISDICTION**Article 9**

These rules shall be governed by and shall be construed in accordance with the laws of the Netherlands. Any dispute arising in connection with these rules shall be submitted to the exclusive jurisdiction of the competent court in Amsterdam, the Netherlands.

Annex A - Matters requiring Supervisory Board approval

The approval of the Supervisory Board is required for resolutions of the Management Board concerning the following matters:

- a.** the making of a proposal to the General Meeting concerning:
 - i.** the issue of shares or the granting of rights to subscribe for shares;
 - ii.** the limitation or exclusion of pre-emption rights;
 - iii.** the designation or granting of an authorisation as referred to in articles 8.1, 9.5 and 12.2, respectively, of the Articles of Association, or disapplication or revocation of any such designation or authorisation;
 - iv.** the reduction of the Company's issued share capital;
 - v.** the making of a distribution from the Company's profits or reserves;
 - vi.** the determination that all or part of a distribution, instead of being made in cash, shall be made in the form of shares in the Company's capital or in the form of assets;
 - vii.** the amendment of these articles of association;
 - viii.** the entering into of a merger or demerger;
 - ix.** the instruction of the Management Board to apply for the Company's bankruptcy; and
 - x.** the Company's dissolution;
 - b.** the issue of shares or the granting of rights to subscribe for shares, except in the operation of the Company's equity incentive plans;
 - c.** the limitation or exclusion of pre-emption rights;
 - d.** the acquisition of shares by the Company in its own capital, including the determination of the value of a non-cash consideration for such an acquisition as referred to in article 12.4 of the Articles of Association;
 - e.** the granting of an approval for the creation of a pledge as referred to in article 15.1 of the Articles of Association;
 - f.** the granting of an approval for a transfer as referred to in article 16.1 of the Articles of Association;
 - g.** the drawing up or amendment of the Management Board Rules;
 - h.** the performance of the legal acts described in article 19.3 and 20.10 of the Articles of Association;
 - i.** the charging of amounts to be paid up on shares against the Company's reserves as described in article 38.3 of the Articles of Association;
 - j.** the making of an interim distribution; and
 - k.** entering into a transaction in respect of which a Managing Director or a Supervisory Director has a Conflict of Interests which is of material significance to the Company and/or to the Managing Director or Supervisory Director concerned;
-

- l.** the entering into a transaction with a shareholder holding ten percent or more of the Company's issued share capital which is of material significance to the Company and/or to the shareholder concerned;
 - m.** the acceptance by a Managing Director of a position as supervisory director or non-executive director with another company or entity;
 - n.** the adoption of the Company's internal audit plan;
 - o.** the appointment or dismissal of the head of the Company's internal audit function (if and when established) or the Company's company secretary (if and when appointed); and
 - p.** such other resolutions of the Management Board as the Supervisory Board shall have specified in a resolution to that effect and notified to the Management Board.
-

SUPERVISORY BOARD RULES**SONO GROUP N.V.****INTRODUCTION****Article 1**

- 1.1 These rules govern the organisation, decision-making and other internal matters of the Supervisory Board. In performing their duties, the Supervisory Directors shall comply with these rules.
- 1.2 These rules shall be posted on the Website.

DEFINITIONS AND INTERPRETATION**Article 2**

- 2.1 In these rules the following definitions shall apply:

Article	An article of these rules.
Articles of Association	The Company's articles of association.
Audit Committee	The Company's audit committee.
CEO	A chief executive officer of the Company.
Chairperson	The chairperson of the Supervisory Board.
Committee	The Audit Committee, the Compensation Committee, the Nomination and Corporate Governance Committee and such other committee as the Supervisory Board may establish from time to time.
Committee Charter	The charter of the relevant Committee.
Company	Sono Group N.V.
Company Secretary	The Company's company secretary.
Compensation Committee	The Company's compensation committee.
Conflict of Interests	A direct or indirect personal interest which conflicts with the interests of the Company and of the business connected with it.
Diversity Policy	The Company's diversity policy.
External Auditor	The auditor or audit firm within the meaning of Section 2:393 of the Dutch Civil Code, engaged to audit the Company's annual accounts and annual report, or the Company's independent outside audit firm for purposes of U.S. laws and regulations (including applicable NASDAQ and/or SEC requirements), as the context may require.

Family Member	A Supervisory Director's spouse, registered partner or other life companion, foster child or any relative or in-law up to the second degree.
General Meeting	The Company's general meeting.
Management Board	The Company's management board.
Managing Director	A member of the Management Board.
NASDAQ	The NASDAQ Stock Market.
Nomination and Corporate Governance Committee	The Company's nomination and corporate governance committee.
Profile	The Company's profile for the size, composition and independence of the Supervisory Board.
SEC	The U.S. Securities and Exchange Commission.
Simple Majority	More than half of the votes cast.
Supervisory Board	The Company's supervisory board.
Supervisory Board Meeting	A meeting of the Supervisory Board.
Supervisory Director	A member of the Supervisory Board.
Vice-Chairperson	The vice-chairperson of the Supervisory Board.
Website	The Company's website.

2.2 References to statutory provisions are to those provisions as they are in force from time to time.

2.3 Terms that are defined in the singular have a corresponding meaning in the plural.

2.4 Words denoting a gender include each other gender.

2.5 Except as otherwise required by law, the terms "written" and "in writing" include the use of electronic means of communication.

COMPOSITION

Article 3

3.1 The size, composition and independence of the Supervisory Board shall be determined taking into consideration the provisions of the Diversity Policy and the Profile.

- 3.2 The Supervisory Directors shall be appointed, suspended and dismissed in accordance with the Articles of Association and applicable law.
- 3.3 A person may be appointed as Supervisory Director for a maximum of two consecutive terms of up to four years each and, subsequently, for a maximum of two consecutive terms of up to two years each.
- 3.4 The Supervisory Board shall elect a Supervisory Director to be the Chairperson and another Supervisory Director to be the Vice-Chairperson. The Supervisory Board may dismiss the Chairperson or the Vice-Chairperson, provided that the Supervisory Director so dismissed shall subsequently continue his term of office as a Supervisory Director without having the title of Chairperson or Vice-Chairperson, as the case may be.
- 3.5 A Supervisory Director shall retire in the event of inadequate performance, structural incompatibility of interests, and in other instances where early retirement of the Supervisory Director is considered necessary by the Supervisory Board.
- 3.6 The Supervisory Board shall ensure that:
- a. the Company has a sound plan in place for the succession of Managing Directors and Supervisory Directors which is aimed at retaining the appropriate balance in the requisite expertise, experience and diversity on the Management Board and the Supervisory Board; and
 - b. a retirement schedule is prepared in order to avoid, as much as possible and practicable, Supervisory Directors retiring simultaneously.
- 3.7 A Supervisory Director shall notify the Supervisory Board in advance of any other position he wishes to pursue.

DUTIES AND ORGANISATION

Article 4

- 4.1 The Supervisory Board is charged with the supervision of the policy of the Management Board and the general course of affairs of the Company and of the business connected with it. The Supervisory Board shall provide the Management Board with advice. In performing their duties, Supervisory Directors shall be guided by the interests of the Company and of the business connected with it.
- 4.2 Without prejudice to any other provision of these rules or the Articles of Association, resolutions of the Management Board concerning matters described in Annex A shall be subject to the approval of the Supervisory Board.
- 4.3 The Supervisory Board may obtain information from officers and external advisers of the Company in order to perform their duties, and the Company shall facilitate this.
- 4.4 All Supervisory Directors shall follow an induction programme geared to their role, covering general financial, social and legal affairs, financial reporting by the Company, specific aspects that are unique to the Company and its business, the Company's corporate culture, the Company's relationship with employees and the responsibilities of a Supervisory Director under applicable law.
-

- 4.5 At least annually, the Supervisory Board shall evaluate - outside the presence of the Managing Directors - its own functioning, the functioning of the Management Board, the functioning of the Committees and the functioning of the individual Managing Directors and Supervisory Directors, shall discuss the conclusions of such evaluations, and shall identify aspects where the Supervisory Directors require further training or education. Each Supervisory Director may require that all Supervisory Directors be able to express their views confidentially during such evaluation. When performing the annual evaluation, the Supervisory Directors shall at least consider:
- a. the mutual interaction among the Management Board and the Supervisory Board;
 - b. the mutual interaction among the Supervisory Board;
 - c. lessons learned from recent events;
 - d. how the values as established in article 4 of the Articles of Association have been pursued; and
 - e. the desired profile, composition, competency and expertise of the Supervisory Board.

CHAIRPERSON, VICE-CHAIRPERSON AND COMPANY SECRETARY

Article 5

5.1 The Chairperson, in regular consultation with the CEOs, shall ensure that:

- a. the Supervisory Board has proper contact with the Management Board, the Company's employee representatives (if any) and the General Meeting;
 - b. the Supervisory Board elects a Vice-Chairperson;
 - c. there is sufficient time for deliberation and decision-making by the Supervisory Board;
 - d. the Supervisory Directors receive all information that is necessary for the proper performance of their duties in a timely fashion;
 - e. the Supervisory Board and the Committees function properly;
 - f. the functioning of individual Managing Directors and Supervisory Directors is reviewed at least annually;
 - g. the Supervisory Directors and Managing Directors follow their induction programme, as well as their education or training programme (if and when relevant);
-

- h. the Management Board performs activities in respect of corporate culture, in particular with regard to the values as established in article 4 of the Articles of Association;
 - i. the Supervisory Board is responsive to signs of misconduct or irregularities from the Company's business and ensures that any material misconduct and irregularities, or suspicions thereof, are reported to the Supervisory Board without delay;
 - j. the General Meeting proceeds in an orderly and efficient manner;
 - k. effective communication with the Company's shareholders is assured; and
 - l. the Supervisory Board shall be involved closely, and at an early stage, in any acquisition, merger or takeover process involving the Company.
- 5.2 If the Chairperson is absent or incapacitated, he may be replaced temporarily by the Vice-Chairperson.
- 5.3 The Chairperson shall act on behalf of the Supervisory Board as the primary contact for Managing Directors, Supervisory Directors and shareholders regarding the functioning of Managing Directors and Supervisory Directors, except for the Chairperson himself/herself. The Vice-Chairperson shall fulfil such role regarding the functioning of the Chairperson.
- 5.4 The Supervisory Board may be supported by the Company Secretary. The Company Secretary may be appointed and dismissed by the Management Board, subject to the prior approval of the Supervisory Board.

DECISION-MAKING

Article 6

- 6.1 The Supervisory Board shall meet as often as any Supervisory Director deems necessary or appropriate.
- 6.2 Supervisory Directors are expected to attend Supervisory Board Meetings and the meetings of the Committees of which they are members. If a Supervisory Director is frequently absent at such meetings, he shall be held accountable by the Supervisory Board.
- 6.3 A Supervisory Board Meeting may be convened by, or at the request of, any Supervisory Director by means of a written notice sent to all Supervisory Directors. Notice of a Supervisory Board Meeting shall include the date, time, place and agenda for that Supervisory Board Meeting. Supervisory Board Meetings can be held through audio- and video-communication facilities.
- 6.4 All Supervisory Directors shall be given reasonable notice of at least five days for all Supervisory Board Meetings, unless a shorter notice is required to avoid a delay which could reasonably be expected to have an adverse effect on the Company and/or the business connected with it.
-

- 6.5 If a Supervisory Board Meeting has not been duly convened, resolutions may nevertheless be passed at that Supervisory Board Meeting if all Supervisory Directors not present or represented at that Supervisory Board Meeting have waived compliance with the convening formalities in writing.
- 6.6 All Supervisory Board Meetings shall be chaired by the Chairperson or, in his/her absence, by the Vice-Chairperson or, in his/her absence, by another Supervisory Director designated by the Supervisory Directors present at the relevant Supervisory Board Meeting. The chairperson of the Supervisory Board Meeting shall appoint a secretary to prepare the minutes of the proceedings at such Supervisory Board Meeting. The secretary does not necessarily need to be a Supervisory Director.
- 6.7 Minutes of the proceedings at a Supervisory Board Meeting shall be sufficient evidence thereof and of the observance (or waiver) of all necessary formalities, provided that such minutes are certified by any two Supervisory Directors.
- 6.8 Without prejudice to Article 6.11, each Supervisory Director may cast one vote in the decision-making of the Supervisory Board. Invalid votes, blank votes and abstentions shall not be counted as votes cast.
- 6.9 A Supervisory Director can be represented by another Supervisory Director holding a written proxy for the purpose of the deliberations and the decision-making of the Supervisory Board.
- 6.10 Resolutions of the Supervisory Board shall be passed, irrespective of whether this occurs at a Supervisory Board Meeting or otherwise, by Simple Majority, unless these rules provide differently.
- 6.11 Where there is a tie in any vote of the Supervisory Board, the Chairperson shall have a casting vote, provided that there are at least three Supervisory Directors in office. Otherwise, the relevant resolution shall not have been passed.
- 6.12 Resolutions of the Supervisory Board may, instead of at a Supervisory Board Meeting, be passed in writing, provided that all Supervisory Directors are familiar with the resolution to be passed and none of them objects to this decision-making process. Articles 6.8 through 6.11 apply mutatis mutandis.
- 6.13 The Supervisory Board may require that officers and external advisers of the Company attend Supervisory Board Meetings. In particular, the Supervisory Board shall request the External Auditor to attend the Supervisory Board Meeting where the External Auditor's audit report regarding the Company's financial statements is discussed.

CONFLICT OF INTERESTS

Article 7

- 7.1 A Supervisory Director shall promptly report any actual or potential Conflict of Interests in a transaction that is of material significance to the Company and/or such Supervisory Director to the other Supervisory Directors, providing all relevant information relating to such transaction, including the involvement of any Family Member.
-

- 7.2 The determination whether a Supervisory Director has a Conflict of Interests shall primarily be the responsibility of that Supervisory Director. However, in case of debate, that determination shall be made by the Supervisory Board without the Supervisory Director concerned being present.
- 7.3 A Supervisory Director shall not participate in the deliberations and decision-making of the Supervisory Board on a matter in relation to which he has a Conflict of Interests. If, as a result thereof, no resolution can be passed by the Supervisory Board, the resolution may nevertheless be passed by the Supervisory Board as if none of the Supervisory Directors has a Conflict of Interests.
- 7.4 Transactions in respect of which a Supervisory Director has a Conflict of Interests shall be agreed on arms' length terms. Any such transactions where the Conflict of Interests is of material significance to the Company and/or to the Supervisory Director concerned shall be subject to the approval of the Supervisory Board.
- 7.5 In order to avoid potential Conflicts of Interests, or the appearance thereof, Supervisory Directors shall not:
- a. enter into competition with the Company;
 - b. demand or accept substantial gifts from the Company for themselves or for their respective Family Members;
 - c. provide unjustified advantages to third parties to the detriment of the Company;
 - d. take advantage of business opportunities to which the Company would be entitled for themselves or for their respective Family Members.
- 7.6 The Supervisory Board shall deal with any actual or potential Conflict of Interests in a transaction that is of material significance to the Company and/or a Managing Director in accordance with the provisions included in the rules governing the organisation, decision-making and other internal matters of the Management Board.
- 7.7 The Company shall not grant its Supervisory Directors or their respective Family Members any personal loans, guarantees or similar financial arrangements.

OWNERSHIP OF AND TRADING IN FINANCIAL INSTRUMENTS

Article 8

- 8.1 The Supervisory Directors shall be subject to the Company's insider trading policy. In addition, each Supervisory Director shall practice great reticence:
- a. when trading in shares or other financial instruments issued by another listed company, if this could reasonably create the appearance of such Supervisory Director violating applicable insider trading and/or market manipulation prohibitions; and
 - b. when trading in shares or other financial instruments issued by another listed company which is a direct competitor of the Company.
- 8.2 Any ordinary shares in the Company's capital held by a Supervisory Director are expected to be long-term investments.
-

COMMITTEES**Article 9**

- 9.1 Each Committee shall be subject to this Article 9 and its respective Committee Charter.
- 9.2 Unless the relevant Committee Charter provides differently, Article 6 applies mutatis mutandis to the decision-making of each Committee, provided that references to the Chairperson should be interpreted as being references to the chairperson of the relevant Committee.
- 9.3 The Supervisory Board shall regularly review and discuss the reports received from the respective Committees.

AMENDMENTS AND DEVIATIONS**Article 10**

Pursuant to a resolution to that effect, the Supervisory Board may amend or supplement these rules and allow temporary deviations from these rules, subject to ongoing compliance with applicable law and stock exchange requirements.

GOVERNING LAW AND JURISDICTION**Article 11**

These rules shall be governed by and shall be construed in accordance with the laws of the Netherlands. Any dispute arising in connection with these rules shall be submitted to the exclusive jurisdiction of the competent court in Amsterdam, the Netherlands.

Annex A - Matters requiring Supervisory Board approval

Resolutions of the Management Board concerning the following matters shall be subject to the approval of the Supervisory Board:

- a. the making of proposals to the General Meeting which are subject to the Supervisory Board's approval pursuant to the Articles of Association;
 - b. the issue of shares or the granting of rights to subscribe for shares, except in the operation of the Company's equity incentive plans;
 - c. the limitation or exclusion of pre-emption rights;
 - d. the acquisition of shares by the Company in its own capital, including the determination of the value of a non-cash consideration for such an acquisition as referred to in article 12.4 of the Articles of Association;
 - e. the granting of an approval for the creation of a pledge as referred to in article 15.1 of the Articles of Association;
 - f. the granting of an approval for a transfer as referred to in article 16.1 of the Articles of Association;
 - g. the drawing up or amendment of the internal rules of the Management Board;
 - h. the performance of legal acts as referred to in Section 2:94(1) of the Dutch Civil Code;
 - i. a material change to the identity or the character of the Company or the business, including in any event:
 - i. transferring the business or materially all of the business to a third party;
 - ii. entering into or terminating a long-lasting alliance of the Company or of a subsidiary of the Company either with another entity or company, or as a fully liable partner of a limited partnership or general partnership, if this alliance or termination is of significant importance for the Company; and
 - iii. acquiring or disposing of an interest in the capital of a company by the Company or by a subsidiary of the Company with a value of at least one third of the value of the assets, according to the balance sheet with explanatory notes or, if the Company prepares a consolidated balance sheet, according to the consolidated balance sheet with explanatory notes in the Company's most recently adopted annual accounts;
 - j. the charging of amounts to be paid up on shares in the Company's capital against the Company's reserves as described in article 38.3 of the Articles of Association;
 - k. the making of an interim distribution;
 - l. entering into a transaction in respect of which a Managing Director or a Supervisory Director has a Conflict of Interests which is of material significance to the Company and/or to the Managing Director or Supervisory Director concerned;
-

- m.** entering into a transaction with a shareholder holding ten percent or more of the Company's issued share capital which is of material significance to the Company and/or to the shareholder concerned;
 - n.** the acceptance by a Managing Director of a position as supervisory director or non-executive director with another company or entity;
 - o.** the adoption of the Company's internal audit plan;
 - p.** the appointment or dismissal of the head of the Company's internal audit function (if and when established) or the Company Secretary (if and when appointed); and
 - q.** such other matters as the Supervisory Board shall have specified in a resolution to that effect and notified to the Management Board.
-

FORM OF REGISTRATION RIGHTS AGREEMENT

THIS REGISTRATION RIGHTS AGREEMENT (this "**Agreement**") is entered into as of ____, 2021, by and among Sono Group N.V., a Dutch public limited liability company ("**Company**"), Sono Motors GmbH, a German private limited liability company ("**Guarantor**") and each of the parties listed as Investors on the Schedule attached hereto (each, an "**Investor**" and collectively, the "**Investors**").

WHEREAS, the Company is in the process of preparing the serial production of a solar and battery powered e-mobility vehicle. In order to finance completion of the development and start of production, the Company intends to raise additional equity in an IPO (as defined below). In order to allow for the implementation of its business plan until the date of the envisaged IPO, the Company secured liquidity in several financing transactions, amongst others, the issuance of Notes (as defined below);

WHEREAS, in December 2020, the Company issued senior unsecured notes in the aggregate principal amount of €6.8 million divided into notes with a principal amount of €100,000 (the "**Principal Amount**") each (the "**Notes**" and each a "**Note**") guaranteed by the Guarantor and convertible upon certain events into new ordinary shares in the capital of the Company (the "**Settlement Shares**") in accordance with the terms and conditions of the Notes;

WHEREAS, a potential conversion of the Notes shall require a private deed of issue of the Settlement Shares to be executed on or about the closing date of the an initial public offering of the Company (the "**IPO**");

WHEREAS, the Company sold under several subscription agreements between the Company, the Guarantor and the relevant Investor (the "**Subscription Agreements**") 68 Notes in a principal amount of €100,000 per Note, i.e. with an aggregate principal amount of €6.8 million, to the Investors at a price equal to 100 per cent. of the Principal Amount; and

WHEREAS, pursuant to the Subscription Agreements, the Investors may demand registration of the Settlement Shares and the parties hereof seek to restate the corresponding rights and obligations thereof.

NOW, THEREFORE, in consideration of the mutual covenants and agreements set forth herein, and for other good and valuable consideration, the receipt and sufficiency of which are hereby acknowledged, the parties hereto agree as follows:

1. DEFINITIONS. The following capitalized terms used herein have the following meanings:

"**Business Day**" means a day other than a Saturday, Sunday or other day on which commercial banks in New York, New York are authorized or required by law to close.

"**Exchange Act**" means the Securities Exchange Act of 1934, as amended.

“**Material Adverse Effect**” means a material adverse change, or any development reasonably likely to involve a material adverse change, in the condition, financial, operational, legal or otherwise, or in the business affairs or prospects of the Guarantor or its subsidiaries, whether or not arising in the ordinary course of business, or any development reasonably likely to result in an adverse effect on the Guarantor’s ability to perform its obligations under this Agreement.

“**Securities Act**” means the Securities Act of 1933, as amended.

2. REGISTRATION RIGHTS.

(1) Demand Registration.

- (a) If the Company receives, upon the expiration of six months after the effective date of an IPO conducted on a U.S. stock exchange and where a class of the Company’s equity securities are registered with the Securities and Exchange Commission (“**SEC**”) (“**US IPO**”), a written request demand for registration under the Securities Act from one or more Investors holding Settlement Shares (the “**Registrable Securities**”) representing at least 10 per cent. of the Settlement Shares then outstanding, then the Company shall, within 10 days after the receipt thereof, give a written notice of such request to all Investors and shall, if Investors holding at least 25 per cent of the Registrable Securities elect to participate in such registration, subject to the limitations of Section 2(1)(b), use its best efforts to effect as soon as reasonably and commercially practicable, the registration under the Securities Act of all Registrable Securities which the Investors request to be registered within 20 days after notice is provided by the Company. Registrations under this Section 2(1) shall be on such appropriate registration form of the SEC or other governmental entity as shall be selected by the Company and shall permit the disposition of such Registrable Securities in accordance with the intended method or methods of disposition specified in the request for such registration.
- (b) If the Investors initiating the registration request under this Section 2(1) (the “**Initiating Holders**”) intend to distribute the Registrable Securities covered by their request by means of an underwriting, they shall so advise the Company as a part of their request made pursuant to this Section 2(1) and the Company shall include such information in the written notice referred to in Section 2(1)(a). The underwriter will be selected by the majority in interest of the Initiating Holders and shall be reasonably acceptable to the Company. In such event, the right of any Investor to include its Registrable Securities in such registration shall be conditioned upon such Investor’s participation in such underwriting and the inclusion of such Investor’s Registrable Securities in the underwriting (unless otherwise mutually agreed by a majority in interest of the Initiating Holders and such Investor) to the extent provided herein. All Investors proposing to distribute their Registrable Securities through such underwriting shall (together with the Company as provided in Section 2(4)(e) hereto) enter into an underwriting agreement in customary form with the underwriter or underwriters selected for such underwriting. Notwithstanding any other provision of this Section 2(1), if the underwriter advises the Company and the Initiating Holders in writing that marketing factors require a limitation on the number of shares to be underwritten, then the Company shall so advise all Investors of the Registrable Securities which would otherwise be underwritten pursuant hereto, and the amount of Registrable Securities that may be included in the underwriting shall be allocated among all Investors thereof, including the Initiating Holders, in proportion (as nearly as practicable) to the amount of Registrable Securities held by each Investor; *provided, however*, that in each case the amount of Registrable Securities to be included in such underwriting shall not be reduced unless all securities other than Registrable Securities are first entirely excluded from the underwriting; and *provided, further*, that if the reduction reduces the total amount of Registrable Securities included in such underwriting to less than 40 per cent. of the Registrable Securities initially requested for registration by the Initiating Holders, such offering shall not be counted as a registration for the purpose of subsection (d)(i) below.

- (c) Notwithstanding the foregoing, if the Company furnishes to the Initiating Holders a certificate signed by the two or more members of the management board stating that in the good faith judgment of the management board, it would be materially detrimental to the Company and its shareholders for such registration statement to either be filed, become effective or remain effective because such action would involve Company prematurely disclosing information which the Company has a bona fide business purpose for preserving as confidential and it is therefore essential to defer the filing of such registration statement, the Company shall have the right to defer taking such action until the earlier of (x) the date that is sixty (60) days after the request of the Initiating Holders is given, (y) the filing of a Form 6-K or publication or a press release including material information that the Company has a bona fide business purpose for preserving as confidential and not disclosing prematurely and (z) the cessation of consideration of a transaction that would materially interfere with a significant acquisition, corporate reorganization or other similar transaction involving the Company which was the reason for the Company exercising this right; *provided, however*, that the Company may not utilize this right more than once in any twelve month period.
- (d) In addition to and without prejudice to Section 2(4) hereto, the Company shall not be obligated to effect, or take any action to effect, any registration pursuant to this Section 2(1):
- (i) after the Company has effected six registrations pursuant to this Section 2(1) and such registrations (x) have been declared or ordered effective, or (y) have been closed or withdrawn at the request of the Initiating Holders (other than as a result of a Material Adverse Effect);
 - (ii) during the period commencing on the date 45 days prior to the date of filing (as estimated by the Company in good faith) of, and ending on the date 120 days after the effective date of, a registration subject to Section 2(2) hereto (other than a registration relating solely to the sale of securities to participants in a Company share plan, a registration on any form that does not include substantially the same information as would be required to be included in a registration statement covering the sale of the Registrable Securities or an SEC Rule 145 transaction); *provided that* the Company uses its reasonable best efforts to cause such registration statement under Section 2(2) hereto to become effective; or
 - (iii) if the Initiating Holders propose to dispose of Registrable Securities that may be immediately registered on Form F-3 or Form S-3 (or any successor form that provides for short-form registration), as the case may be and the Company is complying with Section 2(3).

- (2) Company Registration. If (but without any obligation to do so) the Company proposes to register (including, for this purpose, a registration effected by the Company for shareholders other than the Investors) any of its securities under the Securities Act (or such applicable securities laws, as the case may be), in connection with the public offering of such securities solely for cash (other than a registration relating solely to the sale of securities to participants in a Company share plan, an offering or sale of securities pursuant to a registration statement on Form F-4 or Form S-4 (or any successor form), as the case may be, a registration of securities in a transaction under Rule 145 promulgated under the Securities Act, or in any registration on any form which does not include substantially the same information as would be required to be included in a registration statement covering the sale of the Registrable Securities), the Company shall, at such time and promptly (or as soon as is reasonably and legally practicable) give each Investor that holds Registrable Securities a written notice of such registration. Upon the written request of any Investor who confirms to the Company that its rights under Section 2 have not lapsed pursuant to Section 2(11) given within 10 days after mailing of such notice by the Company, the Company shall, subject to the provisions of Section 2(7) hereto, cause to be registered under the Securities Act the Registrable Securities that each such Investor has requested to be registered. For the avoidance of doubt, registration pursuant to this Section 2(2) shall not be deemed to be a demand registration as described in Section 2(1) above. There shall be no limit on the number of times the Investors may request registration of Registrable Securities under this Section 2(2).
- (3) Form F-3 or S-3 Registration. In case the Company receives from Investors that hold at least 10 per cent. of the Registrable Securities then outstanding, a written request or requests that the Company effect a registration on Form F-3 or Form S-3, as the case may be, and any related qualification or compliance with respect to all or a part of the Registrable Securities held by such Investors, as the case may be, the Company shall:
- (a) promptly give a written notice of the proposed registration, and any related qualification or compliance, to all other Investors; and
 - (b) if Investors holding at least 25 per cent of the Registrable Securities elect to participate in such registration, as soon as practicable, effect such registration and all such qualifications and compliances as may be so requested and as would permit or facilitate the sale and distribution of all or such portion of such Investors' Registrable Securities as are specified in such request, together with all or such portion of the Registrable Securities of any other Investors joining in such request as are specified in a written request given within 5 days after receipt of such written notice from the Company; *provided, however,* that the Company shall not be obligated to effect any such registration, qualification or compliance, pursuant to this Section 2(3):

- (i) if Form F-3 or Form S-3, as the case may be, is not available for such offering by the Investor(s);
 - (ii) if the Investor(s), together with the holders of any other securities of the Company entitled to inclusion in such registration, propose to sell Registrable Securities and such other securities (if any) at an aggregate offering price to the public (before any underwriters' discounts or commissions) of less than US\$5,000,000; or
 - (iii) if the Company furnishes to the Investor(s) a certificate signed by the two or more members of the management board of the Company stating that, in the good faith judgment of the management board, it would be materially detrimental to the Company and its shareholders for such registration on Form F-3 or Form S-3 (as the case may be) to be effected at such times for such registration statement to either be filed, become effective or remain effective because such action would involve Company prematurely disclosing information which the Company has a bona fide business purpose for preserving as confidential, the Company shall have the right to defer the filing of the registration statement on Form F-3 or Form S-3 (as the case may be) until the earlier of (x) the date that is sixty (60) days after receipt of the request of the Investors under this Section 2(3), (y) the filing of a Form 6-K or publication of a press release including material information that the Company has a bona fide business purpose for preserving as confidential and not disclosing prematurely and (z) the cessation of consideration of a transaction that would materially interfere with a significant acquisition, corporate reorganization or other similar transaction involving the Company which was the reason for the Company exercising this right; *provided, however*, that the Company shall not utilize this right more than once in any twelve month period.
- (c) Subject to the foregoing, the Company shall file a registration statement covering the Registrable Securities and other securities so requested to be registered as soon as practicable after receipt of the request or requests of the Investors. Registrations effected pursuant to this Section 2(3) shall not be counted as demands for registration or registrations effected pursuant to Sections 2(1) or 2(2) hereto.
- (4) Obligations of the Company. Whenever required under this Section 2 to effect the registration of any Registrable Securities, the Company shall, as expeditiously as reasonably possible:
- (a) prepare and file with the SEC (or such other governmental authorities, as the case may be) a registration statement with respect to such Registrable Securities and use its best efforts to cause such registration statement to become effective, and, upon the request of the Investors that hold of a majority of the Registrable Securities registered thereunder, keep such registration statement effective for up to 150 days;
 - (b) prepare and file with the SEC (or such other governmental authorities, as the case may be) such amendments and supplements to such registration statement and the prospectus used in connection with such registration statement as may be necessary to comply with the provisions of the Securities Act (or such other applicable securities laws, as the case may be) with respect to the disposition of all securities covered by such registration statement for up to 150 days;

- (c) furnish to the Investors such number of copies of a prospectus, including a preliminary prospectus, in conformity with the requirements of the Securities Act (or such other applicable securities laws, as the case may be), and such other documents as they may reasonably request in order to facilitate the disposition of the Registrable Securities held by them;
- (d) use its reasonable efforts to register and qualify the securities covered by such registration statement under such other securities or blue sky laws of such jurisdictions as may be reasonably requested by the Investors;
- (e) in the event of any underwritten public offering, enter into and perform its obligations under an underwriting agreement, in usual and customary form, with the managing underwriter of such offering including participation by the Company's management in a customary management and documentary due diligence process and the procurement by the Company of customary comfort letters, legal opinions and negative assurance letters from the Company's auditor and counsel; and each Investor participating in such underwriting shall also enter into and perform its obligations under such agreement;
- (f) notify each Investor covered by such registration statement at any time when a prospectus relating thereto is required to be delivered under the Securities Act (or such other applicable securities laws, as the case may be) of the occurrence of any event as a result of which the prospectus included in such registration statement, as then in effect, includes an untrue statement of a material fact or omits to state a material fact required to be stated therein or necessary to make the statements therein, in light of the circumstances then existing, not misleading; such obligation shall continue until the earlier of (i) the sale of all Registrable Securities registered pursuant to the registration statement of which such prospectus forms a part, or (ii) withdrawal of such registration statement;
- (g) use its commercially reasonable efforts to cause all such Registrable Securities registered pursuant to this Agreement to be listed on each securities exchange on which similar securities issued by the Company are then listed; and
- (h) provide a transfer agent and registrar for all Registrable Securities registered pursuant hereunder and a CUSIP number for all such Registrable Securities, in each case no later than the effective date of such registration.

- (5) Furnish Information. It shall be a condition precedent to the obligations of the Company to take any action pursuant to this Section 2 with respect to the Registrable Securities of any selling Investor that such Investor shall upon request of the Company (i) if reasonably necessary to comply with legal obligations or the provision of confidential information by the Company enter into a customary confidentiality agreement with the Company and (ii) furnish to the Company such information regarding itself, the Registrable Securities held by it, and the intended method of disposition of such securities as shall be required to effect the registration of such Investor's Registrable Securities. The Company shall have no obligation with respect to any registration requested pursuant to Sections 2(1) and 2(3) hereto if, as a result of the application of the preceding sentence, the number of shares or the anticipated aggregate offering price of the Registrable Securities to be included in the registration fails to reach or exceed the number of shares or the anticipated aggregate offering price originally required to trigger the Company's obligation to initiate such registration as specified in Sections 2(1)(a) or 2(3)(b)(ii) hereto, whichever is applicable.
- (6) Expenses of Registration.
- (a) *Expenses of Demand Registration.* All expenses (other than underwriting discounts and commissions and such underwriting expenses to be borne by the underwriters and stock transfer taxes or similar duties) incurred in connection with registrations, filings or qualifications pursuant to Section 2(1) hereto for each Investor (which right may be assigned as provided in Section 2(9) hereto), including all registration, filing and qualification fees, printers' and accounting fees, fees and disbursements of counsel for the Company and the reasonable fees and disbursements of counsel for the selling Investors shall be borne by the Company.
- (b) *Expenses of Company Registration.* All expenses (other than underwriting discounts and commissions and such underwriting expenses to be borne by the underwriters) incurred in connection with registrations, filings or qualifications of Registrable Securities pursuant to Section 2(2) for each Investor (which right may be assigned as provided in Section 2(9) hereto), including all registration, filing, and qualification fees, printers' and accounting fees, fees and disbursements of counsel for the Company and the reasonable fees and disbursements of counsel for the selling Investors shall be borne by the Company.
- (c) *Expenses of Registration on Form F-3 or Form S-3.* All expenses (other than underwriting discounts and commissions and such underwriting expenses to be borne by the underwriters) incurred in connection with registrations requested pursuant to Section 2(3) for each Investor (which right may be assigned as provided in Section 2(9) hereto), including all registration, filing, qualification, printers' and legal and accounting fees, fees and disbursements of counsel for the Company and the reasonable fees and disbursements of counsel for the selling Investors shall be borne by the Company.

(7) Underwriting Requirements. If a registration statement for which the Company gives a notice pursuant to Section 2(2) is for an underwritten offering, then the Company shall so advise the Investors as part of such written notice. In such event, the right of any Investor to include its Registrable Securities in a registration pursuant to Section 2(2) shall be conditioned upon such Investor's participation in such underwriting and the inclusion of such Investor's Registrable Securities in the underwriting to the extent provided herein. All Investors proposing to distribute their Registrable Securities through such underwriting shall (together with the Company and the other holders of securities of the Company whose securities are to be included in such registration and underwriting) enter into an underwriting agreement in customary form with the managing underwriter or underwriters selected for such underwriting. Notwithstanding any other provision of this Agreement, if the managing underwriter(s) determine(s) in good faith that marketing factors require a limitation on the number of shares to be underwritten, then the managing underwriter(s) may exclude shares (including Registrable Securities) from the registration and the underwriting, and the number of shares that may be included in the registration and the underwriting shall be allocated (i) first, to the Company, (ii) second, to each of the Investors requesting inclusion of their Registrable Securities in such registration statement on a pro rata basis based upon the total number of Registrable Securities then held by each such Investor; *provided, however*, that no exclusion of such Investors' Registrable Securities shall be made unless all other shareholders' securities are first excluded; and *provided, further*, that in any underwriting that is not in connection with the Company's IPO, the amount of Registrable Securities included in the offering shall not be reduced below 20 per cent. of the Registrable Securities requested to be included in such offering, and (iii) third, to the other shareholders. If any Investors disapproves of the terms of any such underwriting, such Investor may elect to withdraw therefrom by written notice to the Company and the underwriter(s) at least 30 days prior to the effective date of the registration statement. Any Registrable Securities excluded or withdrawn from such underwriting shall be excluded and withdrawn from the registration. For any Investor that is a venture capital fund, partnership or corporation, the affiliated venture capital funds, partners, retired partners and stockholders of such Investor, or the estates and family members of any such partners, stockholders and retired partners and any trusts for the benefit of any of the foregoing persons shall be deemed to be a single "Investor," and any pro rata reduction with respect to such "Investor" shall be based upon the aggregate amount of shares carrying registration rights owned by all entities and individuals included in such "Investor," as defined in this sentence.

(8) Indemnification. In the event any Registrable Securities are included in a registration statement under this Section 2:

- (a) To the extent permitted by applicable laws, the Company will indemnify and hold harmless each Investor, any "underwriter" (as defined in the Securities Act) for such Investor and each person, if any, who controls such Investor or underwriter within the meaning of the Exchange Act, against any losses, claims, damages, or liabilities (joint or several) to which they may become subject under the Securities Act, the Exchange Act or other federal or state law, insofar as such losses, claims, damages, or liabilities (or actions, proceedings or settlements in respect thereof) arise out of or are based upon any of the following statements, omissions or violations (each, a "**Violation**"): (i) any untrue statement or alleged untrue statement of a material fact contained in such registration statement, including any preliminary prospectus or final prospectus contained in such registration statement or any amendments or supplements thereto, (ii) the omission or alleged omission to state therein a material fact required to be stated therein, or necessary to make the statements therein not misleading, or (iii) any violation or alleged violation by the Company of the Securities Act, the Exchange Act, any state securities law or any rule or regulation promulgated under the Securities Act, the Exchange Act or any state securities law; and the Company will pay to each such Investor, underwriter or Controlling person, as incurred, any legal or other expenses reasonably incurred by them in connection with investigating, defending or settling any such loss, claim, damage, liability, or action; *provided, however*, that the indemnity agreement contained in this Section 2(8)(a) shall not apply to amounts paid in settlement of any such loss, claim, damage, liability, or action if such settlement is effected without the consent of the Company (which consent shall not be unreasonably withheld), nor shall the Company be liable to any Investor, underwriter or controlling person for any such loss, claim, damage, liability, or action to the extent that it arises out of or results from a Violation which occurs solely as a result of any written information furnished expressly for use in connection with such registration by such Investor, underwriter or controlling person.

- (b) To the extent permitted by applicable laws, each selling Investor will indemnify and hold harmless the Company, each of its directors, each of its officers who has signed the registration statement, each person, if any, who controls the Company within the meaning of the Securities Act, any underwriter, any other Investor selling securities in such registration statement and any controlling person of any such underwriter or other Investor, against any losses, claims, damages, or liabilities (joint or several) to which any of the foregoing persons may become subject, under the Securities Act, the Exchange Act or other federal or state law, insofar as such losses, claims, damages, or liabilities (or actions in respect thereto) arise out of or results from any Violation by such Investor, in each case to the extent (and only to the extent) that such Violation occurs solely as a result of any written information furnished by such Investor expressly for use in connection with such registration; and each such Investor will pay, as incurred, any legal or other expenses reasonably incurred by any person intended to be indemnified pursuant to this Section 2(8)(b), in connection with investigating, defending or settling any such loss, claim, damage, liability, or action; *provided, however*, that the indemnity agreement contained in this Section 2(8)(b) shall not apply to amounts paid in settlement of any such loss, claim, damage, liability or action if such settlement is effected without the consent of the Investor (which consent shall not be unreasonably withheld); *provided, further*, that in no event shall any indemnity under this Section 2(8)(b) exceed the net proceeds from the offering actually received by such Investor.
- (c) Promptly after receipt by an indemnified party under this Section 2(8) of a notice of the commencement of any action (including any governmental action), such indemnified party shall, if a claim in respect thereof is to be made against any indemnifying party under this Section 2(8), deliver to the indemnifying party a written notice of the commencement thereof and the indemnifying party shall have the right to participate in, and, to the extent the indemnifying party so desires, jointly with any other indemnifying party similarly noticed, to assume the defense thereof with counsel mutually satisfactory to the parties; *provided, however*, that an indemnified party (together with all other indemnified parties which may be represented without conflict by one counsel) shall have the right to retain one (1) separate counsel, with the reasonable fees and expenses to be paid by the indemnifying party, if representation of such indemnified party by the counsel retained by the indemnifying party would be inappropriate due to actual or potential differing interests between such indemnified party and any other party represented by such counsel in such proceeding. The failure to deliver a written notice to the indemnifying party within a reasonable time after the commencement of any such action, if actually and materially prejudicial to its ability to defend such action, shall relieve such indemnifying party from any liability to the indemnified party under this Section 2(8), but the omission to deliver a written notice to the indemnifying party will not relieve the indemnifying party from any liability that it may have to any indemnified party otherwise than under this Section 2(8). No indemnifying party, in the defense of any such claim or litigation, shall, except with the consent of each indemnified party, consent to entry of any judgment or enter into any settlement that does not include as an unconditional term thereof the giving by the claimant or plaintiff to such indemnified party of a release from all liability in respect of such claim or litigation.

- (d) If the indemnification provided for in this Section 2(8) is held by a court of competent jurisdiction to be unavailable to an indemnified party with respect to any loss, liability, claim, damage or expense referred to therein, then the indemnifying party, in lieu of indemnifying such indemnified party hereunder, shall contribute to the amount paid or payable by such indemnified party as a result of such loss, liability, claim, damage, or expense in such proportion as is appropriate to reflect the relative fault of the indemnifying party on the one hand and of the indemnified party on the other in connection with the statements or omissions that resulted in such loss, liability, claim, damage or expense as well as any other relevant equitable considerations; *provided, however*, that in no event shall any contribution by an Investor under this Section 2(8)(d) exceed the net proceeds from the offering actually received by such Investor. The relative fault of the indemnifying party and of the indemnified party shall be determined by reference to, among other things, whether the untrue or alleged untrue statement of a material fact or the omission to state a material fact relates to information supplied by the indemnifying party or by the indemnified party and the parties' relative intent, knowledge, access to information, and opportunity to correct or prevent such statement or omission.
- (e) The obligations of the Company and Investors under this Section 2(8) shall survive the completion of any offering of Registrable Securities in a registration statement under this Section 2.
- (9) Assignment of Registration Rights. The rights to cause the Company to register Registrable Securities pursuant to this Section 2 may be assigned (but only with all related obligations) by an Investor with the consent of the Company (not to be unreasonably withheld). For the purposes of determining the amount of Registrable Securities held by a transferee or assignee, the holdings of transferees and assignees of a business entity who are Affiliates, retired Affiliates of such entity (including spouses and ancestors, lineal descendants and siblings of such Affiliates or Affiliates who acquire Registrable Securities by gift, will or intestate succession) shall be aggregated together and with the business entity; *provided that* all assignees and transferees who would not qualify individually for assignment of registration rights shall have a single attorney-in-fact for the purpose of exercising any rights, receiving notices or taking any action under this Section 2. "**Affiliate**" means an affiliate within the meaning of § 15 of the German Stock Corporation Act (*Aktiengesetz*).

- (10) Reports under the Exchange Act. With a view to making available to the Investors the benefits of Rule 144 and any other rule or regulation of the SEC that may at any time permit an Investor to sell securities of the Company to the public pursuant to a registration on Form F-3 or Form S-3, as the case may be, or without registration, the Company agrees to:
- (a) make and keep public information available, as those terms are understood and defined in Rule 144, at all times after the effective date of the first registration statement filed by the Company for the offering of its securities to the general public so long as the Company remains subject to the periodic reporting requirements under Sections 13 or 15(d) of the Exchange Act;
 - (b) file with the SEC (or such governing authorities, as applicable) in a timely manner all reports and other documents required of the Company under the Securities Act and the Exchange Act, or other applicable securities regulations; and
 - (c) furnish to any Investor, so long as accurate and so long as the Investor owns any Registrable Securities, forthwith upon request (i) a written statement by the Company that it has complied with the reporting requirements of Rule 144 (at any time after ninety days after the effective date of the first registration statement filed by the Company), the Securities Act and the Exchange Act (at any time after it has become subject to such reporting requirements), or that it qualifies as a registrant whose securities may be resold pursuant to Form F-3 or Form S-3 (or any successor form that provides for short-form registration) (at any time after it so qualifies), as the case may be, (ii) a copy of the most recent annual or quarterly report of the Company and such other reports and documents so filed by the Company, and (iii) such other information as may be reasonably requested in availing any Investor of any rule or regulation of the SEC which permits the selling of any such securities without registration or pursuant to such form.
- (11) Termination of Registration Rights. No Investor shall be entitled to exercise any right provided for in this Section 2 after the earlier of (i) three (3) years following the consummation of an IPO by the Company, and (ii) such time as Rule 144 is available for the sale of all (and not less than all) of such Investor's Settlement Shares (with all transfer restrictions and restrictive legends removed upon such sale) to the public during a ninety day period without registration.
3. MISCELLANEOUS.
- (1) Assignment. No Third-Party Beneficiaries. This Agreement and the provisions hereof shall be binding upon and shall inure to the benefit of each of the parties hereto and their respective successors and permitted assigns. This Agreement is not intended to confer any rights or benefits on any persons that are not party hereto, other than as expressly set forth in Section 2.

- (2) Amendments and Modifications. Upon the written agreement of the Company, the Guarantor and the Investors holding at least a majority in interest of the Registrable Securities at the time in question, compliance with any of the provisions, covenants and conditions set forth in this Agreement may be waived, or any of such provisions, covenants or conditions may be amended or modified; *provided, however*, that any amendment hereto or waiver hereof that adversely affects one Investor, solely in his, her or its capacity as a holder of Notes or Registrable Securities, in a manner that is materially different from the other Investors (solely in their capacities as holders of Notes or Registrable Securities) shall require the consent of the Investor so affected. No course of dealing between any Investor, the Company or the Guarantor and any other party hereto or any failure or delay on the part of an Investor, the Company or the Guarantor in exercising any rights or remedies under this Agreement shall operate as a waiver of any rights or remedies of such Investor, the Company or the Guarantor. No single or partial exercise of any rights or remedies under this Agreement by a party shall operate as a waiver or preclude the exercise of any other rights or remedies hereunder or thereunder by such party.
- (3) Priority. Upon signing of this Agreement, the terms of this Agreement shall replace the provisions of the Subscription Agreement insofar as this Agreement provides differently, however, any other rights and claims under the Subscription Agreement remain unaffected.
- (4) Notices. All notices, demands, requests, consents, approvals or other communications (collectively, “**Notices**”) required or permitted to be given hereunder or which are given with respect to this Agreement shall be in writing and shall be personally served, delivered by reputable air courier service with charges prepaid, or transmitted by facsimile or email, addressed as set forth below, or to such other address as such party shall have specified most recently by written notice. Notice shall be deemed given (i) on the date of service or transmission if personally served or transmitted by telegram, telex or facsimile; *provided that* if such service or transmission is not on a Business Day or is after normal business hours, then such notice shall be deemed given on the next Business Day or (ii) one Business Day after being deposited with a reputable courier service with an order for next-day delivery, to the parties as follows:
- If to the Company or the Guarantor:
- Waldmeisterstrasse 76
Munich, 80935
Germany
Attn: ###
Email: ###
- If to an Investor:
- To the address set forth under such Investor’s signature to this Agreement.
- (5) Severability. This Agreement shall be deemed severable, and the invalidity or unenforceability of any term or provision hereof shall not affect the validity or enforceability of this Agreement or of any other term or provision hereof. Furthermore, in lieu of any such invalid or unenforceable term or provision, the parties hereto intend that there shall be added as a part of this Agreement a provision as similar in terms to such invalid or unenforceable provision as may be possible that is valid and enforceable.
- (6) Counterparts. This Agreement may be executed in multiple counterparts, each of which shall be deemed an original, and all of which taken together shall constitute one and the same instrument.

- (7) Entire Agreement. Subject to Section 3(3), this Agreement (including all agreements entered into pursuant hereto and all certificates and instruments delivered pursuant hereto and thereto) constitutes the entire agreement of the parties with respect to the subject matter hereof and supersedes all prior and contemporaneous agreements, representations, understandings, negotiations and discussions between the parties, whether oral or written.
- (8) Governing Law. This Agreement, and all claims or causes of action based upon, arising out of, or related to this Agreement or the transactions contemplated hereby, shall be governed by, and construed in accordance with, the laws of the State of Delaware, without giving effect to principles or rules of conflict of laws to the extent such principles or rules would require or permit the application of laws of another jurisdiction.

To the Company

Ladies and Gentlemen:

We have acted as legal counsel as to Dutch law to the Company in connection with the Offering. This opinion letter is rendered to you in order to be filed with the SEC as an exhibit to the Registration Statement.

Capitalised terms used in this opinion letter have the meanings set forth in Exhibit A to this opinion letter. The section headings used in this opinion letter are for convenience of reference only and are not to affect its construction or to be taken into consideration in its interpretation.

This opinion letter is strictly limited to the matters stated in it and may not be read as extending by implication to any matters not specifically referred to in it. Nothing in this opinion letter should be taken as expressing an opinion in respect of any representations or warranties, or other information, contained in the Reviewed Documents.

In rendering the opinions expressed in this opinion letter, we have reviewed and relied upon drafts of the Reviewed Documents and pdf copies or drafts, as the case may be, of the Corporate Documents and we have assumed that the Reviewed Documents shall be entered into for bona fide commercial reasons. We have not investigated or verified any factual matter disclosed to us in the course of our review.

This opinion letter sets out our opinion on certain matters of the laws with general applicability of the Netherlands, and, insofar as they are directly applicable in the Netherlands, of the European Union, as at today's date and as presently interpreted under published authoritative case law of the Dutch courts, the General Court and the Court of Justice of the European Union. We do not express any opinion on Dutch or European competition law, data protection law, tax law, securitization law or regulatory law. No undertaking is assumed on our part to revise, update or amend this opinion letter in connection with or to notify or inform you of, any developments and/or changes of Dutch law subsequent to today's date. We do not purport to opine on the consequences of amendments to the Reviewed Documents or the Corporate Documents subsequent to the date of this opinion letter.

The opinions expressed in this opinion letter are to be construed and interpreted in accordance with Dutch law. The competent courts at Amsterdam, the Netherlands, have exclusive jurisdiction to settle any issues of interpretation or liability arising out of or in connection with this opinion letter. Any legal relationship arising out of or in connection with this opinion letter (whether contractual or non-contractual), including the above submission to jurisdiction, is governed by Dutch law and shall be subject to the general terms and conditions of NautaDutilh. Any liability arising out of or in connection with this opinion letter shall be limited to the amount which is paid out under NautaDutilh's insurance policy in the matter concerned. No person other than NautaDutilh may be held liable in connection with this opinion letter.

This communication is confidential and may be subject to professional privilege. All legal relationships are subject to NautaDutilh N.V.'s general terms and conditions (see <https://www.nautadutilh.com/terms>), which apply mutatis mutandis to our relationship with third parties relying on statements of NautaDutilh N.V., include a limitation of liability clause, have been filed with the Rotterdam District Court and will be provided free of charge upon request. NautaDutilh N.V.; corporate seat Rotterdam; trade register no. 24338323.

In this opinion letter, legal concepts are expressed in English terms. The Dutch legal concepts concerned may not be identical in meaning to the concepts described by the English terms as they exist under the law of other jurisdictions. In the event of a conflict or inconsistency, the relevant expression shall be deemed to refer only to the Dutch legal concepts described by the English terms.

For the purposes of this opinion letter, we have assumed that:

- a. drafts of documents reviewed by us will be signed in the form of those drafts, each copy of a document conforms to the original, each original is authentic, and each signature is the genuine signature of the individual purported to have placed that signature;
 - b. if any signature under any document is an electronic signature (as opposed to a handwritten ("wet ink") signature) only, it is either a qualified electronic signature within the meaning of the eIDAS Regulation, or the method used for signing is otherwise sufficiently reliable;
 - c. the Registration Statement has been declared effective by the SEC in the form reviewed by us;
 - d. (i) no internal regulations (*reglementen*) have been adopted by any corporate body of the Company which would affect the validity of the resolutions recorded in the Resolutions and (ii) the Current Articles are the Articles of Association currently in force and the Revised Articles are the Articles of Association as they will be in force at each Relevant Moment;
 - e. the resolutions recorded in the Resolutions are adopted and in full force and effect, any power of attorney granted for purposes of adopting any Resolutions was in full force and effect at the time of adoption of such Resolutions and authorized the attorney(s)-in-fact under such power of attorney to exercise voting rights with respect to such Resolutions, the factual statements made and the confirmations given in the Resolutions and each Deed of Issue are complete and correct at each Relevant Moment and the Resolutions correctly reflect the resolutions recorded therein;
-

- f. each Deed of Issue has been validly signed and executed on behalf of the Company;
- g. the Offering, to the extent made in the Netherlands, has been, is and will be made in conformity with the Prospectus Regulation and the rules promulgated thereunder;
- h. the Option (i) has been validly granted as a right to subscribe for Ordinary Shares (*recht tot het nemen van aandelen*), (ii) shall be in full force and effect upon being exercised and (iii) shall have been validly exercised in accordance with the terms of the Underwriting Agreement; and
- i. at each Relevant Moment, each of the assumptions made in this opinion letter will be correct in all aspects by reference to the facts and circumstances then existing.

Based upon and subject to the foregoing and subject to the qualifications set forth in this opinion letter and to any matters, documents or events not disclosed to us, we express the following opinions:

Corporate Status

- 1. The Company has been duly incorporated as a *besloten vennootschap met beperkte aansprakelijkheid* and exists validly as a *naamloze vennootschap*.

Offer Shares and Option Shares

- 2. Subject to receipt by the Company of payment in full for the Offer Shares and the Option Shares as provided for in the Reviewed Documents, and when issued and accepted in accordance with the Resolutions and the Reviewed Documents, the Offer Shares and the Option Shares shall be validly issued, fully paid and non-assessable.

The opinions expressed above are subject to the following qualifications:

- A. Opinion 1 must not be read to imply that the Company cannot be dissolved (*ontbonden*). A company such as the Company may be dissolved, inter alia by the competent court at the request of the company's board of directors, any interested party (*belanghebbende*) or the public prosecution office in certain circumstances, such as when there are certain defects in the incorporation of the company. Any such dissolution will not have retro-active effect.
-

- B. Pursuant to Section 2:7 DCC, any transaction entered into by a legal entity may be nullified by the legal entity itself or its liquidator in bankruptcy proceedings (*curator*) if the objects of that entity were transgressed by the transaction and the other party to the transaction knew or should have known this without independent investigation (*wist of zonder eigen onderzoek moest weten*). The Dutch Supreme Court (*Hoge Raad der Nederlanden*) has ruled that in determining whether the objects of a legal entity are transgressed, not only the description of the objects in that legal entity's articles of association (*statuten*) is decisive, but all (relevant) circumstances must be taken into account, in particular whether the interests of the legal entity were served by the transaction. Based on the objects clause contained in the Current Articles and in the Revised Articles, we have no reason to believe that, by entering into the Reviewed Documents, the Company would transgress the description of the objects contained in its Articles of Association. However, we cannot assess whether there are other relevant circumstances that must be taken into account, in particular whether the interests of the Company are served by entering into the Reviewed Documents since this is a matter of fact.
- C. Pursuant to Section 2:98c DCC, a *naamloze vennootschap* may grant loans (*leningen verstrekken*) only in accordance with the restrictions set out in Section 2:98c DCC, and may not provide security (*zekerheid stellen*), give a price guarantee (*koersgarantie geven*) or otherwise bind itself, whether jointly and severally or otherwise with or for third parties (*zich op andere wijze sterk maken of zich hoofdelijk of anderszins naast of voor anderen verbinden*) with a view to (*met het oog op*) the subscription or acquisition by third parties of shares in its share capital or depository receipts. This prohibition also applies to its subsidiaries (*dochtervennootschappen*). It is generally assumed that a transaction entered into in violation of Section 2:98c DCC is null and void (*nietig*). Based on the content of the Reviewed Documents, we have no reason to believe that the Company or its subsidiaries will violate Section 2:98c DCC in connection with the issue of the Offer Shares or the Option Shares. However, we cannot confirm this definitively, since the determination of whether a company (or a subsidiary) has provided security, has given a price guarantee or has otherwise bound itself, with a view to the subscription or acquisition by third parties of shares in its share capital or depository receipts, as described above, is a matter of fact.
- D. The opinions expressed in this opinion letter may be limited or affected by:
- a. rules relating to Insolvency Proceedings or similar proceedings under a foreign law and other rules affecting creditors' rights generally;
-

- b. the provisions of fraudulent preference and fraudulent conveyance (*Actio Pauliana*) and similar rights available in other jurisdictions to insolvency practitioners and insolvency office holders in bankruptcy proceedings or creditors;
 - c. claims based on tort (*onrechtmatige daad*);
 - d. sanctions and measures, including but not limited to those concerning export control, pursuant to European Union regulations, under the Sanctions Act 1977 (*Sanctiewet 1977*) or other legislation;
 - e. the Anti-Boycott Regulation, Anti Money Laundering Laws and related legislation;
 - f. any intervention, recovery or resolution measure by any regulatory or other authority or governmental body in relation to financial enterprises or their affiliated entities; and
 - g. the rules of force majeure (*niet toerekenbare tekortkoming*), reasonableness and fairness (*redelijkheid en billijkheid*), suspension (*opschorting*), dissolution (*ontbinding*), unforeseen circumstances (*onvoorziene omstandigheden*) and vitiated consent (i.e., duress (*bedreiging*), fraud (*bedrog*), abuse of circumstances (*misbruik van omstandigheden*) and error (*dwaling*)) or a difference of intention (*wil*) and declaration (*verklaring*).
- E. The term "non-assessable" has no equivalent in the Dutch language and for purposes of this opinion letter such term should be interpreted to mean that a holder of an Ordinary Share shall not by reason of merely being such a holder be subject to assessment or calls by the Company or its creditors for further payment on such Ordinary Share.
- F. This opinion letter does not purport to express any opinion or view on the operational rules and procedures of any clearing or settlement system or agency.

We consent to the filing of this opinion letter as an exhibit to the Registration Statement and also consent to the reference to NautaDutilh in the Registration Statement under the caption "Legal Matters". In giving this consent we do not admit or imply that we are a person whose consent is required under Section 7 of the United States Securities Act of 1933, as amended, or any rules and regulations promulgated thereunder.

Sincerely yours,

/s/ NautaDutilh N.V.
NautaDutilh N.V.

EXHIBIT A

LIST OF DEFINITIONS

"Management Board"	The Company's management board (<i>bestuur</i>).
"NautaDutilh"	NautaDutilh N.V.
"the Netherlands"	The European territory of the Kingdom of the Netherlands.
"Offer Shares"	10,000,000 Ordinary Shares.
"Offering"	The offering of the Offer Shares and, if any, the Option Shares as contemplated by the Registration Statement.

"Option"	The option to acquire Option Shares to be granted to the Underwriters pursuant to the Underwriting Agreement and the Resolutions.
"Option Shares"	Up to 1,500,000 Ordinary Shares or such lesser number of Ordinary Shares in respect of which the Option is exercised.
"Ordinary Shares"	Ordinary shares in the Company's capital, with a nominal value of EUR 0.06 each.
"Prospectus Regulation"	Regulation (EU) 2017/1129 of the European Parliament and of the Council of 14 June 2017 on the prospectus to be published when securities are offered to the public or admitted to trading on a regulated market, and repealing Directive 2003/71/EC.
"Registration Statement"	The Company's registration statement on Form F-1 filed or to be filed with the SEC in connection with the Offering in the form reviewed by us.
"Relevant Moment"	Each time when Offer Shares or Option Shares are issued pursuant to the execution of a Deed of Issue.
"Resolutions"	Each of the following: <ul style="list-style-type: none">a. the written resolutions of the Management Board, dated September 17, 2021 and the draft written resolutions of the Management Board prepared by us with reference 82044245 M 30382418, once duly completed and signed;b. the draft written resolutions of the Supervisory Board, prepared by us with reference 82044245 M 30382427, once duly completed and signed;c. the minutes, convening notice, agenda and explanatory notes of the General Meeting, held on November 3, 2021; andd. the draft written resolution of the Pricing Committee, prepared by us with reference 82044245 M 33206542, once duly completed and signed.

"Reviewed Documents"	Each Deed of Issue and the Underwriting Agreement.
"Revised Articles"	The Articles of Association as they will read immediately after the execution of the Deed of Amendment.
"SEC"	The United States Securities and Exchange Commission.
"Supervisory Board"	The Company's supervisory board (<i>raad van commissarissen</i>).
"Underwriters"	The Underwriters, as defined in the Underwriting Agreement.
"Underwriting Agreement"	The draft underwriting agreement to be entered into between the Company and the Underwriters in connection with the Offering, in the form reviewed by NautaDutilh.

[Letterhead of Sullivan & Cromwell LLP]

November 8, 2021

Sono Group N.V.,
Waldmeisterstraße 76,
80935 Munich, Germany.

Ladies and Gentlemen:

We have acted as your tax counsel in connection with the registration statement on Form F-1 (the "Registration Statement") filed with the Securities and Exchange Commission (the "SEC") on the date hereof.

We hereby confirm to you that, insofar as it relates to matters of United States federal income tax law, the discussion under the caption "U.S. Federal Income Tax Considerations" in the prospectus included in the Registration Statement, subject to the qualifications, exceptions, assumptions and limitations contained herein and therein, is our opinion.

We hereby consent to the filing of this opinion with the SEC as Exhibit 8 to the Registration Statement. In giving this consent, we do not hereby admit that we are included in the category of persons whose consent is required under Section 7 of the Securities Act of 1933, as amended, or the rules and regulations of the SEC thereunder.

Very truly yours,
/s/ Sullivan & Cromwell LLP

Sullivan & Cromwell LLP

November 8, 2021

Sono Group N.V.,
Waldmeisterstraße 76,
80935 Munich, Germany.

Ladies and Gentlemen:

We have acted as your German tax advisor in connection with the registration statement on Form F-1 (the "Registration Statement") filed with the Securities and Exchange Commission (the "SEC") on the date hereof.

This opinion is limited to German tax law in effect on the date of this opinion. This opinion (including all terms used in it) is to be construed in accordance with German tax law.

For the purpose of this opinion, we have examined the Registration Statement which we determined to be the only document relevant to rendering this opinion, while relying upon the accuracy of the factual statements therein.

For the purpose of this opinion, we have made the following assumptions:

- The Registration Statement has been or will be filed with the SEC in the form referred to in this opinion.
- The effective place of management of the Issuer is located in Munich, Germany.
- The factual statements in the Registration Statement are true and correct in all respects.

We hereby confirm to you that, insofar as it relates to matters of German tax law, the discussion under the caption "Material German Tax Considerations" in the prospectus included in the Registration Statement, subject to the qualifications, exceptions, assumptions and limitations contained herein and therein, is our opinion.

We hereby consent to the filing of this opinion with the SEC as Exhibit 8 to the Registration Statement. In giving this consent, we do not hereby admit that we are included in the category of persons whose consent is required under Section 7 of the Securities Act of 1933, as amended, or the rules and regulations of the SEC thereunder.

Very truly yours,

CODE OF BUSINESS CONDUCT AND ETHICS**SONO GROUP N.V.****INTRODUCTION****Article 1**

- 1.1 This document sets out the Company's code of business conduct and ethics, consisting of the principal business, ethical, moral and legal standards which the Company Group and all Employees and Officers are expected to observe.
- 1.2 According to the Company's articles of association, the planet, humankind and society are important stakeholders of the Company and the highest principle pursued by the Company as part of its objects is the protection of the environment, nature and humankind. These core values are pursued throughout the Company Group.
- 1.3 This policy shall be posted on the Website.

DEFINITIONS AND INTERPRETATION**Article 2**

- 2.1 In this policy the following definitions shall apply:

Alleged Irregularity

An irregularity of a general, operational or financial nature which is detected, or is suspected on reasonable grounds, within the Company's organisation, including the imminent or actual:

- a. performance of criminal acts, such as fraud, bribery or corruption;
- b. violation of applicable laws and regulations;
- c. violation of ethical or professional standards, including the standards set out in this policy;
- d. endangerment of public health and human rights, safety or the environment;
- e. suppression, destruction, withholding or manipulation of information on the irregularity concerned.

Article

An article of this policy.

CEO

A chief executive officer of the Company.

Chairperson	The chairperson of the Supervisory Board.
Company	Sono Group N.V.
Company Group	The Company and its Subsidiaries collectively or, where the context so requires, any of them individually.
Compliance Officer	The Company's compliance officer.
Employee	An employee of the Company Group.
Government Official	Any individual who: <ul style="list-style-type: none"> a. recently held, holds or can reasonably be expected to soon hold a legislative, political or judicial position of any kind, in each case regardless of rank; or b. is an employee or officer of an organisation or entity which is controlled, directly or indirectly, by a government or any constituency of a government.
Management Board	The Company's management board.
Managing Director	A member of the Management Board.
Officer	A Managing Director, a Supervisory Director, a (managing) director or supervisory director of any Subsidiary, or any other officer of the Company Group who is not an Employee.
Subsidiary	A subsidiary of the Company within the meaning of Section 2:24a of the Dutch Civil Code.
Supervisory Board	The Company's supervisory board.
Supervisory Director	A member of the Supervisory Board.
Website	The Company's website.
Whistleblower	A person reporting an Alleged Irregularity as described in Article 17.

2.2 References to statutory provisions are to those provisions as they are in force from time to time.

2.3 Terms that are defined in the singular have a corresponding meaning in the plural.

2.4 Words denoting a gender include any other gender.

2.5 Except as otherwise required by law, the terms "written" and "in writing" include the use of electronic means of communication.

GENERAL PRINCIPLES**Article 3**

- 3.1 The Company Group is committed to conduct its business in accordance with the highest business, ethical, moral and legal standards, in good faith, with due care and in the best interests of the Company Group, its businesses and its stakeholders.
- 3.2 This policy is not intended to be exhaustive and cannot address every possible situation that may arise, but the Company Group and each Employee and Officer is expected to act at all times to uphold the letter and spirit of this policy, with honesty, integrity and fairness.
- 3.3 The Company Group shall comply with the laws and regulations of all applicable jurisdictions. Each Employee and Officer is expected to familiarise himself with these laws and regulations, to the extent relevant and appropriate in relation to the performance of his activities for the Company Group.
- 3.4 Compliance with this policy is not only the responsibility of the Company Group, but also of each Employee and Officer, and each of them is expected to actively support the values and principles set out herein.
- 3.5 It is the responsibility of all Employees and Officers to regularly review and refresh their knowledge and understanding of this policy. Employees and Officers may be asked to sign a written acknowledgement of their understanding of, and agreement to abide by, this policy.
- 3.6 Failure to observe this policy may not only result in legal difficulties for the Company Group, but could also give rise to legal and/or disciplinary action against the Employee or Officer concerned, including dismissal. Depending on the nature of the non-compliance, failure to observe this policy may be reported to the appropriate authorities.
- 3.7 If an Employee or Officer has any questions concerning the application or interpretation of this policy, he should seek the advice of his direct supervisor, who may consult with the Company's Compliance Officer when appropriate.

FAIR DEALING, DISCRIMINATION AND HARASSMENT**Article 4**

- 4.1 Employees and Officers are expected to deal fairly and respectfully with the Company Group's customers, suppliers, other business partners, competitors, and with each other.
 - 4.2 The Company Group is committed to the principles of non-discrimination, respect for human rights and individual freedoms. Harassment, which includes unwanted sexual advances, subtle or overt pressure for sexual favours, badgering, innuendos and offensive propositions, are not tolerated.
-

4.3 Employees and Officers:

- a. shall maintain a work environment where personal dignity of the individual is respected;
- b. shall not discriminate or harass on the basis of age, disability, family status, race, gender, culture, appearance, national origin, ethnic origin, social origin, religious belief, sexual preference or on the basis of any other personal characteristics;
- c. shall not engage in coercion or intimidation in the workplace; and
- d. shall not knowingly work with companies or organisations that use forced or child labour or violate general human rights and shall also be mindful of the social context in which it operates and not take advantage of social conditions, such as poverty, to achieve unfair competitive advantage.

WORKPLACE HEALTH AND SAFETY**Article 5**

- 5.1 The Company Group is committed to protect and promote the health, safety and security of its Employees and Officers.
- 5.2 Without prejudice to any requirements under applicable laws and regulations, Employees and Officers shall endeavour to participate in health and safety training activities to the extent relevant and appropriate in relation to the performance of their activities for the Company Group.
- 5.3 If an Employee or Officer becomes aware of a health or safety incident, or reasonably suspects a health and safety risk, he shall report this promptly to his direct supervisor, who shall consult with the appropriate level of management.
- 5.4 It is forbidden to illegally possess or consume drugs while working on Company Group premises or otherwise conducting Company Group business. Employees and Officers may not be impaired by drugs or alcohol at work.

ENVIRONMENT**Article 6**

- 6.1 It's one of the highest principles of the Company Group to protect the environment by preventing and minimising, to the extent somehow possible and practicable, the environmental impact of its activities and products through appropriate design, manufacturing, distribution and disposal practices. The Company Group is committed to avoid and mitigate negative environmental impact, every decision should consider the assessment of environmental impacts.
 - 6.2 The Company Group also expects all Employees and Officers to take individual responsibility in protecting the environment while performing their activities for the Company Group.
-

- 6.3** If an Employee or Officer becomes aware of, or reasonably suspects, any violation of environmental law, or the taking of any action that is aimed at concealing such a violation, he shall promptly report the matter to his direct supervisor, who shall consult with the appropriate level of management and/or, if required, the Company's legal department. If such direct supervisor is the culprit (or alleged culprit) of the violation or concealment concerned, the Employee or Officer may report the matter directly to the appropriate level of management.

COMPETITION AND ANTITRUST MATTERS

Article 7

- 7.1** Many jurisdictions have competition and antitrust laws and regulations which are designed to ensure that competition is fair and honest. Such laws and regulations typically prohibit agreements and actions among competitors that affect competitive conditions of trade and other practices that restrict fair and honest competition.
- 7.2** To support fair and honest competition, Employees and Officers:
- a.** shall not knowingly enter into an agreement or tacit understanding with competitors of the Company Group which would illegally restrict fair and honest competition;
 - b.** shall practice great reticence when discussing competitive issues relating to the Company Group's businesses (including the Company Group's strategies and the identity of its customers, suppliers and other business partners), except to the extent that such information is publicly available other than through improper disclosure;
 - c.** shall limit communications, when participating in joint ventures and industry associations involving competitors, to communications required for conducting business;
 - d.** shall not knowingly use market power or market information in a way that may restrict fair and honest competition; and
 - e.** shall not engage in unfair or deceptive acts or practices.

BRIBERY AND MONEY LAUNDERING

Article 8

- 8.1** Employees and Officers shall not participate in any form of illegal bribery or money laundering.
- 8.2** Employees and Officers are expected not to offer, promise, give or accept any item with economic value (including financial and non-financial advantages, promotional premiums and discounts, gifts, travel, meals, entertainment, favours or services) to or from any individual outside the Company Group, including in particular any Government Official or any family member of a Government Official, with the intention of illegally influencing such individual such that the Employee or Officer concerned may obtain or retain a personal opportunity or advantage or a business opportunity or advantage for the Company Group. Employees and Officers should also be aware of, and abide by, the provisions of the Company's anti-corruption policy.
-

RECORD KEEPING**Article 9**

- 9.1** Employees and Officers shall ensure that all books, records and data carriers of the Company Group are retained, presented and disposed of in accordance with applicable laws and regulations. Employees and Officers shall never falsify, alter, destroy or conceal any such books, records or data carriers in order to impair the integrity or availability thereof in an illegal manner.
- 9.2** Financial transactions carried out by the Company Group shall be recorded properly, accurately and fairly, in the correct accounts and within the relevant accounting period, all with due observance of applicable laws, regulations and accounting policies.

CONFIDENTIAL INFORMATION**Article 10**

- 10.1** Confidential information relating to the Company Group shall not be used for personal gain or for purposes other than performing activities for the Company Group as an Employee or Officer.
- 10.2** To protect confidential information relating to the Company Group, Employees and Officers:
- a.** shall not discuss confidential information in places where it is likely to be overheard by someone outside the Company Group;
 - b.** shall strictly limit conversations involving confidential information to business settings;
 - c.** shall not disclose or use confidential information for personal gain;
 - d.** shall not leave papers or other data carriers containing confidential information in public places or in places where such information might be read or discovered by someone outside the Company Group; and
 - e.** shall exert their best efforts to avoid inadvertent disclosure of confidential information.
- 10.3** Employees and Officers shall promptly inform the Company's legal department upon becoming aware that confidential information relating to the Company Group has been wrongly obtained by someone outside the Company Group, or if such information has been misplaced, mishandled or improperly disclosed.
-

- 10.4** For purposes of this Article 10, "confidential information" includes non-public information that, if improperly disclosed, could be useful to competitors of and/or harmful to the Company Group, its business partners, suppliers, clients or other stakeholders, or that is material to a reasonable investor's decision to buy or sell the Company's securities or securities of its business partners. For example, non-public information relating to the Company Group which includes or describes earnings, forecasts, business plans and strategies, significant restructurings, potential acquisitions, licensing agreement terms, formulas, pricing, patient data, client or sales information, research, new product development, undisclosed marketing and promotional activity, intellectual property development, significant management changes, auditor reports, and events regarding the Company's securities would generally all qualify as "confidential information".

COMPANY GROUP PROPERTY AND RESOURCES

Article 11

- 11.1** Employees and Officers shall take appropriate measures to ensure the efficient and legitimate use of property and resources of the Company Group.
- 11.2** Employees and Officers shall promptly report to their direct supervisor any misuse of Company Group property or resources.
- 11.3** Without proper authorisation from their direct supervisor, Employees and Officers shall not:
- a.** obtain, use or divert property or resources of the Company Group for personal gain; or
 - b.** materially alter, remove or destroy property or resources of the Company Group or use services provided by the Company Group, except in the ordinary course of performing activities for the Company Group.
- 11.4** Company Group property also includes intangible assets such as intellectual property. Company Group intellectual property may also include Employee and Officer work product. Employees and Officers should promptly disclose any invention related to the Company Group's business, so that it may receive the same protection as other intellectual property of the Company Group.

COMPUTER, E-MAIL AND INTERNET USAGE

Article 12

- 12.1** Computers, laptops, handheld devices, e-mail and internet access are provided by the Company Group primarily for business use. All Employees and Officers should use the same care, caution and etiquette in sending an e-mail (or when making use of other electronic means of communication) as they would in corresponding in paper form.
-

- 12.2 Employees and Officers shall not download any data at work that is unprofessional or inappropriate for use or viewing in a business context.
- 12.3 An Employee or Officer shall promptly report to his direct supervisor any situation in which data relating to the Company Group has been compromised or when such Employee or Officer suspects or becomes aware of any breach of data relating to the Company Group, including the loss or theft of a computer, laptop or handheld device.
- 12.4 Employees and Officers should always secure their computers and laptops provided by the Company Group and handle in accordance with the Company's IT policy. Employees and Officers are strongly discouraged to write down these passwords and should not, under any circumstance, give their password to others (including to other Employees or Officers). At work, screens of computers and laptops must be locked when an Employee or Officer leaves his desk.

CORPORATE OPPORTUNITIES

Article 13

- 13.1 Employees and Officers are expected to advance the Company Group's legitimate business interests.
- 13.2 An Employee or Officer shall not:
- a. enter into competition with the Company Group;
 - b. provide unjustified advantages to third parties to the detriment of the Company Group; or
 - c. take advantage of business opportunities available to the Company Group for himself or for his spouse, registered partner or other life companion, foster child or any relative by blood or marriage up to the second degree.

GOVERNMENT RELATIONS AND POLITICAL AFFAIRS

Article 14

- 14.1 When dealing with the government or Government Officials in performing activities for the Company Group, Employees and Officers shall conduct themselves according to the highest business, ethical, moral and legal standards. Employees and Officers should also be aware of, and abide by, the provisions of the Company's anti-corruption policy.
- 14.2 Without prejudice to Article 14.3, the Company Group shall practice great reticence when considering to make contributions to political parties or candidates at any level of government, regardless of local laws and regulations.
- 14.3 From time to time, issues of significant importance to the financial and business well-being of the Company Group may arise in a political context. The Company Group may participate in such political processes in order to advance its legitimate business interests, including through lobbying, publication of its views in the media and supporting interested organisations.
-

INTERNATIONAL BUSINESS PRACTICES**Article 15****15.1** The Company Group:

- a. shall not expand its business into a new foreign country without discussing it with the appropriate level of management and, if required, the Company's legal department;
- b. shall be particularly sensitive to dealings with countries that are involved in conflicts or subject to international sanctions;
- c. when involved in exports, shall observe all laws, regulations and international trade agreements that govern the shipment of the Company Group's products and services to the importing country and vice versa; and
- d. shall consult with the Company's legal department when appropriate for specific guidelines for conducting international business.

15.2 Employees and Officers shall apply the Company Group's business, ethical, moral and legal standards when conducting business in foreign countries, even if culture or common practice might indicate that contradicting or lesser standards of conduct are acceptable.

MEDIA AND OTHER COMMUNICATIONS**Article 16**

16.1 The Company Group will disclose information to the public only through specific channels. Unless an Employee or Officer has received proper authorisation to speak on behalf of the Company Group by the appropriate level of management, an Employee or Officer should decline to comment in response to any media requesting information about matters relating to the Company Group, regardless of whether the request is made off the record, for background, or confidentially.

16.2 Employees and Officers are expected to conduct themselves in a manner that reflects positively on the Company Group. When expressing personal views in any media, including television, radio, chat rooms, forums, social media platforms and other electronic media, it should be clear that such statements are personal and do not represent the Company Group's point of view.

16.3 The Company Group considers the following types of advertisements immoral:

- a.** False or Misleading Information – Any advertisement by the Company Group must not contain any sort of claim, which is false, deceptive, or ambiguous to public.
- b.** Inaccurate Testimonials – When a person gives his or her opinion or talks about his or her experiences regarding any product/service, he or she must not give fake information.
- c.** Provoking Statements – Any sort of statement, insulting phrase or immoral comparison must not be part of any advertisement by the Company Group. This includes derogatory phrase or disrespectful comments regarding a race, nationality, profession, cast, sex, social background, age, religion or culture.
- d.** Offensive Materials – All material used in an advertisement by the Company Group must be decent for the general public. No material may be used in any such advertisement which is offensive, obscene, or indecent.

WHISTLEBLOWERS POLICY

Article 17

17.1 Current and former Employees and Officers may report Alleged Irregularities to the Compliance Officer.

17.2 Alleged Irregularities concerning the functioning of:

- a.** the Compliance Officer may be reported to any Managing Director;
- b.** a Managing Director or a Supervisory Director who is not the Chairperson may be reported to the Chairperson; and
- c.** the Chairperson may be reported to a CEO.

17.3 Alleged Irregularities shall be reported in writing or in person. Anyone reporting an Alleged Irregularity should provide as much relevant and concrete information as possible in order for the Alleged Irregularity to be investigated properly. Each reported Alleged Irregularity shall be treated seriously.

17.4 Each Whistleblower has the right, and shall be given the opportunity by the Company Group, to consult with an independent confidential counsellor concerning the Alleged Irregularity reported by such Whistleblower. Such counsellor shall be designated by the Compliance Officer.

17.5 To the extent that the Dutch Act on the Whistleblowers' Institute (*Wet Huis voor Klokkeluiders*) is applicable in relation to the Company Group, a Whistleblower may also turn to the Whistleblowers' Institute (*Huis voor klokkeluiders*), subject to and in accordance with the provisions of such Act, in order to report an Alleged Irregularity.

- 17.6** The Company Group shall treat and safeguard as private and confidential the identity of each Whistleblower, as well as any Alleged Irregularity reported by such Whistleblower. Such information shall not be disclosed by the Company Group, unless:
- a. with the consent of the Whistleblower concerned;
 - b. this is required under applicable laws or regulations, Stock Exchange requirements and/or by any competent authority; or
 - c. it concerns a disclosure to the professional advisors of the Company Group or of the Whistleblower concerned, subject to a duty of confidentiality and only to the extent necessary for any lawful purpose.
- 17.7** The Company Group shall not take disciplinary action or other adverse employment action against a Whistleblower in retaliation for properly reporting Alleged Irregularities in good faith, or for providing truthful information in good faith in connection with any investigation, inquiry, hearing or legal proceedings involving Alleged Irregularities. However, a Whistleblower who knowingly reports Alleged Irregularities in a manner which is not truthful and in good faith, or does so in a reckless or frivolous manner, may be subject to legal and/or disciplinary action, including dismissal.

INSIDER TRADING

Article 18

The applicable restrictions and prohibitions on market abuse, including concerning the unlawful use and disclosure of inside information, tipping and market manipulation, are specific and complex. Employees and Officers should refer to the Company's insider trading policy, which contains detailed rules on the possession of, and conducting and effecting transactions in, the Company's shares and certain other financial instruments.

DISPENSATION

Article 19

- 19.1** At the request of an Employee or Officer, the Compliance Officer may grant a dispensation from certain provisions of this policy, but only in exceptional circumstances, after consultation with the appropriate level of management and the Company's legal department, and provided that no dispensation can be granted for matters which follow from mandatory provisions of applicable laws and regulations.
- 19.2** When considering a request for dispensation, the Compliance Officer shall practice great reticence if the matter concerned has the potential of damaging or violating the spirit of the Company Group's business, ethical, moral and legal standards as set out in this policy.
- 19.3** A request for dispensation shall be made in writing and shall be supported by reasons. Any dispensation granted by the Compliance Officer shall be granted in writing and shall be signed by the Compliance Officer and at least one Managing Director. Any dispensation granted, if required, shall be publicly disclosed by the Company in accordance with applicable law and stock exchange requirements.
- 19.4** If and when a dispensation is granted for a specific matter, this does not automatically entitle other Employees or Officers to receive dispensation for that same matter, or for similar matters. Any Employee or Officer who receives a dispensation, shall not automatically be entitled to any renewal, revision or extension of such dispensation.
-

AMENDMENTS AND DEVIATIONS**Article 20**

Pursuant to a resolution to that effect, the Management Board may, with the approval of the Supervisory Board, amend or supplement this policy and, without prejudice to Article 19, allow temporary deviations from this policy, subject to ongoing compliance with applicable law and stock exchange requirements.

GOVERNING LAW AND JURISDICTION**Article 21**

This policy shall be governed by and shall be construed in accordance with the laws of the Netherlands. Any dispute arising in connection with this policy shall be submitted to the exclusive jurisdiction of the competent court in Amsterdam, the Netherlands.
